Subject: Re: Proof of vaccine or negative test

Thank you, Dr. Johnson. This has been a topic of extensive discussion at our health board meetings, and the board has elected not to pursue that direction at this time. I appreciate your viewpoint and encourage you to promote this opinion to the health board and Kitsap public.

Dr. Morrow is there any way we can move to proof of vaccine or negative test for public dining in Kitsap County? At this point, there is no way to have safe indoor dining. This would be a way to make the indoor venue safer. I would like to eat out and to patronize local restaurants but will not do so now because it is not safe. - Michael Johnson, MD, Medical Director, Pacific Surgery Center, Senior partner, Olympic Anesthesia Services

Dear Commissioners,

We fully support vaccine mandates, as they are a key element to stopping the spread of Covid-19 and ending this pandemic. Apparently science and common sense no longer are factors in decision making. The way the Kitsap Sun has reported this, you apparently are frightened by a small vocal crazy anti-vax mob. This is not the way decisions on public health should be made. As long as we have a segment of our population refusing to be vaccinated, Covid will continue to spread and mutate into new variants, and we will never be able to get back to something resembling normal life.

We are very angry because we have done our part and want to get back to normal. We have been vaccinated, we wear masks in indoor public spaces, we have avoided large gatherings, and we will continue to support public officials who put medical science ahead of conspiracy theories or political ideology. We didn't see our grandchildren in person for over a year, and we still exercise caution around gatherings even if we know everyone is vaccinated. It's time for the unvaccinated to pay a price.

You must restrict their entry to movie theaters, restaurants, concerts, and sporting events. This is not a issue of freedom, this is a public health emergency. No one has the right to infect someone else with a deadly disease.

If someone is too selfish or stupid to get vaccinated, they should not be allowed to work for any taxpayer funded agency. We do not want one cent of our tax money used to pay the salary of any unvaccinated county, state, or federal employee, or pay for their insurance. Vaccines must be a condition of employment and anyone who will not comply must be fired, with no exemptions, period. We don't care how close you are to retirement or how good of an employee you were, get vaccinated or lose your job. No unemployment, no health insurance, no severance pay, you're gone.

Mandating vaccinations for private employers and businesses is another matter. We understand there are economic impacts with small businesses, but if an employee deals directly with the public, they must be vaccinated. Other employees can be on a case by case basis, but public facing employees need to be vaccinated or lose their job. We want the Health Department to publicize outbreaks, so we can decide which businesses to patronize or not. This would be an added incentive to get all employees vaccinated.

Vaccine mandates have been shown to work everywhere they have been implemented. Most reasonable people understand that vaccines protect them, their families, and their community. There are some people however, that will resist common sense until their dying breath. They are either too selfish, stupid, or politically brainwashed to protect themselves and others. Mandates will force those people to either get vaccinated or face whatever fate befalls them. If they don't make it, then it was their choice.

Comments: I want to thank the board of health members for at least considering a vaccine mandate. I think Charles Michel, who spoke positively at the meeting, is correct. The protestors are a very vocal determined minority, and they are holding the rest of us hostage. I feel bad that people like our health board members and school board members have to deal with all this unreasonable protest and even threats.

Thank you for the opportunity to comment.

I believe the wisest course of action would be to wait to see how the Federal vaccine mandate plays out.

Under option 3, on your outline for the meeting, I imagine retail stores, including grocery stores, would fall under private business/public indoor places. How would religious and medical exemptions be handled?

Thank you,
Rebecca Ledger

Subject: If you want more people to get vaccinated . . . and why mandates are a bad idea.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Keith Grellner,

I have done a lot of research, and I had no intention of ever getting the Covid vaccine. In August I changed my mind. It was an extremely hard decision for me. One of the reasons I changed my mind was that the Delta variant was very contagious and supposedly more aggressive and the mask mandate was lifted at the time. I reasoned that if the unvaccinated can transmit the virus and are not wearing masks, I should probably get the vaccine, especially because my husband teaches in the public schools and might pick it up there and bring it home to me without knowing it. Eight days after my first injection, the injection site on my arm swelled up the size of an egg for two days. It has now been a month since my 2nd shot. My arm still hurts a bit near the injection site. No one has answers as to what causes "Covid arm," and I am not comfortable with that. I have already decided to not ever get a booster shot, unless I can be convinced I need one. I am still not convinced I made the right decision to get vaccinated in the first place. My arm still strangely hurts where the vaccine was injected, and I am concerned about the vaccine causing health problems in the future because there are no long-term studies on the vaccine. I am a healthy, thin 46-year-old who exercises, gets plenty of sleep, and takes Vitamin D. Interestingly, I know of several unhealthy, older people, as well as younger people, say they do not want a booster. Many people do not believe the benefits of the vaccine outweigh the risks.

Therefore, if you (you as in the Kitsap board or any government body, really, want more people to choose to get vaccinated,

1) You have to tell the truth.

2) You have to prove the vaccines are safe, not just say they are.

-There are thousands of stories being shared in various places on the internet and also being reported on VAERS of severe adverse events and deaths from the Covid vaccines. (If you would like links to some of those stories, please ask me.) Many unvaccinated people have heard these or similar stories, sometimes first and second hand, and also know stories are being censored and kept quiet, so they believe there are a lot of adverse effects out there that we don't even know about.

-Many of the unvaccinated are therefore afraid of the vaccines, just like many of the vaccinated are afraid of Covid. That's one reason they are willing to leave their jobs if a vaccine mandate is imposed upon them.

-The paperwork that comes with the vaccines lists rare severe side effects associated with the vaccines. Some people don't want to take the chance of being that rare case.

3) You have to prove that the benefits of the vaccine outweigh any severe rare side effects or any possible future health problems that might result from taking this vaccine.

-Many unvaccinated people do not believe the benefits of the Covid vaccine outweigh the risks in children under 18 or even in 18-35-year-olds. Some unvaccinated people believe the risks of the vaccine are greater in any age group.

-Many unvaccinated people know Covid vaccines are not like other vaccines; mRNA vaccines are a new technology that have no long-term safety data, and many unvaccinated are very uncomfortable with that. One person I know is waiting for Novavax to become available.

4) You have to prove the vaccines are effective, not just say they are.

-The unvaccinated hear Biden say "the vaccinated have to be protected from the unvaccinated," so the unvaccinated conclude the vaccine does not protect people well enough. Therefore, they believe the benefits of the vaccine do not outweigh the risks.

-The vaccinated in WA state have to wear masks. This speaks volumes to the unvaccinated; the vaccine doesn't prevent transmission well enough, so why risk getting the shot?

-Many unvaccinated see vaccinated people end up in the hospital, as well, so they conclude "what is the point of the vaccine?"

-Many unvaccinated have seen the graphs showing that it is mostly the unvaccinated who are suffering from Covid in the hospitals. However, this does not always sway them because of my next point.

5) You have to prove that all people (not just the old and those with comorbidities) have a good chance of ending up in the hospital or dying if they get covid - because many of the unvaccinated are unafraid of Covid.

-In the meeting you held last week, a graph was shown at minute 4:00 that outlined that there is a much higher risk for Covid hospitalization for the unvaccinated. It was from 8/19/21-9/18/21. However, unless I am missing something, it looks like only .02% of the population ages 12-59 ended up in the hospital, at least for that month when there happened to be a big surge in cases. That is 1 in 5,000. Only .06% ages 60 and over were hospitalized with Covid that month. People see that as a small risk. Can you prove otherwise?

-Many unvaccinated assume that the people in the hospital and dying are old, overweight, or have comorbidities. Therefore, if they are young and healthy, they do not feel a need to risk a vaccine.

-The data shows that 71 of the 188 deaths in Kitsap County since March 2020 have been people in long term care facilities. That is 38%.

-The data shows the average age of people dying in Kitsap County has been 63 and above, and usually in the 70's. Can you show that young, healthy people are also dying?

-The CDC says, "Most people who catch COVID-19 have mild symptoms, but some people become severely ill." The unvaccinated are seeing many people get Covid and recover and believe they also would recover if they got Covid.

6) You have to prove that the vaccine significantly reduces the spread of the virus and will cause society to return to normal, including few cases and no more mask mandates.

-People see Cornell University and Harvard Business School, both vaccinated at 95%, still having a lot of Covid outbreaks and still having to wear masks or go online. 95% vaccinated and not close enough to normal.

-People were told by Biden, Inslee, and others that if they get the vaccine, they would not have to wear a mask anymore and that life would return to normal. Inslee said, "This is a ticket to freedom, that shot is a ticket to freedom from masks." That was short lived. This is another reason people don't trust the government. Also, with everyone wearing masks again, some unvaccinated feel safe enough to not get the vaccine.

7) You have to prove that natural immunization is not enough.

-Many unvaccinated have seen and heard evidence that natural immunity is far superior to vaccination. Even court cases have been won, allowing people to not have to get the vaccine under a mandate because they have natural immunity.

-Some people who have had Covid are afraid they will have a more severe reaction to the vaccine because people have seen that to be true in others. I saw that happen to my daughter. The night after she got the J&J vaccine was the worst night of her life. Terrifying and painful. She is afraid of getting a booster and does not want one but is very concerned her college and workplace will soon mandate it like they mandated the original first doses.

These are some reasons people don't want the vaccine or don't see the need for the vaccine. If you cannot counter many of these points with fact-based evidence, then a mandate is completely unjustified.

Many of the unvaccinated don't trust the CDC or the FDA. Instead, they believe the people who are giving up their careers to fight against the vaccine. They believe the stories of people seriously injured soon after getting the vaccine, even when doctors say it cannot be determined whether it was the fault of the vaccine. People believe the stories of their friends and family. People see through the manipulation of numbers and data in the United States. (I personally have a friend whose mother died in 2020. She did not have Covid or die from Covid. However, her death certificate said the cause of death was Covid! My friend worked to have that changed.) People see the narrative being controlled. They believe the nurse who doesn't want the vaccine because she has seen too many patients with injuries from the vaccine; they don't believe the pharmaceutical companies that make a lot of money and have no liability. They believe the doctors who are censored and not the FDA, which had a panel of scientists and physicians vote 16 to 2 against a booster (a third dose) for the general public because of a "lack of sufficient safety data in younger age groups as well as indications that the initial doses still seem to be providing robust protection against severe illness . . ." but approved it for not only people over the age of 65 or those who are at high risk of Covid, but also "individuals 18 through 64 years of age whose frequent institutional or occupational exposure to SARS-CoV-2 puts them at high risk of serious complications of COVID-19 including severe COVID-19." So now, a booster is allowed "in certain populations such as health care workers, teachers and day care staff, grocery workers and those in homeless shelters or prisons, among others," said Acting FDA Commissioner Janet Woodcick, M.D. This empowers mandates for booster shots for people of all ages working these jobs, when the FDA's panel of scientists and physicians said

there is not sufficient safety data regarding a booster for younger age groups. And then there is the story of the two FDA officials resigning. Many of the unvaccinated do not trust the FDA.

Some of the unvaccinated are waiting for the Novavax vaccine because it is a traditional vaccine. I would have liked that one. I am not happy I got an mRNA vaccine. It was very scary getting it (it reminded me of Russian Roulette - would I be one of the rare the unlucky ones?), and I am still trying not to worry about my future health. I chose not to get the J&J because my daughter had a horrific and severe reaction after taking it (fortunately only lasting through the night); please feel free to ask me if you would like details about what she went through.

People will trust you more if you give them freedom but trust you less and resist if you take it away. I am sure that your intent is to help and not to harm, but when people are forced to do things that go against their conscience, it feels very, very oppressive. For some people, vaccine mandates and masks bring the feeling of safety. For others, vaccine mandates and masks feel communistically oppressive, like living in China or Russia.

It is also not right that when there is a vaccine mandate and people get injured or die from the vaccine, that there is no compensation or help for those people or their families.

The vaccinated should not be so concerned about people not wanting the vaccine. The vaccinated are protected from hospitalization and death, right? Having more people vaccinated doesn't seem like it will change much except for the number of people in hospital beds, which would help the hospitals a lot. But it would also help the hospitals if there were not vaccine mandates forcing nurses out of their jobs.

Many of the unvaccinated see how hospitals are forcing nurses to get the vaccine or lose their job. The unvaccinated absolutely don't trust anyone who would do that to the very people who have been the heroes since the beginning of the pandemic, working extremely hard in the medical field in the presence of Covid.

Most available vaccines have not even been approved by the FDA yet. Pfizer's Comirnaty is the only one approved, and even it is not really available. The mandates have been happening for months, before anything was approved, and it just doesn't make sense to many people how a new, unapproved vaccine made with new technology could be forced on people, especially with no long-term safety data and no apparent return to normal life.

Every person choosing not to vaccinate or choosing not to get a booster has a reason. Some are not good reasons, but some have good, legitimate reasons. People need to weigh the benefits and risks for themselves. And they should absolutely not lose their employment or rights as a citizen to enter a business simply because they don't want to risk severe, possibly long-term, injury or death.

People are leaving and losing their jobs because of state and federal mandates. Please don't hurt more businesses and more people with more vaccine mandates. With every mandate, there is less freedom, more division, and more stress.

Also, why are the unvaccinated sometimes subject to weekly tests if they are healthy? If the vaccinated can spread Covid asymptotically as well, either everyone should be getting tested weekly or no one. It is obviously an attack on the unvaccinated. That is not right.

My family of four is vaccinated, two by choice and two by force. However, it was an extremely hard decision for each of us. For us, the risks of the vaccine seemed to outweigh the benefits. My daughters are 20 and 22, thin, and healthy. My husband and I are 46 and 49, healthy, on no medication, exercise several times a week, and are not anywhere near overweight. We are thankful none of us had long term adverse effects from the vaccine. We do not want a booster. We do not want our employers to mandate a booster. We do not want to take that risk. Maybe in the future, if the data changed, we might change our minds. But for now, the benefits of a booster certainly do not outweigh the risks. Even the FDA panel of scientists and physicians agree. People need to be able to choose what is best for their own health. Vaccinated communities or unvaccinated, the virus still spreads.

Thank you so much for your time in reading this and for your consideration.

Sincerely,
Michelle Peretti

Subject: Covid Critical Concerns - Require Vaccinations!

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

To the Board and all involved:

We strongly encourage you to require a COVID vaccination mandate for government, business, healthcare and more. To suggest it is not needed risks the lives of so many. Many other vaccines are mandated for many areas of life over past decades. It's critical to do this now for COVID.

Unvaccinated are crowding healthcare systems, and people in urgent need of other medical treatments are not contacting their doctors.

This serious illness will be with us for many more months (and probably years) posing risks to all ages, to the high proportion of older residents, children, and all who work in our health systems.

Please reconsider. It's selfish for people not to use a safe vaccine and infect others.

Respectfully,
Lauren Storck
Kitsap resident

Subject: Meeting, Tuesday October 5, 2021

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

After reading the other comments posted online, I imagine most of the oral comments on Tuesday will be from vocal residents who will forcefully reject Covid vaccines and mandates. Many of the written comments are not logical, some are misinformed and most are very selfish. Whatever we personally think of the vaccines, like the wearing of masks, they are designed to not only protect the person who gets one, but all those with whom he or she comes into contact. The voices who insist on no one telling them what to do have forgotten that we have a responsibility to take care of each other. My brother died from being exposed to the virus by his unvaccinated daughter-in-law. My step-sister died from being exposed by her unvaccinated son. Think of how these people feel about having killed their loved ones. We all need to be vaccinated to have any hope of eradicating this disease. The young who feel they are invulnerable are very short sighted. Others, like the young mother who is convinced the vaccination will affect her fertility, are choosing to be informed by unreliable, heavily political sources.

It would be great if mandates were not necessary, if the residents of Kitsap County turned to real medical sources for their information, if they weren't so self-centered that they can only think of themselves and not of the public good. But, judging from the vaccination rates here, too many have chosen a path and ideology that will keep this pandemic going indefinitely. If we want businesses to thrive, hospitals to be able to treat everyone who needs help, doctors and nurses to not completely burn out, and government to serve our needs, mandates are looking like the only way to achieve those ends. Continuing the high community transmission that we currently have may seem like a solution to many of those whose emails I read, but it keeps me out of public places and I imagine many others feel the same.

This is not Nazi Germany. It is not a matter of our constitutional rights or personal freedom. It is about doing what we can to end this pandemic. When I was young, I remember going with my father to the local elementary school to get the polio vaccine. Since my brother had actually had polio and was lucky to be alive, we considered it a godsend. I don't recall a huge percentage of the population screaming that it was their right not to get it. The idea was to stop the suffering caused by such a serious disease. The more people who write and speak at the meeting on Tuesday about their rights not to be vaccinated, the more you should be convinced that mandates are essential.

Good Morning Keith,

Thanks for asking that. Well, it was actually for your background information. But, please feel free to pass it on to the Board. They should at least be aware of this information. With Inslee breathing down their necks, and Biden breathing down his, I'm not sure how much good it'll do. It appears to me that the independence of the Board is a movable thing. Maybe, somewhat like how the courts hide behind the "lack of standing" fig leaf when they don't want to actually see the evidence in a case. See no evil, hear no evil, speak no evil. We know who those monkeys are. It'd be an amazing thing to see them reassert their complete independence from such pressure.

What is so depressing in this affair, is more and more evidence is coming out that shows the fallacy of a one size fits all approach to fighting the virus. Everyday we learn more. Everyday the side effects that have been occurring show we know almost nothing of the long term effects of the vaccines. In the 1970's there was a vaccine for the swine flu and 32 deaths were recorded as being caused by the vaccine. That small number of deaths was enough to have that vaccine pulled from the market. For the COVID vaccines, we're now at just over 17,000 deaths. But, in this case it's obvious that the powers that be don't give a crap. There has to be more to this story than simply "public health". The aggressiveness being displayed by government forces to get this stuff into the veins of all of our countrymen is well beyond the pale. The establishment fought for over a year the use of early treatment prophylactics like hydroxychloroquine and ivermectin. Both of these meds have a long history of being used for all sorts of ailments. Study after study has shown they are indeed effective if given early on. The establishment got between front line physicians and their patients to the point where scripts written for one of these meds was being prohibited by pharmacists from being filled. The study in Lancet that damaged the reputation of hydroxychloroquine was later proved to be badly flawed. Here's Lancet's retraction of the article ==> <https://www.thelancet.com/journals/lancet/article/PIIS0140-6736%2820%2931180-6/fulltext> But, as we know, a lie is halfway around the world before Mr. Truth has time to pull his boots on. The damage was done.

Mat Staver of Liberty Counsel just filed a class action lawsuit last friday on behalf of all DOD personnel including contractors that cites the number of laws that are being violated by the "mandate". ==> <https://lc.org/newsroom/details/101521-military-federal-employees-and-civilian-contractors-sue-biden>

The judge hearing the suit has scheduled a hearing for a temporary restraining order.

The problem is, this darn thing has gotten so far past "laws" and so much into politics that facts don't seem to matter any more. This truly smacks as a power play by folks who want to show the rest of us plebes who's boss. Facts and human rights be damned. So there we are.

Best regards,

David

Good Morning Keith,

FYI, this paper just came to my attention this morning on the website Revolver.com and the latest VARES data are passed on to you for the record.

==> <https://www.revolver.news/> ;The lead article is here:

==> <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8481107/>

See the European Journal of Epidemiology (accepted on 9 Sep 2021).

"Increases in COVID-19 are unrelated to levels of vaccination across 68 countries and 2947 counties in the United States".

See attached PDF for the 3 page article

Here's the abstract:

1. Eur J Epidemiol. 2021 Sep 30:1-4. doi: 10.1007/s10654-021-00808-7. Online ahead of print. Increases in COVID-19 are unrelated to levels of vaccination across 68 countries and 2947 counties in the United States.

DOI: 10.1007/s10654-021-00808-7

PMCID: PMC8481107

PMID: 34591202

I realize when confronted with an agenda which is impenetrable to any information counter to the "conventional wisdom", information like this may not be considered applicable in any decision making process. But, that doesn't release us from at least trying to get someone in the process to take a look. My concerns are more global than just Kitsap County. I am truly concerned that the ever growing draconian measures being employed to "vax" the entire population, masks a more sinister hidden agenda. I will not speculate on what that is. But, I must say these actions go well beyond what any government should be doing in a free country.

Here is the latest published VARES vaccine side effect data for 8 Oct 2021, now showing 17,056 deaths in 2021. A total of 798,634 side effects are also shown in the report (including the death count).

==> <https://openvaers.com/covid-data>

Many observers say the deaths in VARES are significantly underreported by at least 1 in 5 actuals, due to the complexity of the filing process. For experimental medicants that are being pushed almost nonstop by all the governmental and media forces upon the public these are shocking numbers. Combined with the information in the above paper it should give us pause to rethink our "rush to judgement" in this mass push to vaccinate the entire population.

I realize that you are probably fully aware of these stats, but if you are, then how can you even consider making this experimental "vaccine" mandatory ?

Also, VERY IMPORTANTLY ! the safety and dangers that will come about due to the firing of so many washington employees that we depend on every day,

WAY OUTWEIGH the risks posed by this (TREATABLE) virus.

Please take some time to consider these adverse effects.

Dear Elected and Appointed Servants of Kitsap,

In my letter to you dated October 17, 2021, I mentioned that my wife's religious exemption had been denied and her last day at work was last Friday.

However, she was just informed that after further review, they decided to accept rather than reject her religious exemption. Yesterday, two of her coworkers were told their exemptions had been changed from rejected to accepted. Since we didn't hear back yesterday, we were thinking that we were not going to get the same turnaround, but now we have.

We are both thankful to Jesus for this turn of events and my wife is looking forward to again serving the people of Kitsap county as a Registered Nurse.

Therefore, please note this change when reading my letter, and Dr. Morrow, my selfish request is now cancelled as well 😊.

Praying for all of you to remember your oaths of office/Hippocratic Oath, because God was listening when you made them.

Because He lives,

Kevin

Subject: I Found Someone to Take up Dr. Morrow's offer to Debate - Re: From Pastor Kevin Lea pertaining to Mandating Vaccine Passports in Kitsap County

Dear Dr. Morrow,

Sorry that it has taken eight days to respond.

Thank you for your promise to, "***debate scientific facts and risks and benefits of vaccination at any time***" in your October 9, 2021 email below. It took some time to find an opponent for you and terms of the debate that I think you should find quite acceptable. In fact, it is your chance to earn one million dollars. More on this below.

But first, since my letter to you and others was about the safety and effectiveness of the Covid inoculation mandates, and not vaccines in general, I am assuming your "any time" debate acceptance pertains to the synthetic mRNA shots and not vaccines of the past. I have to say that I thought it was somewhat disingenuous on your part to compare these new shots to the George Washington, Cowpox story during the county commissioner zoom meeting of three weeks ago. I am assuming that you do know there is a very vast difference between the two and the debate is about Covid inoculations.

In fact, as I am sure you know the CDC/FDA changed the definition of "vaccines" on September 1st, since the Covid inoculations failed to fall within the old definition (used for decades), which stated that vaccines provide "immunity" to a disease. Rather than be honest and admit that the Covid jabs should ***not*** be called vaccines (i.e., don't provide immunity), they just changed the definition of vaccines to say that they provide "protection" against disease. No integrity issue there.

By the way, how many fully vaccinated have to die from Covid before you/they will admit that they don't provide "protection" either?

I am very thankful that one of my congregants (fully vaccinated with J&J) is today (after six days) finally starting to feel better after coming down with a hard case of Covid (symptoms and positive test).

I should point out that we did our part to keep your fully-vaccinated-hospitalization/death stats down (which would be bad for your narrative) by encouraging him to get doctor prescribed Ivermectin and associated treatments that are **known** to speed recovery and prevent hospitalization/death. I fear what would have happened to him had he just kept going downhill with no effective treatment, then end up in the hospital to

get the Dr. Fauci, Remdesivir protocol, which often ends up being a kidney and patient kill shot (including for a close friend of mine).

So, assuming your offer to debate "any time" applies to the subject at hand, here is the debate/bet offer from Steve Kirsch which is found at this link: <https://www.skirsch.com/covid/Bet.pdf>

\$1M bet term sheet

\$1M vaccine safety bet term sheet NOTE: 1. I am happy to negotiate the terms of this bet if you do n't like the proposed terms

www.skirsch.com

I have cut and pasted the terms of the debate at the end of this portion of our email thread in case you fear getting a virus at the link above (understandable - since I know computer viruses can ruin your life much more than Covid 😊). I have also pasted my original October 8th, 2021, pdf attachment letter to the bottom of this thread in case you or others on distribution did not want to open my October 8 pdf attachment for the same reason. Now the body of this email thread tells the entire correspondence story without the need to click on links or attachments (except for the Facebook interview you gave on July 4 - which I assure you is a safe link, you won't regret it, honestly).

As you will see in the very reasonable terms of this debate, all you have to do is come up with one million dollars and then start the process of selecting judges. Then both of you complete your arguments. In order for you to come up with your one million dollars, I suggest asking Pfizer to provide these funds out of their approximate 30 billion dollar, tax payer funded, no liability, profits. They should be very willing to throw you a million dollars as they stand by the safety of their product and expect to get the money back when you win the debate.

Of course, if you do win, you will also be getting your one million dollars from the loser, Steve Kirsch, and I will owe you a humble apology for my email of October 8.

If you receive your winnings, I hope you will donate \$400,000 to the county in order to pay the tax payers back for the bribery scheme of \$500 per vaccine-hesitant county employee who gives in to your power play. I suspect that with the news of your win, the vaccination rate will rapidly reach 100% with no further need of bribe money or extortion.

If you lose, and I know it is selfish of me, but I wouldn't mind it if you asked Pfizer (or take it out of the money they are currently giving you - if any) to reimburse my wife for the \$100,000 she is losing for being let go this last Friday (with no unemployment).

Her termination is after 18 years of faithfully serving thousands of patients as a registered nurse because she refuses to take your "safe and effective" mRNA jab. Her management, co-workers and patients love her for her compassion, hard work and professionalism, which includes knowing (based on her medical training) that her natural immunity from a March Covid infection is better than the jab, and it will keep her from infecting anyone (patient or staff). I also had Covid in March, used effective treatment, recovered, have been around several delta patients without a useless mask and have been free of relapse.

Her vaccinated (but **not** previously infected) co-workers are keeping their jobs but will continue to be a potential hazard to their patients, families, co-workers etc. because, as you know, the jabs don't work, and we still don't know the long-term effects these injections will have on these professionals who are the backbone of our healthcare system. I suspect you will continue to blame us (unvaccinated but recovered from Covid) for this, but it will be another lie.

My wife and I were retirement-planning for her to work another two years (about \$100,000), but she and I would prefer that she be healthy and as a Bible believing Christian, she sincerely believes that God does not want her to violate her God-given body with these contaminated, poisonous, not fully tested and already failing gene therapies. Her religious exemption was denied.

In summary, Dr. Morrow, I want to thank you for your time and for being willing to show you believe what you say by entering into a public debate. I am sending this thread to Alex Jones, Todd Herman, the Kitsap Sun, the Stew Peters Show, and Dr. Peter McCullough (who made me aware of this debate offer) in addition to the copy-to list.

To anyone on distribution, please feel free to send me your contact number if you would like to further discuss or if you have any questions.

Sincerely,

Pastor Kevin Lea

Paste of debate offer (with format corrupted - go to website for correct format):

\$1M vaccine safety bet term sheet NOTE: 1. I am happy to negotiate the terms of this bet if you don't like the proposed terms and can suggest changes that make the contract more neutral to both parties. 2. We can use this same term sheet for other binary bets as well. For example, I believe Nicki Minaj was right because the vaccines are known to cause the effects she was told about. The rules are the same: there are 3 appointed judges and all three must agree with one side or the other for a win. TO ACCEPT THESE TERMS OR OFFER COUNTER OFFER 1. Indicate your acceptance by publicly posting your acceptance here, or by publicly posting your counter offer. That way everything is in plain sight of the public. TERMS 1. This is a social bet between 2 parties where both parties bet \$1M USD that they are right. 2. Party A (Steve Kirsch) is betting that the COVID vaccines (Pfizer, Moderna, and J&J collectively) are the most likely cause of over 20,000 "excess American deaths" following the start of vaccination in December, 2020 through Sept 3, 2021. 3. Party B ("the challenger") is betting there are fewer than 500 excess deaths due to the vaccines in the same period of time, i.e., the vaccines are "relatively" safe and should not be stopped. 4. Thus, one side says it is very safe, the other side says it is very dangerous. There is a 40X difference between the two claims. 5. VAERS as of Sep 3 has 6,577 death reports. Some of these could be fraudulent, some could be background deaths not caused by the vaccine. Thus party A is betting that they can prove that there are more than 3 times as many deaths as have been reported, a seemingly impossible burden especially considering the CDC has reported no deaths due to the vaccine. Party B on the other hand, need only show that the FDA and CDC are right that these are all background deaths (or fraudulent entries) and not related at all to the vaccine administration; that they simply were coincidental and that vaccines did not cause them. 6. Excess deaths mean the deaths that are beyond those that would normally be expected to be reported from ALL vaccines administered: average all deaths over the 2015-2019 period. Excess deaths are thus those deaths that are due to a cause other than what would be expected to be naturally caused. 7. The parties confirm that the state they reside in allows social bets. 8. This agreement shall be governed by the laws of the State of California. 9. The bet shall be adjudicated by a 3 person "jury" of retired judges. Each party shall appoint a retired judge of their choice, and those two judges shall appoint 3 retired judges who are mutually agreeable to both of the judges. The appointed judges shall then recuse themselves leaving the 3 mutually agreeable judges. 10. All jurors shall be instructed to exercise their duty as a neutral finder of facts and to recuse themselves if they feel they cannot be unbiased. 11. Each juror shall decide whether it is more likely that A is correct or B is correct. 12. There is a payout only if the juror are unanimously in agreement that one of the parties is correct. Otherwise, it is a draw and monies are returned. 13. Once this term sheet is signed by both parties, both parties shall enter into good faith negotiations to develop a formal definitive agreement incorporating these terms. Parties shall respond promptly to changes from the other side. 14. Within 10 days of signing the definitive agreement, both parties shall send \$1M to an attorney of their choice who is associated with a law firm approved by the other party to hold in escrow. 15. The parties agree that the law firm of the losing party will wire funds within 10 business days of the determination of the jury.. 16. Evidence used to convince the jurors is unrestricted. 17. Each party shall have a total of 2 hours of talking time to present their case. The time may be extended with agreement by both parties for a minimum of 2 hours. 18. The presentation for the jurors shall be done in recorded zoom calls. 19. The jurors may ask questions of the parties at any time. The answers will be clocked as part of the talk time of the respondent. 20. Documents can be submitted to the jurors to read. Up to 200 pages of evidence for each party. 21. The parties may bring in expert witnesses into the conversation. 22. The parties may question each other and their expert witnesses. All talk time will be clocked against the party talking. 23. The methods of proof shall not be limited. 24. The discussions shall be recorded and available for public use except where noted. 25. Any expert witnesses on either side can question any of the expert witnesses on the other side. 26. Parties can talk for as long as they like before yielding to the other side. They will only be "charged" for the time they have "the floor." 27. Parties can call for a 10 minute time out at any time. Each side will have up to 5 time outs or as mutually agreed upon. 28. We reserve the right to change this term sheet at any time prior to acceptance. 29. Party B can be an individual or institution. 30. Before the appointment of the judges and the juror selection process, the parties agree to try to resolve the dispute by a recorded zoom video conference that either party can use for any purpose for a total of 3 hours. Time can be extended by mutual consent. So one party can show the other he'll win, and then offer a reduced settlement to the other party, for example. This saves time and saves money. 31. This offer shall expire Nov 15, 2021 and may be withdrawn at any time prior to that. The entire point of the bet is to show that nobody has any confidence at all that fewer than 500 people have died due to the vaccine in the US.

Otherwise, if you were confident of <500 deaths, you'd jump at either offer since my burden would be impossible to meet...I basically can't win since I'm claiming a rate that is 40X more than that, a rate that most people think is ridiculously high. So this is what appears to be a "no risk" deal for Party B. Party B has a huge advantage here: 1. Most people believe that the vaccines are safe and effective and that nobody has died 2. No judge wants to be seen as anti-science and vote for this and face retaliation from his community for supporting anti-vaxer propaganda. But nobody is jumping at this "sure thing" \$1M bet. All they do is make excuses why they won't accept the bet. This term sheet was reviewed by retired Superior Court Judge Eugene Hyman who found it to be fair to both parties. So you can't argue about the fairness of the terms. Which proves my point. Nobody will put their money where their mouth is. If you think this is not the case, we are interested in accommodating any reasonable changes that are equally fair to both parties. To accept: 1. Signify your public acceptance of the terms (or offer a set of changes to the term sheet) at my stkirsch GETTR account on this post. 2. Please have your attorney contact my attorney: John Brown JBrown@cornerlaw.com +1 (415) 999-9551

Dear Kitsap County Commissioners,

Normally I would only send this letter to my representative (Charlotte Garrido), but because of the severe consequences associated with your decisions in this matter, I am sending it to all of you.

I agree with Poulsbo Mayor Erickson that a fact sheet needs to be made to assist the people in making informed decisions about this issue. I also agree with Mr. Grellner that such a fact sheet is not going to be easy to produce (he prefers sticking with unsubstantiated/false talking points). May I suggest that a public, formal, recorded debate be set up to that end?

A good start would be for Mr. Grellner and Mr. Morrow to start telling the truth about the adverse side effects of these still experimental injections. Mr. Morrow on more than one occasion has said,

*"Get the vaccine, **you will not regret it**, you might have a sore arm for a day or two, you might be a little bit off but at the end of the day you're doing the right thing and you're doing the right thing for not only for your community but for your loved ones your family and for yourself. "*

Please Do Not Mandate Vaccine Passports in Kitsap County

To: rgelder@co.kitsap.wa.us; cgarrido@co.kitsap.wa.us; cgarrido@co.kitsap.wa.us;

keith.grellner@kitsappublichealth.org

Subject: Opposing Vaccine Mandates / Passports for Kitsap County

October 8, 2021

Dear Kitsap County Commissioners,

Out of my pastoral concern for the well-being of all citizens of our community, I am writing to state my strong opposition to the vaccine passport system that you are considering for Kitsap County.

As public employees and elected officials, you are supposed to be working for the benefit of Kitsap County citizens. The primary purpose of the passport system appears to be further illegal coercion on or punishment of those individuals who have chosen, for personal, religious, or medical reasons, to not take the unapproved,¹ experimental COVID gene therapy shot. A passport system would be of *no benefit* to “we the people” but instead would further harm and demoralize our citizenry and businesses who have already suffered so much through this pandemic.

Some argue that illegal coercion is justified because the shot will stop the pandemic. If this is so, why are new COVID cases highest in states and countries where vaccine percentages are the highest? Even the vaccine manufacturers and CDC are now admitting that vaccine efficacy quickly wanes and that inoculated individuals become high viral load carriers of new variants. And if the shots are safe and effective, then why does CDC’s Vaccine Adverse Events Reporting System (VAERS), which experts acknowledge represents at most 10 percent of all events, record **more than 16,000 deaths** from these shots, more than for all other vaccines combined for over 30 years, as well as **hundreds of thousands of other adverse events**, some life-changing?² Also, if the shots are safe and so critical to stopping the “pandemic,” why are the following large groups of people exempt from the vaccine mandate?

- All of US Congress plus all congressional staff, House, and the Senate
- 6,000 White House employees
- 2,500 Pfizer, 1,500 Moderna, and 120,000 Johnson & Johnson employees
- 15,000 CDC and 14,000 FDA employees
- 8 million Chinese students in this country
- 2 million illegal aliens
- At least 500,000 homeless / tent people

Given that (1) it makes no scientific or other sense for you to require local business to deny service to the unvaccinated and (2) that there is no benefit to the community to do so, we must ask the question, who *does* benefit? Have you personally or your agencies been offered money or other favors if you mandate businesses to exclude the unvaccinated? We know that others have. If you accept, you will be guilty of bribery, extortion, and perhaps murder. You *will* be held accountable, perhaps in this life, but certainly on the day of God’s judgment.

I entreat you to resist the pressures of the tyrannical few and instead do the right thing by acting on behalf of the citizens of Kitsap County, as is your charter. The U.S. citizens in Kitsap County, many of whom are critical to our nation’s defense, **must** be given the same freedom of choice that is given to members of Congress, CDC, and FDA; pharmaceutical employees; and illegal aliens and the eight million Chinese living in the US (many of whom are likely

members of the Communist Chinese Party). Further, whatever happened to “my body my choice?” History and God will judge us.

Deuteronomy 16:19 - *You shall not pervert justice; you shall not show partiality, nor take a bribe, for a bribe blinds the eyes of the wise and twists the words of the righteous.* (The Holy Bible, New Kings James Version)

Sincerely,

Kevin Lea

Pastor, Calvary Church of Port Orchard

¹ A careful review of the applicable FDA documents reveals that the Pfizer mRNA drug was **not** approved. In fact, it was another Pfizer product, called Comirnaty, that FDA approved *for testing*. Comirnaty is *not* available in the US. FDA then used the Comirnaty approval to extend Pfizer’s Emergency Use Authorization for the US product. If you doubt this, then ask Dr. Morrow to provide you with the proof that *any* of the US COVID shot products have been FDA-approved. The US products are all experimental. As such, it is against the Nuremberg Code and federal law for you to in any way coerce people to take these experimental drugs.

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

I am writing to request that you oppose the Kitsap County Health Department's proposal to impose vaccine mandates on any business in Kitsap County. Proof of vaccine mandates are un-American, unneighborly and furthermore, highly discriminatory. I, for one, will be committed, along with other highly dedicated residents, be forced to not comply, be denied my rights as an American to commerce freely or to take my business to other counties. Do not give into the federal dollars flowing with this mandate, as you will be complicit in acting against your constituents which you were put in your position to represent. I respectfully request that you put your full force of resistance against this unconstitutional measure being proposed and stand with us in this matter. thank you so much for your consideration. Sincerely, Marisa Ortiz Hansen.

Subject: Vaccine mandate logic

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

If a vaccinated person can still get covid with no symptoms, they're out spreading it without knowing it. If unvaccinated gets sick, with symptoms, at least they know it and stay home. Also a question, if one was vaccinated and the vaccine wears off after 6 months does that mean ones vax passport expires? Another question, why are these vaccines not covered by the vicp? And if alot of people in this county aren't comfortable getting this vaccine, why do we not have the option for testing weekly like other states. Don't you think there should be a compromise? If the county has the funds to hire people to be passport checkers then they have the funds for weekly testing. And God knows how much money my family forks out. Vaccines should be a choice period. And I don't mean get it or loose your job. I urge you to listen to ALL the citizens of Kitsap, that's what makes one a good representative. The key word is COMPROMISE..people need a choice, if mandate happens, they need the option of weekly testing. Thankyou, j. Gregory

To whom it may concern,

I have just recently learned that a meeting is taking place to consider imposing a vaccine mandate in Kitsap County. I am a concerned Washington citizen, respectively opposing this action. A vaccine mandate is a violation of freedoms and civil liberties of the citizens of Kitsap County. This is an experimental gene therapy under EU emergency order, therefore, citizens should not be coerced into receiving it by being threatened with losing the right to enter all businesses in the county. Cominarty is currently the only approved FDA COVID shot, and it is currently not available in the US. There have been increasing reports that these covid shots are neither safe nor effective in preventing the transmission of the virus. There are increasing number of studies indicating natural immunity is better than getting the covid shot.

"A renowned professor at Johns Hopkins University School of Medicine is speaking out this week to admit that the COVID-19 vaccine mandates "ruin lives" and that natural immunity is far more effective than the vaccine." "The data on natural immunity are now overwhelming," Dr. Marty Makary told [The Daily Wire](#). "It turns out the hypothesis that our public health leaders had that vaccinated immunity is better and stronger than natural immunity was wrong. They got it backwards. And now we've got data from Israel showing that natural immunity is 27 times more effective than vaccinated immunity. And that supports 15 other studies." (<https://www.redvoicemedia.com/2021/10/reowned-john-hopkins-doctor-destroys-narrative-admits-vaccine-mandates-ruin-lives/>).

There is an overwhelming number of stories of severe adverse reactions and deaths related to these shots. Check out the CDC VAERS website for those numbers: 752,803 adverse reactions,, 16,874 life threatening reactions, 71,036 hospitalizations, 15,937 deathd, 22,342 permanent disabilities, 117,837 office visits,, 85,321 ER visits, and 509 birth defects from December 2020 to present. (<https://vaersanalysis.info/2021/10/01/vaers-summary-for--covid-19-vaccines-through-9-24-2021/>). These numbers are significantly underreported, and numbers are probably much higher.

The contents of the covid shots have come into question by several doctors and scientists around the world who have examined the vials, maintaining chain of custody, and discovering substances that appear to be metallic and parasitic in nature. Therefore, the ingredients of these covid shots are questionable. Many doctors around the world are comparing vaccinated and unvaccinated blood samples and discovering shocking findings in vaccinated blood samples. In other words, vaccinated blood looks severely unhealthy compared to unvaccinated blood. (<https://3speak.tv/watch?d=n8fbclid=1wAR1rA8mkptCiak93FpxQ1xaVe19N>, <https://www.redvoicemedia.com/2021/09/dr-carrie-madej-first-U-S-lab-examines-v>, <https://www.redvoicemedia.com/2021>, to name a few).

Please do not impose a vaccine mandate on the citizens of Kitsap County.

Sincerely,

Katrina Mason

Hello,

I am writing to make my voice heard that I strongly OPPOSE allowing the Kitsap County Health Department to impose vaccine mandates on any business in Kitsap County.

With businesses already suffering in the midst of this pandemic, a measure like this will crush them. You should allow businesses the choice.

Thank you,

Kelli Walker

Do not use mandates on Kitsap citizens. We are not in the Soviet Union, or China. Many people have had the Covid virus and have no certificate to prove it. If you want to find out if they have had it, you may not ask, for proof, but they may refuse because of privacy about their health. Will you be asking for HIV status? I think not. NO Mandates should be demanded or encouraged by the government. If you want to keep the business community a vibrant economy. A free society is a happy society. NO MANDATES! If we have a break out of the influenza do you think we will need a card proving we had a flu shot? I think not. Do you think we would be expected to all have a flu shot? I think not. Many people do not survive the flu either. The government cannot put mandates on everything. This is still an experimental "vaccine". It has. Not been long enough to determine the complete spectrum of bad affects on women of child bearing years. The recent 37 year old woman that died from thrombosis after getting the shot now has left 2 children without a mother because of the pressure she was feeling to have the shot in order to participate in her children's school programs. This is what can happen and it has because of not supporting therapeutics and other measures to deal with this virus. Governor Ron Desantis of Florida set up clinics around his state to distribute therapeutics and cut the hospital admissions by 65%. Why don't our elected officials follow successful programs like that? Something is very wrong about the national push to administer this shot to everyone without consideration of whether or not they have natural immunity from having had the virus and returned to health. This is not a one shoe fits all scenario. NO MANDATES.

This is a plea for civility and compassion for the people in our community.

If you are vaccinated you should be confident in your decision knowing that you are protected by the shot. If you have had Covid you should be confident in knowing that your body now has natural immunities that will protect you from getting Covid again.

Shaming the unvaccinated or telling them they are responsible for people dying of Covid is absurd.

Let us treat each other with civility.

Viruses will always be with us and no one escapes death. Let us live our lives to the fullest by loving one another, encouraging one another and respecting one another's private medical decisions.

It is time for all the mandates to end. We are in an endemic now and I believe the majority of Americans are responsible enough to continue all the things such as hand washing, staying home when sick, etc. that we have been doing for the last two years.

Sincerely, Tim and Anna Nanfita

Hi Mr. Grellner,

Just wished to express my opinion as a citizen of Kitsap Co. I prefer constitutional rights be upheld and that we all, as free people, choos whether or not we wish to receive a vaccination. I am in great hopes that Kitsap County will leave the rights of the people alone. Let each of us make our own choice and not be bullied or persecuted because we believe differently than someone else.

Please forward this to Board Members.
Thank you.

Dear Board Members,

I would like to comment on the items I read on the 10/05/2021 Meeting.

Public Comment:

I too agree with Mr. Szymansky on the Health District, declaring Racism a Public Health Crisis, should be revisited. I had asked for proof of this and received no documentation either. Why would you promote such an divisive idea without proof? There is no place for this. I hope that you do consider revoking this resolution. I agree the Health Department should focus on medical issues.

Covid-19 Update:

Does Dr. Morrow have any statistics on the Covid Cases started by Vaccinated People? I myself and family members have been vaccinated, but I do not agree with mandating people get vaccines. That should be left up to the individual, or the individual and their Doctor. If you do mandate vaccines, then would you also pass a resolution, that a person or persons' family could sue you for your decision mandating they get one, and as a result, the person dies or has medical issues because of your decision? This recently happened in King County. Did Dr. Morrow provide information on that? The lady died because she was forced to get the shot, just because she wanted to help at her daughter's school. What a tragedy.

Dr. Morrow talks about science but shouldn't we include everything? Why isn't anyone talking about natural immunity? I beg you not to mandate vaccines for restaurants, bars, or any other place. This is very dangerous and would just divide people more. The State Mandates are already creating a shortage of police, hospital staff, and shortages in other state government agencies, because they (the workers) don't want to get the vaccine. This is the real crisis being created. Does Dr. Morrow have those statistics?

Finally,

As I stated above, I agree with people getting the vaccine, but it is not right to mandate them to get it. People that get the vaccine can still get Covid. I do not think anyone can deny that. The vaccine just reduces the severity. My understanding is cases are dropping. Shouldn't we be thankful for that?

Thank you for listening,
Bob Showers

Hello again Mr. Grellner and Commissioners,

In follow-up to my previous email, I've recently been made aware of a very handy interactive map on the NY times website that can be found here: <https://www.nytimes.com/interactive/2021/us/covid-cases.html>

The US, as of October 5, 2021, has had a 24% decrease in cases, 20% decrease in hospitalizations, and 12% decrease in deaths from COVID over the past 14-days.

For all of Washington, there's been a 12% decrease in cases, 17% decrease in hospitalizations, and an average of 0.53 deaths per 100,000 over the past 14-days.

Kitsap county cases have been flat for the past two weeks with a low number of cases per capita of approximately 1 in 18. We've had a 9% 14-day decrease in the number of cases and an 18% 14-day decreased in the number of hospitalizations with an average of 1 death per 100,000 people.

Again I would like to reiterate that we are getting better and there's no need to put the extra and unnecessary burden of verifying everyone's vaccination status on the backs of the already struggling small business community. Let's get back to helping them grow and thrive while helping our community to improve their overall health.

Thank you again for your time and consideration.

Most sincerely,
Heather Torres

On Fri, Oct 1, 2021 at 9:06 AM Heather Torres <contact.heather.t@gmail.com> wrote:

Good morning Mr. Grellner and Commissioners,

Enclosed is my statement for the Kitsap Public Health Board Special Meeting. As a member of Kitsap County, I would like my thoughts and observations taken into account prior to your discussions at the meeting.

If the purpose of the meeting is truly about the health and safety of Kitsap County residents then this board meeting should not derail into a debate over vaccinated versus unvaccinated populations. Please allow me to explain.

The federal government has deemed that an "unvaccinated" person is someone that is not two or more weeks post their second COVID vaccine. This means that someone who had their second shot yesterday is still considered "unvaccinated" ([NIH page 5](#)). One could also assume that moving forward the term will include someone that hasn't received a series of booster shots. It also doesn't include those that have natural immunity from previously contracting

COVID. An immunity that has been proven to be stronger and more effective than the vaccine through a year or more post-infection ([study published in the Journal of Internal Medicine](#)).

The vaccine is available to all who want it and are safely able to do so. The majority of the population has received it and we've reached "herd immunity" status though COVID lives on. The vaccine has been shown to reduce the severity of symptoms, however it does not prevent someone from contracting or spreading COVID. This is especially true with the Delta variant. This means that vaccinated or not every individual who hasn't already contracted COVID can not only catch it but spread the COVID infection to others. Those that are vaccinated have milder symptoms and, in my personal opinion, are more likely to spread COVID because they have milder or no symptoms and don't realize they actually have COVID and can transmit it. My opinion stems from my personal experience of both catching COVID from a vaccinated person who thought that they couldn't catch nor transmit COVID so they went about their day not taking any precautions and not staying home when they were ill. It also stems from my observations from other coworkers and clients.

If everyone, vaccinated or not, can catch and spread the virus then the risk is not who will spread it but rather who will catch it and become ill. It's our individual right to determine what risks we are willing to take with our own health. Prior to vaccines, there was roughly a 1% death rate due to COVID which is only slightly higher than the flu on an average year. Keep in mind the risk is significantly less for the young and significantly higher for the elderly and those with comorbidities. The overall average of all ages is 1% though. It's a little too early to say but if the vaccines truly do what they say then that number should be on the decline.

During all of this, our small businesses have been disproportionately impacted by COVID shut-downs. Small businesses are the backbone of the US and especially Kitsap County. Forcing small businesses to verify the vaccination status of all employees and patrons puts an unnecessary burden on them. Even more so as many are short-staffed due to the labor shortage. Discriminating against small businesses by making them subject to these additional rules and regulations only makes it harder for them to survive and thrive. If we're interested in helping those businesses and thereby citizens of Kitsap County not only survive but thrive then we need to shift our focus to finding ways to help them stay open, have more patrons, and find top-level talent that doesn't break the bank. Let's come together to support small businesses and end discrimination against them when big corporations are allowed to go on with limited restrictions and do what they want.

If the goal of this meeting is truly to keep our fellow Kitsap County citizens healthy and safe then let's work on proactive measures to help them be their healthiest selves. Let's work together to find easier and less expensive ways for them to exercise, eat healthy foods, and have easy access to their care providers. Let's encourage care providers to treat patients proactively to help them be their healthiest selves and to prevent them from getting ill. Then, if they do catch COVID or something else, let's give them the support and protection to treat patients early before they get so ill that they need to be hospitalized.

Again, as a Kitsap County resident, I ask you to:

- Not discriminate against the already disadvantaged small businesses.
- Support ways to increase citizen access to health and wellness activities and services.
- Advocate for medical providers to be able to treat patients using FDA-approved medications and services without fear of repercussion.

Thank you again for the opportunity to voice my concerns and suggestions.

Kind regards,
Heather Torres

Subject: Covid-19 Experimental Vaccine Mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Attached is a follow up of the information I presented today at the Kitsap Public Health Board Meeting on October 5, 2021.

Date: October 5, 2021

To: Kitsap Public Health

Re: Covid-19 Experimental Vaccine Mandate

Hello, I am Kelly Bertelsen and I live in Olalla. I appreciate you taking public comment and urge you to allow the public to the choice to take the Covid -19 vaccine or refuse the Covid -19 vaccine.

Any required Covid-19 vaccination requirement is a violation of federal law. I urge you to advise the public that they have the right to refuse or to take any Covid -19 vaccine. Any other action is contrary to federal law.

Covid-19 Vaccines are Experimental

The Covid vaccines are in a special category and cannot be treated like FDA licensed vaccines. None of the Covid vaccines are FDA licensed; nor have they received full FDA approval. Rather, their approval is under the special provision noted above as EUA. This means that there is not enough data (which includes duration of testing) for the FDA to render a final approval. More importantly, no one, including private employers, may coerce individuals (by threatening their employment or otherwise) to take an EUA vaccine. Federal law requires full and informed, voluntary consent.

Covid-19 vaccines are not approved by the FDA. The Covid-19 vaccines are only approved under an Emergency Use Authorization, for investigational use only. Covid-

19 vaccines lack requisite studies and are not approved medical treatment. The Pfizer-BioNTech Covid-19 Vaccine which was recently approved by the FDA has not been produced. The Pfizer vaccine currently available is still under the EUA (Emergency Use Authorization rather than the approved Pfizer-BioNTech. The approved FDA vaccine that is not currently available is still without the proper testing and time frame to truly ensure the vaccine is safe and will not cause future harm to any individuals in future years.

EUA Authorization allows the EUA product to be administered based on the following requirements:

1. that the Secretary has authorized the emergency use of the product;
2. of the significant known and potential benefits and risks of such use, and of the extent to which such benefits and risks are unknown; and
3. of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks

The right to avoid the imposition of human experimentation is fundamental, rooted in the Nuremberg Code of 1947, has been ratified by the 1964 Declaration of Helsinki, and further codified in the United States Code of Federal Regulations. In addition to the United States regarding itself as bound by these provisions, these principles were adopted by the FDA in its regulations requiring the informed consent of human subjects for medical research.

All charts and tables below reflect the data release on 10/1/2021 from the VAERS website, which includes U.S. and foreign data, and is updated through: 9/24/2021

High-Level Summary	COVID19 vaccines (Dec'2020 – present)	All other vaccines 1990-present	US Data Only COVID19 vaccines (Dec'2020 – present)	US Data Only All other vaccines 1990-present
Number of Adverse Reactions	752,803	823,547	581,851	722,534
Number of Life-Threatening Events	16,874	13,628	8,816	9,723
Number of Hospitalizations	71,036	78,552	33,703	38,186
Number of Deaths	15,937*	9,141	7,215	5,120
# of Permanent Disabilities after vaccination	22,342	19,622	8,359	12,456
Number of Office Visits	117,837	43,428	109,202	42,106

High-Level Summary	COVID19 vaccines (Dec'2020 – present)	All other vaccines 1990-present	US Data Only COVID19 vaccines (Dec'2020 – present)	US Data Only All other vaccines 1990-present
# of Emergency Room/Department Visits	85,321	209,847	73,068	200,874
# of Birth Defects after vaccination	504	141	323	90

***Note that the total number of deaths associated with the COVID-19 vaccines is greater than the number of deaths associated with all other vaccines combined since the year 1990.**

The data show that the Covid vaccines have injured or killed in the last 10 months almost as many or more people than all other vaccines than over the last 31 years. Clearly, any attempt to force anyone to take a Covid-19 vaccine is a violation of federal law and the conditions under which the Covid-19 vaccine has been authorized for use. The law is clear, experimental medical treatment cannot be mandated.

Businesses are not shielded from liability with experimental agents

Under the 2005 PREP Act enacted by Congress, pharmaceutical companies that manufacture EUA vaccines are shielded from liability related to injuries and damages caused by their experimental agents. However, any employer, public school, or any other entity or person who mandates experimental vaccines on any human being is not protected from liability for any resulting harm. While vaccine manufacturers may be shielded from liability, your institution is not protected, and neither are you.

You are hereby on notice that if you illegally or irresponsibly mandate EUA medical therapies on the public, such as the experimental Covid-19 vaccine candidates, I may have no choice but to take legal action and you may be personally liable for resulting harm.

I urge your institution to comply with the FD&C Act and the terms of the EUA and to advise the public of their right to accept or refuse any Covid-19 vaccine. Any other course of action is contrary to federal law.

Thank you for your time and for protecting the best interest of the citizens of Kitsap County.

Sincerely,

Kelly Bertelsen

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Please vote to make NO requirements for business owners and the public in regard to vaccinations or the need to have proof of vaccination to enter public spaces. It is every person's personal right to make decisions about what is right for their own health. Numbers have come in from other communities that have done this and business declines dramatically. Especially since these vaccines were only authorized for emergency use and have not gone through the normal standards of trials and testing, they should not be required by anyone.

Respectfully,
Susanna Morgan

Covid-19 Vaccines are Experimental

The Covid vaccines are in a special category and cannot be treated like FDA licensed vaccines. None of the Covid vaccines are FDA licensed; nor have they received full FDA approval. Rather, their approval is under the special provision noted above as EUA. This means that there is not enough data (which includes duration of testing) for the FDA to render a final approval. More importantly, no one, including private employers, may coerce individuals (by threatening their employment or otherwise) to take an EUA vaccine. Federal law requires full and informed, voluntary consent.

Covid-19 vaccines are not approved by the FDA. The Covid-19 vaccines are only approved under an Emergency Use Authorization, for investigational use only. Covid-19 vaccines lack requisite studies and are not approved medical treatment. The Pfizer-BioNTech Covid-19 Vaccine which was recently approved by the FDA has not been produced. The Pfizer vaccine currently available is still under the EUA

(Emergency Use Authorization rather than the approved Pfizer-BioNTech. The approved FDA vaccine that is not currently available is still without the proper testing and time frame to truly ensure the vaccine is safe and will not cause future harm to any individuals in future years.

EAU Authorization allows the EAU product to be administered based on the following requirements:

1. that the Secretary has authorized the emergency use of the product;
2. of the significant known and potential benefits and risks of such use, and of the extent to which such benefits and risks are unknown; and
3. of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks

The right to avoid the imposition of human experimentation is fundamental, rooted in the Nuremberg Code of 1947, has been ratified by the 1964 Declaration of Helsinki, and further codified in the United States Code of Federal Regulations. In addition to the United States regarding itself as bound by these provisions, these principles were adopted by the FDA in its regulations requiring the informed consent of human subjects for medical research.

All charts and tables below reflect the data release on 10/1/2021 from the VAERS website, which includes U.S. and foreign data, and is updated through: 9/24/2021

High-Level Summary	COVID19 vaccines (Dec'2020 – present)	All other vaccines 1990-present	US Data Only COVID19 vaccines (Dec'2020 – present)	US Data Only All other vaccines 1990-present
Number of Adverse Reactions	752,803	823,547	581,851	722,534
Number of Life-Threatening Events	16,874	13,628	8,816	9,723
Number of Hospitalizations	71,036	78,552	33,703	38,186
Number of Deaths	15,937*	9,141	7,215	5,120
# of Permanent Disabilities after vaccination	22,342	19,622	8,359	12,456
Number of Office Visits	117,837	43,428	109,202	42,106
# of Emergency Room/Department Visits	85,321	209,847	73,068	200,874

High-Level Summary	COVID19 vaccines (Dec'2020 – present)	All other vaccines 1990-present	US Data Only COVID19 vaccines (Dec'2020 – present)	US Data Only All other vaccines 1990-present
# of Birth Defects after vaccination	504	141	323	90

***Note that the total number of deaths associated with the COVID-19 vaccines is greater than the number of deaths associated with all other vaccines combined since the year 1990.**

The data show that the Covid vaccines have injured or killed in the last 10 months almost as many or more people than all other vaccines than over the last 31 years. Clearly, any attempt to force anyone to take a Covid-19 vaccine is a violation of federal law and the conditions under which the Covid-19 vaccine has been authorized for use. The law is clear, experimental medical treatment cannot be mandated.

Businesses are not shielded from liability with experimental agents

Under the 2005 PREP Act enacted by Congress, pharmaceutical companies that manufacture EUA vaccines are shielded from liability related to injuries and damages caused by their experimental agents. However, any employer, public school, or any other entity or person who mandates experimental vaccines on any human being is not protected from liability for any resulting harm. While vaccine manufacturers may be shielded from liability, your institution is not protected, and neither are you.

You are hereby on notice that if you illegally or irresponsibly mandate EUA medical therapies on the public, such as the experimental Covid-19 vaccine candidates, I may have no choice but to take legal action and you may be personally liable for resulting harm.

I urge your institution to comply with the FD&C Act and the terms of the EUA and to advise the public of their right to accept or refuse any Covid-19 vaccine. Any other course of action is contrary to federal law.

Thank you for your time and for protecting the best interest of the citizens of Kitsap County.

Sincerely,

Kelly Bertelsen

Subject: Pfizer Scientist Says Natural Immunity better than Vaccine

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good afternoon Keith,

More than likely the Board of Health won't have much time to digest this information. And, some may not like Project Veritas, but Veritas is only publishing what the Pfizer man said. Kill the messenger? I pray we don't do that here. This just came out a few minutes ago.

Sure, we all know the push for the vaccine mandate in Kitsap County is really not about health, but about control. OK, given that, at least let them see this before they vote.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Gib Morrow -

Please stop all these mandates. You and the board can make a difference. You can save lives. The most populist state in India has ended Covid with early treatment of [Ivermectin](#).

Phizer scientist have admitted on camera that their company is evil and criminal and that natural antibodies are way more effective than the [vaccine](#).

Leading neurologist have said that adolescent and children wearing masks will cause [irreversible damage](#) to the brain and to organ development. Oxygen deprivation is real and my Father's doctor has said that his migraines which he has never had in his 60 years of healthy and active life are from wearing a mask all day.

Not to mention the very real mental and emotional health issues that come from the dehumanization of taking a way a kid's right to fresh air and smiles. Childhood depression, anxiety and suicide has all **increased** and the mask is playing a part in that. America's children are now the most masked children in the WORLD.

Vaccine [injuries](#) are real and my close friend's dad died within 24 hours of getting the vaccine from a blood clot and my mother in-law died within a week of getting the vaccine. Informed consent helps patients know the REAL RISKS of an experimental vaccine... mandates are unethical, creepy and evil.

Real [Doctors](#) are standing up and taking a stand. The [Great Barrington Declaration](#) remains a beacon of truth and common sense. You can join the fight for truth, for medical freedom. You can help save millions of lives worldwide from global tyranny, from experimental vaccines, from oxygen deprivation, from depression and suicide. You can be a part of the solution instead of helping fund the big lie!!!

EVERY SINGLE DAY more comes out about the corruption of these vaccines. Do your [research](#). Stop the mandates!

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To board elected officials/public servants;

I'm writing to you to ask you to oppose medical segregation in our community via requirements to show proof of vaccination status. It is a basic human right to be able to decide one's own medical care. No person's job or ability to provide for their family should be threatened because they want to decide what medical procedures happen to their body. Please remember the Nuremberg code.

The Nuremberg Code states "The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

People have a basic human right to choose what they want done with their bodies. You do not have the power or authority to take this basic human right away. Whether it would be by forcing businesses to do your dirty work of asking for vaccination status. Which by the way is not anything that anyone has a right to know but that person and their personal doctor.

What about natural immunity? Why is that not being talked about or being considered? There are countless humans in the population with naturally acquired immunity? What makes them less worthy to participate in society than someone who chose to get vaccinated? They are just as protected according to several sources.

Here is one from Israel's highly vaccinated population.

https://www.timesofisrael.com/study-covid-recovery-gave-israelis-longer-lasting-delta-defense-than-vaccines/?fbclid=IwAR07pOUbaa_02d9eD7XceUQtPoNyIpgF-1hbl8fJ1MiR41A0WCapu09aYVQ

Here is another one from the NIH themselves.

<https://www.nih.gov/news-events/nih-research-matters/lasting-immunity-found-after-recovery-covid-19>

Here is another one from the national library of medicine which is similar to the one above.

<https://www.ncbi.nlm.nih.gov/search/research-news/12560/>

When it comes to the issue of excluding people from society simply for their medical choice, it is wrong. Nothing medical should be mandated or a stipulation for access to anything basic a human needs.

With this vaccine we are in phase 3 trials. The science is not finished yet. Respect your constituent's right to choose. There have been side effects reported, including blood clots, strokes, myocarditis and death are being attributed to these products. Just recently Dr. Jessica Rose testified to the FDA that this vaccine should not be recommended for boosters nor given to children. The risks outweigh the benefits to humans. You can watch the entire 8 hour advisory virtual meeting for the FDA here:

<https://youtu.be/WFph7-6t34M>

These vaccinations are not without risk and should not be forced on any person. It is a basic human right to control one's own body autonomy and to make one's own medical decisions! Especially when it involves providing for their families!

Vaccinated people are just as likely to be infected with and transmit Covid as unvaccinated people. This is the CDC study to prove it. Please read the CDC study of Barnstable Massachusetts, July 2021 linked below.

<https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm>

- In this study of an outbreak of 469 people, 74% of the positive cases were fully vaccinated.
- Five people were hospitalized for Covid, four of them were fully vaccinated!
- Vaccinated and unvaccinated people were found to have similar viral loads in their nose and throat, meaning that they are equally likely to transmit the virus to others.

This study shows that vaccinated people are just as likely to carry the virus into a business or workplace. How can you justify excluding unvaccinated people from the workplace or from accessing basic services via businesses? The negative impacts of segregating the community far outweighs any proposed benefit. Please consider the negative impacts of your decisions. Businesses should not be given this burden to police. This is not their responsibility to enforce. They are already suffering enough. So many businesses - the backbone of our country - have had to shut down because they could no longer bear the burden. Let's not add this to our businesses list of burdens to bear. Do not do this!

I believe that if you do make the decision to segregate people based on their medical choices, you will only have further fueled the hesitation to vaccinate. I truly don't believe it will make anything better for anyone. And it will continue to breed mistrust of our local county, city, state, and national leaders and government. It does seem that you are not willing to hear the voices of all your constituents.

Is this really about health? Or this really about the federal funding our county may lose by not placing a mandate? Does the city of Bremerton, Poulsbo, or Port Orchard or does Kitsap county receive state or federal funds based on vaccination rates? Our state has one of the highest vaccination rates in the country. When the vaccine came out the goal was 70% vaccinated, I believe? We have met that goal and that does not include the folks who acquired natural immunity. What about those statistics? I would love to see what data you have that makes you feel justified in your decision.

Please don't make a decision that will further divide and segregate our county. Let's find a better solution. Let's treat the sick with available treatment options instead of sending them home with nothing until they can't breathe. Treatment is possible. And it doesn't have to be through the hospital or through vaccine mandates in the form of vaccine passports.

Sincerely,

Yolanda Abastilla
Concerned mother and long-term resident of Kitsap County

Hello Mr. Grellner,

Please vote NO on vaccine passports in Kitsap County.

Kitsap cannot afford a vaccination passport policy, and it would be discriminatory against those who cannot receive the vaccine for religious or medical reasons, as well as those who choose to decline.

Vaccine passports would be a terrible thing for Kitsap County and frankly, I'm disheartened the board would even consider it.

Please listen to your constituents!

Kitsap leaders,

You've a decision in front of you that provides you an opportunity to respect freedom of your fellow Americans, or the opportunity to disrespect your fellow Kitsap neighbors by making a decision that infringes on their personal freedom of choice, and in the process, endangering our already beleaguered local businesses.

Let us NEVER forget who we are, amongst the political fray of the times. We are folks who believe in individual rights, personal accountability, and doing the right thing. Who are we to MANDATE to our neighbors that they show proof of vaccination to be able to live as free Americans? Who are we to MANDATE to our local businesses behaviors that violate their Constitutionally given rights, their freedoms to succeed?

People at risk are protecting themselves. Try not to get caught up in the politicization of a horrible virus. Please have the physical and emotional health of your constituents at the forefront of your minds.

Be aware of the dangers of issuing cards to prove vaccination. Edify yourselves, if you haven't already. It's a slippery slope to unintended deleterious consequences. Don't be a part of that.

So let Freedom ring. It's the right thing to do. By mandating a card to prove vaccination is wrong, and I think you all know that.

Respectfully yours,
PJ Evans
Kingston

Kitsap Health Board
Re: Kitsap Public Health Board Meeting regarding Vaccine Passports

Dear Kitsap Health Board,

I am writing today to express my concern over Vaccine Passports in Kitsap County. I do not support this measure and I hope you will examine all comments before you decide to pass such a measure. My reasons for not supporting this measure are as follows:

1. As you are fully aware 71% of people in Kitsap County are vaccinated yet our cases are on the rise, not decline. I feel that we should be taking a closer look at the vaccine rather than the unvaccinated. If the vaccine was doing it's job we would be reaching herd immunity. At 56% of the population being vaccinated from Polio we reached herd immunity and within 10 years it was eradicated.
2. Just because a drug is FDA approved does not mean there will be no future effects from it. DES was an FDA approved drug for miscarriages. It was found later that it did not prevent them but rather caused them yet large pharmaceutical companies discredited the study and it continued to be given for almost 18 years creating many miscarriages.
3. In many people's eyes vaccine passports are just current day segregation. You will be forcing businesses to enforce a mandate they may not agree with and forcing individuals to get a shot they do not agree with. If they don't comply, their freedom to go anywhere will be taken away.
4. We currently have a shortage in the workforce and by forcing a vaccine mandate it will only make the shortage worse and make it much harder on the ones who continue to work.

I just spent 5 days in San Diego County and not only do they not have a Vaccine Passport they don't even have a mask mandate. Their population is 3.3 million compared to our 271,000. You as the people who represent this significantly smaller community need to consider all of the community. Although you may believe that is exactly what you are doing, keeping us all safe from disease, the unvaccinated understand the risk they are taking, their body is not something you should be able to regulate. Yes, it is spread at a slower rate if you are vaccinated but if the vaccine is doing its job the ones who are vaccinated will have a much less illness than the ones who are not. Merck has a very promising pill that

can be taken in the event you get COVID so not only are we now getting booster shots to help the vaccinated we also have a pill that may cure it if a person does get it, yet you will be taking unprecedented measures for something that may not even be in existence in 6 months. We have been told for years, "My body, my choice", this is no different. You need to be careful about taking away a person's right, you may agree with this one but you may not agree with the next one and you will feel your rights are being violated, where does it stop?

If this passes you will be segregating people, you will be dividing us even more than we already are, you will be taking away freedom from the people you represent and you will be hindering our workforce more than it already is.

Thank you for considering my letter,

Sherri Meek

Subject: Pease say no to vaccine mandates!

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Please take no action and allow the current situation to play out.

Any action taken on your part will be difficult at best to undo. Many businesses will suffer at your hands if you require vaccination. Citizens look to you for information, to open doors, not to divide and not to mandate. Good government is one that supports the citizens and listens to its citizens. The freedom to choose our healthcare is a human right. Today this is the decision on the table. Tomorrow it could be a decision that affects you and yours.

There are those moments in history when people can step aside from politics and propaganda and stand up for what is right and true. Please, please do not vote for mandates or any restrictions regarding the vaccinated vs the unvaccinated. You have a chance to be good humans and to be the best examples of our humanity. At this difficult time, please help our businesses to thrive and the families that run these businesses thrive as well.

You likely got into politics to help people, so please help us now. Kitsap does not need mandates. Kitsap needs thriving businesses and families. Kitsap needs to be united in supporting the medical freedom of its people.

Thank you for your time.

Dear Keith,

As a member of Kitsap county since 1992, a Bainbridge High Graduate (GO Class of 2000!), a Washington State University Graduate (Go Cougs!), a mother of 3 and wife to a Self-Employed man in Kitsap County I ask you to please help honor our NO. Please honor our proven natural immunity to COVID-19. Please respect our rights and freedoms to make the best medical choice for our children. Please do not encourage further polarization in our families, schools, community and county. PLEASE do not pass the burden of vaccine verification onto businesses. It is NOT their job, it's not what they are trained for, it's not why they started a business, it's not what will keep their doors open.

Are you 100% confident that vaccine passports would be the best and most beneficial for **ALL** members of Kitsap County? For **ALL** businesses? For **ALL** Employers? For **ALL** employees....?

If you have **any doubt**, than you owe it to the voters, your neighbors and the future generations of Kitsap County to find a solution that won't destroy our economy, our community and our legacy.

I appreciate your efforts serving Kitsap County. Please help the KPHD find a solution that doesn't ask people to draw an indelible line in the sand.

Sincerely,
Amber Augspurger

Subject: Today's Kitsap Public Health District Meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Keith Grellner,

I am a Kitsap based financial advisor and have worked with this wonderful community for the last 12.5 years. I serve many local business owners who have struggled heavily throughout the course of the pandemic, keeping up with regulations, working with dwindling resources, dealing with staffing issues, and trying, steadfastly, to serve their clients/customers amidst all the uncertainty. Through all these things one of the biggest challenges has been the changing regulations from week to week.

Adding to this the burden of policing who comes in the door to their business is an unjust burden. It is not the job of the business owner to check and judge the medical history of their clientele. It discriminates against people with a complicated health history. It is a crushing economic policy. And it is distinctly divisive as it puts members of the same community at odds with each other.

With all due respect, I urge you to reject all attempts of a vaccine mandate and/or vaccine passport. These are decisions an individual person should make with their doctor, not their local shoe store or favorite restaurant. Vaccine mandates and vaccine passports are not in the best interest of the community especially as we all band together to serve each other and to heal from the pandemic and its lingering effects.

I appreciate the hard work you do in serving the community.

Toward Higher Ground,

Matt

Dear Keith,

I appreciate you taking the time to read an email from a resident here in Kitsap County. I graduated from CKHS and am raising my family here in the beautiful Puget Sound. I believe I live in the most beautiful part of Washington State and even more importantly, the greatest country in the world. Every human on this earth knows that America is the land of opportunity and freedom. Mandating Vaccine Passports will do just what I have put in the subject line. I'm 30 years old and have very little risk of dying from Covid. I know there is risk of death or becoming a long hauler; and even other things that we may possibly have not uncovered in the last year and half. If my right to decide how to govern my own body is taken away I am not free. Now I know I could get tested over and over and over to then continue to provide for my family; but is that true freedom? To be given an **ultimatum** to provide for my family? I thought we were in America the land of opportunity and freedom. These mandates further divide our society. I'm sure you said the Pledge of Allegiance in school... "One Nation Under God, **Indivisible**, with **Liberty** and Justice for All"

liberty
noun

1. The condition of being free from confinement, servitude, or forced labor.
2. **The condition of being free from oppressive restriction or control by a government or other power.**
3. **A right to engage in certain actions without control or interference by a government or other power.**

Say NO to mandates requiring proof of MEDICAL STATUS. IT'S NOT THE AMERICAN WAY!

I will not support ANY business that requires my medical status. Continuing in this direction will send many more to leave this state; myself included.

Thank you for your consideration,
Alexa Harder

Dear Keith,

I'm writing to express my concern at the current state of conversation in our local community regarding vaccines and vaccine passports. Please pass this message along. I believe we, as a country, have lost a great deal of our ability to have a reasoned discussion without devolving into name calling and polarization. It is my intention, with this message, to express one citizen's view that I think is reflective of a much bigger conversation our country is facing at this moment in history.

My wife, my daughters and I have spent our entire lives in Kitsap County, with deep roots to generations past. I am a small business owner and am heavily invested in our county and it's people.

I am extremely concerned with the current political climate. Please understand that I mean no ill will towards you or any fellow members of the health board and understand that you all are tasked with difficult decisions.

I can not, in strong enough terms, oppose the idea of any form of top-down mandate regarding an individual's health decisions. Worse yet, the concept of a 'vaccine passport' is absolutely terrifying. Please consider the long-term ramifications of such ideas. Requiring citizens, whatever the short-term justification, to forever give up their freedom to make their own health decisions or participate in our society sets a tremendous precedent for future authoritarianism. I can not think of a single instance where a government (local or national) has gained new power over something and later voluntarily relinquished that power. Today, it's mandating an injection. Tomorrow, it's....? Please consider the long-term implications of the decisions you make, today.

I understand the current political pressure is strong to force the population to take the current mRNA vaccines. Can I offer a simple logic test to consider?

If the vaccines work, are those who are unvaccinated any risk to the vaccinated?

If the unvaccinated are a risk to the vaccinated, do the vaccines work?

Please allow each individual to make their own health risk assessment and health decisions. Please do not participate in this effort to further divide our society. Please do not consider any form of local government 'passport' for individuals to simply participate in society. Those of us who have chosen to take the vaccines have received them. Those of us who have chosen not to take the vaccines will likely not be forced into it. The current (and future) mutations of the virus will wax and wane along with the seasons despite our best efforts. This has been clearly reflected by the case loads since the beginning of this pandemic. Attempting to use the power of government, even the local government, to

remove individual choice from citizens lives is a short-sighted solution with dangerous long-term consequences. I ask that you choose freedom instead of force. Force is never a realistic long-term goal in a free society. I implore you to respect the informed health decisions of each member of our community.

Thank you so much for your time,

Cameron Goffrier

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Vaccine Passports are not the answer to combat Covid! Local businesses have already been through enough during this pandemic. If passports are implemented many businesses will not be able to survive. Our local economy will suffer tremendously and this will drive people away from our county and eventually out of our state. Passports and mandates of any kind are divisive and oppressive. They infringe upon basic human rights and are creating a medical apartheid in this country. Kitsap County will not tolerate this act of tyranny! Say no to vaccine passports NOW!

Hello,

In addition to my last email, I would like to add that there is a flaw within the healthcare system as a whole in treating covid-19 patients properly early on. There are several ways to treat the virus before it gets worse: monoclonal antibodies, and giving out pamphlets on how to treat at home to avoid hospitalization. I found a PDF from the Association of American Physicians and Surgeons that would be extremely beneficial for Kitsap County physicians to hand out to patients who test positive for covid-19. I have attached this to my email for your review from trustworthy physicians.

Implementing a vaccine mandate on any level is taking away from our right to choose and is very much overstepping your boundaries as elected officials in our county. I know myself and MANY others who will gladly take their business elsewhere in other counties. Do you really want the local economy within our county to collapse? It's we the people that pay your salary. It's we the people that vote you in. Furthermore, do you really think burdening the healthcare system with implementing vaccine mandates is beneficial?

Hospitals and clinics will lose countless employees from this enforcement. It doesn't take much thought to see the damage from coercing an experimental vaccine far outweighs the benefit. Please consider your choices wisely and listen to those who employ you.

Thanks for your time,

Charles and Stephanie Murphy

Good morning,

Please do not support mandated vaccines. Such a mandate would:

- trample on medical freedom
- increase division during a volatile time,
- likely devastate small businesses

Please support medical choice.

Sincerely,
Michael Hastings

Subject: Please protect our freedom

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Benjamin Franklin famously stated, "**Those that give up freedom for safety deserve neither.**" He wasn't talking about battling a virus, but his meaning is very clear. Freedom is of utmost importance in our country, and it should be protected at all costs, even if it puts our safety at risk.

The issue at hand is not whether the "vaccine" is the best thing for everyone, the question is whether the government can strip away the freedoms of those who don't do what the government thinks is best for our bodies. Please don't strip away the freedoms of good, law-abiding people because they hold a different view on the vaccine.

Today, as you meet, please make freedom the number one priority!

Subject: RE: Kitsap Public Health Board Meeting 10/5

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good Morning,

Today is not a good day for our family as we wait for a board of less than 10 people make a decision that affects our right to move freely. I couldn't help but listen last week as board members and the health officer mentioned the "safety of the community".

14 years ago (age 21), I was given a talk by my OB/GYN about receiving the HPV vaccine and how me receiving it would be for the "safety" of any future partners I had as well as myself. I had actually just finished 2 years worth of standard protocol treatment for an HPV infection (cervical cancer strain) just prior to receiving my first dose. Immediately after my second dose of the vaccine I had severe neurological effects in office. This reaction led my down a path to chronic health conditions in the 2 years following. At age 24, my neurologist advised me to go on permanent disability after having received intense 3-day week physical therapy as well as weekly deep tissue massages. I refused for the "safety" of my community. What good was I to my community being on disability where other's have to step up and take over? I was ONLY 24! This led me from a future in healthcare (i.e. couldn't lift patients, I couldn't type, I was collapsing at work) to Seattle working in lumber sales. I thought I might be able to sit for 8 hours a day. I was wrong. My pain was so excruciating that after 18 months and missing so much work due to my health issues, and doctor's appointments that my boss decided it was best to let me go. I was unemployed, and with no help from doctors, I finally took my health into my own hands in order for me to function each day. I still have a long way to go. Thankfully, I have 3 beautifully and healthy children today but I see some of the negative effects of my injury in them (multiple food allergies, environmental allergies, horrible muscle pains, collagen issues, and the list goes on) . I have horrible days to where I need the help of my personal community to get me through the day due to my injury 14 years ago.

I still struggle with finding "how" a pharmaceutical product that implies that its' for the "safety" of any community is being pushed when we know that vaccine injury IS real. VAERS shows that the COVID vaccine (Pfizer, Moderna, J&J) has the most reported injuries out of any vaccine. Harvard conducted a study estimating that only 1-10% of adverse events to vaccines are ever reported to VAERS. How does THIS equate to safety? How does this even remotely help improve the safety of our community? Vaccine injury takes up patient appointments, Urgent Care visits, ER visits and hospital admissions. And now, some of you board members are advocating for the coercion of Kitsap County citizens to get vaccinated knowing full well some of your citizens are going to end up with chronic health conditions due to the vaccine that will take up community resources.

I implore you to not even bring this issue to a vote today because it's clearly not about the safety of community.

Sincerely,
Yvonne Christenson

Hello. Thank you for your email concerning the Kitsap Public Health Board.

Please be aware that the Health Board is not scheduled to take any action at tomorrow's special meeting. The purpose of the meeting is to provide Health Board members an opportunity to discuss the current effects of the COVID-19 pandemic on Kitsap County's healthcare and EMS systems.

The meeting is open to the public, but is limited to the first 500 guests in the Zoom format. The meeting will also be broadcast live on BKAT and Facebook. Interested persons may access the meeting and the meeting materials through the Health Board's meeting materials webpage at: <https://kitsappublichealth.org/about/board-meetings.php>, and click on "Meeting Packet" for "9/28/21 Special Meeting". A video recording of the meeting will also be posted at the above within several days of the conclusion of the meeting.

We will be forwarding all comments received to the Health Board for review at their next regular meeting on October 5.

Best Regards,

This is a plea for civility and compassion for the people in our community.

If you are vaccinated you should be confident in your decision knowing that you are protected by the shot. If you have had Covid you should be confident in knowing that your body now has natural immunities that will protect you from getting Covid again.

Shaming the unvaccinated or telling them they are responsible for people dying of Covid is absurd.

Let us treat each other with civility.

Viruses will always be with us and no one escapes death. Let us live our lives to the fullest by loving one another, encouraging one another and respecting one another's private medical decisions.

It is time for all the mandates to end. We are in an endemic now and I believe the majority of Americans are responsible enough to continue all the things such as hand washing, staying home when sick, etc. that we have been doing for the last two years.

Sincerely, Tim and Anna Nanfito

Re: Vaccine Mandate for Kitsap County

Dear Mr Grellner

First let me say that I am a fully vaccinated adult who had moderate side effects from the vaccine. I regret my decision to take the vaccine. The lingering side-effects are unpleasant and disruptive to my every day life.

I urge you to vote NO on any and all vaccine mandates or passports for Kitsap County citizens

I urge you to look at the data coming out of India and Japan, where Covid deaths have all but disappeared due to the use of therapeutics. (*See below*). Ivermectin and HCQ are low cost and effective therapeutics to treat Covid-19, making experimental vaccines unnecessary, but hugely profitable.

I urge you to study the science and review the side effects of the current experimental vaccines. Go to the vigiaaccess.org website and search "Covid-19 vaccination". You will find that there are over 2 million people who have reported side effects to this experimental drug.

The only purpose of the mask mandates and vaccine passports is to spread fear

Ask yourself why is all dissent being censored?

Ask yourself why are doctors who disagree with the narrative being silenced?

Vaccine Mandates are not about controlling Covid-19, they are about controlling the people. Vaccine Mandates are unconstitutional, in direct violation of the Nuremberg Laws and are not acceptable in America.

I urge you to vote NO on any and all vaccine mandates or passports for Kitsap County citizens

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I am a resident of Kitsap County and am adamantly opposed to mandating vaccines for anyone, and it naturally follows that I am opposed to requiring proof of vaccination for entry into indoor public places.

On the metrics overview page I appreciate the case rate exclusion of the partially vaccinated for clarity. However, I believe that including those that are <14 days post injection as unvaccinated should also be excluded for clarity.

If any of the various mandates are implemented I believe a method to accommodate exemptions for natural immunity from a prior infection, medical exemptions, and religious exemptions must be included.

I urge you to seriously consider alternative perspectives than those dictated by federal agencies. In India, with only 5% of Uttar Pradesh's 230 million people vaccinated, early treatment for an outbreak of Covid-19 dropped cases by 99% in three weeks.

As I commented last week, I believe implementing additional draconian policies will not resolve your concerns with our local healthcare system and will likely make the problems worse.

Dear Keith,

I am writing as a tax-paying Kitsap County resident of 28 years, to implore you to uphold the law and your constituents' freedom in meetings regarding vaccine mandates, including the October 5th meeting. To mandate vaccinations in order to gain/hold employment, and buy/sell in non-essential businesses or otherwise, would be in violation of the Constitution of WA State, the Constitution of the United States, the Rule of Law, and the Nuremberg Code.

I, along with many concerned citizens in our county, are asking you to oppose the Kitsap County Health Department from imposing vaccine mandates on any business in Kitsap County. The health of our local economy is paramount, and to impose a proof of vaccine upon non-essential (aka small businesses) would be the death of our economy. Many small business owners have told me that financially they cannot withstand another discrimination (lockdown, proof of vaccine, etc) that gives large box stores and online mega-businesses the advantage.

Requiring proof of vaccination is in violation of constitutional rights of privacy of medical and personal beliefs. It will create an even deeper segregation and disharmony in our fragile communities that are already suffering from division. As the statistics show, the mental health of our youth has suffered tremendously during this pandemic, and creating more hate and division through passport mandates will incur tragic consequences. Your constituents hold you accountable to promote peace and unity, rather than division and isolation.

Under WA law RCW.49.60.030, citizens have the right to be free from discrimination because of race, creed, color, national origin, citizenship or immigration status, sex, honorably discharged veteran or military status, sexual orientation, or the presence of any sensory, mental, or physical disability, etc in areas including but not limited to employment and commerce. There are many who are not COVID-vaccinated due to a physical or religious reason, and to discriminate against these people would be in violation of WA State law. The United States of America is famous for the freedoms offered to every person, and for the future of our children we must fight to maintain these freedoms regardless of our own personal convictions.

For the sake of our economy, community, and democracy for future generations, it is critical that law is upheld, tyranny does not rule, and freedom to conduct our lives without discrimination prevails.

Thank you and may God give you wisdom and strength to uphold the law.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To the Members of the Kitsap County Health Board, and Kitsap County Commissioners,

Public health programs that are based on force are a relic of the 19th century; 21st-century public health depends on good science, good communication, and trust in public health officials to tell the truth. In each of these spheres, constitutional rights are the ally rather than the enemy of public health. Preserving the public's health in the 21st century requires preserving respect for personal liberty.

Therefore, I respectfully request you take NO action and allow the current situation to play out.

Aloha Kitsap County Leaders,

Thank you for caring so much about your citizens and I know you mean well by discussing and concidering Vaccine Passports, but this will devastate our community. It will destroy businesses, harm families, divide us in ways that will only cause more chaos than the stresses we are already under. I recently moved from Oahu, where Vaccine Passports are currently in place. It is horrible. Nothing good is coming from it. It is harming mental health, damaging businesses, harming families in ways that go very, very deep. Hawaii is fighting back and we will too if you pass this. We are free people, able to make our own decisions with our health providers. We are not a one size kind of people, many cannot even have the vaccine because of their genetics, or health status or issues. It is not right to mandate such a thing. Please use wisdom and truth in your decision, if you do pass this Vaccine Passport, judgment will fall on your heads, and you will be held accountable for the loss of business, income, health and more. You will be complicit in Harms Against Humanity. Are you ready to take on such weight and consequences? We will not allow you to make medical decisions for us. Do you really care about us? You will show us with what you decide.

Sincerely,
Camille Wood

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To the Honorable Representatives of the People

It has come to my attention that there may be a vote on Vaccine mandates for Kitsap County. I am what you might call a Covid vulnerable person because I am over 65 and have a co-morbidity (BMI >30) so I would like to be heard on this issue.

I **oppose any Covid vaccine mandates** for the following reasons...

1. **RISK**- If a person is worried about dying from Covid, they can get vaccinated or/and take appropriate actions such as masking and social distancing etc, to reduce their risk (i.e. individual choice to protect oneself)

2. **PRIVACY**- All (vaccinated or not) people have a right to privacy and having to produce medical records on demand would seem to be a violation of HIPAA (see

<https://www.hhs.gov/hipaa/for-professionals/privacy/laws-regulations/index.html>)

3. **BUSINESS**- I personally know 2 (of 4 , i.e 50%) business owners who have gone out of business due to Covid restrictions. If we can extrapolate these statistics to Kitsap, that would be half of the small businesses would be gone. Would this be good for Kitsap?

4. **CHOICES**- If one person decides to be vaccinated, and another chooses not to be vaccinated, who is most likely to die if they contract Covid? I know that the Kitsap website has done a good job of informing people of the risks and it seems to me, the unvaccinated have made their choice. Shouldn't a person have the right to make a choice about their own body

5. FUTURE - There are no long term studies done on this vaccine and it's affects on future generations, it simply hasn't been around long enough to know. And we must have proof that the vaccine does not have harmful short and long term effects before any mandates should be considered, and even then, the five other points made here would be part of the discussion.

6. RELIGION- If a person objects due to a religious conviction, that right is guaranteed by the first amendment of the Constitution. I would never come between a person and God with a human "mandate", would you?

Please consider what I've said and if you need additional information, feel free to contact me.

Good morning,

I am writing to express my concern over the possibility of a vaccine mandate and to urge you to oppose it.

It is not right to burden our businesses with enforcing vaccine mandates, they don't have the manpower or jurisdiction.

Requiring proof of vaccination to do business will create division between vaccinated and unvaccinated but we need more unity not less.

Peoples choices about medical interventions should be free and private.

Thank you for your service,
Emily

Subject: Vaccine Requirements Are Discriminatory

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello,

As our council members meet to vote on whether Kitsap County will require proof of vaccination for entrance into private businesses, I hope that members will consider the severe detrimental impacts these policies will have on our local businesses and community members.

Many states have banned these requirements because they recognize that businesses don't have the right to a person's private medical information. **Segregating people based on their medical status is immoral and illegal.**

I recently read an article that interviewed a restaurant owner in NY who says business has been down 40-60% since the state implemented a proof of vaccination mandates.

https://www.theepochtimes.com/mkt_breakingnews/nyc-restauranteurs-business-down-40-to-60-percent-due-to-vaccine-mandate_4025794.html?

With most Kitsap County residents, 12+ vaccinated, implementing these types of mandates seems overreaching and unnecessary.

I pray our council members will be convicted and recognize that the ones most negatively impacted by these policies are also the heartbeat of our community.

Respectfully,

Keith Grellner

Subject: Please Vote No on Vaccine Passport

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello,

I am writing to beg you to please vote no regarding any proposal of a vaccine passport.

Local businesses have already been hit so hard over the last couple of years. The Epoch Times, on October 1st, reported that restaurant business declined by 40 to 60% after New York City implemented their vaccine passports. It isn't fair to business owners to have to take a hit to their bottom line, or do the policing, on behalf of the government.

On another note, vaccine passports would institute medical apartheid and discrimination. As a biology major, statistics minor, with an emphasis on genetics and populations, I fail to see how punishing people who don't want to, or are unable to, receive a vaccine makes any scientific sense. People who have been vaccinated can still contract and spread Covid-19. Why is it okay for them to potentially spread the virus, but not others? Where is the science? Why did the CDC change the definition of a vaccine so that this ineffective, experimental, gene-therapy drug can still be called a vaccine, when it was proven that it didn't prevent people from spreading or contracting the disease? The whole system is corrupt. If the real goal is to stop the spread of the virus, it can't be done by giving the vaccinated a green light.

Why do people with legitimate moral and medical concerns face coercion and condemnation? Are people who don't want to use experimental therapies, with mRNA cultured from aborted fetal kidney tissue and with squalene sourced from hundreds of thousands of dead sharks, really bad people? Where is the science saying that these people are any more dangerous than those who have been vaccinated? There isn't any. They aren't.

I'm sure that you are being pressured to go along with someone else's vaccine passport agenda. Please stay strong. Please stand on the side of the research and the people of our community. The disease is 98.8% survivable, and research is showing that people who have natural immunity from recovering with their own immune systems are better protected by their antibodies than those who have antibodies as a result of the vaccine, especially against new variants. With vaccine adverse events being reported, which are hundreds of times higher than in previous years, the cure is worse than the disease. There are therapeutics available, which are cheaper and more effective than the vaccine.

At a time when Norway says that Covid-19 can now be compared to the flu and is removing its pandemic restrictions, why are we trying to tighten them?

When Israel is seeing more problems in fully vaccinated patients with the delta variant, rather than in non-vaccinated patients, why is the government so bent on forcing it on the rest of us?

Thank you for your time. Please vote no.

Keith Grellner

Subject: Please reject vaccine mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Keith Grellner,

I urge the Kitsap County Commissioners and all offices of the Kitsap County government not to impose vaccine mandates for any employees, businesses, schools, or citizens trying to go about their daily activities. Such mandates are un-American and are, instead, hallmarks of authoritarian societies.

While vaccines can help some people, they are not suitable for everyone. Some have already acquired immunity by having had the SARS Cov2 disease. Others have serious religious objections. Still others are allergic to the shot or have medical conditions that make it dangerous for them to be vaccinated.

Here are some examples. My good friend broke out in painful spots two days after receiving the vaccine. They did not disappear for many days. I might have thought it was a coincidence except for the fact that she was the *third* person I know to break out in painful spots soon after getting vaccinated. Another person developed a very large swollen lymph node which still remains. An acquaintance, a young and healthy young woman, has not had a period ever since getting the vaccine a few months ago. Dr. Malone, the inventor of the mRNA technique, has said that the lipid nano-particles from the mRNA vaccine travel through the body and settle in other organs, quite often settling in the ovaries. <https://undercurrents723949620.wordpress.com/2021/06/27/vaccine-causes-lipid-nanoparticles-to-accumulate-in-ovaries/>

Vaccine "passports" will force businesses to fire un-vaccinated employees. Workers who have been fired will be unable to buy groceries, pay rent, pay for utilities during the winter, buy gasoline, or basically exist. This will be a serious situation. Vaccine "passports" will also cause business owners to lose clientele, and many will have to close. They too will have no income. The county then suffers financially from the lack of revenue when there is no commercial activity happening, and no one can pay taxes. Costs for social services will rise due to the large number of people with no income. At the same time, there will be fewer workers to serve them. This ripple effect will become a tsunami effect--- and it is all predictable and avoidable.

Vaccine "passports" and other COVID-related mandates are unconstitutional. Your intent may be to save lives, but you must take into account the lives that will be ruined by the loss of livelihood, subsequent depression, and rise in domestic stress, and the lives lost with an increase in suicide rates.

Rather than impose restrictions, please relax restrictions and allow more normal activity as they are doing in countries such as Norway. Please reject vaccine mandates.

Sincerely,
Joyce Fiess

Subject: Proof of Vaccination

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

This proposal to mandate proof of a Covid-19 vaccination is an invasion of privacy with regards to personal medical care issues. Do we live in a socialist state or a free country? If you take this step, how long before all citizens are required to get permission from the local party headquarters to be allowed to do anything (get married, get a job, travel to the next city or county, etc.). Politicians at all levels are not following science with regards to this entire issue of this virus. If they were, the requirements for masks, etc. would have been lifted long ago. When I read the Seattle Times reports of the numbers of people in Washington getting the virus (and taking into account that this number is very likely to be very low, since there are likely thousands who have had the virus, never knew it and who now have the antibodies in their systems) vs the number of deaths attributed to the virus (likely inflated by the media) the simple math has been consistent that the percentage of deaths has never been greater than 1.5%. This figure is much lower than the politicians and media have been claiming to be the case! This number, as I understand it, is not far off from the normal death rate for flue in the US. It is way beyond time to stop this insanity!

Good day,

I want freedom to choose for everyone. Each person has a choice to take a vaccine or not, it's self-responsibility or personal freedom to steer your life. We only have one, so live it honestly & courageously! It's our job to take care of ourselves not change others. We need forgiveness, respect, community, connection with God & others to move forward healthy. You can't outlaw a smile! Your job is to protect our God given rights of life, liberty, & the pursuit of happiness. To serve & not enslave us. Respect and follow our constitution, which protects & limits government not the people. It's either by discussion or guns that we govern. Freedom is the answer to all this force, tyranny, & inhumane treatment of hero's including our police officers & veterans. Each life is priceless & made in God's image, created equal to all others, has purpose & meaning because God gives us value & life. Absolute power absolutely corrupts. We are all fallible. Layers & balance of powers help to create safety. The smaller the government, the bigger the citizen. Freedom will help in all these oppressive attitudes of control. We must grow a spine & stand for this beautiful opportunity of life, especially for our kids. Will it begin with you? Godly people must speak up respectfully or who else will? Evil can only win with good people being silent. The good book is the basis for truth & our true North. He is love; will use it all & shares His honor. There is a silver lining in every cloud. God bless you & yours. Sincerely,
Cindy Wedel,
Bremerton (360)434-3088

All,

Over the past 19 months, the covid virus has completely revamped how everyone lives through fear. Through this fear, every aspect of the government is swooping in to be fix of the mess they created. And people are still going along with it.

Freedom is quickly going away. Because of this selfish is a word being tossed out. People are individuals and one size fits all is not always the case. Free choice is still in play, while too many are not being told that they can't work without the shot after working all this time without it.

Dr Fauci has instilled fear into families that they cannot go outside, hug one another or just be around people they love. People need to be around others. Kids need to learn how to read faces for proper development. (<https://dana.org/article/losing-face/>)

Losing Face | Dana Foundation

In the summer of 2020, as school districts around the country were announcing mask mandates as part of their plans to safely re-open schools in the midst of the Covid-19 pandemic, a series of memes made the rounds on social media. While their content and images varied, the basic messaging of these posts was the same: Seeing others wearing masks would be detrimental to a student's development.

dana.org

By mandating that people need to have the shot in order to enter businesses will further the burden on fragile businesses just hanging on by a string. Local businesses have been hard hit and this may very well close more this coming holiday season. On top of all the layoffs, does Kitsap really want more shuttered businesses by the end of the year? Dear Kitsap County Commissioners & Kitsap Public Health,

Thank you for your work for the citizens of Kitsap County! Please do NOT vote for a Vaccine Passport for our county. This will only hurt small businesses. Residents have had ample opportunity to obtain a vaccine if they have wanted one. Please respect the rights of your constituents to make the right choices for themselves! A vaccine passport is unconstitutional & a major government overreach. Thank you for your time and attention to this matter.

Mr Grellner & Ms Garrido

Thank you for your concern regarding Kitsap County residents. I appreciate the work you do! However, I take issue with regards to the proposed vaccine passport for Kitsap County. Not only is this unconstitutional, it will also have a devastating effect on residents & small businesses. With Pierce County still open, we will do all our shopping there as opposed to Kitsap County. Many others in Kitsap county may not have this ability to obtain what they need in an adjacent open county.

Anyone who wants to be vaccinated has had ample opportunity to do so and the rest have personal reasons for not taking the vaccine. Thank you for your recommendations as experts, but please allow the citizens of Kitsap County to make the best decision for themselves without unconstitutional government overreach.

Sincerely,

Brad Lamkin

I wanted to write you all again to say thank you for the time you all put into our county. I know tomorrow has some big items on the agenda.

I would like to encourage you all to seriously consider the impact a vaccine passport requirement will put on our county businesses. As you are all well aware of the struggles many businesses have faced over the past 2 years, this would only bring farther hardships and I presume more closures.

As a newer member of this county I would really love to be allowed to shop local and support my county!

Thank you for your time,
Rebecca

Dear Mr. Grellner,

As you vote, I hope you will consider that the vaccine has side effects. Forcing a person to choose between their livelihood and a vaccine to which they are opposed is not only immoral, it can be deadly.

Jessica Berg Wilson died September 7th from Covid-19 Vaccine induced Thrombotic Thrombocytopenia (VTTT). She is one of a number of cases. She did not want the vaccine. It was mandated for her to be able to help at her children's school. Now she is dead.

<https://obits.oregonlive.com/us/obituaries/oregon/name/jessica-wilson-obituary?pid=200278331>

Please vote against any mandates or coercion and allow people to freely make their own informed choices regarding the vaccine.

REGARDING TOMORROWS DISCUSSION ON VAX MANDATE FOR KITSAP

1) CONTRARY to Joe Bidens comment, " This is not about freedom or personal choice ". This is exactly what its about!

2) Why is there NO MANDATE for; Members of Congress and their staffers, 59 million Americans on welfare, postal workers, ETC ETC.

AND BECAUSE WE NO LONGER HAVE A SOUTHERN BORDER, THOUSANDS of illegals have entered into this country and are not included in the mandate?!?!

Nearly 30% of immigrants currently held in federal detention facilities are refusing the vaccine – THEY HAVE AN OPTION, BUT WE DONT ?!

Additionally, more than 18% of immigrants who unlawfully entered the US earlier this year tested positive for COVID before being released by Border Patrol. At least 20% of illegal immigrant unaccompanied minors also tested positive for the virus.

THIS IS BEYOND HYPOCRISY. Please listen to the citizens of this county who are at their limits not only with a virus but so many other attacks on America as we know it.

How about this lets sit back and see how people and businesses in Jefferson and Clallam counties fare with their over-reaching mandate.

Thanks for taking comments.

Dear Kitsap Board of Public Health,

Please take no action on the proposed vaccine mandates and allow the current situation to play out.

Since you received Dr. Morrow's last memo and presentation on September 28, covid cases in Kitsap County have fallen 24.8%, and state covid cases have fallen 14.2%. The number of new daily cases in the United States has decreased 35% since Sept. 1. Worldwide, cases have also decreased more than 30% since late August. The situation is improving.

An additional vaccine mandate will not solve the stated problem of long term care facility outbreaks, crowded hospital beds, and ambulance delays. The current Washington State vaccine mandate will exacerbate the staffing issues at our healthcare facilities. Supporting medical facilities with reinforcements should be a top priority.

A business vaccine mandate in addition to state and federal requirements will push businesses to leave Kitsap. We do not want more empty buildings and unemployed citizens.

Requiring proof of vaccination at every public business is not reasonable. We also do not want to create a separate class of citizens in our community; historically nothing good has come from that.

Mandate policy should be decided with full legislative representation as it impacts the careers and livelihoods for our fellow citizens.

Please take action to lower our covid cases by improving our PCR testing result return time. There is no well-known location in Kitsap where PCR test results can be expected within 24 hours. Citizens need to be informed so they can quickly start or stop quarantine as needed. Right now, people who suspect they have a covid infection or breakthrough case have to weigh the financial cost of self-isolation for 3-5 days. Entire families often miss a week of work or school while waiting for this test information. Financially-challenged people can't afford to miss work. Same day PCR testing is a way to reduce covid spread and help our community economically.

Thank you for your time and service to our community. We appreciate your hard work.

Sincerely,

Thomas & Amber Timmerman

All,

I am writing to you again concerning your meeting Tuesday regarding the same subject that you met and addressed just one week ago during a special meeting.

I don't see anything that has so drastically changed in the last week that warrants having another meeting on the same topic to vote on the same options.

Why must all of the options (except the do nothing option) punish people? How does forcing people out of a job, rendering them unable to feed their families, not having a place to live, not having health insurance, nor being able to recreate to relieve stress at a stressful time help during this crisis? How does firing medical personnel for their convictions help our medical systems? How does firing our civil service help our government and communities? How does forcing people out of jobs help our families and economy?

There are better options than being punitive of people's personal convictions.

Facts:

- People have convictions for which they will not take the vaccine, even if it means losing their jobs and being forced out of their careers.
- The vaccines have limited efficacy. Israel is already on their 3rd booster shot. America is on their 1st booster. After 7 months, the protection is half what it was after being fully vaccinated. Even with a mandate, there will still be COVID-19 cases as the vaccine wears off.
- Mandates have dire side-effects. We are already seeing hospital wards across the country shut down because of the lack of medical personnel, emergency responders let go, police and firefighters dismissed, military units made non-deployable, airlines with flight delays from lack of staff, schools struggling, businesses unable to stay open for a lack of employees, mental health illness increases, serious treatable medical illnesses left undiagnosed, and many more all due to mandates.
- High vaccination rates do not lead to normalcy. States and countries with high vaccination rates are still experiencing high volumes of COVID-19 cases. All of these places still have restrictions on normal activities, travel, work, and public gatherings. Several have exceeded their medical system capacity despite their high vaccination percentage.
- A mandate is coercion by force. Preventing people from being able to provide for their families, to shop at stores, to afford homes, all because a bureaucrat in a health office wanted to see higher percentages of people getting a vaccine is wrong.

If hospitals are being overwhelmed, consider other ways to alleviate the burden on the emergency room. An example might be creating a central location strictly for COVID-19 patients, with vaccinated personnel. That maintains staffing at our other medical centers to treat non-COVID emergencies.

There are other options than mandates. Let's work together to find them.

Sincerely,
Kenneth Schlaudraff

Subject: COVID-19 Update: Current Impacts to Local Healthcare and Emergency Medical Services in Kitsap County

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

To all concerned,

I am writing to encourage you to take no actions regarding a vaccine mandate for Kitsap County.

The vaccines have been available for some time now. Those that have not gotten vaccinated have strong convictions for doing so. For some it is the fetal cells used in the testing and development of the vaccines that makes it a matter of conscience. For others, they have strong health convictions regarding vaccines.

While a mandate will punish those who have chosen to follow their conscience and personal convictions by forcing them out of their jobs, making them homeless, and forcing them onto our community safety nets (further straining limited resources), a mandate will do nothing to alleviate the health care system. Rather it will make the problem worse by causing even more problems that will lead to increasing burdens on our health care system.

We got through much of this pandemic prior to having a vaccine, we can finish this with it and without having to violate and punish the conscience and convictions of those who have chosen not to get vaccinated.

Sincerely,

Kenneth Schlaudraff

Dear Mr. Grellner,

I am absolutely opposed to mask mandates, Covid jab passports and any other form of denying my personal health choices.

To implement such mandates are a gross misuse of your "authority" and a serious breach of constitutional rights.

Sincerely,
Elaine Miller

Subject: Oct. 5th Public Health Board Meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello Keith,

Thank you for serving our county and handling the difficult task of receiving public comments. I am against any mandates and the implementation of vaccine passports. Our businesses are struggling to hire enough workers and with possible rocky economic times coming, we don't need to place one more hurdle in the way of businesses to attract patrons/employees.

I submitted an email before last week's meeting and felt it necessary to do so again because of what I saw discussed during the zoom call. I thought the mayor of Port Orchard and the North Kitsap commissioner voiced my views best. Let us keep encouraging people to be vaccinated, but at the same time let us care about the businesses. These two men both talked about letting the vaccine mandates and passports be an optional thing business owners could decide to independently implement. I strongly believe the government isn't in charge of public health when the death rate is still very low. Maybe the county could have a passport platform available for the community to use on an independent, case by case basis. That way businesses who want to use it as an advertising tool to bolster their reputation could do so, while businesses that didn't care as much could still function. Again, I am against mandates and passports, but if they were to happen, let it be up to businesses to decide if they will implement them and not have it be forced by the government. If it were to be forced, neither my family nor I would not patronize the affected businesses simply because we disagree with this level of government control.

Thank you again for your hard work and the difficult job you do.

Regards,
Sarah Pyke

To the Kitsap County Commissioners:

Thank you all for taking the dire situation our local businesses have faced since Covid was unleashed in our country over a year and a half ago. I want to thank you Commissioner Gelder and Commissioner Wolfe specifically for taking time at the last Health District Meeting to state your opposition to a mandate that would put the onus on our local businesses to police in order to stay open for business.

I was more than disappointed to learn that Mayor Erickson, who I respect, is sending out replies to her constituents relying on the holding in Jacobson v. Massachusetts for what sounds like (from what she said at the last meeting) a blanket mandate for Covid shots not only in her jurisdiction of Poulsbo but perhaps to encourage other jurisdictions to do the same relying on this case.

The case syllabus states: "It is within the police power of a State to enact a compulsory vaccination law, and it is for the legislature, and not for the courts, to determine in the first instance whether vaccination is or is not the best mode for

the prevention of smallpox and the protection of public health.” We have no law in the State of Washington that says as a matter of law adults must take a Covid-19 vaccination or lose their job. We have no local ordinance that says adults must have this shot in order to be present in public settings. Potential legislation is open to public comment, debate and notice and we have had none of that. Another major difference between what we have in the State of Washington and the Jacobson holding is the penalty was a \$5 fine which, according to official data.org’s inflation calculator would be equivalent to \$155.44 today. That is no where near losing your entire employment and ability to feed your family...that’s a speeding ticket. Smallpox had a mortality rate of approximately 30%, FAR higher than we see with Covid-19.

In Washington we also have other protections from bodily intrusion and for our own personal medical decisions. *In re Welfare of Colyer*, 99 Wn.2d114, 119-22, 660 P.2d 738 (1983) was a Washington State Supreme Court decision and held that an individual’s “. . . right to be free from nonconsensual invasions of one’s bodily integrity is the basis for the doctrine of informed consent which requires physicians to disclose to a patient all material facts and risks concerning the patient’s condition, thus enabling the patient to make an informed choice regarding the proposed treatment.” Citing *Gates v. Jensen*, 92 Wash.2d 246, 595 P.2d 919 (1979). RCW 7.70.050 lays out the necessary elements of proof in our state to support a legal claim of “Failure to secure informed consent” and RCW 7.70.060 lays out what an “informed consent” form looks like in our state that would stand as Prima facie evidence that a patient gave informed consent before any medical treatment was administered.

I cannot think of anything that would qualify more as a medical treatment than an injection into one’s body of foreign matter. Even if that matter was designed to help a person regain health, informed consent is required in our state. Why would our Board of Commissioners consider taking on such a sweeping “mandate” that circumvents informed consent? Or, if a mandate were issued, is the Board moving into a role of Health Care Provider for all citizens living within the county? If not what gives the Board the legal right to dictate individual medical care in a one size fits all mandate? Does a true emergency exist?

When I look back on when all of this began and I remember seeing video of people collapsing in China, being literally boarded up into their apartments it was all too horrifying to imagine and I do expect that some of that same coverage was viewed by millions in our country and it struck up fear. I have lost a few people to Covid-19...co-morbidities were present. I have also had half of my family get Covid, and I know personally a dozen people that got the shots and later became incredibly ill, all within the last couple of months. They were not hospitalized, so I will concede perhaps the shots helped them not get so ill they needed hospitalization which is a plus, but there was data out there to show that vaccinated people were actually the ones spreading the Delta Variant back in July. (CDC report shows vaccinated people can spread COVID-19, Emily Kopp, Roll Call, 7/30/2021) A more recent English study showed that vaccinated persons are less likely to spread Covid, but when you read the article they clarify that the Pfizer and Astra Zeneca reduced transmission but were more effective against the alpha variant compared to the delta variant. (Vaccinated people are less likely to spread Covid, new research finds, Akshay Syal, MD, NBC News, October 1, 2021). Sounds like good news for the shots in England except that we’ve been told for months now that the Delta variant is what is present now in our population. But, it’s confusing isn’t it?

The total number of US deaths attributed to Covid as of September 29, 2021 is 687,122. ([Statista.com](https://www.statista.com)) The total number for age groups below age 49 is less than 40,500. Obviously our older populations are more at risk, generally have more health challenges that have developed as they have aged, and their projected life spans are shorter by the nature of the age they have already reached. Covid-19 was reportedly the third leading cause of death in the U.S. in 2020, behind heart disease and cancer. (Covid was the third leading cause of death among Americans in 2020, behind heart disease and cancer, CDC says, Noah Higgins-Dunn, CNBC, March 31, 2021). We know that heart disease is preventable in many people and doctors also counsel patients to avoid certain things in their lifestyle, diet etc that could lead to a higher chance of cancer in their bodies. Yet, while we know all of these things we do not ban high fat foods, cigarettes and cigars, etc...we warn people of the dangers, give them data, and allow them to make choices. Covid ranks below these two causes of death yet we look to mandate shots, masks, school attendance, job retention and countless other facets of life because of it.

In my family alone I have one member that has been hospitalized twice at St. Michael's, had a procedure at UW Medical Center, all in the last year, and not ONCE has any of the doctors he has seen advised him to get a Covid shot. I have another family member with an autoimmune condition that was told by his doctor to "not bother getting the shot." Medical industry workers are quitting their jobs rather than be forced to take a shot they do not want or believe they do not need. People that work for Pfizer and Johnson & Johnson won't take their own product. Why? Where is the recognition that not everyone is the same and that the medical advice they get from their doctor should be sufficient for them to make a decision based on "informed consent?"

I was also disheartened to hear Mayor Erickson say at the last meeting that there was a need to get all the "correct" information out and that people think they know what is going on because they read something on some "guy's blog." She may have gotten some real interesting emails. The fact is though that there are many voices out there and sources that are professional in nature, that are being blocked by media and so no true weighing of information is allowed to take place anymore.

I ask that you take some time if you have not seen the information contained in the following sites before and at least consider what they are saying before the meeting tomorrow. The best decisions come from more information, not less. Thank you for your time in considering this information.

Very truly yours,
Sandra C. LaCelle

I am against any vaccine passport as it goes against our constitution which gives us medical freedom. This will also destroy all of the businesses due to people resigning and then the big decrease in customers. In otherwords it will tank our economy which is obviously what you want . I hope you give this a lot of thought and get beyond your political views and do what's best for your country Carolyn

To Whom It May Concern,

I'm writing to you to ask you to oppose medical segregation in our community. It is a human right to be able to decide one's own medical care. No person's job or ability to provide for their family should be threatened because they want to decide what is injected into their body. The last time people were forced to undertake unwanted medical procedures, the Nuremberg Code was created to protect future generations. I fear that history is repeating.

The Nuremberg Code states "The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

When you threaten people jobs and their ability to access basic services, you are placing them under duress and coercing them into medical decisions. These vaccinations have only been studied for 6 months time. There is no long term safety data. More and more side effects, including blood clots, strokes, myocarditis and death are being attributed to these products. These vaccinations are not without risk and should not be forced on any person. It is a basic human right to control one's own body autonomy and to make one's own medical decisions!

There are no studies showing that medical segregation improves health outcomes. In fact, similar measures are contributing to an epidemic of suicide, abuse and mental health challenges in our communities.

Vaccinated people are just as likely to be infected with and transmit Covid as unvaccinated people. This is the CDC study to prove it. Please read the CDC study of Barnstable Massachusetts, July 2021 linked below.

<https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm>

-In this study of an outbreak of 469 people, 74% of the positive cases were fully vaccinated.

-Five people were hospitalized for Covid, four of them were fully vaccinated!

-Vaccinated and unvaccinated people were found to have similar viral loads in their nose and throat, meaning that they are equally likely to transmit the virus to others.

This study shows that vaccinated people are just as likely to carry the virus into a business or workplace. How can you justify excluding unvaccinated people from the workplace or from accessing basic services via

businesses? The negative impacts of segregating the community far outweighs any proposed benefit. Please consider the negative impacts of medical segregation and discrimination as you make these decisions.

The decisions you make in the next few days, will be your legacy! Do you want to be responsible for a new era of medical apartheid? Do you want to be the cause of segregation and discrimination in our community? Are you willing to answer for these choices in the afterlife?

Sincerely,
John M. Cameron

Please do not require vaccine passports in Kitsap County.

You have received many emails with excellent reasoning and facts:

1. Over 50% in Kitsap county are vaccinated; passports are unnecessary. Social distancing, hand-washing, masking and natural immunity are curbing the COVID-19 virus.
2. COVID-19 Vaccines should not be mandated. There are NO studies that prove long-term safety. The drug companies are free from legal/financial liability for injury or death due to the vaccine.
3. Vaccinated persons can still get the disease.
4. Vaccinated folks still spread the disease; their nasal viral load when infected is the same as unvaccinated persons.
5. Natural immunity is superior to any human-made gene therapy based on a very short and incomplete viral RNA code.
6. Many people have medical issues which put them at RISK to unknown reactions.
7. 95-99% of people recover from COVID.
8. It's illegal to force or coerce vaccination / we have citizen rights afforded by our Constitution
9. Medical information is private information.
10. Passports create division, a two-tiered society
11. Passports cause UNDO stress on businesses, will restrict their financial recovery
12. Passports INSIDE the USA are government overreach.

The Health District should put resources towards HELPING to fight COVID before people are sick:

1. Make rapid test sites readily available.
2. Make antibody test sites readily available.
3. Get the word out NOW: There are several success-proven clinical protocols from renown physicians which stop COVID from developing when using EARLY treatment. The media is silencing them and information by promoting the vaccine only.

Protocols:

Subject: KITSAP PUBLIC HEALTH BOARD MEETING Public Comments October 5, 2021

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Dr. Morrow, Mayor Wheeler, Mayor Pataansuu, Mayor Erickson; Deputy Mayor Hytopoulos, Kitsap County Commissioner Gelder, Kitsap County Commissioner Garrido, Kitsap County Commissioner Wolfe, and Mr. Keith Grellner:

I am a long time Kitsap resident and business owner, a North Kitsap graduate and father of 3 all raised here in Kitsap. This is my beloved home.

I am very concerned about the overreach of government under the guise of protecting its citizens. I naturally resist at the point that governing authorities go from health recommendations to enforcing mandates that rob individual citizens of their God given and constitutionally protected liberties. Restricting freedom of access to our economy based on submission to a government mandated “vaccine” and forcing business owners to police their clientele is appalling to me and I hope also to you.

I am a medical professional, and I am absolutely amazed at the politicization of this so-called vaccine. While I am in no way an “anti vaxer” – there are many issues of concern with these products. The idea that all demographics must get the “jab” is not science – it is politics.

In my own case I am a survivor of a severe case of pericarditis secondary to the swine flu and my personal medical professionals do not advise that I get the vaccine at this point since myocarditis and pericarditis are listed as significant side effects. I also had Covid earlier this year and have verified natural antibodies which don’t seem to be a consideration in most mandates restricting the unvaccinated. I suspect many individuals also carry this natural protection which current science demonstrates is vastly superior to the vaccine and yet this is largely ignored by government mandates.

I don’t mean to make this a discussion of just my situation or the efficacy of the vaccine. I do want to remind you that the current science is anything but clear on this vaccine’s safety and efficacy. In no way should government authorities be stripping away individual liberties and coercing people to submit to something as personal as having an experimental substance injected multiple times into their bodies. This should be a personal choice!

Our economy has been devastated enough already in the last year and half by restrictions and shutdowns. The science shows clearly that lock downs and restrictions have had little effect as comparing the most restricted regions with the least shows little if any difference. So, this being the case – why do governments continue to overreach to the point of restricting our God given liberties?

Please don’t become one of these governments!

My family loves Kitsap County! This is OUR home.

Sincerely,
Michael Ryan DVM
Seabeck , WA

Subject: NO vaccine mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

We say NO to covid passports! We say NO to vaccine mandates of any kind! We have a sovereign right over our bodies and our health decisions. The government has no authority or power to deny us that right. Doing so is a major violation of our Constitutional Rights and our Basic Human Rights!

Think about what you are openly discussing: You are proposing that the government has the power to remove people from society if they don't make the health decision that you decide. Covid survivability rate is 99%. Most of us are barely affected by it. To us, it's a cold we easily fight off with no treatment. Where's the discussion about natural immunity? But you're proposing that we HAVE to take an experimental shot which doesn't stop the spread of covid and has had severe side effects for many. Side effects that are much more serious than covid. And you're saying that if we don't do as the government has decided then we are no longer allowed to work or feed our families. We can't buy groceries?! Is this what you are seriously proposing?!!! This will devastate our community. What do you think will happen to people?

These strategies being put forth are clearly not about health. We have followed them for 18 months and we are worse off now than we ever were. And your solution is to do more of the same? Ridiculous! Mandates DON'T WORK! Masks don't work! The vaccine doesn't work! The vaccine has made things much worse! Since it's use covid has spiked and become worse. I'm sure that's just a coincidence right? Enough with this! Fauci, the CDC, FDA, Inslee and others have prolonged this! Every state or country that has followed Fauci is worse off. It is time to end it! WE WILL NOT STAND FOR OUR RIGHTS TO BE TRAMPLED ANY LONGER!! Do you understand?!!

Now for the good news: Many places have had enormous success combating covid. They know how to successfully defeat it. And it's not with masks and vaccines. Look at Uttar Pradesh in India. Truly amazing! Why are we not looking at others success and modeling off of that. We all know why and it's horrible. The people of this County, this State and this Country are paying attention now. You can no longer operate in the darkness. We will not accept anything but truth. Stop following the Fauci Follies and lets put an end to this pandemic. We all want that! It's time to choose whats right!

Ryan Sage

Subject: COVID Passports, Mandates and Actions Under Consideration October 5, 2021

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Kitsap Public Health
Board,
ber 4, 2021

Octo

I am writing to address any actions under consideration in response to COVID-19.

As written previously, **your recommendations should not overstep both the Washington State and US Constitutions that protect a citizen's right to work (livelihood), engage in business (to include necessities such as food, clothing, shelter, etc.) and freely travel**, simply because they did not receive a vaccine. Any of these excessive measures deprive a large populace of their constitutional rights and blatantly "*assumes*", **without proof**, that they are a danger to society without the vaccine. Rights should not be taken away on such generalized subjective irrational *assumptions*.

Vaccines HAVE NOT BEEN PROVEN to stop COVID-19 transmission, as documented in numerous world-wide accounts of thousands of "break-through" cases (US, Israel, etc.). Only the uneducated or ill-informed now believe that vaccines stop COVID-19 transmission. The vaccinated pass COVID to both other vaccinated and unvaccinated people. Vaccines are not "*the*" solution.

COVID-19 vaccines **have caused thousands of deaths** and **tens of thousands of serious injuries** (15,386 deaths, 99,410 serious injuries between Dec 14, 2020 and September 17, 2021) documented by the CDC's own VAERS system. This is no conspiracy, hype, or ill-informed misinformation. These are documented **minimums**, that are suggested to be **well "under reported"** by numerous academic studies of the VAERS system itself. The academic studies suggest that the actual deaths and injuries may be 10 to 100 **times higher** (multiply).

Keep Health Care Workers. Don't push them out of their jobs with mandates. They know the risks; they work in the trenches. **If Vaccines are so effective, why don't they want to take them?** It should be their choice; they see the effects every day. **WE, should learn from them, and not vice versa.**

One size does not fit all; every human being has their own health history, strengths, weaknesses, and decisions to make about **their own body**. COVID recovered citizens have *superior immunity* and don't need a vaccine. Others have a *robust immune system* and don't need a vaccine. While some choose to *undergo*

protocols that have been developed during the pandemic, proven effective, and don't need a vaccine. If **you choose** to get a vaccine, it needs to be **your choice**.

The Kitsap Health Board should take an immediate proactive, early outpatient treatment of **proven protocols** (i.e. Hydroxychloroquine, Ivermectin, Vitamin D, NAC, etc.) to stop the spread and eliminate COVID-19. **The vaccine is NOT the only treatment** (and a poor one at best since it can't stop the spread of COVID).

DO NOT MANDATE COVID-19 vaccines to our youngest population groups (12-17 years-old or younger). It has been "**well documented**" for many to suffer severe adverse reactions, such as myocarditis, pericarditis, cancer, blood clotting, etc. which are life threatening, **and in many cases cause irreversible damage**. Their natural immunity and recovery rate puts them at an extremely low risk from COVID-19. **DO THEM NO HARM**.

We're counting on our Health Care professionals to make **wise decisions** based on the **preponderance of scientific evidence**, not influenced by media propaganda. I regularly review reports and evidence circulating from scientific papers, doctors (both in research and practice), along with reviewing statistics and data about COVID-19 and its treatment(s). We must be vigilant, reestablish our commitment to, **DO NO HARM**, and put the patient and doctor relationship at the forefront under the tenets of freedom, dignity, medical privacy, **AND CHOICE**.

Thank you

Michael Palmer, BSME, MScEng, MBA

I am opposed to vaccine mandates and believe it best no action be taken and let the current situation play out for the following reasons.

Vaccine mandates are unconstitutional.

Business owners and venues should not be required to be police for government at any level.

Not everybody wants or trusts the vaccine, therefore it should not be forced on them.

Vaccine mandates have had a negative effect on jobs in the medical profession and law enforcement just to name a few. We don't need that in Kitsap County.

Mandates, lockdowns and cancellations have caused loss of business and business closures plus considerable physical and emotional distress.

Enough is enough!!

I strongly vehemently oppose all recommendations except choice #1 “Take no action and allow the current situation to play out”

I cannot believe that our country, states, and local government has come to the conclusions that they have the right to restrict our free movement in society and demand dangerous, forced medical mandates to participate in a free society. It is a fact that Covid 19 vaccines do not prevent anyone from contracting Covid or passing Covid to others. How would forcing people to be vaccinated to enter businesses and public spaces prevent the spread? Nonsensical. Any person who wishes to have the vaccine has the opportunity to be vaccinated. It is a known fact that Covid vaccines have serious side effects including death and serious injury. I choose to take care of my health and immunity in natural ways. No alcohol, smoking, drugs, sugar, processed/junk food and never use toxic products. Taking vitamins and supplements that support my immune system. I never get sick. Why should I be prevented from moving about in society when I am a perfectly healthy, responsible adult? For people with concerns and those that don't live a healthy lifestyle there is the option to shop online for home delivery or pickup without entering the place of business. Restriction of free movement in society is unconstitutional and tyrannical.

“There is no ethical reason for taking a treatment for somebody else. It's an unethical, immoral, and criminal construct. You can only prescribe a medication for someone who can benefit from it, and it's up to them whether they take it or not,”

Even considering all of the above a person's medical decisions are of nobody's business but their own. The government at any level does not have right to make medical decisions for any individual. The government does not own our bodies.

If these mandates and vaccine passports are implemented I will not patronize any business or venue of any kind in Kitsap County. I hope you can sleep comfortably at night knowing that you have destroyed local businesses that are working hard to stay afloat. Participating in these mandates and vaccine passports only reaffirms that this is not about health and is only about power and control. Do the right thing. Do not implement vaccine mandates or passports.

Sincerely,

Nancy Michelli

Subject: Opinion: Proposed Vaccine Mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

I respectfully ask you to vote AGAINST any vaccine mandate for our county in tomorrow's meeting. A "proof-of-vaccination" mandate, while *possibly* having a positive effect on the current hospital situation in the short term, would establish a very dangerous precedent, eliminating bodily autonomy, a fundamental right of every human being. It would certainly put further stress upon our already struggling local businesses and job market. Discriminating against people based on their personal, private healthcare choices will only cause additional division and strife within our community.

We are told that our local medical facilities are experiencing delays in treatment availability and personnel shortages. Personally, I am curious to know what percentage of healthcare workers have recently been terminated or coerced from their jobs in response to the governor's vaccine mandate, and whether our health systems would be experiencing this degree of stress if no such mandate had been imposed. We depended on these individuals at the beginning of the pandemic, and it seems foolish, if not completely unjust, and quite obviously counterproductive, to place such demands upon those who served us faithfully from the start.

As you know, healthcare is NOT one-size-fits-all, and many people have legitimate concerns about the safety, efficacy, and necessity of these vaccine products, especially as they contain technology that has never before been approved for use in humans. The fact that they were rushed to market, bypassing many of the established safety protocols is understandably concerning, and as we have no long-term data on the effects, good or bad, that will result.

In addition, the fact that no provision is made for those who have already recovered from Covid-19 is equally concerning, as vaccinating these individuals is pointless at best, and may indeed be dangerous. It also raises questions as to motives behind the demands for universal vaccination. In a time where misinformation and propaganda are rampant, and trust in politicians and other public officials is low, such a blatant attempt to force an experimental medical procedure upon the public is more likely, in my opinion, to make these cautious individuals MORE likely to distrust and therefore refuse the vaccine. I believe you would better serve our community by letting people be responsible for their own healthcare choices.

I trust that you desire to make a wise choice in this matter and hope that you will listen and take into account the concerns of many of us in the community.

Sincerely,

Brittany Thomas

Keith Grellner,

We are residents on Bainbridge Island and do not believe in showing proof of vaccination to do business. You should never have to disclose personal medical information to conduct business or have to ask for medical information as a business owner. No matter how you dress it up it is discrimination at its core. We will not be doing business with companies who impose such restrictions and will take our money elsewhere. Our businesses should not have to impose such discriminatory policies and businesses will suffer. Small businesses have been through enough hardships over the past almost 2 years. We hope you decide against bringing segregation into our community. I have yet to meet one person who is for this type of discrimination. Thank you for your time and consideration on this matter.

Best Regards,
Kenny and Breanne Walton

Subject: Vaccine Mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

I have been a resident and registered voter of Kitsap County for over 40 years.

I am greatly disturbed by the possibility of a proof of vaccine requirement under any circumstances in Kitsap County. While I am not opposed to anyone getting the vaccine, I believe it is a person's individual choice whether or not they get it. I also believe no one should be punished by not allowing them to be employed or even allowing them to visit a grocery store! Haven't our small businesses and restaurants suffered enough from the shutdowns and mandates? How many more would be forced to close their doors permanently?

I have a close friend who received the vaccine and developed blood clots in her legs and lungs; she will be on medication for the rest of her life and under close supervision of her doctor. My niece had Covid before the vaccines were available; she had no symptoms but tested positive after being in contact with someone with Covid. My niece then got the vaccine which landed her in the hospital with severe side effects; she is now on heart medication. I have two close friends (in Kitsap County) who have been battling Covid for over a month now and have a long way to go before they recover sufficiently to even leave their home....yes, they had both been vaccinated.

These personal examples (and there are many more reported) give me pause as to the safety of the vaccine, and more reason that individuals should have the right to make the choice without repercussions.

Respectfully,

Joanne Gower

Subject: Kitsap Vaccine Mandate Vote

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Administrator Grellner,

I am writing to voice my strong opposition to the vaccine mandate, and to the proof-of- vaccination cards that are being considered in our county.

My husband and I are in the ministry. I am dependent upon him for the financial support of our household. He also works part-time at a local small business with multiple vendors, the income of which supports our family and our daughter's family.

Any vaccine- status discrimination for businesses in Kitsap County will jeopardize my husband's job. He will either lose his job as an unvaccinated employee, or due to significant loss of clientele, leading to business closure. If he loses his job, we will lose a vital source of income, leading to basic lifestyle burdens in: transportation (as we only have one vehicle), fuel needs, grocery shopping, and the extra time required to travel to "open" counties to procure goods & services-the normal provisions of every day.

This mandate would cause an extreme hardship for us as we strive to serve and minister to people on a daily basis. Regardless of vaccination status, we need access to the community venues and services for the people we minister to, and for ourselves.

My choice is to take personal responsibility for my health and well-being, both spiritually and physically-- a freedom of choice supported by the Constitution that we hold dear as American citizens. This step, should the vote pass to enforce the vaccine cards, or any other vaccine-related mandate, is foolish and detrimental. Many people who would vote against it will see the need to take action in order to ensure freedom to provide for their families as they always have done, in a place they call home. This mandate, and, if passed, would be a shameful act of discrimination for our community.

There is a lot of misinformation and extremism on BOTH sides of this issue. However we are dealing with a virus that cannot be control. The extreme measures being used and proposed are not going to help the situation or change outcomes in a positive way. It will increase the extremism, panic measures and responses by everyone involved. It will harm local businesses and communities. They are logical people who have done due diligence in making informed decisions for themselves and are NOT a part of the extreme responses unfortunately you and many people have had to deal with. I don't on any level agree with those extreme points of view or how they get expressed. I can understand how they got there though. People are fed up with government over reach.

People have the right to decide for themselves what is best medically for them, and weigh out the consequences of EACH outcome for themselves. There are consequences for not getting the vaccine and for getting the vaccine. That should be acknowledged. At some point a decision must be made to where is the line in which the government policing will stop. How about smoking? The extreme obesity in this country? Rampant drug use? People make choices every day that impact the medical community and society. Heart disease, diabetes, COPD just to name a few could be slowed down or almost eliminated if people made different choices. Is it the "governments" to police that?? Hospitals are filled with people who have made stupid choices and choices the general public wouldn't make. It is not the governments job to police that.

People need to hang on to their medical freedom of choice. That being I am not anti-vaccine; I don't feel the choices for vaccine are in my family's health benefit at this time. There is another vaccine Novavax that I feel would be a better option for my family. I am not alone in this thought and as it is MY body and the bodies of my immediate family, I feel it should be our choice. I dont agree with forcing a blanket policy on everyone. People have other medical concerns (heart issue, allergic reactions etc) that are a bigger concern to them, than the actual virus.

Im sorry some people are pushing personal and professional boundaries. I hope you can see past the "few" bad apples to see there are intelligent, thoughtful and concerned citizens who want their voice and personal freedoms to TRULY be heard and respected.

Sincerely,
Kristy Krieg

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Hello,

I would like to comment on the vaccination requirements special meeting.

I am very concerned regarding to consideration to require everyone to be vaccinated in order to be allowed entry in to businesses in Kitsap County.

I strongly believe that forcing people to be vaccinated is an absolute violation of 5th and 14th amendment rights.

Asking small businesses, and potentially “all” businesses to require proof of vaccination before being allowed in their businesses, is not only burdensome, but again, a violation of their rights, as well as a violation of the consumers rights. It would also be yet again, another blow to this County’s economy. Businesses are already hurting from previous forced closures and requirements. Many businesses have gone out of business already. This would be another hit to the economy that will do serious harm and is not necessary.

Vaccines have not been out that long, and NO potential long-term side effects will be known for some time. There are also numerous people that have had serious side effects from the vaccines, including death. Additionally, there are more and more “break-through” COVID cases, showing that the vaccines currently available, are not as accurate as they are claiming to be.

I don’t feel the County has the right to tell me what to do with my body, and under the Constitution, this is in total violation of my rights.

Please pass along my concerns for consideration in the 9-28-21 special meeting.

Thank you for your time and consideration.

Subject: Kitsap Vaccine Mandate Decision

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,

Thank you for the opportunity to share my experience with the COVID vaccine mandate with you. I hope you will consider my story as you make a decision about vaccine mandates here in Kitsap County.

My name is Holly. I was born and raised here in Kitsap County. Last spring I graduated from the Olympic College Physical Therapy Assistants Program after a very difficult academic year due the heavy COVID restrictions. I'm sure you can appreciate the difficulties experienced by our class as we not only had to negotiate virtual classes, but also find a way to fulfill the hands-on laboratory experience credits required to complete the PTA program. All the while, I worked part-time at a local business. Thanks to our instructors, program staff, and self-advocation, our class graduated with only minor delays.

Weeks of devoted intensive study to prepare licensure exam to become a licensed Physical Therapy Assistant. Even before I found out if I had passed the exam, I began hunting for a job—hoping to find one here in Kitsap County where I have lived for so long, and have family nearby. You can imagine my delight when I found a job opening for a position that suited my personality perfectly at the new St. Michael's Hospital in Silverdale. After completing the interview process and receiving the news that I had passed my exam, I eagerly began my new job in July—looking forward to months and years ahead practicing in a field I love, giving back to the members of our community.

In August, I was notified that there was a new COVID vaccine mandate which threatened my joy and ability to make a livelihood in Kitsap County. At first, I was hopeful that the mandate would not prevent me from working—I have a sincerely held religious belief against getting the COVID vaccine. I applied for a religious exemption and continued working hard to improve as a hospital employee, and physical therapist assistant.

After weeks of waiting, last Wednesday, I was notified that my religious exemption was denied—even though several of my co-workers had theirs accepted. I am now faced with losing my job because someone decided my religious beliefs were not valid. I never thought I would see the day in the United States of America where I would be fired because my religious beliefs stop me from getting a shot.

Now I hear that you are considering a COVID vaccine mandate here in Kitsap County. It makes me sad to think that our local elected officials would put their own citizens in danger of facing the same

prejudices I am now facing. To my way of thinking, it doesn't matter if someone declines the COVID vaccine because of religious beliefs or because of health concerns—these people will be treated as second-class citizens in the same way I am now being treated.

I urge you to not pass any form of vaccine mandates for Kitsap County citizens. Please spare your constituents the pain of being singled-out for their beliefs.

Sincerely,

Holly Swope
1750 Nebraska St SE
Port Orchard, WA 98336

Subject: Government Vaccine Mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner, please think very carefully about the consequences of the action being contemplated by the local government boards regarding a vaccine mandate for entering stores and other public places.

How odd that a requirement for a government issued ID card, for the Constitutional right of a Citizen to vote, is held by some as voter suppression. But a vaccine passport required by the government in order to buy food, or go into church, or go to the doctor's office, or to buy shoes for children, IS PERFECTLY REASONABLE? Really?! It not only smacks of 1930's Fascist Nazi Germany (armbands are the next step from vax cards) but it will create untold havoc and expense for retailers and other public venues. It will bring any economic recovery to a screeching halt.

There are prophylactic medications that can help to prevent Covid infection as well as medications for early treatment that resolve Covid symptoms before they ever get to the stage of needing hospitalization. The wide availability of these medical treatments is what the public health board should be advocating. This is what a public health agency in a free Republic should be doing.

Subject: Local business owner concerned about mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I am a small business owner here in Kitsap County. I am writing to ask that you please **DO NOT** mandate business owners to require employees to get and show proof of the Covid vaccination. Enforcing a medical procedure should not be something I am responsible for, and I disagree **STRONGLY** with the steps Governor Inslee has been taking. Putting someone's livelihood in jeopardy for not getting the shot is wrong on so many levels. And, what about all the exemptions that are going to be filed if you enact this mandate on employers - are **WE** going to have to deal with that?? As a business owner, I already work full time, sometimes more than 40 hours a week, I can't handle more paperwork and stress...and our industry, like many others nationwide, is experiencing a shortage of qualified individuals who are seeking work. Having to let go of the very qualified employees I currently have, would create a huge burden on my business being able to continue to operate normally.

I am grateful to be a resident of Kitsap County. I have lived here for 38 years. It's been sad to watch the demise of Seattle over the years as the mayor and city council have continued to ruin that great city. Please do not bring Seattle and King County policies, beliefs and protocols over here to our beautiful Kitsap County....leave the dysfunctionality on that side of the water!

If you haven't already done so, I encourage you to read through all the articles of citizens, employers and companies who are currently suing Gov. Inslee and/or the state of Washington for the recent vaccine mandates....read the overwhelming comments on your City Council Facebook page, look to the protest that was just held in Olympia at the Capital yesterday, with thousands in attendance ... If after all that, you still feel compelled to push forward with a business mandate for employees, at least please consider natural immunity for individuals who have already had Covid, and also allow Covid testing as a substitution to forcing a vaccination on people.

Thank you for your time.

Subject: Appeal To Reject Implementation Of Requirements To Show Vaccine Documents In Public Settings And Venues

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To whom it may concern,

As a resident of Kitsap county for the last seven years, I am requesting that there be no prohibition and that you do not implement restrictions regarding admittance to public events, indoor venues and facilities, such as restaurants and gyms, small businesses, stores, including shopping malls, and grocery facilities.

We have lived with flu and many other communicable diseases such as HIV, tuberculosis, measles, hepatitis B, Ebola without exacting or implementing draconian measures such as those that are now being proposed. Presentation of vaccine documents and paperwork have never been required. Much more objective, logical, and reasoned consideration are warranted in this matter. It appears that there is a highly emotional component to actions that are being suggested.

I want to be perfectly clear and transparent that I am not an anti-vaxxer, nor have I ever been. I worked in healthcare in a major regional hospital in Renton, WA for almost 20 years as a healthcare provider. I always took the vaccinations (annual flu shot, hepatitis B, tuberculosis test, and other vaccines). My children also have had vaccines suggested by school and government.

In addition there are the healthcare workers who were admired, praised, and applauded during the 18 months that they selflessly and courageously showed up to their Hospitals & Medical Centers day by day. They worked tirelessly 12,16, 24 hour shifts and more treating patients who had this novel virulent disease, Covid-19.

Now, in the last few weeks, Hospital Administrators and County Officials are performing acts of betrayal in my opinion, using threatening, even bullying tactics to make these same seasoned heroic medical professionals choose between receiving a vaccine or losing their careers. Upon termination these health-care workers (M.D.'s, RN's, PT's, OT's, SLP's) also will lose their own medical insurance, as well as their distinctive "calling". Their families who suffered the loss of that medical professional for the past 18 months, also are caught up in the same conundrum.

As you are aware, there has been a shortage of healthcare professionals throughout the pandemic. Is the plan now to crater health care by exacerbating the present and very persistent employment shortages in hospitals & medical centers? Laying off and terminating additional healthcare workers will do exactly that. These actions are shortsighted and unreasonable.

I have a medical procedure that was postponed due to Covid shortly after April 2020. The procedure screens for cancer. Just this month I will be having that procedure completed--18 months beyond the Doctor-recommended timeframe. What could that same scenario look like with demonstrably lower medical staffing? There has to be a better solution such as testing once a week using the rapid-test machine by Abbott with 5-15 minute results.

Small businesses should not have these onerous regulations placed on their backs. Checking vaccination records/documents should not be required. These businesses have suffered more than enough with numerous shutdowns. We are a nation that prides itself on personal and corporate freedom. Covid numbers are declining sharply. It is not the time to rescind the freedom to shop, dine indoors, or to exercise indoors or outdoors. It is shortsighted, very inconsiderate, and careless to force our healthcare professionals into a binary choice-- be vaccinated or lose your career. No one does that to their heroes.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner and SK Health Board Members,

I am writing again as a concerned SK resident. I am 60 years old and have lived here in South Kitsap all of my life. Please say not to any government overreach in our community. A vaccine mandate and proof of vaccine will be devastating to our community, schools, churches, small businesses etc. We are American citizens, this is not any part of who we are. We have a constitution and a bill of rights. We stand for liberty and freedom. Freedom to choose what we put in our bodies. I am not anti-vaccine, but I am totally against anyone telling me I need a vaccine for something I already have natural immunity to.

Our community and our country has suffered enough with government policies and overreach - we will be paying the price for years to come. Please stop the insanity!

Thank you for your work and your service to our community.

To the Kitsap County Health Board --

We all agree that it is important for the Health Board to make decisions grounded in science, a way of understanding the world based on a systematic methodology of evidence, not feelings or strictly an appeal to authority.

Science does NOT equal vaccines and the evidence in support of the new mRNA vaccines is rapidly failing. Unfortunately, many trusted organizations purporting to “follow the science” have been unduly influenced by money, controlled by the very industry they purport to regulate, which hampers the effort to respond appropriately to what is looking more and more like a bioweapon leak, intentional or otherwise.

Thanks to the information age, we have access to many sources of truth from around the world and intelligent and educated community members have made appeals to this board based on factual information that is being heavily censored and suppressed from the mainstream. Not all board members have the time or inclination to do their own research but it is insulting, to say the least, to hear members discount all outside data, from renowned doctors and scientists, thinking they have a monopoly on truth. Were you aware of this recent study, for example, from the *European Journal of Epidemiology*?

European Journal of Epidemiology
<https://doi.org/10.1007/s10654-021-00808-7>

CORRESPONDENCE

Increases in COVID-19 are unrelated to levels of vaccination across 68 countries and 2947 counties in the United States

S. V. Subramanian^{1,2}  · Akhil Kumar³

Received: 17 August 2021 / Accepted: 9 September 2021

And have you even considered the possibility that it is our own CDC, captured long ago by the pharmaceutical industry, that is spreading a great deal of misinformation while hospitals and health administrators alike have benefitted from additional “pandemic” funding used to influence their decision-making? By admission now, the vaccines are not effective at preventing infection or spread (few of us were at risk from covid last year anyway) and are causing horrible consequences that are severely underreported. Many new infections occur within 2 weeks of inoculation and are counted as “unvaccinated” to skew statistics, discounting any possible role the injection played. Serious covid outbreaks

have already happened in “fully vaccinated” populations (cruise/military ships, college campuses) and in many locales the vaccinated are now reported to be the majority of hospital cases. If you aren’t aware of this, you should not be making decisions that effect the entire community.

If our hospitals are truly overwhelmed with covid patients, the answer is EARLY OUTPATIENT TREATMENT. For example, we know the vast majority of those suffering with the illness have low Vitamin D levels; encouraging supplementation is one way to prevent a severe cytokine storm response yet this simple solution is never mentioned by our health authorities. (WHY NOT? This is science!) Many doctors around the country have had great success treating covid with high-dose vitamin and mineral supplements and existing medications. Other states are using community-based antibody infusion centers to prevent a patient's condition from worsening and ultimately requiring hospital care. Have we considered any of this or have politics and money gotten in the way?

Forced procedures of any kind are repulsive to many of us and the harder the push, the greater the push back. Local businesses and medical facilities are already hurting, unable to find employees. How would these mandates possibly help, either the business OR the public in need of medical care? Again, the vaccinated are still getting sick, still taking up hospital beds, and still transmitting the disease to others! Maybe we should ask St. Michael’s how many patients actually came in for treatment of covid symptoms (vs. identified at the hospital with possible false PCR test), how many had received any experimental injection, how many are being treated with Remdesivir/intubation now known to cause unnecessary death... You cannot make decisions based on assumptions or manipulated statistics.

From testimony at the last meeting, it appears the EMS/ER issue is actually not related to covid patients. In fact, most of you realize it is a STAFFING issue and yet new mandates will force even more healthcare workers out of their jobs. Maybe they know something the public does not; nurses and other healthcare workers on the covid frontline for 18+ months are now coming forward with grizzly information on medical malfeasance related to the virus which has caused so much suffering in our country. Will you listen to them?

Any new mandate is sure to lead to economic hardship not only for fired workers but for Kitsap businesses, who are having a hard enough time hiring back employees without imposing additional policing requirements on them. Let the market work freely: businesses can decide whether to require a vaccine passport and the public can decide whether or not to support them. Government-supplied pandemic funds or quasi-legal health edicts should not be used to interfere in this process, especially since the overall death rate is still low and reported cases are trending downward.

Much more could be said but would probably be ignored by those with an agenda. Just know there are THOUSANDS of competent doctors, researchers, and medical workers sharing truth around the world and the covid lies will eventually be exposed. Lawyers might be the only ones to ultimately benefit from covid health mandates. In the meantime, you are all supposed to be working for the people of our county and we demand you stay out of private health decisions that belong solely between an individual and their doctor. Kitsap County voters are watching.

Subject: 5 quick news story synopsis w/data to consider for Health Board Meeting this week, plus a video at the end

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Some of the following are widely accepted mainstream sources.

First a question: Do you know of a medical code for if a patient dies from one of the new jabs?

I hear there is a code for if someone dies from the flu or some other known cause of death.

Safety Signals for COVID Vaccines Are Loud and Clear. Why Is Nobody Listening?

The public deserves a complete and transparent accounting of the Centers for Disease Control and Prevention's safety monitoring, including the results of all interim reports and analyses, whether through an Freedom of Information Act request, Congressional order or some other means.

- There is a disproportionately large number of adverse events reported to the Vaccine Adverse Event Reporting System (VAERS) from COVID-19 vaccines compared with other vaccines.

- There are 91x the number of deaths and 276x the number of coagulopathy events reported after COVID-19 vaccination than after flu vaccination.

- Safety signals were found for 242 adverse events using the Centers for Disease Control and Prevention's (CDC) methodology.

- Full transparency of CDC and U.S. Food and Drug Administration (FDA) safety monitoring is urgently needed.

[https://childrenshealthdefense.org/defender/safety-signals-covid-vaccines-full-transparency-cdc-fda/?utm_source=JangoMail&utm_medium=Email&utm_campaign=We+wonder+when+we+might+get+to+herd+...+intelligence+\(344412392\)&utm_content=](https://childrenshealthdefense.org/defender/safety-signals-covid-vaccines-full-transparency-cdc-fda/?utm_source=JangoMail&utm_medium=Email&utm_campaign=We+wonder+when+we+might+get+to+herd+...+intelligence+(344412392)&utm_content=)

A Harvard study said only 1 to 10 percent of adverse events get reported.

Former Pfizer employee flags FDA study, warns that Pfizer vaccine increases COVID by over 300%

The full FDA approval for Pfizer's COMIRNATY vaccine contained clinical proof that the inoculation increases COVID infection by over 300 percent! A former Pfizer employee named Karen Kingston is blowing the whistle on her former employer. Kingston is currently a

pharmaceutical marketing expert and biotech analyst. When she scrutinized the full FDA approval for COMIRNATY, she found blatant fraud in Pfizer's clinical studies. Kingston brought forth a Briefing Document from the FDA's advisory committee meeting that took place on September 17, 2021. The title of the document is, "Application for licensure of a booster dose for COMIRNATY (COVID-19 Vaccine, mRNA)." The document includes clinical studies conducted by Pfizer. These studies track the durability of immunity offered by the COMIRNATY vaccine and compare it to immunity observed in unvaccinated people. "If you get the Pfizer vax, you're more likely to get COVID" said Kingston, "So, when they weren't injected, their infection rate was 1.3% and when they got injected, it was 4.34%. It went up by over 300%." How could the FDA have glossed over this evidence and approved blatant fraud?

<https://www.afinalwarning.com/558686.html>

Harvard has a 96% vaccination rate. EVERYONE has been forced to get injected to even be in the zip code. And yet, they have had so many cases, they have had to go back to virtual classes.

Exactly one month following the start of its fall term, Harvard Business School announced Monday it has moved all of its first-year MBA students and some of its second-year students to remote learning this week due to "a steady rise in breakthrough" COVID-19 infections among its student population.

[https://fortune.com/education/business/articles/2021/09/27/harvard-business-school-moves-online-after-surge-in-breakthrough-covid-19-cases/?utm_source=JangoMail&utm_medium=Email&utm_campaign=We+wonder+when+w+e+might+get+to+herd+...+intelligence+\(344412392\)&utm_content=](https://fortune.com/education/business/articles/2021/09/27/harvard-business-school-moves-online-after-surge-in-breakthrough-covid-19-cases/?utm_source=JangoMail&utm_medium=Email&utm_campaign=We+wonder+when+w+e+might+get+to+herd+...+intelligence+(344412392)&utm_content=)

The Centers for Disease Control and Prevention (CDC) have devised a set of rules pertaining to the classification of infectious disease and death. Hospitals and laboratories are required to follow these rules and report official covid-19 data based on these rules. It appears that these rules were designed in a way to conceal the number of covid cases in the vaccinated and to conceal the number of deaths caused by the covid-19 vaccines. These rules simultaneously inflate the number of covid cases in the unvaccinated and allow hospitals to classify dead vaccinated people as "unvaccinated" deaths.

This medical fraud and morbid treachery allows the CDC to continue on with the false narrative that the nation is suffering from a "pandemic of the unvaccinated." People who die from the vaccine are used as props to falsely advertise the need for more of these deadly vaccines.

<https://www.naturalnews.com/2021-09-17-cdc-hospitals-classify-dead-vaccinated-as-unvaccinated.html>

And then there is this story that shows we are not being told that the vaccine does not work:

Fully Vaccinated Michigan Couple Dies From COVID a Minute Apart While Holding Hands

A fully vaccinated Michigan couple died one minute apart from COVID-19 on Sunday, weeks after coming down with the virus.

Cal Dunham, 59, and his wife Linda, 66, had preexisting conditions and were very cautious, Fox17Online reported. But they came down with symptoms during a recent camping trip and days later were hospitalized and put on ventilators, the report said.
[https://news.yahoo.com/fully-vaccinated-michigan-couple-dies-042823194.html?utm_source=JangoMail&utm_medium=Email&utm_campaign=We+wonder+when+we+might+get+to+herd+...+intelligence+\(344412392\)&utm_content=](https://news.yahoo.com/fully-vaccinated-michigan-couple-dies-042823194.html?utm_source=JangoMail&utm_medium=Email&utm_campaign=We+wonder+when+we+might+get+to+herd+...+intelligence+(344412392)&utm_content=)

Please make time for this video (that with the 2x speed feature can be watched and understood in 12 minutes) with Department of Defense info on the whole matter:

<https://www.brighteon.com/c3c52dd7-7db9-4e1c-b386-58b9a6c97f5b>

Attorney Thomas Renz reveals DoD data proving covid vaccines WORSEN infections and hospitalizations

Thank you for your time and attention to this matter from a Kitsap resident.

Pam Tronson

8691 Quail Ridge Rd SW

Port Orchard, WA 98367

P.S. If any of that perked your interest and you have a half hour (if played on 2x) here is a Physician's Asst. who has always used vaccines in an interview titled:

“THESE PATIENTS DESERVE TO BE HEARD” -

VAERS <https://www.bitchute.com/video/e2NnMSB589Vj/>

Just to be clear, she is not referring to the Open VAERS System, but the traditional government run system.

Subject: Unborn children at risk!!!!

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

No mandate! Please let ME make the best choice for MY family! This vaccine has not been around long enough to determine if there are impacts on unborn fetuses! Too risky! Pregnant woman cannot eat deli meat much less be subject to experimental injections! Additionally, There are so many of us who have had the virus, subsequently possess immunity, and were not documented, myself include. It is NOT in my best interest to vaccinate and open myself, and my unborn child, up to the risks associated. Shame on you as a fellow American for thinking you have any right to punish me for making my own medical decisions. My school aged children have suffered enough at the hands of an overreaching health department and government. Masking, injecting, and restricting a healthy population of joyful children and expecting mothers will have dire consequences. Get out of the way and let the families make the best decision.

To: Members of the Kitsap Public Health District Board

My concern about looming mandates has grown rather than diminished since your last meeting. Two weeks ago NYC enacted a draconian vaccine card mandate preventing those without one from entering public spaces and small businesses. During that time restaurants have reported a steep decline in customers. One owner said his business is down 50-60%. He will not be able to stay open much longer if this continues. Kitsap County lost several businesses during our previous shutdowns and we're fortunate to have so many that were able to push through and survive in spite of all the obstacles they faced. Many residents, including myself, went the extra mile and actively supported a number of small businesses and restaurants to help keep them afloat during previous harsh mandates. I purposely supported many in the downtown Poulsbo area, as well as in Silverdale, but I want it known that if a vaccine passport is recommended or required for our county residents, and half of our residents aren't allowed to go inside those establishments, I will NOT support those businesses in any way, shape, or form.

1) Businesses should NOT be used as an arm of the government to enforce mandates that are NOT laws. That is NOT their job, and if a customer doesn't like the mandates, the business and its employees bear the brunt of the complaints. More businesses will fail, more people will be hurt, because of continued government interference.

2) Vaccine Passports create a two-tier society between the vaxxed and unvaxxed. Since when does America allow, tolerate, or promote a caste system among its people? This should be rejected at all costs!

3) The virus is decreasing in our state and around the country. Governor Inslee said we would have to achieve a Rate of Transmission of less than 1.0 for us to ease up restrictions and return to "normal." The Rate of Transmission in Washington State is .60, and although that is encouraging news, our Governor has not eased up on all his restrictions. It should also be noted that although we supposedly "achieved" that level through all our precautions, both Texas and Florida have achieved a lower Rate of Transmission than ours without shutting down, damaging businesses or individuals, and

living fairly normal lives, especially compared to us in Washington. Our current path is leading to an increase in mental health issues that shouldn't be overlooked. I know several people who traveled to "free" states this summer and experienced a level of happiness and freedom among the people of those states that has largely disappeared from our state. They describe it as the difference between night and day.

4) Statistics show that shutdowns or shutting out people have not made any difference, no matter where in our country or around the world it's been tried. Shutdowns have failed miserably and have only resulted in economic and mental health suffering.

So, let's stick to the facts. Even though the unvaccinated are tending to end up in the hospital at higher rates for now, the vaccinated are spreading the virus as much as the unvaccinated. That means shutting out the unvaccinated from public places will NOT stop the virus from spreading. So, there is no reason to treat anyone differently. The highly vaccinated countries are now experiencing high outbreaks among their vaccinated people. Israel has kept great statistics on their situation. Norway and Singapore just announced that they are changing direction after everything they've tried hasn't stopped the virus. They have realized that we're going to have to learn to live with the virus. They will still encourage older citizens to get the vaccine, but not the young. They will save their economies and their businesses and the livelihood of their people.

I think we need that same recognition and a change in mindset as well. I understand that at the last meeting there was discussion of showing "leadership" by "following" what King County is doing. That is not leadership at all. And Kitsap is NOT King County. There are many reasons we live here, not there! We need to keep in mind why our quality of life is better on this side of the water, and it's because we haven't followed the failed policies of the Seattle area and King County. Their leadership style is poor, indeed, as they continue to cause their city and county to decline. That's not a future I want for our area.

I would ask on behalf of many of our residents that you don't enact any more mandates. We have enough to deal with, without piling more on top of our current situation. You can't nor should you try to live other people's lives for them or force them to live the way you think they should. Trust that we are doing what we know to do to stay safe with the precautions we choose to take. The numbers will continue to decline without any further draconian measures.

Thank you for your time.

Sincerely,

Jeri Stockdale

Subject: CONSIDERATION

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good Morning !

Tomorrow will be filled with lots of listening and decision making I am sure. With that, I would like you all to consider options that include,

1. Following with the Presidents and CDC recommendations that which include the option of weekly testing for COVID.
2. That you eliminate the idea of vaccination cards

Please,

- Keep your policies in alignment with the rest of the United States as per the president and CDC. The Country is healing, no need for stricter policies at the State/local level.
- Can we as a community work to be united and not divided? Acknowledge the good works of our community in keeping safe, to much ado about the negative and fear. People are tired. Its time to focus on ways to heal and to be positive.
- Keep religious or medical exemptions (including having COVID naturally) as options.
- Look at real data, not guesses, assumptions and estimations by so called professionals that dont represent the views by the entire county. Look at your local municipalities in the kitsap area and ask how many employees (vaccinated and non vaccinated) have contracted covid to date and how many have died.
- Is the ongoing capacity issues spoken about solely based on the influx of COVID patients or is it a combination of patient load, lack of first responders and nursing/physician staff? what about Facility changes? How many emergency beds did we have in Bremerton and Silverdale facilities, to how many ER beds do we have with St. Michaels today?

Last, the vaccination cards are going to be a challenge. PEOPLE ARE QUITTING LEFT AND RIGHT all over Kitsap County. Listen to real stories from your community, not just "thoughts and opinions" from people sitting on the board. Get out there and talk to downtown associations, businesses and chambers. I

know someone already that is not going to continue working in a local resteraunt if they are made to verify someones vaccination status before entering. The resteraunt has already had to close its doors in Poulsbo due to staff shortages. Stricter mandates, more challenges. Less staff. Less Revenue, Less taxes all around.

Again, please consider the option for testing weekly if anything and eliminate the vaccination card idea at this time.

I oppose mandates on several grounds, but please consider the impact on local businesses. I am not, nor have I ever been a businessman, but I can see the undue burden vaccine mandates will place on local businesses and their employees. Decisions made by the County Health Department will impact the entire community, local businesses, and other local government offices, notably law enforcement.

If businesses are required to verify vaccine status of their customers, additional staff will be needed. That staff may become subject to verbal and even physical assault. While I do NOT encourage or condone either, reality must be faced. Some individuals in every community will take offense at being required to show proof of vaccination or be denied service. Sadly some will respond poorly. At sixteen, my granddaughter was a hostess at a local restaurant. I cannot imagine management placing her in the position of being the Covid police, and facing abuse from disgruntled customers. Who is going to be responsible for dealing with irate and unruly customers? The hostess? The wait staff? Maybe the busboy? Walmart greeters will have to become bouncers. Will grocery stores, hardware stores, and pharmacies need to hire bouncers at the entrance checking ID's (Vaccine cards) like some seedy kind of big city night club? Will the county provide police presence at all establishments that are required to check vaccine status before allowing entrance and providing serviced? I assume not, but how quick will police be able to respond to emerging problems and the additional workload? We have all seen the images on TV of criminals openly looting hardware and other stores, while store staff are told by management not to try to stop the looting and avoid physical confrontation. Are we now to expect those same employees to confront a customer who refuses to show a vaccine card? What if there is a serious altercation that results in injury to an employee or customer? If a customer is injured, what is the employees liability, what is the stores liability? What is the businesses responsibility for training its employees in handling different situations regarding vaccine status verification? Will the County Health Department provide training guidelines? The mandates will be especially burdensome on small businesses with fewer resources. For some it may be the straw that broke the camels, and they will cease to exist. I am sure there are other unintended consequences that I have not thought of, but you need to.

I may be wrong, but what if there is only one serious incident involving violence and injury, how will the county deal with it? What if we lose more small businesses? Will the community accept that? I for one will not be happy.

Subject: Board Meeting October 5, 2021 regarding COVID mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Kitsap Public Health Board,

Natural immunity after having had COVID is never considered. Even if you have natural immunity and get one shot (which has been recommended), you still would not be considered fully vaccinated without two shots, which makes no sense. Proof of antibodies after having had COVID should be an alternative to having to show proof of vaccination. As more studies are being done, there is more proof that natural immunity is better than or at least as good as being fully vaccinated. [Natural immunity to covid is powerful. Policymakers seem afraid to say so. - The Washington Post](#)

There should be no vaccine passports. Fully vaccinated people can still get the virus and pass it on. Even if you only allow vaccinated people into public places, they can still have the virus and pass it on, especially since some of them may be asymptomatic and not even know they have the virus. The unvaccinated have been unfairly blamed for this outbreak, when the vaccinated were unknowingly passing it around as well.

Vaccines should not be mandated. As President Biden and Governor Inslee have mandated vaccines that cover almost everyone, except small businesses, Kitsap County would only extend mandates to small businesses, which would be detrimental to them. The law to wear seatbelts is often compared to getting the vaccine. An injection is an invasive medical procedure, whereas wearing a seatbelt is an external requirement. Why is it OK to say "My Body My Choice" for abortions so that women aren't forced to have a baby if they don't want to, but being forced to get an injection is OK? **Loss of your job is a threat.** The mandates do not really allow a choice, even if you have a valid religious or medical exemption, because if your employer cannot "accommodate" you in the workplace, you still lose your job. So basically, you are saying if you don't get this vaccine, we don't care if you lose your job or business, become homeless, starve to death, or even die. **Natural immunity should be considered the same as being fully vaccinated. There should be an alternative such as weekly testing for those who are unvaccinated and do not have natural immunity.**

While severe adverse reactions may not affect the majority of people getting vaccines, how would you feel if it was you, your child, spouse or parent had a seizure, blood clots, Myocarditis, Bell's Palsy, Guillain-Barre syndrome? These concerns are real. For these people the side effects outweighed the benefit of getting the vaccines. **Side effects are a serious consideration when thinking about getting the shots.**

Please forward to the Kitsap County board of health and county leadership and city mayors:

I oppose any form of "vaccination passport" as a requirement to do any business in Kitsap County. I don't know why an unconstitutional mandate is even being considered for the population of the county. It doesn't make sense to make vaccination status a requirement to do business in the county when the only COVID-19 vaccines available to us are the EUA versions and not the licensed one. Are there provisions for people that may be allergic to the vaccination? What about people who have objections to receiving the vaccine? Are you ready to lose the business/tax revenue of all the people that will go outside the county for everything?

Subject: Vote on Vaccine Mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I have been a resident of Kitsap County for 25 years now. It has been a place I call HOME. Home should feel safe and secure, not some place where mandates are the rule of law/land. What happened to FREEDOMS? Once Freedoms are removed most likely will be gone forever. Is this where you want your family to be? Your Grandchildren? Are Mandates going to stop COVID? COVID is here to stay just like the annual Flu. Forcing people to do something against their will should be illegal.

The votes you pose on the masses have consequences. Businesses will lose out. Do you really care? If you really care then you would vote NO on any mandates.

Elections have consequences and those who oppose what's American can be voted out. This is not China, yet. Your vote for Mandates only brings our County down the road to Communism. You will be the ones that will have to look yourselves in the mirror and know you were the ones to bring Kitsap down this ugly path of destruction.

I need to make a correction to one word in the second sentence. It was supposed to read , "There are those who have survived being stricken with a designer virus without taking the experimental VACCINE."
Please read my letter with the correction into the record of your meeting.

On Mon, Oct 4, 2021, 10:45 AM Mary Lou Long <maryloulong2515@gmail.com> wrote:

The concept of mandating one way to deal with Covid 19 virus is an abomination. There are those who have survived being stricken by a designer- virus without taking this experimental man-made virus. There are ways of combating the virus with therapeutics now. Not all citizens wish to be used as guinea pigs by a greedy pharmaceutical company. Not everyone is being threatened with the potential of reproductive damage to themselves if they take an experimental shot in the arm. Freedom of choice extends to say no to the "vaccine". Putting survival threatening mandates on Americans is totally contrary to what our country stands for. If this mandate policy is not stopped now our future is in grave jeopardy. Government can create more rationalizations for emergencies to inforce devastating requirements in order to exist in society. I believe our constitution is under attack by doing away with freedom of choice in saying no to a vaccine. I have had the vaccine by free choice. My age and health logically indicated my taking the experimental shot. So far so good.Thank God. But as I said, I am not like everybody and I support my fellow citizens choice to reject the vaccine.

The hysteria of government agencies about Covid 19 has caused a total lack of confidence in their judgment. The avoidance of promoting therapeutics is suspicious. The lack of compassion by those wishing to impose a mandate on those that are not fully convinced of the safety or the need of the vaccine is truly disturbing. The signs of a declining level of inflection would logically lead to a less aggressive manner of dealing with this virus. I hope you take my views into consideration on the decision you make about mandating any health directives today and in the future. Not everyone wears the same shoe size, thus not everyone will have the same experience combating a man made virus.

The one thing that I believe the health district should be expressing an opinion on, is finding those responsible for creating the designer virus and getting to the bottom of how this virus was used to spread a pandemic across our country and the world. If Dr. Fauci violated the Obama administration directive of not funding and stopping research in gain of function virus manipulation when will the health districts, and states Attorney generals file charges for his criminal participation of his violating a Presidential order.

I am thoroughly revolted by the entire inactivity of those that have the means to address these concerns.

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Your job is very important in promoting health. I fear, however, your messages have been an overwhelming failure. Instead of concentrating on trying to control personal behavior, a much better way to spend your time and money might be to present the FULL information about this virus. For example, how about providing the number of persons who have recovered from Covid as well as the cases and deaths. This would provide some easily understood perspective to the reporting.

Additionally, how about information on some of the TREATMENTS available. I have not seen any of this information presented to the citizens of this county or state. (Maybe I missed it). How about information presented on the immunity in persons who have recovered after having covid. The only solutions presented thus far have been AVOID CONTACT WITH PEOPLE, DON'T GATHER WITH FRIENDS AND ABOVE ALL MASK UP, MASK UP AND MASK UP!!! OH yea, get the vaccine even if you have had covid.

Not all people who contract covid end up in the hospital, on a vent and die. In fact, I learned this morning, that the hospitalization rate is less than 1%. The vast majority of infected people may not even know they are sick.

As I said in the first paragraph, you have a very important position. You can continue to add to the hysteria, fear and anxiety of the citizens or you can be the instrument to decrease these things. You make the choice.

Thank-you for your time,

Janet Muenzenberger

The concept of mandating one way to deal with Covid 19 virus is an abomination. There are those who have survived being stricken by a designer- virus without taking this experimental man-made virus. There are ways of combating the virus with therapeutics now. Not all citizens wish to be used as guinea pigs by a greedy pharmaceutical company. Not everyone is being threatened with the potential of reproductive damage to themselves if they take an experimental shot in the arm. Freedom of choice extends to say no to the "vaccine". Putting survival threatening mandates on Americans is totally contrary to what our country stands for. If this mandate policy is not stopped now our future is in grave jeopardy. Government can create more rationalizations for emergencies to inforce devastating requirements in order to exist in society. I believe our constitution is under attack by doing away with freedom of choice in saying no to a vaccine. I have had the vaccine by free choice. My age and health logically indicated my taking the experimental shot. So far so good.Thank God. But as I said, I am not like everybody and I support my fellow citizens choice to reject the vaccine. The hysteria of government agencies about Covid 19 has caused a total lack of confidence in their judgment. The avoidance of promoting therapeutics is suspicious. The lack of compassion by those wishing to impose a mandate on those that are not fully convinced of the safety or the need of the vaccine is truly disturbing. The signs of a declining level of inflection would logically lead to a less aggressive manner of dealing with this virus. I hope you take my views into consideration on the decision you make about mandating any health directives today and in the future. Not everyone wears the same shoe size, thus not everyone will have the same experience combating a man made virus.

The one thing that I believe the health district should be expressing an opinion on, is finding those responsible for creating the designer virus and getting to the bottom of how this virus was used to spread a pandemic across our country and the world. If Dr. Fauci violated the Obama administration directive of not funding and stopping research in gain of function virus manipulation when will the health districts, and states Attorney generals file charges for his criminal participation of his violating a Presidential order.

I am thoroughly revolted by the entire inactivity of those that have the means to address these concerns.

Please vote only Option ! "Take no action and allow the current situation to play out." I am a sole practitioner and work with a large number of small businesses. During the mandated shutdown, **I lost 7 small business clients, as they could not keep their doors open.** That was a huge impact to my bottom line. We have had enough!!!

I also had the vaccine over 3 months ago and am still having negative side effects from it. I don't feel like I should have to share these private details, but I will and will ask you to please not share my name if you share them. My lymph nodes on the left side of my arm where I received the injection are still very sore and swollen. Typing is very painful for me, and that's something I have to do most of the day for my work. I saw the images on a mammogram a couple of weeks ago and they are about 4 times the size of the ones under my right arm. I have no idea what long-term damage this will cause, or how long this condition will last, and it is highly concerning to me. It makes me angry. I got the vaccine because of the hysteria perpetuated by the mainstream media and because many of my clients were afraid to meet with me if I was not vaccinated.

We are only hearing the "safe and beneficial" message. There are real side-effects associated with the vaccines that are being minimized or dismissed in an irresponsible effort to get everyone vaccinated.

We should be developing an antibody test, as those who had Covid should not need the injection. This makes no sense to me, and I am angry that the government is shoving this on everyone.

There is a large and growing segment of our population who are boycotting any business that requires proof of vaccination to enter. It should be up to the individual business - NOT THE COUNTY!!! Let the people make up their own minds! PLEASE!!!

Good morning,

Thank you for allowing more public input. However, allowing only 30 people to publicly zoom comment is a minimal attempt to engage the public. Especially this topic that effects their health and income.

In reviewing the last meeting, I was disappointed in the way some of the members were categorizing the public. Public servants should not demean the public and some of your members publicly did that. An apology would be appropriate.

I am trained in the medical field (zoonotic diseases and FEMA responses as part of my training) and would like to give a different viewpoint to your board publicly, not by a limited zoom call meeting. Here are safe outdoor facilities to allow such a meeting.

Lastly, I noted that the coroner was not present. That would be a great source to hear from also.

Thank you for your time.

Awaiting a reply to this email.

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Kitsap Board of Health Members,

Please share the studies you're using that support medical segregation and discrimination in the community! Where is the evidence that medical segregation shows any benefit to community health?

How does firing nurses and doctor that want to maintain their body autonomy benefit local hospitals? How many less hospital beds are staffed and available because experienced staff are forced out?

Where are the impact studies showing the effects on local business economy for instituting medical segregation?

Where the impact studies showing the costs to community mental health and suicide rates after mandating medical segregation?

These are not small decisions! You can't make these choices based on your feelings! You need evidence, studies that show the benefit is more than the costs! Where are they?

Consider the possibility that these vaccines could cause long term side effects! Are you willing to be held personally liable for forcing them into people?

Sincerely,
Mary Coleman

Hello Mr. Grellner,

I am writing to urge you not to vote for a Covid-19 vaccine mandate for anyone living in Kitsap County. If you do, Kitsap County will lose many well trained and valuable employees. Data now becoming available suggests that there is no evidence to support increased vaccination rates reducing Covid-19 cases. Kitsap County residence are relying on you to look at all the data and recommend what is truly best for them regardless of pressure to comply from other sources. I will be praying that God gives you the wisdom and strength needed for wise decisions in these challenging times.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hi Keith,

You have to have wondered about Inslee's ability to lead!

The idiotic two and a half month lockdown that did nothing but prolong the virus.

Mask do not work because they have the potential to become infected and are now a petri dish on ours and our children's face.

You need to evaluate Dr. Inslee and his WSDOH policies. You know they do not work.

The vaccine does nothing but maybe slow some cases. Do we want to slow or do we want herd immunity! Think that through before you and our wonderful county approve a policy that will destroy more lives.

I am not an anti-vaxxer! I am for those that are immune and those that are marginally healthy to live our lives free from tyranny.

You can see here that Winlock has a point about Inslee's sanity!

Subject: Oppose Passports

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hi Mr. Grellner,

We believe in life, liberty, and the pursuit of happiness. We ARE anti-tyranny. We are NOT anti-COVID (i.e., that it doesn't exist) or anti-vaccination, but we will not be subjected to these oppressions any longer nor be a part or participate in active discrimination.

The current approach to "fight" to eliminate COVID is a fool's errand and needs to end now (1). Never before has there been a successful all-or-nothing approach, nor should there be now, because it is irrational and a strategy that is doomed to fail. It took centuries of living with viruses like smallpox, polio, rubella, and measles until vaccines appeared, and it still took decades to "eliminate" them which hasn't fully happened (2).

The tyrannical edicts that have been commanded by Governor Inslee, other elected officials, and medical bureaucrats here in Clark County have killed countless citizens, devastated businesses, stunted the education and development of our children, discouraged workers from returning to employment, piled on insurmountable debt, and now tragically divides communities (3).

We cannot keep going like this and we are declaring to all governing officials that it is time to go in a different direction than this "emergency" empowered tyrannical fight to eliminate COVID that will never succeed.

No more mandates. No more lockdowns or restrictions. No more closing down or restricting businesses, schools, homes, parks, churches, events, etc. No more forcing face coverings and absolutely NO VACCINE MANDATES OR COMPULSORY REQUIREMENTS because at the heart of all these is discrimination. Amnesty International says, "Discrimination occurs when a person is unable to enjoy his or her human rights or other legal rights on an equal basis with others because of an unjustified distinction made in policy, law or treatment."

Instead, we demand common sense and transparent definitions and data collection, clear and visible formatting of the data, and to be fully informed as a public (4). We require a focus on resources to the most vulnerable, and to provide the best therapeutics, supplies and support to hospitals and all medical professionals. This isn't a time to fire or eliminate healthcare staff but to encourage them and hire more. We need to encourage and empower families and communities to join together, rather than be divided (5). We can overcome this together as free people, rather than divided and subjugated.

We are the land of the free and the home of the brave. It is time to live this out in the COVID era.

Thank you,

Brooke Hausman

Hello. Thank you for your email concerning the Kitsap Public Health Board.

Please be aware that the Health Board is not scheduled to take any action at tomorrow's special meeting. The purpose of the meeting is to provide Health Board members an opportunity to discuss the current effects of the COVID-19 pandemic on Kitsap County's healthcare and EMS systems.

The meeting is open to the public, but is limited to the first 500 guests in the Zoom format. The meeting will also be broadcast live on BKAT and Facebook. Interested persons may access the meeting and the meeting materials through the Health Board's meeting materials webpage at: <https://kitsappublichealth.org/about/board-meetings.php>, and click on "Meeting Packet" for "9/28/21 Special Meeting". A video recording of the meeting will also be posted at the above within several days of the conclusion of the meeting.

We will be forwarding all comments received to the Health Board for review at their next regular meeting on October 5.

Best Regards,

Keith Grellner | Administrator | Kitsap Public Health Board Executive Secretary

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good morning.

My name is Margaret Lakin. I am resident of Port Orchard Washington.

I am respectfully asking that during the special meeting of the Kitsap Public Health Board on September 28 when “discussing and getting direction from the Board about other measures to take to address “this critical state of the pandemic” in Kitsap County that you take option 1. Take no action and allow the current situation to play out.” If any of the other options are taken it would be detrimental to the Washington State/Kitsap County economy – many businesses will close and many good employees will lose their jobs. If any other options are taken it is violating our Civil Rights. The CDC website states that over 31,000 deaths have occurred between January and August 2021 because of the Covid vaccination. This is way too many deaths related to this vaccination to consider it safe and effective.

Thank you for your consideration.

Margaret Lakin

Keith, not allowing someone to enter or work in a public building in the USA is the very definition of DISCRIMINATION. look up the word and read the entire meaning. Having to show a vaccine passport is wrong on so many levels. You'd like us to go sign paperwork stating nobody is responsible if one has adverse reactions and that its impossible to know if there will be long term effects. This vaccine isn't covered by VICP! We, who refuse to be lab rats now will be discriminated against, not aloud in or to work in public places..THAT'S A LAWSUIT. We the people in Kitsap are angry. Doctors and nurses are forced to leave their jobs, don't you think they might know something we don't? Like the actual numbers and the actual numbers of adverse events. Do you believe they're going to keep silent after this! I personally know how much the hospital gets for covid patients! I'm guessing so do you! Everyone who has a brain knows many had nothing to do with covid! Look up discrimination Keith. Thankyou for probably not caring enough to read this.

I am a citizen in Kitsap county. I had and recovered from COVID-19 in early 2020.

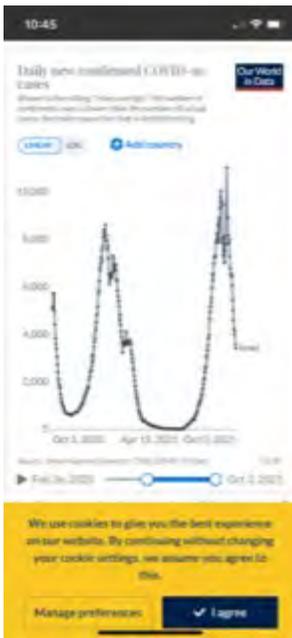

I have natural immunity! This is superior to any vaccine 🪖. Why is this the only time in history when government agencies have tried to sell the fact that vaccines are better than natural immunity??

Also, the vaccines are failing! All one has to do is look at the vaccine rates versus new COVID-19 cases in Israel!

They have a 62+% rate of fully vaccinated people.

Then compare to the new cases. There is no correlation at all. The vaccines are ineffective;

Do not mandate vaccine passports.

If you do you will put the final nail in the coffins of small business. And you politicians will be responsible for destroy the economy, not COVID-19! You have a choice to make the proper decision and not cave in to Inslee and Gates by forcing the vaccines and causing injury and deaths from the vaccines while not guaranteeing any safety from COVID-19. If the vaccine companies and the government can be sued for I hope death from the vaccines then I will consider taking the vaccines.

Will Kitsap County take full legal responsibility for death or injury from the COVID-19 vaccines??????

Please answer my last question.

Sincerely,

Patrick Herbig

Mr. Grellner,

I'm a resident of Kitsap County for 20 years. The only reasonable option, of the five listed in the subject meeting agenda, is to take no action. No mandates of any kind. I realize that's difficult for the power hungry, and the bullies, to accept. But anything else is tyranny masquerading as virtue.

Subject: Position on mandatory vaccines

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

As a small business owner in South Kitsap County I strongly believe that a government orchestrated mandate for the COVID-19 vaccination or requirement to carry proof of vaccination would be an egregious abuse of power. No matter my position on vaccines, I must oppose a county policy that mandates vaccination or requirement to show proof of a COVID vaccination in Kitsap County under any circumstances. This kind of decision should be made by the individual based on personal choice, reason, conviction, and study.

My small business would suffer greatly and immediately because it is not what one would call an “essential business”, if my client base were oppressed by a mandate like this they would definitely not prioritize coming in to my place of business, and by this I am confident I would lose my client base immediately.

My family would suffer from this economic loss. My husband and I have two young sons and we utilize everything we have for their growth and benefit. Having these mandates would, I believe, dry up an important income at a crucial time in our little family. We work hard and we care for our community and want to definitely stay healthy. We support small and local businesses whenever possible. Putting this policy in place would cripple us economically and socially.

I must strongly oppose even the consideration of these mandates being put into action. For me this is not at all to do with vaccines, societal health, or COVID.... This for me is about my freedom as an individual being slowly stripped away and watching the country I love being mishandled. I want my sons to be able to taste the freedoms that this great country and state used to have. That will never happen if I don't fight for my rights today, their rights tomorrow.

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

The vaccine should not be mandated. It should be up to the individual to weigh the risks and consequences. It's not right for the government to force any medicine on anyone, or to require private businesses to be burdened with policing their employees and customers for Covid cards. It's a financial strain and it's not a business owner's job to enforce the mandate. This will also affect Kitsap's economy as there are those who will not take the vaccine. Many people have valid reasons to decline the vaccine —pregnancy, breast feeding, health issues, and fear. A blanket rule is unwise.

A person who survives Covid has natural immunity. That should be factored in also.

Government should not step beyond its constitutional powers. The vaccine has become a political hot potato. There should not be a mask mandate for those who have been vaccinated.

We CHOSE to take the vaccine. Let's keep America's freedom of choice in Kitsap County.

Stan and Carol Napora
Port Orchard

Keith, I'm very much against the vaccine mandate for several reasons. The biggest one being that this vaccine is not covered by vicp. You want to make folks take a vaccine yet one has to sign paperwork before hand stating that nobody is to be held accountable if one has an adverse reaction. I personally know alot of people, and my circle is not very big, here locally in Kitsap county that have had adverse effects. 2 that died. Also the paperwork states that there's no way to predict possible long term effects. I have a huge issue with this. I'm personally afraid to take this vaccine. It isn't right to mandate something people are afraid of. If you've been vaccinated and truly believe it works then why are you and others so concerned about the unvaccinated? The truth is the vaccinated can spread it to the vaccinated right? Everyone should have a choice what to put in their bodies. I cannot sign paperwork that doesn't hold someone accountable if something should go wrong and its absolutely wrong that one should have to. All the nurses, doctors, emts, etc. Were called frontline heroes a year ago and now they're about to loose their jobs. Has it occurred to you that there's a reason these health care workers are against this? The nurse that was taking care of my dad this past April was against the vaccine but got it anyway, ended up in silverdale hospital with blodclots, she told me she regrets it as she was so scared she was going to die. A week later they recalled that vaccine. The weird thing is after that I saw our governor on the news saying nobody was effected in Washington state. This nurse was at st. Michael's hospital in silverdale! So nobody reported it! I honestly don't know if you'll actually read this or if you even care . I'm sure I'll get the same automated mass email response that everyone else is getting from everyone they write to, exact same wording. Thankyou if you do read this and take it all into account.

I strongly urge you to do no further damage to our county by burdening it with vaccine mandates.

- the threat of a failed economy far outweighs the threat of COVID
- isolation resulting in suicide and mental breakdowns far outweigh the threat of COVID
- Vaccine mandates violate HIPPA laws which protect private health information from being used in just this kind of scenario. You would open the county to federal lawsuits.

Let private businesses make their own requests. Let private citizens make their own choices. Vaccines are available to all. Now let people choose.

I have personally spent time with two people who have had COVID mental breakdowns from the lockdowns. I know many friends who have lost jobs due to lockdowns. My local market can barely stock its shelves.

I have been fortunate to know no one who has died, nor suffered greatly from COVID.

Please vote for this option:

1. Take no action and allow the current situation to play out.

The health of our city is more than COVID. It is commerce and mental health and family. It is schools and transportation and entertainment. These things need to resume, and vaccine mandates do not do this.

Thank you,

Rebecca Ifland

Kitsap County Commissioners:

An internationally renowned scientist and medical doctor who invented the mRNA vaccine technology urges avoidance of vaccine extremism by giving individuals the freedom of choice to accept or reject medical intervention.

Dr. Robert Malone warned that the "approach of mandated interventions, whether they be vaccines or any other procedure" failed to "respect the sanctity of the individual and their body."

"Vaccinate only the ones that need it," Malone pleaded, insisting that **physicians should be allowed to practice medicine and "not only have to conform with guidance that is coming from the government and the pharmaceutical industries."**

Commissioners,

I OPPOSE the imposition of any mandates related to the COVID-19 epidemic.

During the 1980s and 1990s, I flew with the U.S. Navy and put my life on the line alongside my fellow aircrew to defend the FREE world against the AUTHORITARIAN governments of the Soviet Union, the People's Republic of China, their satellite states and North Korea. I served to defend the ability of FREE peoples to control their own lives and not have a government DICTATE their choices, destinies and opportunities. As a city councilman for seven years, I operated under an oath to safeguard the LIBERTY of our people.

In light of this new challenge posed by the COVID-19 epidemic and my exposure to vulnerable individuals, I VOLUNTARILY received two doses of a COVID vaccination. However, I find it DISAPPOINTING that the KPHB is now considering IMPOSING mandate(s) related to the COVID-19 epidemic, citing statistics and tragic personal anecdotes. I understand why board members might consider this action but as citizens and elected officials sworn to uphold the CONSTITUTION OF THE UNITED STATES, you need to consider the CONSEQUENCES of imposing government mandates. Such action(s) move us closer to the DYSTOPIAN reality experienced by hundreds of millions of people in the aforementioned authoritarian countries.

Therefore, I call on you to OPPOSE the imposition of any mandate(s) related to the COVID-19 epidemic. Rather, focus on intensifying COMMUNICATION and EDUCATION efforts to understand vaccine hesitancy and provide any information necessary for our citizens to make the best health choice for themselves and their family members.

Regards,

Roy Runyon
Citizen, taxpayer, veteran, public servant

Greetings:

I am a legal registered voter of this county and I OPPOSE any decision to further regulate one's right to choose upon "optional" healthcare matters.

Vaccinated individuals that voluntary chose to take the vaccine are actively infecting others by choosing not to self-quarantine and inform others. They waived their right to HIPAA. These individuals must be monitored.

This proposed Covid regulation being decided upon is on the same tangent of enforcing mandatory abortions by lethal injection because too many children are nuisance!

Absurd? Yes it is.

Abortion is not mandatory healthcare decision to document to the public - a condition of employment, ability to travel, or attend social gatherings.

Focus your efforts on sanitation. Inspect filtration systems and comply with ISO hygiene standards. This will greatly improve public health and keep Covid out of our county. Keep Kitsap employed with our competent trades and labor workers!!

Sincerely,
Alisha Silbaugh
