

REGION 2 NOTIFIABLE CONDITIONS SURVEILLANCE REPORT

September 2023

Table 1 presents the year-to-date (YTD) tallies for the current and previous year of reported cases of notifiable conditions specified by WAC 246-100. Only conditions with one or more cases reported in Clallam, Jefferson or Kitsap counties during this time period are displayed.¹ The 5-year annual average number of cases is presented at the right of each set of columns and provides a baseline of expected cases for an entire year. **Table 2** includes YTD rates (number of cases reported YTD divided by the annual population estimate²) for a subset of high volume conditions.

For all conditions other than TB or STIs, counts include cases classified as confirmed, probable or suspect. Numbers are not finalized and are subject to change as investigations are completed and data are cleaned.
