WEEKLY RESPIRATORY SURVEILLANCE REPORT

2024, Week 29 | Week ending 7/20/2024

The respiratory surveillance report is published every four weeks during low transmission periods. The next report will be released 8/22/2024.

1 | COVID-19
Data are shown for past 24 months.

- Labs: 67 of 376 (17.8%) specimens positive in past reporting week
- ED Visits: 22 of 1485 (1.5%) visits attributable to COVID-19 in past reporting week
- Outbreaks in LTCFs: 3 COVID-19 outbreaks reported in past 28 days

2 | INFLUENZA
Data are shown for past 24 months.

- Labs: 2 of 127 (1.6%) specimens positive (1 Flu A, 1 Flu B) in past reporting week
- ED Visits: <10 of 1485 (<0.7%) visits attributable to Influenza in past reporting week
- Outbreaks in LTCFs: 0 Influenza outbreaks reported in past 28 days

3 | RESPIRATORY SYNCYTIAL VIRUS (RSV)
Data are shown for past 24 months.

- Labs: 0 of 35 (0.0%) specimens positive in past reporting week
- ED Visits: <10 of 1485 (<0.7%) visits attributable to RSV in past reporting week

NOTE: All data are preliminary and subject to change as more data become available.
§ In accordance with CDC reporting conventions, flu seasons are shown as weeks 40-39. Weeks where the number of COVID-/Influenza-/RSV-attributed ED visits is between 1 and 9 are suppressed and appear as missing data.
