**Subject:** Regarding proposed vaccination requirements

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello,

I am a concerned citizen in Kitsap county. I am a stay at home mother with two small children, one of whom is in the CKSD attending a special education preschool program. I am writing this letter to tell you that vaccination requirements are not what this county needs. Mothers are the backbone of this county and do a significant amount of the shopping (grocery or otherwise), planning, bringing children (or others) to appointments, networking and supporting of small businesses. Many of us are uncomfortable and unwilling to take our chances of getting a vaccine that changes our DNA when we are still considering having children or are pregnant ourselves.

To put a strong hold on us to submit or not be able to buy food for our families is a shameful overreach of power; just as it is to force capable, dedicated, specially trained employees to get one in order to retain employment.

Please tell me how I would buy groceries, take my kids to sports, therapies, appointments, if I can not enter simply because I didn't get a vaccine that we do not know the long term side effects of? Do we not deserve to feed ourselves because our views are not in line with yours?

What would it look like for those who have exemptions? Would we be giving even more of our private information to employees at businesses in which we need to enter? Imagine walking into Safeway, kids in tow, pulling out your private information to explain why you can't get the vaccine? This is nobody's business except a doctors and an embarrassing situation to be putting everyone into.

How would stores enforce this? This is a HIPAA violation. You aren't keeping anyone safe; on the contrary, you are putting undue burdens on your constituents.

You are decision makers and have the opportunity to do the right thing- take no action and allow the current situation to play out.

People have always been allowed to choose what is medically best for them; by forcing businesses to require proof of vaccination, you are taking away personal autonomy. My body doesn't belong to you; nor does my husband's or my children's. You are paid with our tax dollars and right now you are on the verge of taking this county into a very dark place.

Let the people of Kitsap county choose what's best for US.

Do not force vaccination requirements!

Sincerely,  
Samantha Hendrickson of Silverdale

Subject: Upcoming Board meeting 9/28/21

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To Whom it May Concern: Greg Wheeler, Mayor of Bremerton

I am very adamant that "no action" should be taken with regard to vaccines for employees of private and/or state/federal agencies with employees. I am also very much against "proof of vaccination" in order to enter a private business or state/federal agency. Those who have had the COVID 19 already have immunity that has been proven to be as effective as a vaccinated individual. The medical choice to be vaccinated should be left up to each individual and their health care professional. The government has no right to interfere as this vaccine is still considered experimental and as such there is no written informed consent provided to those individuals. These experimental vaccines are by definition a violation of (1) the 1947 Nuremberg Code, (2) The International Covenant on Civil and Political Rights (ICCPR Treaty, and (3) The American Medical Association (AMA) Code of Ethics.

To restrict private businesses from serving the public which may hamper their ability to stay in business, provide income for their employees and support the economy would be a travesty. It goes against our nation's founding principles to not allow them to engage in business with whomever THEY choose to serve and not be hindered by more government regulations.

Respectfully,  
René Jordan  
Poulsbo WA 98370

**Importance:** High

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mayor Wheeler,

First we would like to thank you for serving Kitsap County, we appreciate your hard work. Second we would like to join you in rejoicing for the option of a vaccine that will help people feel safe. Having read through your agenda brief a couple of times we understand your concern and challenges so what we have to say we aren't saying lightly.

We have studied data in the US, Washington and it's counties, and other countries and spoken to many people on both sides of the vaccine mandate local and other states. Most are not anti vaccine they are anti mandate, even many who have been vaccinated.

With the vaccine being readily available for many months those that are vulnerable have been able to choose to protect themselves in this way.

With the excellent education you and your counterparts all over the US have done, which has been amazing, most others know how to protect themselves and have been doing it for the past 18 months and continue to do so.

It seems that the mandates are defeating the purpose of the vaccine and it makes me very sad.

With so many of our people serving bravely for so long without a vaccine and many having earned their immunity already, and having learned to cope with caring for others using the safety precautions taught by agencies like yours, it seems they would have earned some respect for the choice they made to continue serve through the pandemic. Instead many feel they are not valued, unappreciated and defeated. Many are leaving their jobs in despair.

The businesses that have struggled for the past year and a half and ones that have been told are unessential are eager to open and to thrive again but the mandates are putting more burdens on them and burdens on their staff. There are people who come into Kitsap County to do business from other counties that will choose to go other places. People understand how to be safe after so many months, and there are continually more treatments being learned and implemented by the health care providers to help save lives, and more are on the horizon.

With the state mandates already in place try to get a uhaul out of the great state of Washington they are booked way in advance.

Please don't add to this exodus.

Allow people to choose, you have educated them and done your job well, we are asking you to allow them to do their jobs.

I was born and raised in Kitsap County, my husband and I pay taxes and own property here. We love Washington's wondrous beauty.

Sincerely Doug and Dorene Paterson

**Subject:** Against Proof of Vaccination Requirements/Further Mandates

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mayor Wheeler,

First of all, thank you for your service. I am writing today because I am not okay with these proposed “proof of vaccination mandates” for our local community. Have we really devolved to a “show me your papers” society? How many more boosters until we are FULLY VACCINATED? How many more variants?

Most everybody who wants to be vaccinated has already been vaccinated, either through a mandate by their employer or through their own volition. Those who have chosen not to have made that decision by their own conscience.

The continuing emergency orders of this pandemic, which by now is endemic, have resulted in emergency decrees issued by executive order bypassing normal legislative process. This has gone on for two years. I have witnessed many small businesses close and their market

share transferred to large corporations. We are printing money out of thin air to compensate people for putting them out of work in the first place.

Yet the most alarming result of this entire episode is the resultant totalitarian mentality that has formed. Believe it or not, there are now “free states” versus “lockdown” states. That is what folks are calling them. I am against this, and most people I know are against this.

The amplification of voices on social media and traditional media calling for these mandates and lockdowns represent a small, yet vocal, component of our population who will not accept a return to normalcy until there is never another case of coronavirus again. This is unacceptable.

Please stand against these mandates.

Sincerely,

Keith Lawson

My name is Beth Kimple. Please do not support any decisions or ultimatums that force a person to choose between being injected with a vaccine or lose their jobs. Please do not support the "vaccine passport" idea, that if installed will devastate many lives, in Kitsap county. Fear and depression strike when people are placed under these draconian mandates. Suicide rates have risen as a result, especially among the black population, where suicides have risen as much as 94%. The mandates and lockdowns have been especially devastating to the lower income folks who struggle day to day to feed their families and pay bills. Let people make their own free choices. Thank you for your attention.

Sincerely,

Beth Kimple.

Dear Mayor Wheeler,

As a long time resident of Kitsap County, I am appalled at the recommended action items for the September 28th health board meeting. Mandating vaccinations and vaccination passports will not stop the virus. Covid 19 will never be eradicated. What the mandates will do instead is to hurt businesses and destroy our community. It will segregate us. Please do not turn our county into Nazi Germany by forcing people to undergo a medical procedure that they do not want and by forcing us to show our papers to live out our daily lives. Although I am personally vaccinated, I will not comply with this tyranny. Please make the right decision and let people have the freedom to make their own medical choices, even if you don't agree with them.

Sincerely,  
Dawn Larson

Greg Wheeler  
Mayor of Bremerton

Thank you for taking the time to hear my voice.

I love our county and our community.

I'm writing to voice that many of us in Kitsap County request that you do not bring on vaccination passports and stricter requirements. A vaccine passport requirement would go against the very essence that is the United States and the free citizens of Kitsap County and all Americans

I am pro-vaccine and informed choice but this particular vaccine I would like more time. I want to see long term affects. Also, there are many "whistleblowers" bringing to light that MANY adverse reactions are not being reported across the country. I have many family and friends who are dealing with adverse reactions to the vaccine as well. These reactions may be rare but they weigh on my decision. That coupled with the uncertainty of what may happen in years to come

makes me so thankful to live in a country and a county where we have the right to choose what we put into our bodies. We truly just don't have all the answers yet.

We do our part by supporting our community. We shop local, we donate and volunteer, we wash, we are mindful; we distance and when we are sick we stay home. Cases are dropping across the country and in Kitsap.

Please reconsider this decision so that my family can remain active members of this community.

Thank you for your time,  
Christina Besand

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Thank you for allowing me to express my opinion as a concerned citizen and tax payer in Kitsap County.

I would like to talk about the proposed vaccine mandated for businesses in Kitsap County. These businesses have spent so much time and money trying to stay afloat through the COVID pandemic. Many have had to close their doors because of lock downs.

Please do not cause more stress in these business owners and their families and employees by asking them to mandate vaccines for their employees and patrons. We do want to stop the spread of this virus but the truth is that according to the CDC, vaccinated people can also contract and spread the virus.

Businesses are already masking, cleaning, screening and taking other precautions as are their patrons. I cannot imagine the stress they have been under. Please do not add to it. Please take a stand for freedom in Kitsap County. Allow people to make their own decisions. Further mandates will only lead to more businesses closing and this will be detrimental to our economy.

Thank you for your time. I know your job is not easy and I truly appreciate the hard work the health department is doing.

Kristina Weisgerber

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Wheeler,

It has come to my attention that you, along with other representatives, will be meeting this Tuesday to discuss the potential requirement of vaccine passports in Kitsap County. I am writing to urge you to consider some very pertinent information when taking these matters into consideration.

The first fact that cannot be ignored is that vaccines don't prevent transmission of covid, nor were they designed to. Case in point, the outbreak in Massachusetts.

<https://www.cdc.gov/mmwr/volumes/70/wr/pdfs/mm7031e2-H.pdf>

In Israel, a country with the highest vaccination rate in the world (for Sars-Cov-2), hospitalizations among the vaccinated are soaring. It is being shown that a vaccinated person is many times more vulnerable to emerging variants than the unvaccinated and people who have developed natural immunity.

(Please see the attachment for a copy of that study).

So, if they don't prevent transmission, and actually weaken people's immunity, how would requiring a passport contribute to the safety and well-being of anyone? It's clear to me that the passports are not about health, but rather about control and discrimination.

The next fact, that the mainstream media would like to ignore, is that these vaccines are proving to be highly dangerous and even deadly to far more people than any drug or vaccine ever put on the market. There's a plethora of videos of real people, including doctors and nurses, reporting their adverse reactions or observations of others' adverse reactions, if you're simply willing to look. I will only include one link here as an example, but if one is willing to open their eyes, it's clear that forcing these shots on people is simply not right.

<https://odysee.com/@hugotalks:8/Testimonies-Project:5>

A person in your position holds a great deal of responsibility, and therefore will be held accountable for making decisions that cause undue suffering and hardship.

Please think long and hard about this.

Sincerely,  
Candice Sumera

**Subject:** Special Meeting on 9/28/21.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good morning.

My name is Margaret Lakin. I am resident of Port Orchard Washington.

I am respectfully asking that during the special meeting of the Kitsap Public Health Board on September 28 when “discussing and getting direction from the Board about other measures to take to address “this critical state of the pandemic” in Kitsap County that you take option 1. Take no action and allow the current situation to play out.” If any of the other options are taken it would be detrimental to the Washington State/Kitsap County economy – many businesses will close and many good employees will lose their jobs. If any other options are taken it is violating our Civil Rights. The CDC website states that over 31,000 deaths have occurred between January and August 2021 because of the Covid vaccination. This is way too many deaths related to this vaccination to consider it safe and effective.

Thank you for your consideration.

Margaret Lakin

**Subject:** forced vax and proof

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,

PLEASE OPPOSE forced vaccinations AND proof of vaccinations! These VIOLATE the Nuremberg Code, stating it UNLAWFUL to force or coerce medical treatment. It's UNAMERICAN! Despite what main-stream media, CDC, FDA, WHO and others say, there is risk with the vaccination and WHERE THERE IS RISK THERE NEEDS TO BE CHOICE WITH NO DISCRIMINATION!!!! It is American to protect ALL people, even those who don't want the vaccine. Do your job and fight for the people, and the rights they were born with. You're a public servant, as is the governor, so please stop the tyrannical behavior being forced on us! And please don't give me any patronizing "misinformation" garbage. When you inject ANYTHING into your body, there is risk. WHERE THERE IS RISK, THERE NEEDS TO BE CHOICE WITHOUT DISCRIMINATION!

Thank you,

Lisa

**Subject:** 9/28 special meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear members of the Kitsap Public Health Board,

I recently read your meeting agenda for the special session to be held tomorrow Tuesday 9/28/21. As we all faces struggles and trials in the Pandemic, I am concerned about the options presented in the discussion notes. In particular the idea to require proof of vaccination for entering an indoor space. This seems to be an extreme reaction to the situation that will not actually address the problems we are facing, but add to hardships for many community members.

First when I look at the CDC guidelines the definition of close contact (how covid is typically spread) it is to be "within 6 feet of someone for a cumulative total of 15 minutes or more over a 24-hour period". This is not happening in most public spaces. This does not happen at the grocery store, Lowes, Target, or even a sit-down restaurant experience.

In addition, if you vote to require proof of vaccination for indoor areas in the county, how would unvaccinated individuals meet their basic needs? How would many middle and high schoolers be educated? How would unvaccinated individuals buy groceries or home goods? How would they buy clothes for their children? How will they maintain dental and medical health with regular check ups? You also state you would be doing this for the good of the economy. How would removing a large buying base help local small businesses?

We have been well aware of this pandemic for over 18months. Early and inexpensive treatment methods are widely available. Our hospitals have had more than enough time to prepare for the steady 5% hospitalization rate. If we need more ICU beds I am sure there is physical space that can be made available. Just 10 more beds would change our current fill rate to below 80%. If we are having staffing shortages perhaps there are other policies that need addressed.

I urge you to consider the health and economic hardships these kinds of policies will have in devastating our community.

Sincerely,  
Elizabeth Paulus

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

My name is Beth Kimple. Please do not support any decisions or ultimatums that force a person to choose between being injected with a vaccine or lose their jobs. Please do not support the "vaccine passport" idea, that if installed will devastate many lives, in Kitsap county. Fear and depression strike when people are placed under these draconian mandates. Suicide rates have risen as a result, especially among the black population, where suicides have risen as much as 94%. The mandates and lockdowns have been especially devastating to the lower income folks who struggle day to day to feed their families and pay bills. Let people make their own free choices. Thank you for your attention.

Sincerely,

Beth Kimple.

Dear Kitsapers,

We have relations in Jefferson & Callum counties and would ask that there be no Vaccine ID nonsense be instituted. Vaccinated or not Vaccinated this is not the right approach. Restaurants are suffering and the wait staff DOES NOT want to enforce such a thing. I've spoken with many there as my mother lives there and visits are often.

Thanks for the chance to have an input.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Kitsap Health Board and Community Leaders,

As a life long community member of Port Orchard, I have concerns for your upcoming meeting to discuss further mandates and enforce vaccination for Covid-19.

All businesses, especially small, local run businesses, have struggled to stay open the past year and a half. Those who have worked this entire time, or were essential, want to work and provide for their families. Many of us have shopped small as often as we could/can to support our community, friends and family. Sadly, many doors couldn't stay open. A required vaccine for any employee or guests would further harm the local Kitsap community. I don't want to see Kitsap continue to struggle, financially or in morale. I don't want to see more shops close, more people struggle or more unnecessary hardships than this pandemic has already provided.

I am requesting *NO further restrictions* for Kitsap residents. (Option 1, on your agenda: Take no action and allow the current situation to play out.)

An open meeting where public voices and concerns are heard would be appreciated. Kitsap can endure this without having to be more restrictive and enforce vaccine compliance. We, as a community, can rise above that and be successful.

Kayla Martinsen

**Subject:** Don't Force People to Vaccinate

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To Those Who Are Making Vital Decisions,

Please don't force the people in our community to be vaccinated in order to work, conduct business, enter restaurants or venues.

\*Because we know getting vaccinated does not prevent an individual from getting Covid.

\*Because we know that previously having Covid and having the antibodies already protects you from Covid.

\*Because we know that the MAJORITY of people in our community are already protected with antibodies or the vaccine.

\*Because we know there are risks and side effects associated with any vaccine.

Please stand up for truth and the freedom of the people in our community and for the welfare of our small business owners.

Say NO to vaccine passports and forced vaccinations.

Thank you,  
Jamie Myers

**Subject:** We Oppose All Vaccine Mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,

I am writing to express our opposition to vaccine mandates in any form, whether to require employees to be vaccinated or require public citizens to show proof in order to engage in business.

My wife and I oppose mandatory COVID injections and vaccine mandates for the purpose of restricting access to public businesses. As Gib Morrow stated during the KPHD meeting on September 7, "...it's time for Plan Z, which is requiring..." (at the 15:02 mark).

We have the free choice to determine if we want a COVID shot. Neither government nor private companies have the right to force us to have a so-called "vaccine passport" for the purpose of doing business. The idea of vaccine mandates presents a serious threat to individual liberty. To quote Ben Franklin, "Those who would give up essential Liberty, to purchase a little temporary safety, deserve neither liberty nor safety." Or more succinctly, "The welfare of the people in particular has always been the alibi of tyrants" (Albert Camus).

The Revised Code of Washington guarantees our "right to the full enjoyment of any of the accommodations, advantages, facilities, or privileges of any place of public resort, accommodation, assemblage, or amusement" (RCW 49.60.030).

The Constitution of the State of Washington states "governments derive their just powers from the consent of the governed, and are established to protect and maintain individual rights" (Art 1, Sec 1). Additionally, "No person shall be deprived of life, liberty, or property, without *due process of law*" (*emphasis mine*) (Art 1, Sec 3).

This is not about controlling a virus; rather the intent is to force compliance upon the citizenry in response to government demands. Mandates are not law; they do not carry the force of law, and are as such unenforceable. No legislative actions have been taken to create any such law.

We urge you to fight against any direct or indirect effort to make COVID shots mandatory, or to require a vaccine passport to engage in business within the community.

Thank you,

Robert and Cheryl Reiher

**Subject:** No Vaccine Mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,

Countless people, including my husband, have had covid. Natural immunity can not be dismissed and here's why. First what vaccine have we EVER given to an individual with prior infection? NONE. Why is that? They don't need it and it's dangerous and untested to show the safety of doing so. This is virology 101. Also, studies show a much HIGHER risk, as much as 10 x, to having had covid and THEN getting the vaccine. It has shown to take robust natural immunity and put the recovered individual's immune system in overdrive causing a cytokine storm, death, or blot clots which then either go to brain and cause stroke, or to the heart which causes a heart attack. This isn't speculation, this is science, and ignoring the data proving this is not just ignorant but unethical. So WHY should a person with natural immunity that poses less of a health risk to society than the vaccinated, by 23% be forced to get the vaccine for a illness that they already have had and to put them selves at a MUCH greater risk?

Are the mandates protecting society? No, everyone now knows that you can get covid and give covid EVEN after having the vaccine. What about the post-covid individuals? They are NOT getting it or giving it. The same amount of people are getting and dying of covid today as before the vaccines were introduced in January. They are not working. No one has shown me (and I've looked) any data to prove otherwise. I do however see in VEARS the amount of vaccine injuries are higher with the covid vaccine than every other vaccine in history added together. That should be alarming to our society that we haven't stopped them.

My husband had an aneurysm in his heart two years ago and underwent open heart surgery, ablation, and took blood clotting medicines he had to be slowly weaned from. A year later he had covid and did just fine. He was back to work after the quarantine time and doing well. Now, a year later he is being forced to take this vaccine or loose both his jobs. Given the reasons above, we would have never dreamed someone would say he should risk his health and take this shot, given his history. Now to mandate it to work, to eat out, to shop is such a blatant attack to our freedom, our personal choice, and completely ignoring the scientific studies of natural immunity. He will most likely loose both of his jobs if this continues. Saying it's unfair, doesn't even seem to cover it. My husband has proudly served in the military since 9/11 to protect these freedoms. If you have the ability to protect the freedom of our community members, you should do so.

Here is another point that needs to be addressed. My parents were staying with us when our family of 6 got covid. We obviously were very concerned for their health and safety and knew most likely they would get covid. My father 79, did not want to go to the hospital so inquiring of their local doctors what we could do for them prior and during covid, their responses were dumbfounding. No doctor was willing to prescribe anything prior, and once they obviously had it, they said they could prescribe anti nausea medicine until they were sick enough to go to the hospital. We already knew of early treatments, even a year ago, and could not understand why the doctors were telling us that there was a blanket statement for Franciscan and Multicare that said no doctor could prescribe early treatment meds until they were hospitalized. Are you aware of these policies that are creating havoc and allowing covid to multiply?

Covid positive patients could get a prepackaged amount of daily vit. D3, C, zinc, baby aspirin, zpac, and ivermectin with literature like is being done successfully in India and South America. This would save lives at home and eliminate the severe replication of COVID-19 that is occurring early on and put less stress on our hospitals for late treatment that may or may not work? Does this seem like a good community health policy to you? I'm appalled at these choices, this information on early treatment being suppressed, and allowing SO MANY people to get unnecessarily sick and die. Once my parents had telemedicine appts with doctors out of state that would DO something, they got on Ivermectin, hydroxychloroquine and zinc and were better in a couple days. They have had no lasting problems from covid but couldn't say the same if they got the vaccine. If we would have waited and done nothing, they would have likely died due to the fact of replication and underlying conditions. But, they got better at home with early medicine and vitamin treatment a year ago. It's a crime against humanity what is happening. I could kind of understand a year ago that maybe some medical professionals were unaware of these lifesaving treatments, but that is impossible a year later. I've heard those with loved ones trying to get Ivermectin and can not. It's completely wrong to have something with 40 years of safety behind it, to be kept out of the hands of Americans only.

These hospitals are already short staffed and if the staff is now forced to take the vaccine, our community hospitals will be in disrepair in terms of staffing. I am VERY concerned. I am concerned for my elderly neighbors that may need care and will be turned away. I am concerned for the general trust in healthcare. I am concerned for those that have taken the vaccine and have side effects. I am concerned about all the people who will lose their jobs based on poor science by those making these decisions. I am concerned there will be many losing their housing soon after losing their jobs which should NEVER happen. I am concerned for anyone getting covid right now and are not able to get treatment unless they are sick in the hospital. This should concern everyone. People feel that hospitals care more about making money from big pharma than protecting their loved one's lives. How is the health department going to repair this trust? Do you think mandating vaccines will do it? By ignoring natural immunity? By taking away our constitutional rights? By firing people and taking away their freedom of choice? By segregating society into the vaxxed and unvaxxed? I don't think this would be on the right side of history.

Thank you for considering the countless lives a poor decision of vaccine mandates would affect, and please take the stand for freedom that so many have died to protect.

Sincerely,  
Katie Ellis

Dear Officials,

I am writing to you in hopes that you are being led by a true desire to serve the people. If you are then please read this. I am against vaccine passports. As a BIPOC, I can tell you how disgustingly racist vaccine mandates and passports are-even the leaders of Black Lives Matter and Native Lives Matter have vehemently denounced them.

As a Historian pf World War II, I can tell you that requiring citizens to show a vaccine card or be denied entry into places outside of their homes is eerily resonate of fascism.

Lastly, I have to wonder why this meeting is closed to we, the people- when it concerns us so intimately.

True statesmen and stateswomen are led by God and do what is right for the people even when it means pissing of their peers. Oppression is never right.

God Bless you all.

Sincerely,

*E. Gonzales*

Keith Grellner, RS  
Administrator

Thank you for taking the time to hear my voice.

I love our county and our community.

I'm writing to voice that many of us in Kitsap County request that you do not bring on vaccination passports and stricter requirements. A vaccine passport requirement would go against the very essence that is the United States and the free citizens of Kitsap County and all Americans

I am pro-vaccine and informed choice but this particular vaccine I would like more time. I want to see long term affects. Also, there are many "whistleblowers" bringing to light that MANY adverse reactions are not being reported across the country. I have many family and friends who are dealing with adverse reactions to the vaccine as well. These reactions may be rare but they weigh on my decision. That coupled with the uncertainty of what may happen in years to come makes me so thankful to live in a country and a county where we have the right to choose what we put into our bodies. We truly just don't have all the answers yet.

We do our part by supporting our community. We shop local, we donate and volunteer, we wash, we are mindful; we distance and when we are sick we stay home. Cases are dropping across the country and in Kitsap.

Please reconsider this decision so that my family can remain active members of this community.

Thank you for your time,  
Christina Besand

**Subject:** NO Vaccine Passports, NO Vaccine Mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good Afternoon,

Recently I heard that the Kitsap County board will be making a major decision “for the people” regarding vaccine passports for businesses and restaurants and mandates for county employers and businesses.

1. Do I agree with vaccine passports? **NO**
2. Why? **My body, my decision. In no way should the city, county or federal government have any say over who can or can't shop in a store and by requiring a vaccine passport you would be doing just that. I would stop shopping in this County, period. I would not use Kitsap businesses by means of online shopping or pick-up either. Making the decision to require vaccine passports will make it hard on small business owners as well as on those who have chosen not to be vaccinated (waiver or not).**
3. Do I agree w/vaccine mandates for anyone? **NO**
4. Why? **My body, my decision. Each person has their reason's for either getting vaccinated or not and it should be that, their decision. I know people on both sides, those who got the vaccine and those who will not. It's not mine, your or anyone else's job to make that decision for them. I feel like County representatives are stepping in to make these choices because the louder group gets the attention. That louder group being the government, media and those who are vaccinated and freaking out because the government and media have blown this thing up ridiculously. Besides, we're all still required to wear masks still, don't they work? Why would we require people to get vaccinated if the Great Mask mandate worked so well? BTW since this all started I have been to other states who do not have a mask or vaccine mandate and people are not dropping like flies as everyone wants us to believe.**

If Kitsap County is to require vaccine passports or have vaccine mandates I will not live or shop within this County. I truly believe you will experience staffing shortages if you are to vote in mandates.

From a post on FB but completely relevant to how I feel:

For my friends and family who have recently gotten their CV shot or who know they will get one soon, awesome for you. I can see how relieved you are and I'm so glad that this option is available for you!

For my friends who aren't sure they will get one just yet, or maybe ever, or already know that they never will, I want to throw some love and respect your way, too. I am happy that you have that choice. Medical freedom is important. 🤗  
The wonderful thing about informed consent is that two people with the same information, can make two completely different choices and neither of them is right or wrong. That is what medical freedom is and should be.

👉 There are benefits and risks to every medical procedure. Doing the “right thing” means you've weighed the risks and benefits for yourself, and are making an informed decision! The only wrong decision IMO is made purely out of fear, social pressure or emotional reactivity.

✨ If you have researched your decision and are comfortable with it....great!

✨ What's right for one person, may be wrong for the other. Both, on an intuitive and biological level. We're all doing the best we can with the information we hopefully have spent time digging into.

Let this be a gentle reminder \*for all\* to please respect each other and be mindful of the message we put out there. Is everyone "wrong" because they believe differently than you? They very likely have just as strong of a reason for their choice as you do.

So whether you choose;

CV shot

No shot

You're okay in my books and I respect YOUR DECISION

You're NOT ok in my book when you start being rude to others because they made a decision that was BEST for them & different from yours.

😏 "I've Copied + Pasted because we all need to respect one another and agree to disagree sometimes.

Just do you 🙏

--

Courtney Norwil

**Subject:** Discussion of Vaccine Mandates in Kitsap County

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear members of the Kitsap Public Health Board,

Thank you very much for taking on the important responsibility of serving on the Kitsap Public Health Board. When you agreed to serve you could not have believed that you would be serving during a pandemic. Nor could you imagined that you would be asked to make decisions that could impact the livelihoods and Constitutionally guaranteed freedoms of the residents of Kitsap County.

In his memo to the board that ultimately calls for vaccine mandates, Dr. Morrow indicates that Covid and other illness "... is critically straining a depleted and fragile healthcare system, which is now operating at levels approaching 'crisis standards of care' ". He then states that "Staffing at our local healthcare facilities remains a critical challenge due to personnel shortages". I believe that Dr. Morrow correctly outlines a problem but proposes a solution that is illogical and will certainly be ineffective.

Multiple industries are facing critical labor shortages. As an executive for a major transportation company I can confirm that the US transportation industry along with many other industries in the US are facing a critical shortage of workers. Covid has certainly contributed to that shortage, however, there is ample evidence pointing to increased government unemployment payouts, comfort with remote work arrangements, and employees becoming more willing to change jobs for higher wages in new industries as reasons for the shortage of workers. Businesses are now responding successfully with higher wages and better benefits in order to attract and keep quality workers.

I vehemently disagree with Dr. Morrow's fundamental assertion that "Vaccinations are the best tool -- really the only tool if we want to keep the economy and schools open...". He then ties the economy and open schools to the worker shortage in the county's healthcare system. Though I am sure he is well intentioned, his solution flies in the face of the laws of economics. As with any other business, Kitsap area hospitals will have to pay higher wages and offer improved benefits to achieve their target staffing levels in a competitive environment. Vaccinations will not address the issue Dr. Morrow outlines; in fact, it may actually constrict the number of people who are willing to work under those conditions.

On behalf of my wife and four daughters I am urging you to resist the imposition of vaccine mandates as they will have a devastating effect on the residents of Kitsap County. A primary reason for opposing vaccine mandates resides with our US Constitution and the fundamental freedoms it guarantees. Mandating vaccines- (or any other medical procedures)- even in the face of a pandemic,

would fundamentally weaken the constitutional underpinnings of our entire society. I can think of no way I could explain such a mandate to my children in the context of what our country has stood for these last 243 years.

Based on sound economics and a reverence for our US Constitution, I urge you to do the difficult but correct thing- resist the imposition of vaccine mandates. Any decision to the contrary, however well intentioned, does nothing to address the core reasons for short staffing in our healthcare system. More importantly, any medical mandate goes against our Constitution's guarantees of personal freedom, personal liberty, and freedom of choice.

Sincerely,

Christopher Baugh  
Poulsbo, Wa

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello,

I will keep this email brief because you will be receiving a lot of input on this topic and it will be a lot to read.

Mandating proof of Covid vaccination will cause significant harm to local small businesses that are already hurting from the previous lockdowns and closures of their businesses.

Secondly, people running a small business already have enough to manage without having to now police their customers.

Business owners should not have to be in the position to enforce county and state mandates. That is the responsibility of the county and state.

Respectfully.

Thomas Basile

Thank you for allowing me to express my opinion as a concerned citizen and tax payer in Kitsap County.

I would like to talk about the proposed vaccine mandated for businesses in Kitsap County. These businesses have spent so much time and money trying to stay afloat through the COVID pandemic. Many have had to close their doors because of lock downs.

Please do not cause more stress in these business owners and their families and employees by asking them to mandate vaccines for their employees and patrons. We do want to stop the spread of this virus but the truth is that according to the CDC, vaccinated people can also contract and spread the virus.

Businesses are already masking, cleaning, screening and taking other precautions as are their patrons. I cannot imagine the stress they have been under. Please do not add to it. Please take a stand for freedom in Kitsap County. Allow people to make their own decisions. Further mandates will only lead to more businesses closing and this will be detrimental to our economy.

Thank you for your time. I know your job is not easy and I truly appreciate the hard work the health department is doing.

Kristina Weisgerber

**Subject:** Comments regarding Dr. Morrow's memo dated 9/28/21

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dr. Morrow's memo only serves to illustrate something that we've known for many months. The vast majority of Covid transmission occurs in custodial settings (jails, nursing homes and other long term care facilities) and in private homes. With the exception of some well documented "super spreader" events, there is little transmission that occurs in restaurants or in retail establishments. Yet these businesses are the ones most often singled out for restrictive government mandates.

While we are still in a very serious situation, we are not, as some would have you believe, in worse shape than we were a year ago. Our vaccines are very effective and we have far better treatment options for covid than we did a year ago. According to the public health districts own statistics 65.5% of those over twelve are fully vaccinated and 71% of the 12+ population in our county have had at least one shot. Yes, we can do better. The public health district should use its moral authority to encourage more people to get vaccinated and to continue to take simple precautions like wearing masks. Extra efforts need to be made to reach those in low-income groups and communities of color who are statistically least likely to be vaccinated.

Additional mandates on businesses however, need to be avoided.

Mandating that employees get vaccinated on pain of termination is counterproductive and only serves to harden the resolve of those that are opposed to being vaccinated.

Requiring businesses to police the vaccination status of their customers places a huge additional burden on folks already struggling to remain afloat and poses an unnecessary risk of assault to their employees (Jefferson and Clallam counties are having to hold "vax de-escalation" workshops due to their asinine vaccination card requirements). In addition, since people of color are less likely to be vaccinated than their white counter parts, any vaccination card requirement could be construed as racist as it has a disparate impact on that group.

While I have no doubt that the outbreaks at our long-term care facilities have adversely effected care at St. Michael Medical Center, the fact is that St. Michael's has been experiencing staffing issues long before Covid. Those are separate issues that can be addressed at another time.

In closing, I am urging that the Board reaffirm the health districts efforts to increase our vaccination rate and to also create contingency plans to "ramp up" our health care system should the need arise. Keep in mind that we are far from the point where our local health care system is overwhelmed. Cases in Kitsap county appear to have plateaued and even with the staffing issues, St. Michael's is only at about 70% capacity (not abnormal for any hospital).

Covid has become endemic. We're never going to be rid of it. To deal with it, society needs to remain cohesive. Government mandates only serve to drive us apart and to undermine trust in our public institutions.

Sincerely,  
Charles Ely  
Bremerton

**Subject:** Comments regarding Kitsap County Public Health Board Meeting, September 28th

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Board Members,

My name is Lori Thompson. I live in Port Orchard and I am fully vaccinated. Thank you for all your work to serve our community to help us fight the covid virus. I am writing regarding the board's considerations regarding Covid mandates in Kitsap County.

I believe that the current situation should be allowed to play out. I believe that individuals should decide what is right for their family regarding the vaccine.

Private businesses should decide what is right for themselves and their employees. Mandates place an unfair burden on business owners by making them an enforcement arm of the government. I also believe that the government is also over stepping its bounds by mandating their employees to be vaccinated.

I believe that there should be no mandate regarding showing proof of vaccination status to enter a business or indoor venue. This type of mandate violates personal privacy. It also seems to violate what is in place with HIPPA. This mandate appears to assume that vaccination provides more protection than it truly does. The current information that I understand is that it keeps me from becoming seriously ill if I contract the virus, not preventing covid. People should not be restricted from being able to conduct business in this county by not taking the vaccine. I think this proof of vaccination is not right for people who have had covid and recovered. I don't believe it is right to mandate them to have the vaccine when they have already had the virus. A policy that requires proof will only cause more frustration, with little to show for public protection from the virus. This also puts our businesses in a "policing" position, which I believe to be unfair to them and their customers.

I would like to see health officials in our community focus on how to help people before hospitalizations are necessary. I think there has been too much focus on the vaccine being the only treatment option to helping people. What kinds of treatments do we have available to our health providers to treat people who contract covid?

Thank you for your considerations regarding this matter.

Sincerely,

,

Lori Thompson

Thank you for taking the time to hear the voice of those in the community. I have grown to love this community.

I am writing to voice the concern that I share with many in the community regarding the vaccination passports and stricter requirements.

I am pro-vaccine and pro-choice. With this particular vaccine, however, I need more time, I would like more time. I want to see long term affects. I am a veteran. I live in the United States of America where we have the right to choose what we put into our bodies, my body, my choice. I am so thankful for the scientists and doctors that are taking the time to look into this even more so that when I make a final decision I will feel fully prepared and confident in my decision. I have not chosen at this time to not get the vaccine, I am simply waiting until there is more research and long term studies.

I shop local, I shop small business, I donate and volunteer and we try to be involved in many ways in making this a better community. We are mindful of when we are under the weather and stay home. When we venture out to local businesses we are washing our hands, distancing as best we can and being respectful of others around us.

Cases appear to be dropping in Kitsap County and that gives me hope that we can continue on without the vaccine passports. I would love for my family to stay an active members of this community and support my neighbors as best as possible.

Respectfully,

Joshua Kejsar

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good evening,

I write to you today specifically for the special meeting listed above. It states in the board meeting agenda that the health board will review recommended action to include requiring proof of vaccination to enter private businesses for all Kitsap county citizens. This is unethical and frankly an appalling ideology. To stop someone from entering an establishment based off of their medical history is unconstitutional and a massive breach of protected medical information. Kitsap county's established governance should never have the authority to decide who is allowed to enter a grocery store, especially when it involves private protected information. To move forward with vaccine requirements to enter private businesses is a breach of public trust, and will fracture its confidence from the citizens that fund it's operations.

Thank you for your time.

-A very concerned Kitsap County Citizen.

**From:** Jonathan Jordan <jonathan\_jordan@hotmail.com>  
**Sent:** Sunday, September 26, 2021 9:44 PM  
**Subject:** Kitsap county health board special meeting Tuesday the 28th of September

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Please take the following recommended action:

"While the Health District recognizes that vaccination requirements are a complex and controversial topic to some, we hope to receive direction from the Health Board on how you would like to proceed with respect to the following, or other, options:

1. Take no action and allow the current situation to play out.

Please also look at the following link by Dr. Fleming. It is a 4-hour lecture on the origins of the pandemic and how the current treatment that is approved is incorrect.

[LIVE FROM 'EVENT 2021' IN DALLAS, TX | The HighWire](#)

Here is his web site:

["CURRENT HOT TOPIC" | Fleming-Method \(flemingmethod.com\)](#)

### Current COVID/Heart/Cancer | Fleming-Method

Gain of Function Research. With a paper trail from China's bat caves to North Carolina, to increase infectivity and virulence of virus. Documents tracking the virus back to Wuhan with \$3.5 million from U.S. National Institute of Health funding.

[www.flemingmethod.com](http://www.flemingmethod.com)

I hope that you can stand up for freedom and not be swayed to just go along with what the President and the governor is pushing. 49% of PSNS have decided to not get the vaccine. If you force this many people may leave Washington state. Imagine what would happen if PSNS couldn't do its job due to the workforce not being there to get the ships out in time. If half of the county decided to leave, what do you think would happen? I know you are thinking that there is no way that that many people would walk out of the job that they have just because of a vaccine. You might be surprised. Those that are true Americans know how to stand up for the right thing even when it isn't popular. This is something that was taught as a lesson coming out of WWII. After what was done to the Jews you would think that no other country would try to force an entire group of people to do something against their will. You get to make that sort of decision this week. Are you going to be like Nazi Germany or are you going to be like the freedom loving Americans that lost their lives trying to preserve freedom for a people that had it taken away.

Jonathan Jordan

Keith,

Thank you for taking the time to hear the voice of those in the community. I have grown to love this community more and more each day and year.

I am writing to voice the concern that I share with many in the community regarding the vaccination passports and stricter requirements.

I am pro-vaccine and pro-choice. With this particular vaccine, however, I need more time, I would like more time. I want to see long term affects. I have autoimmune diseases that would greatly influence how this vaccine would affect my body. Not only that but there are many whistleblowers bringing to light the many adverse reactions that are not being reported consistently. That coupled with the uncertainty of the long term affects of said vaccine make me so thankful that I live in the United States of America where we have the right to choose what we put into our bodies. I am so thankful for the scientists and doctors that are taking the time to look into this even more so that when I make a final decision I will feel fully prepared and confident in my decision. I have not chosen at this time not to get the vaccine, I am simply waiting until there is more research, long term studies and specifically how people with my autoimmune diseases react to this vaccine.

As I stated earlier I love this community. On top of that I love supporting this community. I shop local, I shop small business, I donate and volunteer and we try to be involved in many ways in making this a better community. We are mindful of when we are under the weather and stay home. When we venture out to local businesses we are washing our hands, distancing as best we can and being respectful of others around us.

Cases appear to be dropping in Kitsap County and that gives me hope that we can continue on without the vaccine passports. I would love to stay an active member of this community and support my neighbors as best as possible.

**Subject:** Covid restrictions

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

I write to you with a heavy heart. I am a wife of 39 years we have nine children and seventeen grandchildren. We have lived in Washington all of our married years. We have been proud to say that this has been our home. It has been very sad to me to see our home reduced to a place of unconditional mandates, a place of unconstitutional restrictions and now a place where the livelihoods of all our children are threatened because all of a sudden there is no concern for my children nor for ourselves, to the right of our bodies, our choice is being threatened. My fifth child and her husband with his brother and spouse have a small business. These kinds of restrictions that you are considering are inconceivable. The small business getting off the ground. My favorite coffee stand run by two single moms. The losses they have all suffered with now more restrictive mandates are just beyond feasible. The loss we have faced in our schools with everything in our lives being political. As a mom and grandma that has taken to standing on a street corner calling for a world for my children and grandchild that may be a very different America. I don't want to pass on to them anything less than what I was raised with. Living in a place that was established and fought for. That all men might live free as guarded by our constitution. In less than two short years we have been dictated to shut up not allowed to worship freely, speak freely. My grandchildren not being able to see someone's face to hearing the worry in their parents' voices as to how will we take care of our families when they take our jobs, our livelihoods. I could talk science but let's be real that's something different for everyone but freedom should not be. Our basic freedoms have been taken and looking at your agenda will be taken some more. I would call your attention to the well know phrase "my body my choice" whether we agree with what that phrase represents the principle remains the same-no one has the right to force, coerce, or demand any of us to place anything in our bodies we do not want. The Covid vaccinations are still a test, there are no long term case studies to follow. The Covid vaccine does not eradicate Covid nor does a paper mask as the boxes own warning label discloses. There are many doctors, nurses, firefighters, police officers that were counted heroes now have to choose their jobs over a threat of their very own lives or lose their jobs and careers. Doctors took an oath to do no harm. There are those of us who have health concerns, religious concerns and moral concerns that all of your said agendas disregard. Medical and religious exemptions not being signed or accepted even though the Governor's mandate allows for them. It is my sincere desire and request that you take these concerns seriously and not call for vaccine passports that would further restrict small businesses, professionals, and me, a mom and grandma who wants her children to be raised in the same kind of America I grew up in.

Respectfully submitted,

Bobbie Hunt

**Subject:** Vaccine requirements in Kitsap County

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Please choose to take no action and allow the Covid19 situation to play out in regard to vaccination requirements in Kitsap County.

According to the CDC website the vaccines do not provide known, lasting immunity, do not eliminate the virus, do not prevent death, do not guarantee a person won't get Covid 19, and do not stop a person from passing Covid 19 on the others.

What we do know is the current vaccines have not been evaluated for their long term safety or their safety for pregnant or nursing mothers.

It is known that the current vaccines are altering women's menstrual cycles, yet there are no studies regarding the consequences to reproductive health. There are large groups of people for whom the vaccine companies acknowledge the current vaccines are dangerous.

Segregating a large group of people because they do not want, for whatever reason, an experimental vaccine for a virus that the CDC says is 99.97% survivable is unconscionable. It creates two classes of citizen and science does not support it.

Studies show that vaccinated people have the same viral loads in their nasal passages and are at the same risk of transmitting the virus as unvaccinated people. Why stop only the unvaccinated from working or entering buildings when everyone has and the same possibility to transmit the virus? The unvaccinated are actually at greater risk of contracting the virus in public places because vaccinated people may be sick but asymptomatic. This is a risk the unvaccinated are willing to take.

If you choose to restrict the unvaccinated from entering public buildings businesses already hurting from the last year and a half, will suffer from the lost revenue. How many more

businesses will close from this decision? Our county has lost too many businesses already and thousands have lost their livelihood.

Please do not make an already bad situation worse by making an unsubstantiated decision to require vaccines to work or effectively live in Kitsap County.

Sincerely,

Christeen Mogavero

Dear Kitsap Public Health Board,

As a long time resident of Kitsap County, I am appalled at the action items for the September 28th health board meeting. Mandating vaccinations and vaccination passports will not stop the virus. Covid 19 will never be eradicated. What the mandates will do instead is to hurt businesses and destroy our community. It will segregate us. Please do not turn our county into Nazi Germany by forcing people to undergo a medical procedure that they do not want and by forcing us to show our papers to live out our daily lives. Although I am personally vaccinated, I will not comply with this tyranny. Please make the right decision and let people have the freedom to make their own medical choices, even if you don't agree with them.

Sincerely,  
Dawn Larson

**Subject:** Special Session

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear commissioner,

I have recently read your meeting agenda for the special session to be held on Tuesday 9/28/21. As we all faces struggles and trials in the Pandemic, I am concerned about the options presented in the discussion notes. In particular the idea to require proof of vaccination for entering an indoor space infringes on our rights to choose our own medical treatment. I believe that vaccinations are a very important part of the fight against COVID. Many individuals will have their lives saved because of taking the vaccine. I also understand the stresses put on our medical facilities. In your memo it was stated that, "Vaccinations are the best tool --- really the only tool if we want to keep the economy and schools open" shows a predisposition to a certain method of dealing with this pandemic. We are nearly 18 months into the pandemic. Treatment methods that are potentially effective such as Ivermectin can't be prescribed despite the benefits of using them. Reallocation of space within the hospital, different disinfectant methods, additional staffing could all be accomplished. Governor Inslee closed the state so that we could "flatten the curve" and allow our medical system to prepare for the increasing rates of COVID-19. As the health department, those preparations should have been accomplished this last year. Stating vaccinations are the only way, causes great concern I urge you to maintain our ability to care for those people who are unfortunate enough to get sick. I urge you to continue to allow individuals to choose what they put in their body and what medical procedures they undergo.

In addition, the consequences of not allowing people into indoor spaces without a vaccine brings forth other issues such as:

- 1) How do unvaccinated get dental care
- 2) High schoolers can't go to school if they choose not to be vaccinated
- 3) Unvaccinated can't get medical care without vaccination
- 4) How do unvaccinated get food and home goods

These things are simply unacceptable. In addition there is no room for moral or religious objections to the vaccine development methods. There are also those with natural immunity.

This is an overreach by the government and should not be allowed. Please find other ways to care for our sick, educate and encourage vaccination for the complacent or ignorant, but don't require it.

Thanks

Mark Paulus

**To:** Keith Grellner  
**Subject:** Vaccine Passports

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

To whom it may concern,

I wish to strongly voice my objection to vaccine passports for Kitsap County restaurants for the following reasons:

1. Violation of citizens' rights to medical privacy
2. The negative economic impact to our local businesses just recovering from the lockdowns
3. Enforcement of the "passports" would place additional burdens on restaurant and bar owners thus forcing more businesses to shutter.
4. Enforcing and encouraging discriminatory practices on people that choose not to get vaccinated because of religious or other reasons.

If more people are, in fact getting vaccinated (even if not at the pace desired) and the mask mandates are back, shouldn't the problem be getting better? Our Covid rates would show this is not the case but has anyone bothered to research why it's not getting better? We have over 70% vaccinated, mask mandates are back but we are worse off than we were a year ago, before the vaccine was released. Why is no one talking about this? Could it be the vaccinated are actually exacerbating the problem?

The fact this decision is coming up with no/minimal public input is shady as heck.

Respectfully,

Heather McClellan

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Mayor Wheeler

I am writing you regarding the upcoming meeting this Tuesday. I find it both Sad and appalling that we are even having this conversation. As you are aware there is good data regarding the efficacy of the MRNA vaccines. It has become clear and the NIH website states the vaccine does not stop people from getting COVID and it does not stop them from spreading it. Further evidence from Isreal and Vermont which both had high vaccination rates both had two of the largest surges. Do I need to repeat that? You have the proof and it is easy to find. I have no issue with people making their own choices that suit them. That is called medical freedom. If you think forcing vaccines on people to protect others makes sense, read the above sentences again. Who are you protecting? It seems you are admitting the vaccine does not work, so therefore there is no reason to mandate.

This is science and the actual science tells us COVID is here, it is very deadly to a very small percentage of society, not enough to require everyone be locked down or forced to take an experimental MRNA vaccine. The claims of it being safe and effective are false as the VAERS data shows and that is with many issues not being reported as proven in the Project Veritas video. No, that is not conspiracy stuff but an exposure of lies. We are at almost 15,000 deaths in a year. there were less than 2,000 from 1991 to 2020. Once again you can easily find this data and if you need I will go dig it up again. No MRNA vaccine in over 20 years of testing has ever passed long term animal trials including this one. This has not passed long term trials, it was rushed to market by one Administration and the current one claims people are opposed to it because people don't like their administration. The reality is many people don't care what party created it or wants them to take it, they are looking at the numbers such as VAERS, the efficacy and whether they need it when they look at the survival rate of COVID especially with

proper use of some gene therapies which have shown a lot of promise. That is not political, it is the right way to make a decision, an informed decision. This is a personal choice and should not be done through force, coercion or ostracization. Especially by the government. What country are we living in? Why would you fire an employee for making that decision? That is coercion and with the fact that it will not protect the public more if they are vaccinated it should make you liable to a lawsuit. You should also be held liable to a lawsuit should any employee(God forbid) have an adverse reaction or even death since you are forcing a medical procedure on them. Considering that that was also not a condition of their employment when they hired on, can you show where they signed something saying if you got scared as an employer you can force a potentially life threatening medical procedure on them? I'm willing to bet it is not there.

Lastly, with all of the above information I would say the idea that there is potential talk of enforcing a vaccine passport to shop, go to a restaurant or a theater? I will not share my private medical information with anyone and will be disgusted if the County even suggests they can force a private company to ask for my papers. Should anyone ask, they better be prepared to get a look at my US passport and a copy of the Constitution and if that is not accepted they better produce their medical info. I want proof they do not have HIV, AIDS, Hepatitis, herpes, tuberculosis or any number of other contagious diseases. Of course that is not any more my business than is my status theirs. This is a bridge too far and I have already resolved not to go shop in any county attempting this. This is supposed to be a free country and sometimes being a free person comes along with some risk. If I choose that risk is too high it is up to me to alter my plans, not the rest of society.

Please consider this long and hard and think about the flawed logic of forcing this vaccine.

Respectfully  
Daniel Smallwood

**Subject:** Vaccines For Entry Into Businesses In Our County

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

It is my understanding that you are considering an additional tyrannical mandate for certian Kitsap County Businesses. It is a disastrous route to take for the livelihood of our community. I am opposed to the direction you are considering and hope that you will decline this burdensome, discriminatory and unconstitutional consideration for the sake of our treasured business owners.

Sincerely,  
Rhonda Quayle

Good Evening Mr. Wheeler,

I am emailing as a citizen of North Kitsap. I live in Poulsbo and raising my four young children here. I'm writing you to show my opposition on the vaccine passport. Not only does this bring segregation back and divide our county, but it also takes away freedoms from good hard working Americans. This should not be a one size fits all. Some people are unable to get this vaccine as it can be a problem for their other health issues. Please take that into consideration when discussing this with the other members.

Thank you for your time,

Liz Hallum

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Mr. Wheeler,

As you are calling for a vaccine requirement, I am wondering if you understand that not everybody can take the vaccine. Some people can't due to health issues and it is not the place of the county to decide that they can. I know a number of people who can't because their doctor did not recommend it even though their doctors were not anti-vaccine. This is a decision that absolutely must be between a patient and their doctor. Not between a person and politicians.

I know I personally will never show proof of vaccine anywhere. I have no problem getting a covid test, out of general courtesy, now that they don't have to swab your eyeballs from inside your nose and as long as it's free. I don't object to that but I absolutely will not ever under any circumstances show proof of vaccine. I am 63 years old and my medical records are none of your business or the business of anyone in this County.

Sincerely  
Lori Johnson

Subject: No Vaccine Mandates in Kitsap County

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I'm writing to express my opposition to vaccine mandates being imposed on any business in Kitsap County by the Kitsap County Health Board.

I am a citizen of Kitsap County and a small business owner.

"Take no action and allow the current situation to play out" Is the best of the five options under discussion at the meeting.

Mandating vaccinations is a trampling of our rights as citizens of the USA, WA state, and Kitsap County. This decision would neither be good for the health of the citizens or the economy. We need to be able to make our own choices. Citizens should be allowed to educate themselves and make their own decisions without the force of mandates.

I urge you to oppose vaccine mandates.

Sincerely,  
Michele Schoepflin

Dear Mayor Wheeler,

We have resided in Kitsap County since 1998. We are very concerned with the direction our state is going regarding the unconstitutional mandates and potential vaccine passport restrictions.

According to the Kitsap County Public Health District's website as of September 16, 2021 a total of 156 people have died since March 2020 within the county from Covid related illnesses. To now consider a vaccine passport when the science clearly shows that vaccinated people can not only get the virus but spread the virus is a response that has no justification and will only hurt the citizens and businesses in the county more than they have already been affected since March 2020.

The last time we checked we lived in the United States of America not the communist states of America. We reside in the State of Washington, not the communist territory of Washington.

Elected officials work for us, we don't work for them. Governor Inslee is just an elected Governor not a dictator.

Our Constitutional rights under the law and ordained by God are not suspended by a pandemic. I would strongly recommend that you don't follow or even consider the unconstitutional direction that Clallam and Jefferson county have taken, but that in Kitsap County our freedoms remain intact.

Thank you,  
David & Jacki Baker

**Subject:** Recommended Action - KPHB Special Meeting 9/28

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Per the Kitsap Public Health Board Special Meeting Agenda for 9/28, Recommended Actions on Pages 5 & 6:

[https://kitsappublichealth.org/about/files/agendas/2021/0928\\_BOH\\_Agenda.pdf](https://kitsappublichealth.org/about/files/agendas/2021/0928_BOH_Agenda.pdf)

I strongly oppose all Recommendations but #1.

Please keep our County one of those who allow its residents the freedom of choice regarding obtaining a COVID vaccine in order to participate in and contribute to the economy of Kitsap County.

Those who are vaccinated are protected from those who are not. Those who are not can choose to expose themselves to situations where other unvaccinated citizens gather and should not be banned (which in a sense is what the result will be) from participating in commerce just because they have chosen not to be vaccinated. Americans should continue to have freedom of choice in such matters.

There are many more reasons why I oppose Recommendations #2-5, but to keep this short, count my voice as one, of many Kitsap County residents who oppose such mandates.

Thank you for your consideration.

Anna Winney

To Mr. Keith Grellner,

I've heard that Kitsap County is considering requiring vaccination to enter public buildings.

I find this very concerning.

To even consider limiting freedom of movement based on an individual's medical choices is illegal.

And, it opens a door to a level of government control that is very troubling.

Not allowing a portion of our community to enter buildings and participate in life is not about health, it's about control.

Dear public officials,

Requiring government mandated vaccines is not ethical and should not be adapted as a standard for Kitsap County public employees or private industry. It should be the choice of individuals to decide what is best for their bodies. They must maintain the right to decide what they choose to enter their bodies based on their medical or religious needs. I am not against vaccine but I am against taking the choice of a people away as it takes their freedom and liberty to choose!

I thank you for all the hard work that you do and for navigating the challenging times that we have faced this past year.

Thank you for considering my position on this matter.

Mr. Grellner, my name is Dane and I have lived in Kitsap for my entire life. I am deeply concerned about the health board passing any sort of vaccine mandates in the county. Please know that this will negatively impact my family. As a hard working father of six kids, this type of mandate would make it hard for me to feed my little ones.

We have had covid and have 130x the antibodies of a normal vaccinated individual, and this was earned by fevering for 10 days straight. Please have compassion on the great people of this county and don't make a rash decision. Please stand up for what's right and don't discriminate against your fellow citizens. God sees what is done behind closed doors.

Praying for you!

Dane

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

Please do not implement vaccine passports in Kitsap County.

This move will kill productivity and profit, and I trust that is not anyone's goal.

Considering many who have taken the shot are regretting it because it doesn't work and is likely making people very sick all by itself, why would any official attempt to demand that others must take it?

The vaccine was designed for a virus that is already almost two years old, so the science says it is out of date with the current strain of the virus. Why should any authority try to continue with an ineffective experimental substance which has numerous serious side effects and unknown long-term effects?

Please do everything in your power to stop this before it starts. The people who intended to take the vaccine have already done so. Please don't allow your health department to cripple the economy and the middle class by trying to force it on everyone else.

America is still the land of the free and the home of the brave and Kitsap County is my home. Please do what is best for the residents of the county which you represent and do not turn our home into an inhospitable and unwelcoming place. Trust that the residents will do their best to protect and take care of each other, without a mandated vaccine passport.

Sincerely,  
Michaela Rubenstein  
Kitsap County Resident

Good day, i am writing to you to express my opinion about mandatory vaccines and passports. Hopefully you will get to read this before your meeting on Tuesday. I understand your concerns about the covid virus, however it is not the governments role to try to force people to get the vaccine especially when 99% of people can recover on their own. If you require businesses to enforce the passports, you will only be hurting the businesses even more. I can personally say that it won't change my mind about getting the vaccine. Its obvious that this so called vaccine is really not a vaccine at all because it dosen't prevent people from getting the virus. Please keep Kitsap County a county of free choice not one of government control. Thankyou for your time!

Sincerely, Kim Jensen

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

I've been a small business owner in Kitsap County for over 25 years and have suffered the ups and downs of our economy. Covid has caused me more hardship than even the '08 recession due to shutdowns, lack of staff and inability to acquire the material needed to complete jobs we may have. If you vote to restrict us even more with these unconstitutional mandates we may be forced to move our business to another state. Between the mandates and additional taxes that Olympia and DC keep heaping on us you are giving us no other options. Covid has been misrepresented and static's have been skewed to fit a narrative. I also believe we need to recognize immunity that some have already acquired. Vaccines and all medical options need to be left to a personal choice. We don't do forced abortions or sterilization for those who seem unfit to have children and /or are on welfare but you want to force a untested shot on the entire population. Let those who choose to get the shot , get it and those who don't ,don't. If you're vaccinated then you should be protected, right?

Marjorie Gaines

**Subject:** Public Comment - KITSAP PUBLIC HEALTH BOARD SPEICAL MEETING 9-28-21

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

**Thank you** for allowing my written comment to be submitted prior to your special meeting regarding COVID-19 impacts in Kitsap County. I can certainly understand where the staffing issues to the emergent community health issue is at an all-time critical challenge due to personnel shortages. The mandate by the Kitsap Public Health District requiring its employees to implement vaccination requirements for their employees can certainly be part of the loss of staffing.

In brief, I am very much against the mandate of vaccinations. I believe government has no role in personal health care choices. I believe that education is key. Choosing to help the spread by vaccinating may be the primary objective, however what we have witnessed is the rebellion due to the mandates instead of strong education for personal choices that covers a variety of health conditions (active vs sedentary). When the Health District tells us the vaccine is our “only tool” I immediately understand that this is a personal decision by someone believing the vaccine is a cure. It is **not** a cure and anyone getting the vaccine may also get COVID and pass COVID on more readily believing they are invincible. This is what some may say is a “lie”. Thus, can we trust everything that is being told to us?

I believe we have so much rebellion because these statements have become a way of controlling populations. What about allowing doctors to tell patients about the supplemental choices that can slow the process from home, i.e., Hydroxychloroquine, Ivermectin, or Budesonide Oral Inhalation, based on an individual’s personal health? I hear about these alternatives from sources outside the government agencies, unfortunately. But when consulting my doctor, he tells me his hands are tied and cannot prescribe nor recommend the supplements due to the mandates to provide only the vaccines. He had to hide what he thinks would be helpful due to the Health District control.

If truth be told without prejudice, I believe people will respond in favor of following strong recommendations. But the truth is there are potential alternatives for some healthier citizens that choose to remain in a whole-health lifestyle, not being injected with a foreign substance. I believe the alternatives that reduce large population gatherings such as working from home, or ordering online for those who benefit from this lifestyle during the pandemic will be received well by most. Allowing largely spaced supervised walks by older residents of senior apartments outside or down halls and appointment-made visits in a protected space for nursing home residents is crucial for their whole health. This business of isolation has got to STOP! People are not made to isolate and will die in the trying. Please, let’s **consider whole health terms** and not only Health District Fear Tactics to control large populations. I hear their stress and wish there was more I could do to help them, but they are tying their own hands by mandating their staff and volunteers who are healthy to be vaccinated. Those vaccinated do NOT walk around cured of the COVID just because they receive a vaccine. This method may be an extreme help, but only when encouraged.

My vote would be to up the encouragement for alternatives without fear-based controls, including the right for doctors to prescribe supplements when appropriate. Also, let's figure out creative ways to keep fresh air, exercise and visitations or connections with people for our elderly, mentally sick, or shut-in patients. I don't think that Charlotte Garrido or any of the Commissioners or Health District personnel would appreciate being shut in a 350 sq. ft. space with no outside access for a minimum of 10 days, having their food served under the door (*so to speak*). And, remember you cannot get your groceries nor have visitors during this time. Not even allowed to speak to the best friend you made in your building. Many other stories like this are much worse, but I am believing you get the point without me having to scare you.

**Recommended Action:**

**Tell the truth:** Vaccines are best choice, but they are not the cure. Consult your doctor for alternative supplements in the meantime, even if you have taken the vaccine. Allow shut-ins at facilities to receive fresh air, exercise, and community contact under certain recommended protective guidelines furthering human growth and purpose. Utilize all resources learned and created to lower populations, but still allow connection to school or other activities.

**STOP MANDATES!!! IT DOESN'T WORK.**

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Members of the Kitsap Health Board,

As a Kitsap County resident, I am requesting that you do not recommend vaccine mandates in any way, shape or form in our county. Mandates such as these will not solve the situation you describe in your agenda. They will only serve to put further strain on our community.

Early treatment with safe, effective and economical medicines such as Hydroxychloroquine (HCQ) and Ivermectin should be made available to patients. Hundreds of studies confirm the effectiveness of HCQ in treating COVID-19 and preventing hospitalization and death. 63 studies have confirmed the effectiveness of Ivermectin in treating COVID-19.\*

Experimental Covid-19 vaccines have many concerning side-effects and liability for these side-effects fall on the consumer alone as manufacturers are exempt from liability. VAERS data from the American CDC shows that as of August 26, 2021 already half a million people suffered severe side effects, including stroke, heart failure, blood clots, brain disorders, convulsions, seizures, inflammations of brain & spinal cord, life threatening allergic reactions, autoimmune diseases, arthritis, miscarriage, infertility, rapid-onset muscle weakness, deafness, blindness, narcolepsy and cataplexy. Besides the astronomical number of severe side effects, the CDC reports that approx. 16,000 people died as a result of receiving the experimental injections.

Thank you for your consideration of this extremely important issue.

Lisa Poole, Seabeck

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

I'm writing to express my opposition to vaccine mandates being imposed on any business in Kitsap County by the Kitsap County Health Board.

I am a citizen of Kitsap County and a small business owner.

"Take no action and allow the current situation to play out" Is the best of the five options under discussion at the meeting.

Mandating vaccinations is a trampling of our rights as citizens of the USA, WA state, and Kitsap County. This decision would neither be good for the health of the citizens or the economy. We need to be able to make our own choices. Citizens should be allowed to educate themselves and make their own decisions without the force of mandates.

I urge you to oppose vaccine mandates.

Sincerely,  
Michele Schoepflin

Hi I am writing you about the vax passport and mandates. I will never take the vax I believe this is America and people have right to what they will and will not put into there body. I believe the vax is the mark of the beast and will not take it and there is alot of people who will not take it. This is America and I am thankful we have some freedom to decide these serious things. Thank you for all you do! I appreciate all you do for us!

Mayor Wheeler,

Thank you for taking my input into consideration and providing such a quick and kind reply. I appreciate it.

I had already emailed Dr Morrow so I appreciate you forwarding my message as well.

Take care,

Matt

Mayor Wheeler,

I'm writing in response to the KPHD announcement of a special meeting being held Tuesday September 27th without public input.

I would like to voice my opposition to any vaccine mandates, especially if they do not allow for testing. Kitsap County and the City of Bremerton have shown its dedication to minimizing Covid-19 through a 72% vaccination rate and dropping cases. Any further action at this point would just appear as control and would cause further division than what is already present.

Thank you for taking the time for my message and my best to you and your staff.

Sincerely,

Matt Pickering

Good afternoon,

Please take into consideration that our families know what's best for our own health. Requiring the vaccine, or proof of the vaccine is unconstitutional, unethical and goes against our medical freedom.

Stop this nonsense. We're smarter than we look.

In the constitution it also says we the people can over throw the government. If you want a **civil war** you're taking the correct path.

Hello KITSAP county Tuesday meeting attendees,

I am writing to ask you to PLEASE do not mandate anymore in KITSAP County.

Mandating vaccines for employees, the general public etc is over reaching into the lives of people, families and children in Kitsap county.

Information, encouragement and public education is all wonderful - and people can make their decisions. It is too much to mandate a vaccine!

All COVID vaccines as I am sure you know are tested or proofed on aborted fetal cell lines - mandating injection of these vaccines is not ok. Each person needs to make their OWN health choices.

Please listen to the people of KITSAP county and do not mandate anything that has to do with vaccines.

**Subject:** Medical Segregation

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To Those Deciding the Fate of Others,

I'm writing to you to ask you to oppose medical segregation in our community. It is a human right to be able to decide one's own medical care. No person's job or ability to provide for their family should be threatened because they want to decide what is injected into their body. The last time people were forced to undertake unwanted medical procedures, the Nuremberg Code was created to protect future generations. I fear that history is repeating.

The Nuremberg Code states "The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

When you threaten people jobs and their ability to access basic services, you are placing them under duress and coercing them into medical decisions. These vaccinations have only been studied for 6 months time. There is no long term safety data. More and more side effects, including blood clots, strokes, myocarditis and death are being attributed to these products. These vaccinations are not without risk and should not be forced on any person. It is a basic human right to control one's own body autonomy and to make one's own medical decisions!

There are no studies showing that medical segregation improves health outcomes. In fact, similar measures are contributing to an epidemic of suicide, abuse and mental health challenges in our communities.

**Vaccinated people are just as likely to be infected with and transmit Covid as unvaccinated people.** This is the CDC study to prove it. Please read the CDC study of Barnstable Massachusetts, July 2021 linked below.

<https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm>

- In this study of an outbreak of 469 people, 74% of the positive cases were fully vaccinated.
- Five people were hospitalized for Covid, four of them were fully vaccinated!
- Vaccinated and unvaccinated people were found to have similar viral loads in their nose and throat, meaning that they are equally likely to transmit the virus to others.

This study shows that vaccinated people are just as likely to carry the virus into a business or workplace. How can you justify excluding unvaccinated people from the workplace or from accessing basic services via businesses? The negative

impacts of segregating the community far outweighs any proposed benefit. Please consider the negative impacts of medical segregation and discrimination as you make these decisions.

The decisions you make in the next few days, will be your legacy! Do you want to be responsible for a new era of medical apartheid? Do you want to be the cause of segregation and discrimination in our community? Are you willing to answer for these choices in the afterlife?

Sincerely,

Mary Coleman

**Sent:** Sunday, September 26, 2021 6:54 PM  
**To:** Gib Morrow  
**Subject:** Please do not make vaccines mandatory

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello,

I am writing to implore you to please not make covid-19 vaccine mandates mandatory in Kitsap County. If people have remained unvaccinated, it is by their own choice, and I believe that should be respected. The CDC says that Covid-19 is 99.97% survivable, so why do we need to enforce a vaccine that still allows you to pass the virus on to another person? Another issue with mandating the vaccine is that it is already showing changes in menstrual cycles. This vaccine needs to be put through long-term studies to find out what affects, if any, it has on reproductive health. Many places of employment are hurting for people already. Forcing unvaccinated people to quit their jobs or go through strenuous, expensive testing does not make sense.

Please do not re-introduce segregation in America, the greatest country in the world.

Thank you for your time,

Ariel Newby,  
Kitsap County resident

Hello Greg,

It has come to my attention that you will be voting either for or against a vaccine mandate as well as vaccine passports in kitsap county. I am a long time port orchard resident of 15 years and wanted to let you know that I strongly oppose these mandates. I work for a local municipality's public works and utilities wastewater division. I have worked through the entire pandemic providing service to the citizens of bremerton as an essential worker even before a vaccine was available. Its important to me and my family that our community allows people the freedom to choose. My biggest decision to not be vaccinated stems from my deeply held religious beliefs. The "vaccine" does not stop transmission and spread of the virus as well which is the only reason i can see to even consider a mandate. The vaccine is still in the clinical trial phase and has proven to be ineffective at stopping the spread. We have more cases now that majority of people are vaccinated then we did before There was even a vaccine available. There are many cases of harm and death to some that get this vaccine and i wish to not be a part of the experiment. For that reason alone i find it irresponsible for any one person to limit other peoples livelihoods and ability to be a member of a society based on their choice to not be vaccinated yet. It is too new and too little is known about the vaccine to be taking such a line in the sand stance on it. I personally know a unvaccinated person, and a vaccinated person that has passed due to covid and while this disease is a tragedy, I dont think we should jeopardize who we are as people and take peoples lives away due to something that

cannot guarantee a better result in the health and safety of everyone as a whole. I work side by side with vaccinated co workers who can transmit this disease to me at anytime and never once have I shamed them for doing what they felt was best during this hard time. I trust that you will use your vote knowing all of the consequences for so many people that ride on it. Thank you for hearing my side of the story and have a great night.

Mitchell k irish

15 year port orchard resident

7 year local municipality utility service provider.

**Sent:** Sunday, September 26, 2021 6:29 PM  
**To:** Keith Grellner  
**Subject:** 9/28/21 Special Meeting Agenda Comments

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

I am writing to you to provide my public comment ahead of the special board meeting to be held 9/28/21. I am writing to ask the health board to refrain from any mandates, recommendations, or orders that would put pressure on employers, businesses or local government agencies to require vaccination for patrons and employees. These actions would be a gross misuse of power and would undermine public trust in the board.

Vaccination was never meant to be the single solution to COVID. In fact, case and death rates are higher now (September 2021) than at most points during this pandemic, even with the addition of vaccination in the toolbox for fighting COVID.

I understand that personal choices beget consequences. But telling people to choose between their job and their health is evil and wrong. I believe the goal of many government agencies in 2021 is not to sustain public health, but rather to make "normal life" so difficult for people who do not need or choose not to get vaccination, that they have no "choice" but to get it anyway in order to participate in our economy and society on any reasonable level. This is inhumane. I personally know many families that are single-income, with many children (some adopted and fostered), and they do not want or need this vaccine. You are putting their livelihoods at stake by refusing them the right to work, shop, or patronage in Kitsap county.

All health decisions should be personal. Reasonable accommodations should be made for those who need them. Wearing masks & vaccination should be personal decisions, left to individuals, families, and employers. They do not need your order or recommendation to do so, if they feel it is in the best interest of their employees and families.

The public has lost confidence in your motives and purposes. You are holding this meeting mid-week and limiting participation. You are not allowing public comment during the meeting. You will only accept written statements. Again, I reiterate that health decisions should be a personal choice, and there is no room for the Kitsap Public Health Board's orders in that process. Extreme measures taken in Kitsap county and elsewhere have not proven to be effective, and we are essentially in the same place we have been in for a year and a half. I urge you to consider the livelihoods of the people residing in Kitsap county, before handing out more orders. This will have devastating consequences for an already struggling economy, and for many families who reside here. People who are vaccinated are protected, and do not need another government agency ordering other people to vaccinate "for their safety."

Respectfully,  
Kari Rolnick  
Concerned Citizen

Mr Grellner,

I have heard through the grapevine that the county is asking Kitsap citizens their input to wether or not the county should require vaccines for their businesses. If this in in error I apologize for the time wasted.

I'm pro-vaccine but believe this is a bad idea. It makes no sense to increase our homelessness problem when businesses are struggling to hire people to lower our infection rate of 27 people per day per 100,000 people.

Thank you for the time!

-Andrew

Ref: Kitsap County Health Board Sep 28

President Biden and Dr. Fauci are both on record as stating vaccinations could not and would not be mandated. Then, they flipped 180 degrees saying they are going to mandate vaccinations. ... And they want the people to trust them.

I have had both injections, but that was my choice.

“While the Health District recognizes that vaccination requirements are a complex and controversial topic to some, we hope to receive direction from the Health Board on how you would like to proceed with respect to the following, or other, options:

1. Take no action and allow the current situation to play out.

If COVID cases were given home care instructions and medications such as Ivermectin by their doctors many of the emergent cases would be less as many cases could be cleared up and not reach the need for hospitalization. But due to the guidelines set by "our government & Mr. Fauci" they will not let any normal care be started by the family doctors they have them wait until it has progressed to an emergent state and this usually ends with the patient put on a ventilator and Revesimer medication where the patient dies. To not see that is happening is to be closed minded and determined to do things as you are told. Where is our freedom of choice? You have to be blind to see that these so called vaccines are not stopping this COVID-19; if it was working then you would not need a second shot and especially not a booster! Also the variant is caused by the vaccinated, they are spreading this as their immune system has been compromised by the vaccine. To me this says volumes about this so called Vaccine, THEY DO NOT WORK. All the side effects and risks are being overlooked and the risks of COVID overstated, they have employed fear to enforce these shots.

I read that in Mexico City they achieved up to a 76% reduction in COVID hospitalizations by making Ivermectin-based home treatment kits widely available. With evidence like this, why are U.S. hospitals stubbornly adhering to life-threatening protocols involving Remdesivir (known to produce fluid in the lungs and longer hospital stay) intubation?

Are hospitals immune from liabilities for fatal outcomes and are receiving increased payments for days spent on a ventilator.

Quoted from article “The Emperor Has No Clothes: COVID Math Simply Doesn’t Add Up” The Defender By Children's Health Defense Team” article 9/23/21

Eighteen months of COVID-related health data show the numbers promulgated by public health officials and mainstream media vastly overstate the risk of COVID and downplay the risk of vaccines.

“From the beginning of the series of events branded as a global health emergency, many people have smelled a rat.”

“Whether one looks at leaders’ willingness to engage in wanton economic destruction, or the rapidity with which billionaires have amassed new wealth or the multisectoral efforts to link and mine people’s intimate data, it is not hard to recognize that something much larger than a health crisis is afoot.”

“However, even if one restricts oneself to the narrow confines of the health narrative, 18 months of data — emerging in spite of ferocious censorship — have repeatedly illustrated that the official story is full of lies and omissions.”

“One of the biggest holes in the story is the trail of destruction that the experimental COVID vaccines are leaving in their wake, with hundreds of thousands of reported injuries in the U.S. alone and, according to some statisticians, as many as 150,000 dead Americans. With this level of damage after just nine months, now is as good a time as any to reexamine “COVID math” and highlight some of the embedded falsehoods that cast serious doubt on official and corporate pronouncements about risks and benefits.”

Why have our own God given immune system been completely ignored, especially when someone has had COVID and has recovered. This is not even considered. We are not living in a communist country but it sure is starting to sound and feel like it. It’s time to wake up to the truth before it is too late.

A very concerned citizen  
Gloria Bowman

Good Day Mayor Wheeler,

It's been brought to my attention that there is a council meeting September 28th at 11am to discuss whether or not to implement vaccine passports.

First of all, there are no laws in the state of Washington that allow businesses to mandate vaccines. Therefore, if you vote (without public opinion) to implement these requirements, you will be illegally overstepping and there will be many lawsuits to come to this city and state.

Also, it is overdue to allow for these meetings to be public. No more zoom meetings that do not include the public in which you all serve.

You seem to forget that the U.S. Constitution is still the supreme law of the land. Until Governor Inslee calls for a special session to allow the legislature to create actual laws, there are a few rights of the people that are being trampled:

~U.S. Constitution Fourteenth Amendment.

~Civil Rights Title 2 sect 201.  
~Civil Rights Title 7.  
~Washington State Constitution  
Article 1 Sect 1  
~Washington State Constitution  
Article 1 Sect 3  
~Washington State Constitution  
Article 1 Sect 4  
~Washington State Constitution  
Article 1 Sect 7

These are just a few of the peoples rights that are presently being denied.

Thank you.

Good afternoon Mayor Wheeler,

I hope you're enjoying your day. I want to remind you that you represent the people who work hard to make this city thrive and whom have been working nonstop throughout this entire "pandemic."

Our livelihoods are suddenly at stake, not because we choose to give up our jobs, but because an overreaching and authoritarian government chooses to deny real science by ignoring natural immunity and not being accepting of other available medical treatments.

Let me remind you that we are not anti vaccine, we are anti mandate. Every single citizen should be allowed their choice over their own health and medical procedures.

I will leave you with this quote from one of our founding fathers.

"Be it remembered, that Liberty must at all hazards be supported. We have a right to it, derived from our Maker. But if we have not, our fathers have earned and bought it for us at the expense of their ease, their estates, their pleasure, and their blood." ~ John Adams

Good evening Mayor Wheeler,

I know this is a tough topic but this vaccine mandate is insane. What is going on is a true violation of our civil rights, our Constitutional rights and our medical privacy.

I know you understand that even in an emergency proclamation, the governor cannot make laws he can only suppress some. Since governor Inslee has already turned down a special session, the legislature is not able to gather to pass actual laws.

I hope you understand the amount of lawsuits that will come to the governors desk because of this and I would hope that you will stand with your constituents and do not allow these illegal mandates to come to Kitsap county.

Thank you,

Alyssa Wainwright

**Subject:** Upcoming Health meeting 9/28

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good Morning,

I hope all is well with you. I just wanted to share my thoughts on the upcoming decisions you will be part of making for our community. I know I am not on the popular side of what is going on but I really don't like the idea of vaccine cards to be shown for entry into any establishments as well as making vaccine a mandatory requirement for employment. I find it odd that the more people that are vaccinated the more cases we seem to have. The majority of the people that I know that have/had covid are fully vaccinated. By making these things mandatory it is allowing the illness to continue to be spread under the guise that everyone will be safe and they will by nature let their guard down. Hence the mandate about you have to show your card or a negative test seems redundant as someone whom is vaccinated can actually be positive and not know it. It seems kind of backward to what we actually want to be doing. If you all just let people be and let them decide what is best for them we will be over this much sooner than placing all these restrictions. By banning people from being able to provide for their families or denying them access to facilities is very discriminatory and creating a

world that is very divided. We have created a world of fear and one where there is this sense that this group will somehow guarantee we all will only survive if we only do as you all see fit and mandate to us. Several in my family that were deemed essential are now being told they are no longer that important unless they receive this vaccine. If you do not want it for any reason whatsoever it doesn't matter, you will be dismissed. We will give you an exemption, but we will not be able to accommodate you so you are no longer needed. Small businesses have been hit hard as it is with constant changes and mandates. This will add one more layer in an already strapped workforce.

These are just my thoughts, my heartache and my opinion.

I just wished more was being done to promote how to keep ones self healthy in the first place.

Please consider the people that for whatever reason choose not to be vaccinated at this time. They are choosing that for very personal reasons that may not always make sense to others. They do what they need to do to keep themselves and others safe.

Thank you for taking the time to read this.

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello, my name is Angela and I am an unvaccinated Registered Nurse. I am asking for your help as a human with a child to feed and a mortgage to pay. PLEASE DO NOT MANDATE the COVID vaccine at local government agencies or at the private business level in Kitsap County. My husband and I are careful individuals; we wear masks, we do not gather in large groups, we do not attend large gatherings. We care about the health and well being of our community. I am personally unvaccinated for health reasons. I am unable to get vaccinated and if you mandate the vaccine my family will literally have to flee our beautiful home state. It is not proven that the vaccine prevents you from spreading COVID within the community. Mandatory vaccinations will just create an even larger nurse shortage which will devastatingly affect our community who needs care. My husband does heating and air conditioning. Imagine in the middle of winter when your furnace goes out and there is no one there to fix it due to a shortage of HVAC technicians; which there already is in this county. PLEASE consider the fact that all lives matter and if you mandate the vaccine you will affect families who are unable to get the vaccine and need to feed their children and pay their mortgage. I do not wish to move out of Washington State but if you continue with these mandates we sadly will be forced to leave. Thank you so much for your time.

Sincerely a concerned mother and citizen.  
Angela

**Subject:** Citizens Against Further County Health Regulation

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Greg Wheeler:

I am a Kitsap county resident and military veteran with more than 20 years in the United States Marine Corps. I also am a software engineer and data scientist by trade and I have been keenly following the pandemic as it has unfolded, as well as the response by public health agencies. As a military commander with combat experience, software engineer, and data scientist, I am able to provide some advice on difficult policy decisions.

Bottom Line up front:

I recommend that Kitsap county does not add any new regulations to a plan that is already in motion by state and federal authorities. In fact, I believe that the pandemic represents an opportunity for Kitsap leaders to show genuine courage by standing for time honored convictions, and by demonstrating their principles by leading through example. Through demonstration of intelligence and honor, I believe this gives Kitsap an opportunity to lead, where other state and federal leaders have merely followed. I recommend that Kitsap county should make a declaration that Kitsap stands for medical freedom, that a vaccine passport will NEVER be implemented in the county boundaries, and that individual choice should guide whether to take a vaccine or not based on their personal circumstances.

Detailed Answer:

The current pandemic fight is very chaotic, making it a challenge to decipher the truth from the many narratives in play. In these scenarios, it is best to use data to drive decision making rather than relying on politically driven information.

Any policy choice should be guided on the risk versus rewards in the scenario. The word Pharmakon in Greek means remedy... and poison. Medical policy should pay heed to this, as giving medicine to someone may kill them or allow their system to stabilize to the point where it can heal itself. A government policy can not determine this; only an individual themselves can assume the risk for their given health situation.

The current data shows that 90% of the people that die from Covid are over 65, and the data also shows that Covid is 99+% survivable in most cases. Many people that died also have existing comorbidities. The dataset is very chaotic and it's likely that there is some overcounting occurring. The current data does not say whether or not Covid killed you from the CDC. The data says the obvious: if you are older and have a comorbidity (or several), then you may be primed to have an issue with Covid. CDC public datasets are available here:

<https://data.cdc.gov/Case-Surveillance/COVID-19-Case-Surveillance-Public-Use-Data/vbim-akqf>

The other aspect to evaluate is the high reaction rate to these shots. Data directly from HHS shows that these covid vaccines lead all other reactions in the 30+ year history of the database. These shots on the low estimate side show the covid injections have 150 times as many deaths as a standard flu shot. We also do not have any long term testing results for these injections. Vaers HHS data is available here:

<https://vaers.hhs.gov/data.html>

There are a variety of legalities in play here that should be considered on any mandated policy. The status of the vaccines as an Emergency Use Authorization vaccine is important as this equates to a medical experiment. The Nuremberg Code, established after large scale Nazi testing on civilians, sets the established international norms and ethics for experimental testing. The Nuremberg Code requires informed consent during the experimentation process.

This means that an individual must consent, free from coercion, and be informed about the risks of the vaccine and all ingredients. Consent under duress (loss of job, threats, etc) is illegal under the Nuremberg Code. There are also a variety of other laws that deal with the rights to medical privacy (Americans with Disabilities Act and Health Insurance Portability and Accountability Act (HIPAA)). Title VII of the Civil Rights Act of 1964 also provides protections to American for religious freedom, as the covid injections have used aborted fetal cell lines as part of their development and testing. The Cominarty FDA approval is a political stunt to drive increased vaccination since approval was accelerated from the planned 2023 date by 2 years. Also, Cominarty vaccines are in short supply in the US, so this appears to be a political stunt to drive vaccination rates with the EUA vaccines. Please see a letter to the FDA from Senator Ron Johnson. <https://childrenshealthdefense.org/defender/under-federal-law-can-your-employer-make-you-get-covid-vaccine/>

The current initiatives for a vaccine passport, the unification of your digital identity with your health and potentially your social information, is a dangerous path for individual freedom in America. Currently, there is no need for a vaccine passport and this is a coercive tactic to get people to take a vaccine, when the data shows that everyone SHOULD not take the vaccine. Coercing is illegal under the Nuremberg Code, and this makes very little sense from a policy perspective, as this reduces the legitimacy of the local government in the eyes of the people. I highly recommend this video on the Chinese Social Credit system, as it is a dangerous tool of control over the people and we do not want that precedent here in America. It's evident that pharmaceutical companies have a plan to start rotating vaccinations on Americans and being vaccinated now will expire at some point in the future. This places America on a path where large corporations will be guiding social policy and this should be strenuously objected to.

WHO international VAX Passport Tech Specs Indicating

[https://www.who.int/publications/i/item/WHO-2019-nCoV-Digital\\_certificates-vaccination-2021.1](https://www.who.int/publications/i/item/WHO-2019-nCoV-Digital_certificates-vaccination-2021.1)

China Social Credit Score Documentary.

<https://youtu.be/evBzPwCdeHI>

In summary, the public health emergency is best satisfied by ensuring that the right data is provided to citizens through independent evaluation of the risks of Covid, and the risks of the vaccines. The mandate and vaccine passports represent dangerous oversteps to individual freedoms and should not be implemented. This is Kitsap's moment. Seize it and lead.

Thank you for your time and consideration.

Justin Jones

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

Having read the recent memo concerning the 28 September Kitsap Public Health Board Special Meeting I wanted to share with you a few of my thoughts.

First, I do not envy the position you or any other members of the board are in with the decision that you are trying to make. Any choice will inevitably upset some group at a time when we need to bring people together.

With that in mind, I strongly believe the worst thing that we can do at this point is begin to enact and enforce vaccination mandates for anyone. This will only serve to further drive away and alienate those who are hesitant or unwilling to get their vaccines, and do little to move us towards a more fully vaccinated and protected community.

The focus of government public health should be to make recommendations which allow individual businesses to make the choices that are right for them, followed by education and ensuring vaccine availability. This will not be a fast solution to our problems, but I do believe it will be the correct one that will leave us a stronger and less divided community.

Thank you for your time.

Stephen Williams

September 25, 2021 - 1:51pm

Dear Mayor Wheeler,

I just found an extremely important video I want to share with you and hopefully you can share it with the Kitsap County Health Board as well. It explains what the vaccine is doing which is the belief I have as well from my research. Dr. Gertsch Vanden Bosshe PhD, DVM explains. Please watch and share the video. It might help you and others understand why Vaccine mandates are the wrong way to attack this virus!!!

You want to keep your immune system natural.

Does this vaccine work? If it did, why would you be required to wear a mask, worry about the unvaxxed and need a booster? It is like no one is asking obvious questions.

The Question will Soon be "How do we save the Vaccinated"

Here is why we do not take the vaccine! Never, ever!

You have to spread this information!

This explains what the vaccine does from a reliable source, Dr. Gertsch Vanden Bosshe PhD, DVM.

It tells you what the vaccine is doing!

Please watch and share!

Vaccine Disaster Ahead

<https://rumble.com/vjyrbq--must-watch-.html?mref=6zof...>

Sincerely,

Dear Mayor Wheeler,

Thank you for your reply and the cc to other board members of my previous email regarding Covid Vaccine Mandates. I look forward to this Tuesday's meeting at 11:00 as well.

Today I am writing you again about the issue I hadn't even thought of last week because I hadn't experienced anything like it before Thursday and Friday this week.

Thursday I drove my husband out to Prompt Care in Silverdale since his Asthma had gotten worse again. In late June he was seen and treated at the same facility with a severe infection in his lungs from his Asthma. When we approached the entrance to the tents at about 12:20pm, there was a sign stating that they had reached their limit and were closed. Sorry for the inconvenience. Never before have I ever seen that in all the previous times I have gone or taken someone to the facility. We left to do some other errands and returned at 1:45pm thinking maybe it was due to lunch. But the same sign was there when we returned.....Sorry for the inconvenience!

So, yesterday, my husband had a dentist appointment at 8:00am and left there at 8:45 to drive straight out to Prompt Care. He ended up being about 20th in line as they opened. They had one person doing temperature checks and the other person doing all the paperwork and prep. All the exam rooms were full, so they took his phone number and told him to wait in his car until they called.

About 20 minutes later they called him to come in and was put in an exam room. He waited about another 20 minutes before the doctor came in. He was having another coughing fit as the doctor came into the exam room. During the exam he asked about what happened on Thursday to cause the closure and whether all the patients they were seeing were Covid related. She told him they reached the limit of how many they could see that day due to staffing shortages and had closed at about 11:00am. Most of the cases are related to Covid as people are being required to get a doctor's clearance or Covid test before returning to school or work. This mandate is causing an undue burden and hardship on the medical facility, supplies, and employees and trickles down to adverse effects on the citizens of this community. Prior to Covid they were getting between 60-70 patients a day and now during Covid they are pushing through 140-150 per day with LESS staffing.

The mandates are being passed without preparation, thought, or funding for the affected facilities such as Prompt Care, the Hospital, or doctor's clinics and the affects on the employees of those facilities. When you mandate vaccines or negative Covid tests to do normal daily activities you have to provide the mechanism to get that done without impacting all sectors of the economy. It becomes a domino effect on everyone!

I know, the simple answer is everyone should be vaccinated! However, the vaccinated are currently getting Covid at an alarming rate and spreading it rapidly through the community. So, if the vaccinations are NOT stemming the tide now, what will be the future mandates and what alarming effects will they have? Passing a vaccine mandate to enter restaurants, bars, gyms, movie theaters, etc. boosters every 6 months? Where will it stop???? Not everyone is willing or able to get this shot or any boosters and to treat them as 2nd class citizens is at best discrimination and at worst is complete segregation. And my question again is WHY? Vaccinated have shown to be getting the virus at an alarming rate all over the world and spreading it to other vaccinated and unvaccinated people. How else can you explain fully vaccinated sports teams, government officials, TV personalities and more being infected with Covid while all those around them are fully vaccinated? This should never become an US vs. THEM situation in our county. Nothing GOOD will ever come from that. Remember, we are NOT Seattle or King County. Following their lead is NOT in this county's best interest.

In closing, I ask that all of you on the board consider all the negative impacts your decision or mandates will have on the entire community. It is time to go with number one on your agenda and leave things alone in this county. We will continue to get through this as we have been over the past 19 months without adding any more burdens to our local businesses, restaurants, medical facilities, and citizens.

Sincerely,  
Joyce Connolly

September 17, 2021

Dear Mayor Wheeler,

I am writing to you today after seeing a bit of the Zoom meeting with Gib Morrow that was posted online where he is requesting vaccine mandates be put in place in Kitsap County. We absolutely DO NOT NEED to put that type of mandate in place to further divide and segregate the people of this county. That policy would be no different than the old Black vs White rules of the Deep South in this country. We have come too far to return to that type of thinking! Especially so since the vaccine does not stop transmission of the virus! WHY let vaccinated have privileges that the unvaccinated don't have? We don't spread the disease any more that they do.....

I find it absolutely ridiculous for any county, city, or federal government to mandate anything that has NOT been fully tested. None of the people pushing this vaccine know of the long term effects on the human immune system. Some of those effects won't be known for several years when people start to die from all sorts of illnesses because their immune system has been compromised by the vaccine.

The recent information coming out of Israel, one of the most vaccinated countries in the world with the Pfizer-BioNTech vaccine, showing the high rate of infection in their country among the vaccinated. Look at the data shown in the study: <https://nationalfile.com/israeli-study-fully-vaxxed-are-27-times-more-likely-to-get-covid-compared-to-people-with-natural-immunity/>

Also, data coming out of Africa should cause one to stop and pause the idea of vaccine mandates. If doctors were allowed to do no harm as they are supposed to do then they would TREAT the infection the best way possible and go against hospital protocols and do what is working in Africa! <https://nogreport.com/2021/09/03/shocking-conclusions-from-africa-study-expose-why-big-pharmas-puppets-are-suppressing-ivermectin-data/>

Now with the so-called "Delta Variant" that no one can detect with the Covid tests being used and you are not allowed to be told if you have Delta, Alpha, Mu, or regular Covid or any other variant.....seems a bit odd to me. Now the discussion comes to segregate the vaccinated from the unvaccinated.....my question is.....WHY???. Everyone can catch and spread Covid whether they are vaccinated or unvaccinated.....so why push businesses, restaurants, etc. to only allow the vaccinated inside??? There is NO COMMON SENSE to doing that! So you let the vaccinated go inside and spread the virus among all the vaccinated and they get the virus despite being vaccinated and then they go out and spread the virus to everyone else! How does that make one bit of sense? I can find many reports that tear apart the CDC and FDA data about vaccinated vs. unvaccinated..... <https://freedomfirstnetwork.com/2021/09/fda-confirms-both-vaxxed-and-unvaxxed-have-99-chance-of-not-getting-covid-19>

Hospitalizations in the UK are up 8-fold compared to the same time last year when nobody was vaccinated, yet UK officials, doctors, and even citizens are calling for even more vaccinations and rapid deployment of booster shots. The Reuters article continues:

*Johnson has stressed that vaccines have broken the link between cases and deaths, and that without them, he would not have been able to re-open England's economy in July. His government sets health rules in England, with other nations setting their own policies. But while 81.3% of people over 16*

*have received two vaccine doses, there are currently 8,340 COVID-19 patients in hospital in Britain, compared to just 1,066 a year ago.*

The whole situation in the county is because the vaccinated were allowed to go about business in July and August without masks while spreading the new variant they were shedding because that is how the vaccine was designed. It only stops the spike protein which does NOT kill the virus and allows the virus to mutate and then be shed as a new variant. Also, the data being used is always from February 1-August 1 for unvaccinated hospitalizations which skews the data! MOST people were NOT fully vaccinated until May, so of course the CDC continues to push the narrative that we have a pandemic of the unvaccinated so they can push mandates of the vaccine that DOES NOT work instead of admitting it doesn't work, stopping the vaccinations, and using the ivermectin protocol from I-Mask, Math+, and I-Recover protocols instead of the hospital protocols from the CDC/NIH that use Remdesivir that is known to cause kidney failure and leads to pulmonary edema thus killing the patient by drowning. I have done a vast amount of research to find information on immune system boosting, preventative measures, and treatments that do not require hospitalization. It is tragic that politics is killing so many Americans because they want everyone to take a vaccine with UNKNOWN long term effects. The FDA site has the information on the ongoing study that began May 1, 2020 and is not set to end until September of 2023. So they are doing Phase 1/2/3 testing right now.....so how can anyone say it is safe and effective without the completed human trials being completed. Also pregnant women were not included nor were those under 16.

In closing, I respectfully ask you to keep this county open to its citizens whether vaccinated or unvaccinated as was the case for the last 19 months when no vaccines were available. We have helped keep the struggling small businesses and local restaurants open during the entire pandemic and don't need to further add this burden to their plate.

Sincerely,

Mayor Wheeler,

My name is Briana Jones and I am a concerned citizen due to the Covid-19 Vaccine. I hear there is a Kitsap County Health Board meeting coming up this Tue, September 28th. I wanted to write to you because I have a concern about medical and personal freedom. No one should be forced to get vaccinated. No one should be forced to lose their job due to this! This is very upsetting and for many of my friends. And as it has not effected my family YET, it is something I worry about as well. Our constitutional rights are being taken away, and I hope you will be our voice. Many many people do not want to get the vaccine due to adverse reactions. Unless you know someone personally who has has a reaction you may not understand how scared people are to get it. The media is not talking about it because of censorship. Another freedom being taken away. Please take the time and express my concerns.

Thank you for your time,  
Briana

Hello sir

I'm writing to ask you to push for freedom. I see that the health district will be meeting Tuesday to push vaccine mandates. I think everyone at this meeting knows it is the wrong thing to do. America is about freedom. Forcing a medical procedure on people to be free doesn't sound very free. Both of my grandfathers fought in WW2, my father in law was a marine who fought in Korea and Vietnam, my dad was a marine in Vietnam as well. I don't think these men had forced vaccine mandates on their minds when they fought for our freedom. Please say no to vaccine mandates.

Thank you  
Alan VanFossen

Good afternoon Mr. Wheeler,

I am writing to you as a concerned citizen of Kitsap county. I wanted to express my concern and opposition over local vaccine mandates. Let's be clear, these mandates do little to protect public health and simply force the burden of illegal and unenforceable mandates on small business owners who are already struggling to stay afloat. I'm sure you are aware of the number of businesses that have closed their doors for good due to the lockdowns and now the county wants to have the remaining businesses act as a police state and lose a large population of their patrons? How exactly does allowing vaccinated but not requiring tests of them, help anything? My own sister in law just caught covid at an outdoor event where everyone was either vaccinated or had to provide a negative test on site. She is vaccinated and this means whomever she caught it from was vaccinated too since all the unvaccinated were tested.

Where is the data showing massive community spread in businesses? Why the fear mongering? Why is our community health department not sharing the scientific facts that excess adipose tissue contains extra spike protein receptors and encourage people to exercise? Or share the fact that low levels of vitamin d, c, and zinc DIRECTLY correlate to more Severe COVID, hospitalizations, and deaths? Why not recommend people discuss having these levels checked with their docs and supplement accordingly?

Finally, are you familiar with Uttar Pradesh, India? If you're not, you should be asking yourself why, because that state is one of the most densely populated, has one of the lowest vaccination rates, yet has effectively ELIMINATED COVID. I'll tell you why you haven't heard about them from our government officials, because they've used ivermectin to treat COVID. Please allow me to speak on Ivermectin from a personal level. I take that medication as prescribed by my doctor for my cancer. I had stage IV breast cancer with innumerable Liver Mets....4 years ago. For the past 1.5 years I've enjoyed no evidence of disease, most of that time with no conventional treatments. Repurposed Medications like ivermectin and many supplements have helped me become and remain cancer free when I should've been long dead. I learned that big pharma controls the medical community and scientific community and stacks the cards in their favor for every disease. They effectively censor, vilify, and ban cheap, effective treatments to ensure their obscenely expensive treatments are the only options (one of the medications I took for my cancer was \$18500 a month, the tri weekly injections I had for 5 years cost \$24000 per injection). Fast forward to this past week, our family had cold symptoms. Mine were the worst and I have heart damage from those injections so I'm high risk for Covid. We tested positive and my doc immediately increased my ivermectin dose. Within 24 hours of the 1st dose my symptoms completely turned around. I could feel my cough clear and my symptoms went from severe muscle aches, uncontrollable cough, runny nose, fever, and the most painful headache I've ever had to mild cold symptoms like that. I'm here to tell you from personal experience that there ARE effective treatments for COVID. I know over 20 others who successfully used Ivermectin and healed quickly with no side effects.

I'm also here to tell you that even the FDA panel that voted against recommending the booster for everyone did so citing the side effects from the vaccine and the very real possibility that the vaccines themselves are driving the variants.

<https://m.youtube.com/watch?v=WFph7-6t34M>

I urge you to do your own research, question why effective treatments are being blacklisted, and ask you to speak out against any local vaccine mandates. I can assure you that if those go into effect, the county and likely cities WILL start facing lawsuits. Citizens are already meeting with lawyers to prematurely draw up paperwork. We will not support segregation.

I welcome any dialogue on this subject.

Very respectfully,  
Cheryse Skiles

Hello, it has been brought to my attention that kitsap county is thinking about enforcing passports. As a resident of kitsap county for over 37 years I hope to see this not happen. It will greatly harm our economy and divide us a community even more.

Please do not let Kitsap County become like the rest and ruin the good thing we have going on.

Hello.

Im here to ask that you will not allow any further divide in Washington State & our beloved Country by requiring vaccine passports. This will not only create even more chaos (haven't we all had enough?!) & divide but it is a new form of segregation. It will force many out of a job and ruin livelihoods- driving many out of the state. It is inhumane to shove this down people's throat (I suppose arms would fit better here) Those who have wanted the vaccine (and those forced to get it) have it- those that do not want it or want to wait a few years before receiving it should have that choice WITHOUT the freedom of purchasing food and goods taken away from them. The thought that this is even a thing to be voted on is disgusting. It is scarily similar to history- having to show a yellow star. Many do not like that comparison and yet, here we are. We are not a communist country. Mandating or requiring a vaccination card is a turning point of this country's freedom. It isn't a health concern at this point. Not when so many freedoms will rely solely on a card.

If you believe in God or higher power, I ask that you pray or meditate. Listen to what your soul and heart say. Do the right thing and don't pass this vote to require vaccine passports.

Kindly,  
Chelsey

Ref: Kitsap County Health Board Sep 28

President Biden and Dr. Fauci are both on record as stating vaccinations could not and would not be mandated. Then, they flipped 180 degrees saying they are going to mandate vaccinations. ... And they want the people to trust them.

I have had both injections, but that was my choice.

“While the Health District recognizes that vaccination requirements are a complex and controversial topic to some, we hope to receive direction from the Health Board on how you would like to proceed with respect to the following, or other, options:

1. Take no action and allow the current situation to play out.

Dear Mayor Wheeler,

I would like to express my opinions on the following issues that will be voted upon September 28, 2020 Please VOTE NO to vaccine mandates for small businesses & entry to indoor public places. I am a concerned citizen with several friends who own small businesses in Kitsap county and due to the vaccination rate of our county being below 50% I fear that this imposition if mandated would cause a grave affect upon our economy. Please keep our businesses open and allow them to serve customers regardless of vaccination status. If they want to check temperatures at the door and require masks mandates I'm fine with that, but preventing someone who to enter a business simply based on vaccination status is not only unconstitutional but is it extremely unfair to the business owner who would benefit from the revenue received from said customer.

Thank you for taking my concerns into consideration as you vote on this very sensitive issue. How you vote could have grave consequences for the small businesses in our county.

Ver Sincerely,  
Andria Laws

To ALL that are considering this NONSENSE, you will be opening the proverbial 'Pandora's Box' .

You are dictating law that is ILLEGAL, whether written or NOT!

This constituent will likely make my attempt (should this foolishness be enacted) to enter a store for the sole purpose of engagement, then arrest.

If I'm lucky, there will be a sufficient number of others doing the same thing.

That will result in a Class Action lawsuit against Kitsap County!

I'll be looking forward to a supplement to my retirement after having lived in Kitsap County for the past 31 years in the same house.

I picked Kitsap County BECAUSE of the Conservative nature of this location and now RADICAL LIBS have made it here in Main Stream numbers and that is UNACCEPTABLE!!

DO NOT GO FORWARD with this 'proclamation' that will CAUSE starvation by DECREE !!!!!

Harold Bright  
Port Orchard resident since 1989

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

If COVID cases were given home care instructions and medications such as Ivermectin by their doctors many of the emergent cases would be less as many cases could be cleared up and not reach the need for hospitalization. But due to the guidelines set by "our government & Mr. Fauci" they will not let any normal care be started by the family doctors they have them wait until it has progressed to an emergent state and this usually ends with the patient put on a ventilator and Revesimer medication where the patient dies.

To not see that is happening is to be closed minded and determined to do things as you are told. Where is our freedom of choice? You have to be blind to see that these so called vaccines are not stopping this COVID-19; if it was working then you would not need a second shot and especially not a booster! Also the variant is caused by the vaccinated, they are spreading this as their immune system has been compromised by the vaccine. To me this says volumes about this so called Vaccine, THEY DO NOT WORK. All the side effects and risks are being overlooked and the risks of COVID overstated, they have employed fear to enforce these shots.

I read that in Mexico City they achieved up to a 76% reduction in COVID hospitalizations by making Ivermectin-based home treatment kits widely available. With evidence like this, why are U.S. hospitals stubbornly adhering to life-threatening protocols involving Remdesivir (known to produce fluid in the lungs and longer hospital stay) intubation? Are hospitals immune from liabilities for fatal outcomes and are receiving increased payments for days spent on a ventilator.

Quoted from article "The Emperor Has No Clothes: COVID Math Simply Doesn't Add Up" The Defender By Children's Health Defense Team" article 9/23/21 Eighteen months of COVID-related health data show the numbers promulgated by public health officials and mainstream media vastly overstate the risk of COVID and downplay the risk of vaccines. "From the beginning of the series of events branded as a global health emergency, many people have smelled a rat." "Whether one looks at leaders' willingness to engage in wanton economic destruction, or the rapidity with which billionaires have amassed new wealth or the multisectoral efforts to link and mine people's intimate data, it is not hard to recognize that something much larger than a health crisis is afoot." "However, even if one restricts oneself to the narrow confines of the health narrative, 18 months of data — emerging in spite of ferocious censorship — have repeatedly illustrated that the official story is full of lies and omissions." "One of the biggest holes in the story is the trail of destruction that the experimental COVID vaccines are leaving in their wake, with hundreds of thousands of reported injuries in the U.S. alone and, according to some statisticians, as many as 150,000 dead Americans. With this level of damage after just nine months, now is as good a time as any to reexamine "COVID math" and highlight some of the embedded falsehoods that cast serious doubt on official and corporate pronouncements about risks and benefits."

Why have our own God given immune system been completely ignored, especially when someone has had COVID and has recovered. This is not even considered. We are not living in a communist country but it sure is starting to sound and feel like it. It's time to wake up to the truth before it is too late.

A very concerned citizen

Dear Sir,

I am writing to you concerning an area of the most serious concern, namely the potential introduction into our society of so-called "vaccine passports". I am opposed to this suggestion and wish to make three points about the potential consideration of any scheme of this type.

Firstly, to make vaccination the basis of whether someone is allowed entry to a venue, or participation in an activity, makes no logical sense in terms of protecting others. If the vaccines are highly effective in preventing significant disease, as seems to be the evidence from trial results to date, then those who have been vaccinated have already received protection; there is no benefit to them of other people being vaccinated. Further, since vaccines do not prevent infection per se even a vaccinated person could in carry and potentially pass on the virus, so to decide someone's "safe non-spreader" status on the basis of proof of their immunity to disease is illegitimate.

Secondly, the introduction of vaccine passports would constitute an unethical form of coercion and violation of the principle of informed consent. People may have various reasons for being unable or unwilling to receive vaccines currently available including, for some Christians, serious issues of conscience related to the ethics of vaccine manufacture or testing. We risk creating a two-tier society, a medical apartheid in which an underclass of people who

decline vaccination are excluded from significant areas of public life. There is also a legitimate fear that this scheme would be the thin end of the wedge leading to a permanent state of affairs in which COVID vaccine status could be expanded to encompass other forms of medical treatment and perhaps even other criteria beyond that. This scheme has the potential to bring about the end of liberal democracy as we know it and to create a surveillance state in which the government uses technology to control certain aspects of citizens' lives. As such, this constitutes one of the most dangerous policy proposals ever to be made in history. As a resident of Kitsap county I absolutely oppose this idea along with MANY others who reside in Kitsap county. This is unethical and would be detrimental to our society as a whole including causing many small businesses to end up shutting their doors.

Sincerely,

Shawnda Rollings  
Kitsap county

Dear Mayor,

I am a mother, wife, homeowner, business woman and university graduate. I have been living the last 6 years with the tragic and unexpected effects of the MMR on my son's stomach all while helping my husband cope with stage 4 kidney disease. Now, a ruling could go on the books to force me to get a new shot which has been proven to harm Individuals with pre-existing heart conditions. Every member of my biological family has died from heart issues including my healthy younger brother who, while getting ready for work on September 10, 2019 hollered for his wife and died before she reached him of a heart attack. I cannot risk the possibility of leaving my family through side effects. I have lived through COVID. I've had it. My son and husband have had it. We recovered.

Please don't keep me from being employable or educating my son through the simple joys of ball games and symphonies.

Our future depends on our freedom.

Please speak on our behalf.

Peace and all good,  
Tina MW Lujan OFS

It does seem to me, the vacinnes does not prevent the covid, it doesn't prevent the transmission has a definition of vaccine should be. It seems it is a suppression of the disease. This article explains how I feel.

I am writing this to be heard in regards to your upcoming meeting on Sept 28 to discuss the possible requirement of Covid-19 vaccine to enter Kitsap County businesses. A decision to require a vaccine to enter business will cripple our small business, especially those who have already suffered this pandemic. Please do not vote to require the Covid vaccine to eat at restaurants or enter any business. People should not be discriminated against based on their vaccine status, as it is a violation of human rights to choose.

Thank you,  
Dena Vickerman

**Subject:** Citizens Against Further County Health Regulation

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Greg Wheeler:

I am a Kitsap county resident and military veteran with more than 20 years in the United States Marine Corps. I also am a software engineer and data scientist by trade and I have been keenly following the pandemic as it has unfolded, as well as the response by public health agencies. As a military commander with combat experience, software engineer, and data scientist, I am able to provide some advice on difficult policy decisions.

Bottom Line up front:

I recommend that Kitsap county does not add any new regulations to a plan that is already in motion by state and federal authorities. In fact, I believe that the pandemic represents an opportunity for Kitsap leaders to show genuine courage by standing for time honored convictions, and by demonstrating their principles by leading through example. Through demonstration of intelligence and honor, I believe this gives Kitsap an opportunity to lead, where other state and federal leaders have merely followed. I recommend that Kitsap county should make a declaration that Kitsap stands for medical freedom, that a vaccine passport will NEVER be implemented in the county boundaries, and that individual choice should guide whether to take a vaccine or not based on their personal circumstances.

Detailed Answer:

The current pandemic fight is very chaotic, making it a challenge to decipher the truth from the many narratives in play. In these scenarios, it is best to use data to drive decision making rather than relying on politically driven information.

Any policy choice should be guided on the risk versus rewards in the scenario. The word Pharmakon in Greek means remedy... and poison. Medical policy should pay heed to this, as giving medicine to someone may kill them or allow their system to stabilize to the point where it can heal itself. A government policy can not determine this; only an individual themselves can assume the risk for their given health situation.

The current data shows that 90% of the people that die from Covid are over 65, and the data also shows that Covid is 99+% survivable in most cases. Many people that died also have existing comorbidities. The dataset is very chaotic and it's likely that there is some overcounting occurring. The current data does not say whether or not Covid killed you from the CDC. The data says the obvious: if you are older and have a comorbidity (or several), then you may be primed to have an issue with Covid. CDC public datasets are available here:

<https://data.cdc.gov/Case-Surveillance/COVID-19-Case-Surveillance-Public-Use-Data/vbim-akqf>

The other aspect to evaluate is the high reaction rate to these shots. Data directly from HHS shows that these covid vaccines lead all other reactions in the 30+ year history of the database. These shots on the low estimate side show the covid injections have 150 times as many deaths as a standard flu shot. We also do not have any long term testing results for these injections. Vaers HHS data is available here:

<https://vaers.hhs.gov/data.html>

There are a variety of legalities in play here that should be considered on any mandated policy. The status of the vaccines as an Emergency Use Authorization vaccine is important as this equates to a medical experiment. The Nuremberg Code, established after large scale Nazi testing on civilians, sets the established international norms and ethics for experimental testing. The Nuremberg Code requires informed consent during the experimentation process. This means that an individual must consent, free from coercion, and be informed about the risks of the vaccine and all ingredients. Consent under duress (loss of job, threats, etc) is illegal under the Nuremberg Code. There are also a variety of other laws that deal with the rights to medical privacy (Americans with Disabilities Act and Health Insurance Portability and Accountability Act (HIPAA)). Title VII of the Civil Rights Act of 1964 also provides protections to American for religious freedom, as the covid injections have used aborted fetal cell lines as part of their development and testing. The Cominarty FDA approval is a political stunt to drive increased vaccination since approval was accelerated from the planned 2023 date by 2 years. Also, Cominarty vaccines are in short supply in the US, so this appears to be a political stunt to drive vaccination rates with the EUA vaccines. Please see a letter to the FDA from Senator Ron Johnson.

<https://childrenshealthdefense.org/defender/under-federal-law-can-your-employer-make-you-get-covid-vaccine/>

The current initiatives for a vaccine passport, the unification of your digital identity with your health and potentially your social information, is a dangerous path for individual freedom in America. Currently, there is no need for a vaccine passport and this is a coercive tactic to get people to take a vaccine, when the data shows that everyone SHOULD not take the vaccine. Coercing is illegal under the Nuremberg Code, and this makes very little sense from a policy perspective, as this reduces the legitimacy of the local government in the eyes of the people. I highly recommend this video on the Chinese Social Credit system, as it is a dangerous tool of control over the people and we do not want that precedent here in America. It's evident that pharmaceutical companies have a plan to start rotating vaccinations on Americans and being vaccinated now will expire at some point in the future. This places America on a path where large corporations will be guiding social policy and this should be strenuously objected to.

WHO international VAX Passport Tech Specs Indicating

[https://www.who.int/publications/i/item/WHO-2019-nCoV-Digital\\_certificates-vaccination-2021.1](https://www.who.int/publications/i/item/WHO-2019-nCoV-Digital_certificates-vaccination-2021.1)

China Social Credit Score Documentary.

<https://youtu.be/evBzPwCdeHI>

In summary, the public health emergency is best satisfied by ensuring that the right data is provided to citizens through independent evaluation of the risks of Covid, and the risks of the vaccines. The mandate and vaccine passports represent dangerous oversteps to individual freedoms and should not be implemented. This is Kitsap's moment. Seize it and lead.

Thank you for your time and consideration.

Justin Jones

**Subject:** Covid vaccination requirements

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To Whom it may concern,

I am vehemently opposed to a requirement for citizens to be vaccinated to do business in Kitsap County. With most of the people of the county already vaccinated, I do not understand what is to be gained with such a requirement? I have not seen any statistics that prove that there is danger of dying from this supposed pandemic/virus. Actually, I have seen the opposite; with many health care professionals and morticians coming forward with anecdotal stories of people dying after receiving the Vax. With truly effective medicines such as Hydro-Choloquine and Ivermectin available, why risk the health of your constituents/tax base on an unproven, experimental "treatment"?

I am especially disappointed that the Health board will not be open to the public during the meeting on Tuesday, but rather will be hiding behind the veil of a Zoom virtual meeting. If you are all vaxxed and with all the "social distancing" requirements in effect, what is the purpose of that? I cannot think of a valid reason, other than to more easily ignore what the people that you are supposed to be serving have to say regarding mandatory vaxxing.

That you are considering mandatory vaccinations in opposition to the Nuremberg Code of 1947 in regards to requiring an experimental vaccination is appalling and I strongly encourage you to drop any thought of a requirement and just let this run it's course.

This only a pandemic because the media/government is telling us it is.

Sincerely,  
David Waller

I ask that you do not impose any further mandates on the citizens of Kitsap County. I personally believe the current dictates are an infringement on an individual's right of personal choice. To institute harsher restrictions would result in limited benefits and intrude even further on the freedoms guaranteed by the Constitution of both the State of Washington and our Nation.

Respectfully,  
Tim Carter

Subject: COVID Vaccine Mandate

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Greg Wheeler

Thank you for taking the time to read my email about the upcoming COVID vaccine mandate. As a local citizen who has lived in Kitsap County for 22 of my 29 years I can tell you how much what is happening currently is devastating to the core. Not just for me, but for so many of my friends and family this is beyond upsetting. I respect my fellow citizens and I have never been against vaccines, aside from the flu vaccine which I have watched many people around me continue to receive and continue to get the flu as a result, while I have not gotten the flu in many years.

I love this country and I love this state. But what has been happening in our country is scaring me.

Everyone I personally know to have had COVID 19 in the last two months has been FULLY VACCINATED. I however an unvaccinated person have not gotten it the entire life of this pandemic, I was a server, a barista, I was in the public doing my job for all but three months of this entire pandemic and I have not gotten this virus. I believe in the freedom to choose. I believe that this is my body, it is sacred and I take care of it. Please do not force this vaccine on me. I want to have children, I want to live a healthy normal life, this vaccine makes me very afraid and I beg of you to not force it on us.

There are doctors and nurses speaking up about what is going on and what they have seen. People dying from this vaccine, people getting seizures, getting myocarditis ESPECIALLY IN PEOPLE UNDER 30 (source: CDC WEBSITE). The numbers are inaccurate because people that are getting the vaccine and are having adverse effects are often not reporting because their strong belief still in this vaccine. DRs are told to report but then implied not to.

People under 30 aren't even at risk. People at highest risk are over the age of 50 (a lot of them not even in the work force). Why is taking a vaccine that is questionably even safe for my age group to fight a virus that is questionably even dangerous for my age group even up for debate?

I believe that this country is on a slippery slope of repeating what happened in Germany under 100 years ago. We are forcing people to get a vaccine that doesn't prevent, doesn't stop side effects, doesn't protect from spreading. WHAT IS THE POINT? What DOES IT EVEN DO that is so great that we are taking peoples rights away to enforce it? The point is control. This administration wants us to be controlled, I believe in the greater good, but this doesn't seem like it. THE White House IS NOT EVEN FORCING THEIR STAFF TO GET THIS VACCINE. Why are we pushing this on our people?

Please don't allow so many people; ones who are ACTUALLY working instead of collecting continuous unemployment to suffer. These are your voters. I have never seen so many people in this area shift slowly from democrat to republican. I am telling you as somebody who speaks to a lot of people in the community and often, that if you make this call, you will not be our representative. You are guiding your own demise in this counties politics if you allow for this tyranny to hit Kitsap. Please reconsider. Please PLEASE don't force this vaccine.

Sincerely,  
Melissa Ward

**Subject:** Tuesday meeting: A vaccine mandate

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Greg Wheeler,

I strongly encourage you to consider the importance of an individual's right to make their own medical decisions. Enforcing a vaccine mandate to continue to work, would revoke this right. We all need to make money to survive. As a women who is 31 weeks pregnant, I do not want to have to make the rash decision to get a vaccine that has not been heavily tested on pregnant women ( I will remind people time and again, that while the Chicken pox vaccine is a different kind of vaccine, it was originally thought safe for pregnant women...years later it was discovered to not be). I also do not want to be forced to leave my work place in the last weeks I am able to save for my future child and ensure I have money to feed, cloth, and shelter my son before I give birth.

Our work force is already struggling. There are for hire signs all over the county, business have to cut their hours and days just to give the employees they do have, at least one day off a week. We are struggling for staff everywhere. Enforcing a vaccine mandate is going to increase this struggle.

I strongly encourage you to think about the importance of allowing people the right to their body, their own

medical decisions, life, and family. I do not want to live in a community where I am unable to find a job because of a personal medical choice I have made. A medical choice that should not be anyone's business, much like my medication regime or if I am on any type of birth control. This is a spiraling effect, jobless people end up with poor food supply, poor food choices that lower their immune system, can lead to being homeless....Which all can increase the chances of getting sick, and spreading germs. This can even happen to those that ARE vaccinated.

I am not personally against the vaccine; I went to nursing school at Olympic College and understand as well as appreciate the magnificence of a vaccine being created. I am not interested in taking a vaccine that has not been widely tested on pregnant women. Many of those who are currently unvaccinated are not 'against' the vaccine, they have other considerations that they are waiting for answers before making the irreversible decision to get vaccinated. Science is amazing, but science is always changing. That is why we have standards for medications before they are put out on the shelf, including long term studies (long term is considered more than the year and a half we have been testing these exact vaccines).

Thank you for taking the time to read my e-mail. I am just a first time to-be mom, who has to make hard enough choices to protect my baby and myself. I am scared of the anxiety and consequences of a mandate where I have to make another, large choice, where there is not much research for me to consider to help me decide. So, I ask of you, to please consider many individual people who are currently in the process of making a tough and scary decision themselves, and not to exacerbate it by enacting a vaccine mandate just to be able to put food on our tables for our families.

Thank you,

Serenity Huntwork

Good afternoon Clarice,

Thank you for taking the time to email me your input. I appreciate it very much and consider all feedback carefully as part of the decision making process as a member of the Kitsap Public Health District Board of Directors. Thank you again for reaching out to me with your thoughts and concerns. Take care and I hope you enjoy the rest of your weekend.

Sincerely,

Greg Wheeler  
Mayor  
City of Bremerton

Good day, I am writing you about the Tuesday meeting on vaccine mandates. I have lived in Kitsap County for 30 years and I do NOT in support any mandates or restrictions. There are many, many reasons I could list for you but I will address only two. Firstly, it will only cause segregation and division in our county. It will become neighbor against neighbor. Secondly, if you think creating mandates will make the unvaccinated comply, then you don't know human nature. A person pushed into a corner will not fold, they will fight back more. Mandates will divide our community. I am hoping you are not considering these mandates because you will get more money from the government. I love living in Kitsap but if this county goes in a direction of mandating people more, we are fine selling our home and moving to a more cohesive community. Thank you Clarice

Dear Sir,

I am writing to you today as a concerned citizen of the Kitsap County area. It has been brought to my attention that there will be a Kitsap Public Health Board meeting on Tuesday, September 27 to discuss and make major decisions for all Kitsap county residents and others who shop, recreate, work, receive medical care etc. in the Kitsap metro area. The Covid-19 vaccines are available and free to all those who want them. Those who have chosen not to be vaccinated are making a health decision at their own individual discretion. Let's encourage vaccination rather than mandating them, creating a cultural war that will only result in people becoming more entrenched in their opposition, divide our beautiful community against one another, and unjustly discriminate against those who have a moral, ethical or other reason (such as natural immunity) for rejecting the vaccine.

Reject soundly any idea of a mandated vaccine. Reject soundly any suggestion of a vaccine passport. My sincerest hope for the Kitsap Public Health Board is to respect the citizens and visitors of Kitsap county by taking no action and allow the current situation to play out by respecting personal liberty and preserving unity.

Respectfully,  
Nancy Kauahi

Hello,

I am writing to provide comment on Kitsap Public Health Board Speical (sic) Meeting Agenda dated 9/28/2021. The document lists several possible courses of action regarding Covid response. The first one, "Take no action and allow the current situation to play out", is the only sane solution.

The current shortage of working, trained nurses has been caused by nurses either quitting or being fired because of vaccine mandates. Imposing more vaccine mandates would only exacerbate this problem. This would make health care delays even worse.

Proposals for vaccine mandates ignore one key scientific fact, natural immunity. Studies have shown natural immunity to be up to 27 times as effective as the current vaccines. For every person who becomes infected, you have one more person who is immune. At some point, soon, infections will drop near zero.

Then there are the questions of enforcement and racial tensions. Many police officers will be quitting rather than take the forced jab, as will many other workers. They will seek employment elsewhere. Since the African American community has the highest proportion of vaccine hesitancy, they will be disproportionately affected by these mandates, losing jobs and possibly being forcibly removed from businesses. (Everyone has a cell phone with a video recorder). New York is already facing protests by BLM over what are considered racist vaccine mandates. No matter how altruistic the intentions of these mandates, they will be seen as punitive by those who are adversely affected. People with conscientious objections to the vaccines will see themselves like the Jews in WW2 forced to sew the Star of David on their lapels.

Kitsap County is in the United States of America, a country founded on freedom. People need to be free to make choices about their own bodies. I am not sure who coined the phrase but, "My body, my choice", comes to mind. Americans aren't swayed by authoritarian tactics, their hearts and minds must be won. Mandates do not win hearts and minds.

**Subject:** Against mandate for showing proof of vaccination

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

As a long time Kitsap resident and tax payer, I would like to voice my concern over the potential mandate by the county to require proof of vaccination for entry into public places. The data, science and politics around Covid, the vaccines and masks has been all over the place. The CDC, the President, the Governor and Government Administrators have flip flopped to suit their needs. This mandate is just a further over reach by the government to limit the freedoms of the people. Having the vaccine does not guarantee that someone will not get Covid or give it to someone else. The world will never be 100% safe for germs. The live is to have risk. Please allow the citizens of Kitsap county to make their own choices and not put in place this mandate.

Thank you,  
Katherine Corso

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Keith Grellner,

After reading the Board Agenda for the upcoming meeting, I would like to comment on the recommended action choices for the Kitsap County Health District regarding vaccination requirements. Citizens of Kitsap County are varied in their reasons for choosing many different lifestyles, and they are free to do so because our state Constitution gives them that freedom. If the county or state uses vaccine mandates and/or passports to simply engage with others at a place of business, shopping, recreation, work, etc., the effect will harmfully divide our county's citizens and businesses. We know a lot more now about the science of the C-19 virus. People are getting sick and passing virus to others, whether or not they have taken the currently provided vaccines. If they were as safe and effective as getting a common childhood vaccine which truly end disease, as in the smallpox, polio, tetanus, etc., the C-19 vaccinated people would not be getting sick. Why would Kitsap County Health and other County agencies attempt to force it's citizens to choose to inject these chemicals into their bodies or be ostracized from public life? I would like to add that our government should serve the people, not force them. Americans believe in liberty and justice for all, not just those who make a particular medical choice. Thank you for reading my comments and taking them into consideration in your deliberations.

Sincerely,

Adrienne Kinzie

**Subject:** Restriction on the unvaxed;

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

This an unfair restriction for the ones that choose not to get vaccinated for Covid!! Also selfish & uncareing!! Some of the unvaxed have very serious auto immune deficiencies or other medical conditions making it available to not get vaxed, has anyone in the group considered this!? Evidently not!! So let me get the facts straightened out here, your saying that you will punish the unvaxed by by not allowing them into any public establishment without a legal vaccination card!! Evidently you haven't thought this over well enough to know what this will do!? The unvaxed are not an enemy, they are just people like you & me!! The only difference is they choose not to be vaxed for personal, religious or medical reasons!! So you are willing to mandate that the unvaxed will be unable to buy groceries, purchase life saving necessities to live, what that means in the long run they will starve to death without the ability to get food at the grocery store to feed their families & theirs elves! That is inhuman & dark ages type of rule!! Just think about what harmful consequences this will be when thousands can't get food, toilet paper, water, even hygiene products?? Its as incomprehensible as the refugees sitting under that bridge in Mexico & Texas!! You people better take a better look at the repercussions of the actions you are about to tell your community!! God has compassion!!

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

**There should be no vaccine passports.** Fully vaccinated people can still get the virus and pass it on. Even if you only allow vaccinated people into public places, they can still have the virus and pass it on, especially since some of them may be asymptomatic and not even know they have the virus.

**Natural immunity after having had COVID is never considered.** Even if you have natural immunity and get one shot (which has been recommended), you still would not be considered fully vaccinated without two shots, which makes no sense.

**Vaccines should not be mandated.** Mandating wearing a seatbelt or motorcycle helmet is not the same as mandating an injection. Seatbelts and helmets may protect people, but are external and are not medical procedures. An injection is an invasive medical procedure. Why is it OK to say "My Body My Choice" for abortions so that women aren't forced to have a baby if they don't want to, but being forced to get an injection is OK?

Simply put:

1. Take no action and allow the current situation to play out. **Consider this option.**
2. Make a formal Health Board recommendation/resolution for all local governmental agencies to require vaccination for their employees. **Consider this option.**
3. Make a formal Health Board recommendation/resolution for all private businesses to require vaccination for their employees and/or require proof of vaccination for entry into indoor public places. **Requiring proof is stepping into personal health information and a no go!!**
4. Issue a formal Health Board / Health Officer order under the authority of RCW 70.05 to require employee vaccinations at governmental agencies. **Consider this option.**
5. Issue a formal Health Board / Health Officer order under RCW 70.05 to require all business open to the public, or indoor venues open to the public, to require proof of vaccination for entry. **Requiring proof is stepping into personal health information and a no go!!**

You will become a dictatorial government if you demand proof of vaccination.

I realize, as a private citizen of our free country, that I would then be Free to choose not to provide the proof and take my business elsewhere. However, if you make it mandatory for ALL public/indoor venues, then that would include grocery stores, restaurants and many small business.

That puts them at jeopardy for the loss of business. That will hurt the economy of our county, which is already struggling.

It will force many to go on line for their services, if they can. Many seniors do not comprehend how to do that; some may not have access to the internet or a way to pay on line.

Some will then turn to criminal activity to get past the mandate. They will create false proof.

I realize that there are some in our country/world who already fit into the categories I have mentioned.

However, I do think it is not necessary to increase the problem. The world already has enough problems facing us and spiraling out of control.

I would hope you all use the brains and power you have been given to help solve the issues facing our county and not make things worse.

Thank you,  
GM  
Port Orchard Resident

**Subject:** Special Covid meeting on Sept 28

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello Mr. Grellner,

Yesterday I had breakfast with a group of friends and, while talking about vaccines and proposed mandates, it came to my attention that the Kitsap Public Health Board would be having this “speical” meeting on September 28. Now, I know that is not how the word “special” is spelled but that’s how it reads on the [kitsapublichealth.org](https://www.kitsapublichealth.org) website. Hmmm...

I have some questions and comments about this meeting:

1. Why was this meeting not made common knowledge to the citizens of Kitsap County? Even on the home page of the website it is not mentioned, only the meeting on October 5 is. I had to search hard to find the link to this meeting and I believe you have left most Kitsap County residents uninformed in regard to who is making decisions about our health care choices and the choices we make over our own bodies.
2. The public is not being made aware of the fact that there are EUA fact sheets from the manufacturers of these vaccines that contain numerous warnings, again, we must search for the information. In a time where even an aspirin commercial contains warnings, the tv ads for the Covid vaccine show nothing but a little box checked “safe”. These vaccines are not safe for all, there have been a wide variety of adverse reactions to them. And, they all say not to use the vaccine if you have known allergies but how does a person know if they have allergies if they’ve never before been exposed to the ingredient or substance they are allergic to? I am allergic to codeine but didn’t know it until I was given codeine after a surgery years ago. Finding out that I was allergic to it was not a pleasant experience.
3. No one knows what the long-term effects of the vaccine are as they have not been out long enough to have any long-term information. Johnson’s Baby Powder, which was a staple in households as far back as I can remember, is now proven to cause cancer.
4. The public is not being made aware that none of the available vaccines for Covid have been tested with any other vaccines (as stated on the EUA fact sheets). This is the time of year for flu and pneumonia vaccines, and I heard a Bartel’s commercial today encouraging people to come get all of their vaccines for the season there. How much time is necessary between the Covid vaccine and other vaccines? If they haven’t been tested, how do we know? The CDC is stating that the Covid vaccine can be given in the same visit as other vaccines based on experience with OTHER vaccines, not based on experience with the Covid vaccine which is not like OTHER vaccines. Scary. Maybe I’ll forgo my flu vaccine this year.
5. What about people who have had Covid? They aren’t eligible for the vaccine for 90 days if they have been treated with monoclonal antibodies or convalescent plasma.
6. Why is no one talking about natural immunity? If God sees fit to let someone recover from Covid (which is what happens in the vast majority of cases) He has granted them natural immunity. Why does this seem to mean nothing to the health care world?
7. Why aren’t preventative measures (diet, exercise, vitamin D, sunshine) being encouraged? It is a disservice to the community to not encourage the measures which deter the virus.

8. Kitsap county is populated by a very large group of military personnel, both active and retired, who have given of themselves to protect the freedoms granted by the Constitution. Mandates violate those freedoms but the health care industry, and the Governor, don't seem to care.
9. If a woman has the right to decide what to do with her own body, that decision doesn't just apply to her uterus. Or does it?
10. People are flooding our borders without even being tested, let alone forced to have a vaccine. What makes anyone think it's okay to force American citizens into a vaccine while illegal immigrants can flood our country with the virus?
11. The mandates in place already have caused depression and suicide. That's a fact. They've also caused obesity in much of our population, our children especially. It's a known fact that obese people are more at risk for Covid. What's the next mandate, overweight people have to weigh in every week and be tested to see if they ate anything fattening?
12. Maybe if the emergency room at Harrison in Bremerton hadn't been closed there wouldn't be "intermittent bottlenecks" at the other ERs in the area.

At the breakfast I mentioned at the beginning of this email, 50% of our group had been vaccinated but 100% of the group agreed that mandates are not only not the way to get people on board, but they also put business owners in charge of doing something they are not qualified to do. In addition, they put employees at risk of having to defend themselves from irate customers who feel their right to medical privacy is being invaded, which it is.

I am not anti-vaccine. As a mother, I've made sure that my daughter was vaccinated properly and on time. I am, however, anti-privacy invasion, anti-mandate and anti-public disinformation or withholding of information to the public. My medical records are my business, I can't find anywhere in the HIPPA rules that says a restaurant owner can have access to my medical records.

I hope you will take these comments into consideration and decide to take no action that disregards Kitsap County residents' freedom, which is protected under the Constitution and a vital part of what makes America "special".

Thank you,  
Kelly Donalson

Hello,

I am writing to provide comment on Kitsap Public Health Board Special (sic) Meeting Agenda dated 9/28/2021. The document lists several possible courses of action regarding Covid response. The first one, "Take no action and allow the current situation to play out", is the only sane solution.

The current shortage of working, trained nurses has been caused by nurses either quitting or being fired because of vaccine mandates. Imposing more vaccine mandates would only exacerbate this problem. This would make health care delays even worse.

Proposals for vaccine mandates ignore one key scientific fact, natural immunity. Studies have shown natural immunity to be up to 27 times as effective as the current vaccines. For every person who becomes infected, you have one more person who is immune. At some point, soon, infections will drop near zero.

Then there are the questions of enforcement and racial tensions. Many police officers will be quitting rather than take the forced job, as will many other workers. They will seek employment elsewhere. Since the African American community has the highest proportion of vaccine hesitancy, they will be disproportionately affected by these mandates, losing jobs and possibly being forcibly removed from businesses. (Everyone has a cell phone with a video recorder). New York is already facing protests by BLM over what are considered racist vaccine mandates. No matter how altruistic the intentions of these mandates, they will be seen as punitive by those who are adversely affected. People with conscientious objections to the vaccines will see themselves like the Jews in WW2 forced to sew the Star of David on their lapels.

Kitsap County is in the United States of America, a country founded on freedom. People need to be free to make choices about their own bodies. I am not sure who coined the phrase but, "My body, my choice", comes to mind. Americans aren't swayed by authoritarian tactics, their hearts and minds must be won. Mandates do not win hearts and minds.

**Subject:** Kitsap County Health District Meeting on Tues Sept 28-Please do not make the Vaccine Mandated in Kitsap County

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hi

I understand that there will be a meeting this coming Tuesday with the County Health Board to discuss vaccine requirements in Kitsap County. It says they will be discussing and making a decision on if they want to proceed with the following options (or possibly other options will be discussed). This is going to be a closed meeting but I understand we can send in comments ahead of time so I would like to ask that you do not require options 2-5 but rather go with 1

- 1. Take no action and allow the current situation to play out.*
- 2. Make a formal Health Board recommendation/resolution for all local governmental agencies to require vaccination for their employees.*
- 3. Make a formal Health Board recommendation/resolution for all private businesses to require vaccination for their employees and/or require proof of vaccination for entry into indoor public places.*
- 4. Issue a formal Health Board / Health Officer order under the authority of RCW 70.05 to require employee vaccinations at governmental agencies.*
- 5. Issue a formal Health Board / Health Officer order under RCW 70.05 to require all business open to the public, or indoor venues open to the public, to require proof of vaccination for entry."*

Without getting into a debate on the benefits of the vaccine, it is important to understand that each citizen should have the right to choose for themselves whether to take the vaccine or not...Their livelihood (job, being able to shop for groceries and necessary supplies to live, etc) should not be dependent on whether or not they have received the Covid vaccine. Please put a stop to this now.

We are already short workers in many many different areas and if employees who are choosing to go to work each and every day (and have done so since the beginning of the pandemic without a vaccine) are let go we will even have more of a shortage of workers. Why punish good hard working people? Our county will suffer greatly.

There are many other reasons I would like option 1 to be the outcome, but I don't want to be long winded as I know you are busy and your time is valuable. I am sure you are all smart enough to understand the ramifications and impact this will have on each and every one in the county....Vaccinated or not!

Thank you for your consideration  
Becky Futrell

**Subject:** Proof of vaccine mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I hope this message finds you well.

In regards to the proposed Kitsap county mandate requiring proof of vaccination to access businesses. This must not come to pass. That it is even being considered is abhorrent to our most sacred American values. To deny access to essentials like food (grocery stores) and work (in reference to the state workers vaccine mandate) will cause a large segment of society to become, for all intents and purposes, outlaws. We are Americans and we will not go silently and submissively into the night. How loudly must we call for the right of every person to have control over his or her own body and maintain the right to life, liberty, and the pursuit of happiness. Would you require everyone with an STD to wear a badge marking them as a viral threat? There are too many other COVID-19 treatment options being ignored in favor of an untested vaccine. And all this for a disease that has a survival rate well beyond 99%. What of all we have been told by the experts and government for over a year? "Masks and social distancing are effective against COVID-19" why has that changed?

I call on you to represent your people and protect them from government overreach. As a society we can recover from even the worst of diseases but to prune back governmental overreach would likely take a far greater toll on those you are sworn to serve.

God Bless America  
Caleb Hinson

No Vaccine mandate for Kitsap County, it is unconstitutional and will put many small businesses (that are already struggling) out of business.

It's hard enough to get customers at this point and to limit that even more would be devastating.

Thank you for your time

Good Afternoon,

I certainly hope that the information which I have just received is only a rumor, that the Kitsap County Health Board is considering a new requirement regarding 'proof of vaccinations', which will cripple the economy of Kitsap County. To consider taking such a drastic action AGAINST the residents/voters of this County is unimaginable.

PLEASE - Do not institute something so UNAMERICAN. Do not cripple this Countys' Economy. Do not force the EVACUATION of residents and local business owners - including the United States Department of Defense.

PLEASE - Do not support alienating your voters. Do not support political terrorists. Do not support panic and fear generated by those who wish our Country harm.

PLEASE - Vote to "TAKE NO ACTION!"

I have lived, worked, shopped and voted in Kitsap County for more than 35 years and I'd like to continue doing so.

Very Respectfully,  
Leslie Yuenger

**Subject:** Kindly refusing vaccines

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hi Keith,

I am a healthy 30 year old women in the Kitsap area. I moved here to start a farm and health center. I have property on an acre of land and will not be getting the vaccine. Please note this is not a one size fits all. I am pro vaccines but I have seen many injuries from these recent vaccines. There is no long term side effects. Many drs have been noticing spikes of cancer in their longterm patients.

The economy will crash in our area as most of my friends and family will not be dining or shopping anywhere there is a passport mandate. The economy will tank and people will move out of this market. Please respect our health choices and know that is this not the way to go about it in Kitsap county. Thank you for listening. I will probably be moving if there is a proof of vaccine mandate. I am a person you would want to have around too. A wholesome nice girl from Mt.

Thank you,

Taylor VanDy

You should be ashamed of yourselves for even considering mandating vaccination. Let alone having this upcoming special zoom meeting for it during the day when people are working, AND making it closed.

Why has this vaccine been the ONLY solution since the beginning? Why has there been no discussion of other treatments? Why have doctors who are treating patients successfully being censored? Why is there no ongoing research on ANYTHING else but this vaccine? Its fishy.

If it was about everyone's health, there would be transparent ongoing research and data to us to show your work. We would be CONVINCED of this data to follow the treatment. But even then, people have the FREE WILL to decide for themselves how they will live.

You have no convincing data. The vaccine has been available for months and the cases are worse with more variants. There are doctors [and other countries!] with PROVEN treatment successes but you won't talk about it. Take a look at these doctors. They are publishing their ongoing research and SHOWING the data of what is working:

[https://odysee.com/@FrontlineCovid19CriticalCareAlliance:c/FLCCC-Weekly\\_Update-092221\\_MATH+:0](https://odysee.com/@FrontlineCovid19CriticalCareAlliance:c/FLCCC-Weekly_Update-092221_MATH+:0)

Why is there no discussion or testing or acceptance of people with natural immunity?

You are proving yourselves to be corrupt and the lies and deceit are showing. And now you are resorting to MANDATES because you aren't convincing enough people with your "science".

If you were honest servants of the public, you wouldn't have to hide behind your closed zoom meetings. Open it up to the public and answer for yourselves.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

I am upset that our county leaders are trying to require businesses to obtain proof of vaccination before entering. This is absolutely ridiculous!!! There are people who cannot get the vaccine due to health and religious reasons. This is segregation and discrimination. We were all told by the people in charge that we would NOT be required to show papers. When does this control end? Please don't allow this to happen!!!

I am fully vaccinated only because I was going to lose my job and not be able to provide for myself. This has got to stop. Please don't allow this to take place. People are going to suffer.

Sincerely,  
Tracie Aguilar

**Subject:** Vaccine Mandates are unconstitutional and does not follow the science!!

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello Keith,

Background: I was born and raised in WA (over 60 yrs) and have been a homeowner and resident in Kitsap for nearly 28 years. My wife Melinda and I have raised all five of our kids here and consider ourselves law abiding citizens who have been involved with community outreaches and benevolent activities in the greater Kitsap area.

Complaint: The Kitsap County Health officials and county/city representatives have overstepped their authority. The fact that medical mandates are even being considered is proof that the board is only considering one side and not taking into consideration many of the benefits of natural immunity as found in several peer reviewed medical studies (Israeli being one) and the risks and deaths associated with getting the jab (it is not a vaccine as described by the medical definition). The study in Israel clearly shows that natural immunity is WAY more effective than getting the "vaccine". I vehemently oppose any and all mandates as it is an affront to our federal and state constitutions, not to mention the fact that it is a clear violation of the law that our representatives swore to uphold to protect our freedom and rights as opposed to trade in our essential freedom to purchase a little temporary safety (as Ben Franklin so eloquently stated some years ago).

While I acknowledge the fact that these experimental "vaccines" have some benefit to those with high risk profiles and comorbidities, there are diminishing benefits for those of us who have had the virus and have built up immunity for the original virus and variants as stated by prominent immunologists and epidemiologists. The risk far outweighs the benefit, but again, that decision should solely be up to the individual and his/her health professional.

Thusly, I would like to wager a formal objection to any and all medical mandates which include wearing a mask that has proven to be ineffective from both a medical and scientific standpoint. The government's agenda is very clear here since any opposing views by the medical community made up of experts are not even considered or heard. This is purely and simply fear-mongering for the purpose of gaining power and control over the populous. A very Marxist activity, and wars against the very foundation of our society.

Please serve the people by allowing them to make there own decision about their health based on their risk profile and existing health conditions. Each person should be able to make that judgement without the government intervening in their business... remember, my body, my choice!

Please let me know what I can do to make my opinion clear to the elected servants that serve WE THE PEOPLE!!

V/r,

David & Melinda Manning & Family

**Subject:** No vaccine requirements for Kitsap businesses

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Vaccine requirements will cause Kitsap to lose many citizens and businesses that already struggle to get enough workers. Imagine having to fire your precious few workers who can't show proof of vaccination and you can't find anyone to replace them? Imagine the black people in our county that fall into the category of being a large percentage of the people in the US who just aren't there yet in trusting the vaccine? I'd say if you do anything, let your language express that you are leaving the choice up to businesses to require the shot or not. Let it be stressed that you respect businesses ability to choose. Let our county continue to be what it's been all these years, a break away from the big city and a slow paced family oriented home for people of all different backgrounds.

**Subject:** Covid vaccines for indoor access

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

I am a longtime resident of Kitsap county with 4 children that attend public schools here in South Kitsap. I want to state for the record that I am vehemently opposed to mandating vaccines for indoor entry into public spaces. This is a gross overreach of government power into the private medical lives of it's community members.

Sadly, many of us are at high risk for vaccine reactions, we have philosophical objections to the vaccine, or we have scientific objections to the vaccine.

There is ample evidence showing that this vaccine is not the answer or the cure to stop Covid in its tracks. As a matter of fact, one of the first things that I learned as a biologist/chemist is that when you introduce severe pressure on a virus at the height of a pandemic, instead of eradication you produce strains that become even more effective at harming the host. This is what we are seeing. This is what the vaccine is doing to the population currently. If you care about your community, you must give them the freedoms of choice.

Sincerely,  
Kimberly Wilson  
A concerned citizen

**Subject:** Regarding Kitsap County Health Board Meeting Sept 28, 2021

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Greetings Kitsap County Health Board Members,

I am a concerned citizen and I am writing to you to about the issues to be discussed on September 28, 2021. I am voicing my opposition to this plan. This will hurt citizens and private businesses. It is discriminatory to have some version of vaccine passports as the low income and people of color have the lowest vaccination rates. It is also a person's choice to decide if they want medical treatment or not. Our rights and freedoms are guaranteed by the constitution. Not every rule, mandate, dictate, or law that erodes or contradicts those freedoms will be allowed to stand, nor will citizens allow themselves be made into slaves, outcasts, or criminals for living and existing as we have before this situation. We the people are asking you to side with us and protect freedom as many of us have done for you. We have a problem with elected officials dictating to the public instead of carrying out the public's wishes. This "papers please" way of doing business is unconstitutional and very dictatorial. We have a problem with the secrecy that veils these meetings and the fact that citizens are not allowed to make comment in those meetings. Please consider that the citizens you represent do not wish to have this extra burden and strip even more freedom away. I am but one of thousands of concerned citizens. Not all will be able to write to you but they need their voices heard. It is the will of the people to be free.

Best Regards,

Justin Blanton

**Subject:** COVID Vaccine Mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Dear Keith Grellner

Thank you for taking the time to read my email about the upcoming COVID vaccine mandate. As a local citizen who has lived in Kitsap County for 22 of my 29 years I can tell you how much what is happening currently is devastating to the core. Not just for me, but for so many of my friends and family this is beyond upsetting. I respect my fellow citizens and I have never been against vaccines, aside from the flu vaccine which I have watched many people around me continue to receive and continue to get the flu as a result, while I have not gotten the flu in many years.

I love this country and I love this state. But what has been happening in our country is scaring me.

Everyone I personally know to have had COVID 19 in the last two months has been FULLY VACCINATED. I however an unvaccinated person have not gotten it the entire life of this pandemic, I was a server, a barista, I was in the public doing my job for all but three months of this entire pandemic and I have not gotten this virus. I believe in the freedom to choose. I believe that this is my body, it is sacred and I take care of it. Please do not force this vaccine on me. I want to have children, I want to live a healthy normal life, this vaccine makes me very afraid and I beg of you to not force it on us.

There are doctors and nurses speaking up about what is going on and what they have seen. People dying from this vaccine, people getting seizures, getting myocarditis ESPECIALLY IN PEOPLE UNDER 30 (source: CDC WEBSITE). The numbers are inaccurate because people that are getting the vaccine and are having adverse effects are often not reporting because their strong belief still in this vaccine. DRs are told to report but then implied not to.

People under 30 aren't even at risk. People at highest risk are over the age of 50 (a lot of them not even in the work force). Why is taking a vaccine that is questionably even safe for my age group to fight a virus that is questionably even dangerous for my age group even up for debate?

I believe that this country is on a slippery slope of repeating what happened in Germany under 100 years ago. We are forcing people to get a vaccine that doesn't prevent, doesn't stop side effects, doesn't protect from spreading. WHAT IS THE POINT? What DOES IT EVEN DO that is so great that we are taking peoples rights away to enforce it? The point is control. This administration wants us to be controlled, I believe in the greater good, but this doesn't seem like it. THE White House IS NOT EVEN FORCING THEIR STAFF TO GET THIS VACCINE. Why are we pushing this on our people?

Please don't allow so many people; ones who are ACTUALLY working instead of collecting continuous unemployment to suffer. These are your voters. I have never seen so many people in this area shift slowly from democrat to republican. I am telling you as somebody who speaks to a lot of people in the community and often, that if you make this call, you will not be our representative. You are guiding your own demise in this counties politics if you allow for this tyranny to hit Kitsap. Please reconsider. Please PLEASE don't force this vaccine.

Sincerely,  
Melissa Ward

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I agree with Duel Brown, so I copied and pasted his remarks from a Facebook post recently.

"Dear Elected Officials;

I am a 59 year resident of Kitsap County and Port Orchard. I have pretty much enjoyed living here most of my life. I have felt that in many cases the elected officials have put the best interests of the people as a priority in their decisions. As a concerned citizen and a Covid-19 survivor I encourage you all not to place any mandates in order. These mandates will not serve the best interests of the people of this county.

My and my wifes Covid survivorship was not based on anything the medical profession of this county did. When I visited the E.R., their response was there is nothing we can do for you. I had just returned from a Health and Freedom conference where several Doctors spoke of treating patients early on with great success and no deaths. This "pandemic" is only exacerbated by failure to institute early treatment as prescribed by those Doctors having success. The mortality rate in this county has not grown since the beginning of this virus. While one death is to many most have included comorbidity.

Instituting mandates will only exacerbate economic problems for this county's business owners.

The reason for hospital occupancy problems are two fold, one failure to institute ealy treatment, and the laying off of workers, (nurses,Drs, staff, etc).

There have been some 7000 plus cases in Kitsap County, that means there are some 7000 p[lus naturally immune people and probably more due to unreported cases. These people, spouse and self included DO NOT need to contaminate our bodies with something that is causing severe side effects, including death.

In closing, I strongly urge you to vote against any mandates. Let this virus take it's course.. I would like K.C. to continue to stand for Kitsap County, instead of Kitsap Communism."

Sincerely Duel and Seenie Brown  
Concerned Citizens

Gretchen Blair, also a concerned citizen.

**Subject:** Citizens Against Further County Health Regulation

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello Keith Grellner:

I am a Kitsap county resident and military veteran with more than 20 years in the United States Marine Corps. I also am a software engineer and data scientist by trade and I have been keenly following the pandemic as it has unfolded, as well as the response by public health agencies. As a military commander with combat experience, software engineer, and data scientist, I am able to provide some advice on difficult policy decisions.

Bottom Line up front:

I recommend that Kitsap county does not add any new regulations to a plan that is already in motion by state and federal authorities. In fact, I believe that the pandemic represents an opportunity for Kitsap leaders to show genuine courage by standing for time honored convictions, and by demonstrating their principles by leading through example. Through demonstration of intelligence and honor, I believe this gives Kitsap an opportunity to lead, where other state and federal leaders have merely followed. I recommend that Kitsap county should make a declaration that Kitsap stands for medical freedom, that a vaccine passport will NEVER be implemented in the county boundaries, and that individual choice should guide whether to take a vaccine or not based on their personal circumstances.

Detailed Answer:

The current pandemic fight is very chaotic, making it a challenge to decipher the truth from the many narratives in play. In these scenarios, it is best to use data to drive decision making rather than relying on politically driven information.

Any policy choice should be guided on the risk versus rewards in the scenario. The word Pharmakon in Greek means remedy... and poison. Medical policy should pay heed to this, as giving medicine to someone may kill them or allow their system to stabilize to the point where it can heal itself. A government policy can not determine this; only an individual themselves can assume the risk for their given health situation.

The current data shows that 90% of the people that die from Covid are over 65, and the data also shows that Covid is 99+% survivable in most cases. Many people that died also have existing comorbidities. The dataset is very chaotic and it's likely that there is some overcounting occurring. The current data does not say whether or not Covid killed you from the CDC. The data says the obvious: if you are older and have a comorbidity (or several), then you may be primed to have an issue with Covid. CDC public datasets are available here:

<https://data.cdc.gov/Case-Surveillance/COVID-19-Case-Surveillance-Public-Use-Data/vbim-akqf>

The other aspect to evaluate is the high reaction rate to these shots. Data directly from HHS shows that these covid vaccines lead all other reactions in the 30+ year history of the database. These shots on the low estimate side show the covid injections have 150 times as many deaths as a standard flu shot. We also do not have any long term testing results for these injections. Vaers HHS data is available here:

<https://vaers.hhs.gov/data.html>

There are a variety of legalities in play here that should be considered on any mandated policy. The status of the vaccines as an Emergency Use Authorization vaccine is important as this equates to a medical experiment. The Nuremberg Code, established after large scale Nazi testing on civilians, sets the established international norms and ethics for experimental testing. The Nuremberg Code requires informed consent during the experimentation process. This means that an individual must consent, free from coercion, and be informed about the risks of the vaccine and all ingredients. Consent under duress (loss of job, threats, etc) is illegal under the Nuremberg Code. There are also a variety of other laws that deal with the rights to medical privacy (Americans with Disabilities Act and Health Insurance Portability and Accountability Act (HIPAA)). Title VII of the Civil Rights Act of 1964 also provides protections to American for religious freedom, as the covid injections have used aborted fetal cell lines as part of their development and testing. The Cominarty FDA approval is a political stunt to drive increased vaccination since approval was accelerated from the planned 2023 date by 2 years. Also, Cominarty vaccines are in short supply in the US, so this appears to be a political stunt to drive vaccination rates with the EUA vaccines. Please see a letter to the FDA from Senator Ron Johnson. <https://childrenshealthdefense.org/defender/under-federal-law-can-your-employer-make-you-get-covid-vaccine/>

The current initiatives for a vaccine passport, the unification of your digital identity with your health and potentially your social information, is a dangerous path for individual freedom in America. Currently, there is no need for a vaccine passport and this is a coercive tactic to get people to take a vaccine, when the data shows that everyone SHOULD not take the vaccine. Coercing is illegal under the Nuremberg Code, and this makes very little sense from a policy perspective, as this reduces the legitimacy of the local government in the eyes of the people. I highly recommend this video on the Chinese Social Credit system, as it is a dangerous tool of control over the people and we do not want that precedent here in America. It's evident that pharmaceutical companies have a plan to start rotating vaccinations on Americans and being vaccinated now will expire at some point in the future. This places America on a path where large corporations will be guiding social policy and this should be strenuously objected to.

WHO international VAX Passport Tech Specs Indicating

[https://www.who.int/publications/i/item/WHO-2019-nCoV-Digital\\_certificates-vaccination-2021.1](https://www.who.int/publications/i/item/WHO-2019-nCoV-Digital_certificates-vaccination-2021.1)

China Social Credit Score Documentary.

<https://youtu.be/evBzPwCdeHI>

In summary, the public health emergency is best satisfied by ensuring that the right data is provided to citizens through independent evaluation of the risks of Covid, and the risks of the vaccines. The mandate and vaccine passports represent dangerous oversteps to individual freedoms and should not be implemented. This is Kitsap's moment. Seize it and lead.

Thank you for your time and consideration.

Justin Jones

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

I am writing this to be heard in regards to your upcoming meeting on Sept 28 to discuss the possible requirement of Covid-19 vaccine to enter Kitsap County businesses. A decision to require a vaccine to enter business will cripple our small business, especially those who have already suffered this pandemic. Please do not vote to require the Covid vaccine to eat at restaurants or enter any business. People should not be discriminated against based on their vaccine status, as it is a violation of human rights to choose.

Thank you,  
Dena Vickerman

**Subject:** Written Comment to the Kitsap Public Health Board for the 9/28/2021 Special Meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To the members of the Kitsap Public Health Board,

I am the Director of Environmental Health and Safety for a regional manufacturer that has facilities in several western states with over 5,000 employees. Additionally I served 27 years in the United States Coast Guard as first a flight medic then an independent duty corpsman, and finally Chief of Health Services for Alaska/District 17 USCG.

I enacted reasonable protective health measures for my company, and we did not have any large outbreaks, even with remote conditions in congregate living situations and working conditions, which include a transient work population flying in from around the globe. Using measures such as requiring masks, enforcing social distancing, and strict sanitation procedures helped to minimize any spread of COVID-19. We followed CDC and public health guidance on any close contact situations, and that also assisted in minimizing the spread of the virus. While we recognize the value of vaccinations and highly recommend our employees to consider getting vaccinated, we do not require our employees to be vaccinated. We respect their right or necessity to not get vaccinated and have procedures in place to ensure everyone's safety.

As I know and KPHD medical staff knows, viruses continue to mutate throughout the life of the virus and there are no absolutes in responding to them. The human body is the most complex machine ever conceived and no one can predict who will get sick and who won't; why some vaccinated people are fine, and why others become very ill; why some unvaccinated using no precautions have been just fine for the last year and a half and why others become ill and die.

Putting excessive regulations in place beyond the standard masks, hand washing, sanitizing, and social distancing in the case of any many viruses is unnecessary. I've proven that in my own manufacturing plants in the State of Washington, as well as the other locations.

Options #3 and #5 that would require proof of vaccination to enter a business would effectively deny unvaccinated citizens freedom. Some people are unable to obtain the vaccine for medical reasons, and just to enter a grocery store they would be forced to either ignore medical advice and get the vaccine, be dependent on others to shop for them, or be denied access to critical infrastructure necessities. We do not live in a country that requires its citizens to carry proof of their health status, citizenship, or identity for public access to any private business. These measures would invite chaos to the small business owner who is already short staffed and barely making ends meet.

The arts organizations that effected these extended rules did so because for the last 18 months they have been unable to secure donations or community support. They had to effect these extensive measures or face financial extinction. Most organizations do not have those particular constraints. People have been able to conduct mostly normal business using standard precautions.

Your numbers are going up because it's a virus and because we do not have natural immunity from it yet. People can still get a virus when they are vaccinated, and they can still spread a virus when they are vaccinated. Unvaccinated people getting sicker than the vaccinated people doesn't mean that it is the unvaccinated keeping the virus alive. This means that attempts to vaccinate 100% of the population are noble, no matter how many people are vaccinated you are not eradicating it you are just suppressing it.

I strongly urge the Kitsap Public Health Board to not consider any health protective measure that requires proof of vaccination to enter a public place or business. This will pass and the numbers will go down.

Respectfully,  
Brian Painter

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello all,

I am writing in opposition of vaccine passports in Kitsap.

- 1) ALL vaccines and medical procedures should be a choice.
- 2) ALL medical procedures are between a patient and their doctor only. You don't know if someone has AIDS or any other virus for that matter and asking for proof of a vaccine shouldn't be allowed either.
- 3) There is not a vaccine on the planet that is one-size-fits all and should never be treated as such.
- 4) Vaccines are designed to help the person vaccinated.
- 5) Having my vaccine doesn't stop me from getting the virus, nor does it stop me from spreading the virus; it simply lessens MY chances of being hospitalized.
- 6) Those of us that are vaccinated should be paying extra close attention to not be in public spaces with even the slightest illness as we could be unknowingly spreading covid without since systems are lessened or non-existent.
- 7) What about people that have had covid and have natural immunity?
- 8) Vaccine injuries ARE real. You can always check the VAERS website but I will list the negative reactions I know of firsthand. In case you're not familiar with the site, you can go here. <https://vaers.hhs.gov/>

- My niece was forced to get the vaccine for work and now has no control of her lower body. No control of legs, bowel, bladder, etc.
- A friends father went into cardiac arrest just hours after the first dose. He died.
- An elderly family member passed out about an hour after his second dose and broke both ankles. Hospitalized for months with no family around.
- At least a dozen people I personally know have permanent nerve damage either in their arm or throughout their body.
- Another friend of the family is completely paralyzed and lost the ability to even speak within 24 hours of the first shot.
- Another friend lost eye sight just a few hours after one shot.

I'm certain there are more we aren't aware of.

Regardless of what you or I choose, this should NEVER be forced upon anyone. NEVER.

Maybe we should make diet and exercise a public health emergency and teach people to eat better. Feed their children better.

Furthermore, the pressure for businesses to mandate this is absurd.  
Almost seems like an attempt to kill small business.

This is AMERICA. Choice is always a must.

Thank you,

Concerned Citizen

**Subject:** County mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello.

I am writing as a concerned citizen about possible mandates for businesses and agencies that are being considered by your agency and the county.

As a citizen of Kitsap County, I'm always looking to support small businesses in our community. Knowing that these business owners and employees have families to feed and house makes me want to support them. The past year and a half have been so difficult financially for them.

I want to commend businesses for following all of the requirements that have been placed on them over the past months. They have complied and done whatever has been mandated in order to stay open, serve their customers, and keep their businesses afloat: takeout only, limited seating, masks, disinfecting procedures, and more. Sadly, many have not survived and have closed their doors. How devastating for their families and the community, as the social and economic consequences have ripple effects for all of us.

As you consider how best to continue keeping citizens healthy in our community, I strongly ask that mandated vaccines as a requirement for employment or required for entry into businesses be removed as an option. Mask mandates and social distancing are already in place. With those requirements, the risk of contagion has been reduced dramatically.

Requiring proof of vaccination for employment or to enter a building will continue to negatively impact our community. People need to work. Businesses need employees. People need to visit businesses to get items to care for the needs of their families. Mandates will continue to crush our community as employers will lose more employees at a time when everyone is already hiring, and more businesses will close.

Please consider the impact of further mandates. The health of our community is important. However, the approach and solution to a problem should not be worse than the problem itself. These mandates will make things worse for so many people.

This county needs to take a stand for its businesses and citizens. Do not follow other counties, but be a leader in supporting all people, normal everyday people who just want to provide for their families.

Thank you.

Connie Lander

It does seem to me, the vaccines does not prevent the covid, it doesn't prevent the transmission has a definition of vaccine should be. It seems it is a suppression of the disease. This article explains how I feel.

**Subject:** September 28th Health Board meeting - COVID-19 Vaccine Mandates in Kitsap County

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good morning,

I am writing today regarding the potential enactment of various COVID-19 mandates in Kitsap County. I am a new Kitsap County citizen as of April 2021. We moved our family here from Edmonds, WA to be close to family and because we love the friendly people, pace, and beauty of Kitsap County. And to escape some of the politics and urban issues that come with living close to Seattle. We have embraced living here, and have joined our kids' elementary school PTA, support local athletics and businesses, and overall just love the experience.

I recently heard there will be a Health Board meeting to discuss implementing COVID-19 mandates to enter businesses, gyms, etc. here in the county and was disappointed to know this is even being deliberated. I believe the political hysteria is doing nothing but damaging our citizens and our culture. Many less invasive public safety measures are bringing down the COVID numbers and many Kitsap County residents are fully vaccinated without the need for this "stick" approach. Also, fully vaccinated individuals and businesses should have nothing to fear from unvaccinated individuals. In addition to the vaccination rate no one is accounting for the natural immunity a large portion of our citizens have. Businesses, including critical infrastructure like healthcare and public safety, are already struggling to find qualified workers. These mandates cause reasonable citizens like myself to pause and wonder what the real reasoning is behind these mandates. It does not make scientific sense, it only demonstrates that those in power want to have more control over their citizens. Not to mention these policies are extremely inequitable to those from disadvantaged communities. And where will it stop? Currently, there is one FDA approved vaccine for adults and all others remain under an EUA. Will we start mandating emergency authorized vaccines for our children when those receive an EUA? When did looking at the risk/benefit analysis of medicine and policy become an afterthought?

I plead with you to take a more reasonable approach. Your citizens care about each other, they care about the economy and each other's health. That can be seen by our current COVID numbers, that people are making good common sense decisions to keep each other safe. We can all understand that living with COVID is something we have to do, but enacting these mandates damages businesses, citizens, and the way of life we love here in your county. Let's avoid the need for protests and marches in the streets against mandates seen in big cities across the country and world. Let's be reasonably minded and scientific about these decisions. There is no science to prove that segregating vaccinated and unvaccinated folks benefits your citizens, but it is being shown to tear regions apart causing unrest and pitting people against each other.

Thank you for your time and consideration in stepping back to just look at the situation reasonably.

A concerned voter.

Melanie Danuser

Hello,

Thank you for your time and consideration.

I'm writing to request that you do not bring on vaccination passports and harsher requirements in our county.

There is still a lot unknown about this particular vaccine and am thankful to have the choice without consequence.

My family supports our community in various ways and are mindful of our actions while in public. Cases are dropping in our county and country.

We hope to remain active in the community, and we will not be able to if vaccine passports are required.

Sincerely,  
Benjamin

**Subject:** Regarding Meeting on the 28th

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Hello all,

Thank you for taking the time to hear the voice of those in our community.

We love our county and the respect I feel we all share.

I'm writing to voice that many of us in Kitsap County request that you do not bring on vaccination passports and stricter requirements.

I am pro-vaccine but this particular vaccine I would like more time. I want to see long term affects. Also, there are many "whistleblowers" bringing to light that MANY adverse reactions are not being reported across the country. These reactions may be rare but they weigh on my decision. That coupled with the uncertainty of what may happen in years to come make me so thankful to live in a country and a county where we have the right to choose what we put into our bodies. We truly just don't have all the answers yet.

We do our part by supporting our community. We shop local, we own a business, we donate and volunteer, we wash, we mask, we distance and when we are sick we stay home. Cases are dropping across the country and in Kitsap.

Please, please reconsider this decision so that my family can remain active members of this community.

Thank you,  
Chelsey Nied

Dear Mr. Grellner,

I am a mother, wife, homeowner, business woman and university graduate. I have been living the last 6 years with the tragic and unexpected effects of the MMR on my son's stomach all while helping my husband cope with stage 4 kidney disease. Now, a ruling could go on the books to force me to get a new shot which has been proven to harm Individuals with pre-existing heart conditions. Every member of my biological family has died from heart issues including my healthy younger brother who, while getting ready for work on September 10, 2019 hollered for his wife and died before she reached him of a heart attack. I cannot risk the possibility of leaving my family through side effects. I have lived through COVID. I've had it. My son and husband have had it. We recovered.

Please don't keep me from being employable or educating my son through the simple joys of ball games and symphonies.

Our future depends on our freedom.

Please speak on our behalf.

Peace and all good,  
Tina MW Lujan OFS

Dear Sir,

I am writing to you concerning an area of the most serious concern, namely the potential introduction into our society of so-called "vaccine passports". I am opposed to this suggestion and wish to make three points about the potential consideration of any scheme of this type.

Firstly, to make vaccination the basis of whether someone is allowed entry to a venue, or participation in an activity, makes no logical sense in terms of protecting others. If the vaccines are highly effective in preventing significant disease, as seems to be the evidence from trial results to date, then those who have been vaccinated have already received protection; there is no benefit to them of other people being vaccinated. Further, since vaccines do not prevent infection per se even a vaccinated person could in carry and potentially pass on the virus, so to decide someone's "safe non-spreader" status on the basis of proof of their immunity to disease is illegitimate.

Secondly, the introduction of vaccine passports would constitute an unethical form of coercion and violation of the principle of informed consent. People may have various reasons for being unable or unwilling to receive vaccines currently available including, for some Christians, serious issues of conscience related to the ethics of vaccine manufacture or testing. We risk creating a two-tier society, a medical apartheid in which an underclass of people who decline vaccination are excluded from significant areas of public life. There is also a legitimate fear that this scheme would be the thin end of the wedge leading to a permanent state of affairs in which COVID vaccine status could be expanded to encompass other forms of medical treatment and perhaps even other criteria beyond that. This scheme has the potential to bring about the end of liberal democracy as we know it and to create a surveillance state in which the government uses technology to control certain aspects of citizens' lives. As such, this constitutes one of the most dangerous policy proposals ever to be made in history. As a resident of Kitsap county I absolutely oppose this idea along with MANY others who reside in Kitsap county. This is unethical and would be detrimental to our society as a whole including causing many small businesses to end up shutting their doors.

Sincerely,

Shawnda Rollings  
Kitsap county

**Subject:** Sept 28th meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Reference your COVID-19 September 28th meeting that concerns the public you serve and yet will not allow any public comment in the meeting.

Do not go forward with any potential decisions requiring tax paying, law abiding citizens to show any personal medical paperwork to include proof of "vaccinations" to enter or remain in any place of business. Not only is this blatantly anti-American in concept, but it is a violation of individuals medical privacy, and an act of discrimination based on individual medical decisions.

You are discussing a disease that has over a 99.7 percent survival rate.

If these vaccines worked and everyone over the age of 12 has had access to them for over 6 months then let everyone go about their lives without government over reach and there is nothing to fear. If someone doesn't have the vaccine and is afraid let them order to their car or stay home.

Yet the reality is there is more evidence each and every day that these "vaccines" fail to prevent the ability of individuals to contract or spread Covid-19 anyway. So what will requiring proof of getting a shot really be doing besides attempting to flex your abuse of authority.

You assume citizens will comply after you enact mandate like this. They won't. And since Governor Inslee and the Washington Legislator as of July 25th have restricted the ability of law enforcement to use any degree of force to do their job without probable cause, and since any mandate or health order issued by your body is not a Law, and therefore no probable cause can be established how to you suppose any of this will be enforced.

Imagine the lawsuits that will be headed your way if you go down this road, it's already taking place in many other states and is currently being done here regarding Inslees orders and he even has "emergency powers" under RCW. The tax dollars of the citizens of this County are better off spent elsewhere not fighting lawsuits due to your totalitarian policies that don't follow science and discriminate against your constituents.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good Evening Keith,

I wanted to write to you tonight and encourage you to be brave and strong with your position on the Kitsap Public Health Board, and to not go along with the plan to order local businesses to require proof of vaccinations for entry. I want you to consider that a lot of people do not want the shot for various religious and medical reasons. Why do they have to be treated like second-class citizens?

I also wanted to remind you that 50%+ of the employees at PSNS are unvaccinated. People who do not want to get the shot for one reason or another. There are people willing to walk away from their jobs at PSNS because of their convictions. I personally know of two people who just submitted their resignations. I myself will be forced into an early retirement, because I will not take a shot that the Holy Ghost has prompted me not to take. Even if some or all who cannot just walk away from their great job at PSNS, and they end up having to get a shot, they are doing it coercively and under extreme pressure. They aren't going to support a County mandate requiring vaccines. Our small businesses need "everyone's" support. Please don't alienate their potential customers. You're only hurting our local businesses!!!

Please, please, if you haven't already done so, please do your own research concerning the shots. Look to the research coming out of Israel, where they have one of the highest vaccination rates. Both vaccinated and unvaccinated can catch and pass the virus on to others. So why is it ok to treat the unvaccinated as if they are the cause of the problem? Please vote no to requiring businesses to check for proof of vaccination. Keep our County strong, by not limiting our local businesses. Respect the rights of "all" to make choices about their health.

Instead of trying to coerce compliance on a shot, and creating second class citizens, what would be much more beneficial would be to let our doctors treat covid patients early with medications they are using all across the world. Early treatment is the key to keeping people out of the hospitals, and to speedier recoveries.

Thank you for listening,  
Linda Popp  
Poulsbo, WA

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Herat Keith Grellner,

I would like to express my opinions on the following issues that will be voted upon September 28, 2020 Please VOTE NO to vaccine mandates for small businesses & entry to indoor public places. I am a concerned citizen with several friends who own small businesses in Kitsap county and due to the vaccination rate of our county being below 50% I fear that this imposition if mandated would cause a grave affect upon our economy. Please keep our businesses open and allow them to serve customers regardless of vaccination status. If they want to check temperatures at the door and require masks mandates I'm fine with that, but preventing someone who to enter a business simply based on vaccination status is not only unconstitutional but is it extremely unfair to the business owner who would benefit from the revenue received from said customer.

Thank you for taking my concerns into consideration as you vote on this very sensitive issue. How you vote could have grave consequences for the small businesses in our county.

Ver Sincerely,  
Andria Laws

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

1. Let this situation play out. Forcing and mandating are almost certainly entrenching distrust in those who are already hesitant. These outbreaks burn bright and fast. Prepare for the patient load appropriately. Treat the patients. Maybe don't fire your unvaccinated staff and increase the staffing issues we face! Set up and ADVERTISE early treatment centers/ tents. Get people help before their cases worsen to needing hospitalization. Even offering home oxygen if needed as I've seen some of my friends in healthcare take advantage of! People can do this stuff at home given instructions and relieve the hospitals of the less serious cases. Stop treating the community like they are stupid, or even like coercive measures will work!

Continuing to blame the unvaccinated when the vaccinated spread the virus too is simply another avenue to sow distrust in the public.

I believe that encouraging vaccination for restaurants only unnecessarily damages further the incomes of our small businesses and puts further burden on them to police these issues- another injustice as big chains will not face these restrictions, and low income earners and spenders are put disproportionately "protected".

Implementing antibody testing as Israel does (they give green passes to recovered individuals) as an alternative could potentially regain some lost public trust as many see the absence of the consideration of naturally acquired immunity as a huge oversight and injustice on those who've already fought to gain antibodies the hard way.

These over reaching, unscientific mandates are furthering the distrust of some people who truly should be taking the vaccine.

Thanks,

Olivia

9/25/21

To whom it may concern, this is an extreme response and over reach. I as a long term tax payer I highly oppose any vaccine card or equivalent for entry to restaurants, bars, stores etc. Not only is this not necessary but a gross mis use of power. As well as an infringement of US citizens personal rights. Any one who pushes this thru will not ever get my vote and MANY will follow suit. This will cause further chaos and fracturing of society. It will severely harm all local businesses who are forced to do this or do it by choice. This will further collapse a delicate economy.

Sincerely  
Kristy Krieg

Hello.

Im here to ask that you will not allow any further divide in Washington State & our beloved Country by requiring vaccine passports. This will not only create even more chaos (haven't we all had enough?!) & divide but it is a new form of segregation. It will force many out of a job and ruin livelihoods- driving many out of the state. It is inhumane to shove this down people's throat (I suppose arms would fit better here) Those who have wanted the vaccine (and those forced to get it) have it- those that do not want it or want to wait a few years before receiving it should have that choice WITHOUT the freedom of purchasing food and goods taken away from them. The thought that this is even a thing to be voted on is disgusting. It is scarily similar to history- having to show a yellow star. Many do not like that comparison and yet, here we are. We are not a communist country. Mandating or requiring a vaccination card is a turning point of this country's freedom. It isn't a health concern at this point. Not when so many freedoms will rely solely on a card.

If you believe in God or higher power, I ask that you pray or meditate. Listen to what your soul and heart say. Do the right thing and don't pass this vote to require vaccine passports.

Kindly,  
Chelsey

I am a resident of Port Orchard. I am strongly against vaccine mandates. I do not think the should be required to go about our daily business. There are plenty of legitimate reasons why a person would not be able to receive the vaccine, some in my family have medical issues. Saying that vaccines are our only tool is not true. My family has stayed healthy through this pandemic by focusing on our general health, avoiding large indoor gatherings, masking indoors, and washing hands. We have also chosen to homeschool and work remotely. We are being responsible and making the best choices for our family. I feel that requiring us to take the vaccine in order to get groceries, get medicines, and other goods takes away that freedom of choice. I also fear requiring local businesses to enforce something like this will hurt them. I know that my family would just give all our business to Amazon until we can sell our house and move somewhere that still believes in individual rights for its citizens.

I have personal connections regarding vaccinated people infecting other vaccinated people and vaccinated infecting the unvaccinated that has not had covid yet. Vaccinated people are just as responsible to infecting others. There should be no different treatment or allowances to either group. There are many that have had covid and have self made antibodies They should have the freedom and make the choice to take the vaccine or not. Those who refuse to take the vaccine have made their choice and understand they are risking their own life. Do not add to the division of people. Obviously masks have not made a difference. The general public does not know how to handle masks properly to prevent cross contamination. Stop the vaccine mandate. I am vaccinated, I will not go to any business that requires proof of vaccination, because not everyone needs that proof. Let things be and see how they play out.

**Subject:** Vote no to covid passports

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

I do not know where to start in my response to covid vaccine passports being allowed in Kitsap county. This news really saddens me. It saddens me that this is what this county has come to. Covid vaccine passports are wrong, and there is certainly a “show me your papers” aspect to it.

I moved here 10 years ago from middle of nowhere Illinois. Kitsap county just felt like home to me the moment I first arrived. You see, I had always felt out of place in IL, I just never really fit in there. Like some kind of missing puzzle piece or something. I saw Poulsbo on a warm sunny day and just knew that I was gonna live here. Everyone was so kind and so warm and inviting. Kitsap itself was a free spirit and you could just always be yourself. I felt like I finally found my place in life and felt like I finally found my true home. I used to really enjoy this county, the people were so kind and in such high spirits and all-around good energy. But I feel as though I have fallen out of love with the PNW and Kitsap county. Because of all of this ugliness and mandates, people are divided and are no longer kind to one another. There’s so much anxiety being created just going to the grocery store or wanting to go to a park so your kids can play. Do you really want to keep living in a world like this?

This news of vaccine passports makes me afraid to raise my children in this county and if we stay here then I am afraid for their future. And I never thought I would ever feel this way about my home. What scares me even more is that I feel like you guys have already made up your minds, this “open” discussion through letters and emails is just a formality. I could just flood this email with all of the facts and evidence that go against the vaccines and all of the side effects. Or go on about how not everyone can get the vaccine. I know you are reading enough of that in your emails so I will not waste your time. If you even are reading this.

I don’t want to see where Washington is headed let alone where I’m afraid this county is headed. I don’t want to leave my home, I also don’t want to live in a county that has me feeling like I’m living in World War II era Germany. Just because the government or the governor or the president is recommending something does not mean that it is right. Plenty of governments have recommended certain actions for “safety measures” and it was not at all about that. It only lead to devastation.

This isn’t the county I know anymore. What happened to you guys? You use to be all about community and fairness. Not anymore.

I love Kitsap with a very heavy heart. However what has happened to our community has really broken a lot of hearts. I want my children to see the kind of beauty that this community holds. Say no to these mandates, and especially passports.

Megan Cook

Me Grellner,

My name is Briana Jones and I am a concerned citizen due to the Covid-19 Vaccine. I hear there is a Kitsap County Health Board meeting coming up this Tue, September 28th. I wanted to write to you because I have a concern about medical and personal freedom. No one should be forced to get vaccinated. No one should be forced to loose their job due to this! This is very upsetting and for many of my friends. And as it has not effected my family YET, it is something I worry about as well. Our constitutional rights are being taken away, and I hope you will be our voice. Many many people do not want to get the vaccine due to adverse reactions. Unless you know someone personally who has has a reaction you may not understand how scared people are to get it. The media is not talking about it because of censorship. Another freedom being taken away. Please take the time and express my concerns.

Thank you for your time,  
Briana

**Subject:** Comments re: 9/28/2021 Covid-19 meeting topics

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

To the Kitsap County Commissioners and Kitsap Public Health District:

Regarding proposed responses to the current wave of new infections.

I am a citizen of Kitsap County and rural Port Orchard, Wa.

I hold two bachelors degrees in the sciences and a masters degree in education. I currently work more than full time for a regional employer. My husband is currently the Director of Safety and Environmental Health for a large regional manufacturing company. I worked for several years in the medical field and my husband was previously a military flight medic and corpsman. Needless to say we have a better than average understanding of viruses, the government and private sector responses to the COVID virus and, due to our employment, have had a better than average overview of the issues surrounding and complexities of the COVID pandemic.

We believe that doing nothing further than is being done is the smartest move to combat the issue. Though greater effort could be made to enforce the mask mandate and sanitary measures, the numbers will go down. Makeshift hospitals can be erected with minimal impact to the economy to augment and support the needs for additional beds. Imposing heavier mandates for consumers and businesses will not provide for greater compliance and will keep people from entering society to greater loss. Imposing heavier mandates also open the door to larger safety issues. If restrictions placed are severe enough, social uprisings will abound over smaller and smaller things creating a public safety crisis far larger than the pandemic.

Basically, further restrictions placed for the public good and safety in one area will most certainly lead to a sacrifice of the public good and safety in another.

And, frankly, while I applaud the Admiral Theater and Bremerton Symphony and their work in the arts, they are not knowledgeable beyond what serves their needs for their organizations. And their decisions to serve their needs and their subscriber base needs during what is a difficult time for everyone in a certain way through a specific response is not representative of the entirety of the Kitsap County Population needs and shouldn't at all be considered a template for how everyone should respond.

Especially when you consider that going to a concert or stage performance are optional life activities. Going to the grocery store or visiting a mechanic is not.

Personal rights to make choices in consultation with a medical doctor should not become subject to public knowledge or ridicule simply to buy a loaf of bread, a gallon of milk, or a tank of gas. As long as anyone is vaccinating where possible, or wearing a mask correctly, washing, and sanitizing hands and surfaces often and maintaining appropriate distance, there really is little worry from this or any virus.

Thank you for your consideration. I hope you chose wisely in you upcoming meeting and weigh all options in consideration of everyone's legal, medical, public safety rights and protected freedoms.

Respectfully, Jodi

**Subject:** Comments for Meeting September 28, 2021

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

I read the agenda for the upcoming meeting and am writing to submit commentary. I live in Kitsap County and am an attorney and recently became a small business owner. One thing that struck me immediately when reading the agenda is there is no presentation on the pros and cons of mandating vaccination for small business owners and the community at large (not even public health pros and cons) however the purpose of the meeting is to ask the Health Board to give a recommendation on whether to mandate vaccination. That doesn't make sense to me. It seems to have already been decided- as stated in the agenda- that vaccination is the "only" way to have businesses and schools stay open and then further decided that after designated individuals present on the crisis of the healthcare system, the Health Board should give a recommendation on whether to recommended mandatory vaccinations or do something else. If the board is open to input and other more open-ended considerations to advance public health, I have some questions: 1) Are there things that St. Michaels can do to run a safer, more efficient hospital for its employees and patients outside of the vaccine issue? I know doctors and nurses who work there, both vaccinated and unvaccinated, and I think the answer to that question is yes. If the problems at St. Michaels are a stated reason for mandating vaccination, their management and administrative decisions should become an ongoing open, transparent discussion and part of the public debate on public health. 2) What is the cost and burden on businesses to mandate vaccination? Will boosters be mandated? How will this be policed? Will religious and medical exemptions be allowed and whether yes or no, will businesses be opened up to possible liability in administering a vaccine mandate? 3) Is there a public health benefit in having more widely available antibody testing? If a person has antibodies from having had Covid, what is the increased protection for that person (and for the public from that person) in receiving the vaccine? 4) Are there any legitimate concerns that individuals have in getting the vaccine and/or having it mandated vs optional? If so, what are they and how should that be weighed? 5) What are the potential costs to the public of mandatory vaccination? Will people still refuse and avoid necessary services? For instance, DV victims or people that need other legal services? I suppose some may say- well, it's their choice, it doesn't matter. But that would be an emotional response, not one in the interest of public health.

Thank you for your time in review.

Sara Humphries

**Subject:** September 28 KPHB Special Meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I just finished listening to your previous zoom meeting and see that in your upcoming meeting you will not be taking comments. Is that the norm for your board meetings? The board is taking what I'm assuming is an unprecedented step in considering mandating a vaccine that is still in it's experimental trial stage. I hope you will address the following questions before making such a decision.

1. You said that "science deserves our respect". I couldn't agree more which has had me baffled why given some significant studies most notably out of Israel on the superior effectiveness of natural immunity vs. vaccine immunity appear to be completely ignored. I didn't hear anything from the board about natural immunity being an exception to the vaccine mandate. Could you please explain why? Do you refute the findings of the Israeli study?  
[https://www.timesofisrael.com/study-covid-recovery-gave-israelis-longer-lasting-delta-defense-than-vaccines/?fbclid=IwAR07pOUbaa\\_02d9eD7XceUQtPoNyIpgF-1hbl8fJ1MiR41A0WCApu09aYVQ](https://www.timesofisrael.com/study-covid-recovery-gave-israelis-longer-lasting-delta-defense-than-vaccines/?fbclid=IwAR07pOUbaa_02d9eD7XceUQtPoNyIpgF-1hbl8fJ1MiR41A0WCApu09aYVQ)
2. You said, "masking is proven", so why are mask mandates not enough?
3. What has KPHB given to those testing positive for covid to reduce the chances of hospitalization? My personal experience is that you are sent home with no recommendations even as to how to support your own immune response, though there is a great deal of proven science on the subject. The only guidance given is to quarantine and come to the hospital if you have trouble breathing. How is this helpful in reducing hospitalizations? Even El Salvador sends home a health packet of vitamins and medicines not only for the person testing positive for covid but also for all those living in the home with them. It seems this lack of response here should be addressed first.
4. It seems like we first heard of the delta variant as it swept through parts of India. I recently saw the data from India. While they had a huge upswing in cases it dropped swiftly. What intervention did they use that was so effective? It wasn't a vaccine mandate.
5. Has KPHB been contact tracing from the beginning? If so, where is the data? I remember hearing early on (though not sure if it was local or national) that most cases of covid were coming from the home/relatives rather than from restaurants, stores, etc. Is that correct? What about in our county? I heard someone in the last meeting mention a teacher in some other state spreading covid in her class. I'm assuming that was cited because it has not been an issue here. Please correct me if I'm wrong.
6. Looking at statistics for our county, will "vaccine passports" have a greater negative impact on people of color in loss of jobs and/or loss of access to restaurants or other venues that are part of your proposed mandate? Are a greater percentage of people of color unvaccinated here in Kitsap Co. as is the case in New York City. Here's the definition I

found for systemic racism: (I do not think you are basing any decision with race in mind, but your mandates may have a greater negative effect on some populations and that needs to be considered)

**policies and practices that exist throughout a whole society or organization, and that result in and support a continued unfair advantage to some people and unfair or harmful treatment of others based on race**

7. As we continue to see more and more break through cases of fully vaccinated individuals testing positive and potentially spreading covid (The ladies on The View who were about to interview the vice-president as a very recent public example), how can we possibly consider vaccine mandates to be the answer?

8. Finally, you voiced concern about a health issue being politicized and yet the following was voiced by your board members. "you shouldn't work for the government if you don't want them mandating what you do" I'm pretty sure even you would agree that there are lines that even our government shouldn't cross. What if they decided all government employees can only have one child or less because they lose too many work days for caring for sick kids. Some people think that mandating a vaccine is a crossing of that line, especially when many of those about to lose their jobs already have natural immunity. Someone else on the board voiced that not getting vaccinated was "unpatriotic" which makes it feel as if board members are the ones politicizing things.

Can you please send us any kitsap county specific data you have regarding vaccination rates by age & ethnic groups, contact tracing data that shows where people are being exposed in our county since the start of covid as well as what measures you took to reduce hospitalizations by providing preventative care, immune response support, or other interventions, and who are the board members that have a medical degree and/or experience in immunology, or covid care. Also, do any of the cities or does the county receive state or federal funds based on vaccination rates?

Thank you,

Dan & Marcie Hamilton  
Seabeck, WA

Mr Grellner.

please protect your citizens' rights and oppose this vaccine passport that is on the table for [Tuesday the 28th](#).

We are not a communist country.

We are not the Nazi regime.

To enforce "Papers please " to enter an establishment should no be a thing in this nation.

Forcing all employees to vaccinate in every establishment in a county should not be a thing.

We are at 74% immunization rate in our county already?

Do scientists no longer believe in herd immunity because it doesn't fit their control agenda?

The

Scientific method 🧪 means we should always question everything.

Instead science has turned into a religious, dogmatic cult.

"Don't you dare question us ".

And what about those of us (like myself, and my husband and 6 kids : family of 8, My parents in their 60s, and my sister and her husband and 3 kids ) who have natural immunity?

In our church and homeschool community there are 1000s of us in the last year that have had Covid. Survived, and have stronger antibody counts than those who have had 2 jabs and now are working on a 3rd. (The booster )

So- what ? We can't go in to a restaurant?

A movie theater?

Bookstore or library ? Go clothes shopping? Shoe shopping?

This is outrageous.  
It should not even be on the table.

Thankful for many small businesses I know who will not comply - in port orchard-  
But I will not give names and throw them under the bus.

But this is The United States of America.

You are not a king. You are not a dictator.

The health department isn't a branch of the government who can legally pass laws and  
rule over the state of WA.  
Guidelines and recommendations is about all the health department can do.  
And for the love !  
It's been over a year. We can't have an "eternal state of emergency clause".

And-  
This is not Australia. This is not Canada.  
We have a constitution and a bill of rights that is currently being trampled all over

Please. Do not allow this to happen.

Sincerely,  
Concerned Port orchard Resident,  
Mother to 6,  
Homeowner and tax payer, and registered voter.

Laura Guidry

**Subject:** Kitsap Health Board Meeting Tues 9/28

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear, Community leaders,

As a small business owner in Bremerton, Kitsap County, I respectfully request that you do not institute mandatory verification of vaccines for employees, nor any type of system that mandates mask wearing or proving vaccination status for residents and visitors to this community. Please vote for Option 1.

I don't mind sharing my personal information regarding Vaccinated status, I am vaccinated but to make it my responsibility to check this personal medical status of an individual working for me, sets me up to be legally liable for violating their right to privacy. To require this any any person that uses my services, puts me in the same position. Mandates are not law, making laws are the right and responsibility of elected officials, let them do their job properly.

Additionally, I would love to hear the explanation as to why vaccinated people need to be protected from unvaccinated? This doesn't make sense, if the vaccines work then regardless of our exposure, we are protected. I took the vaccine in good faith and believe it works, so why must I now discriminate against those that do not have it? There are many logical and reasonable reason a person may choose not to vaccinate, we should respect that.

I love this state, I love my country, I try to be respectfully of all the different opinions out there and I'm an ardent supporter of constitutional right to free speech, even when I disagree with it. If you place this mandates on our community, I will begin the process of moving my business to a State that shows they love and want to protect the rights of every citizen that lives here, not just the ones following the mandates. I don't want to move, I already left the State of California for the same reason, but I will if I am forced to follow the considered items of your meeting today.

Respectfully,

paige

**Subject:** A concerned Kitsap citizen asking for your help

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Hello, my name is Angela and I am an unvaccinated Registered Nurse. I am asking for your help as a human with a child to feed and a mortgage to pay. PLEASE DO NOT MANDATE the COVID vaccine at local government agencies or at the private business level in Kitsap County. My husband and I are careful individuals; we wear masks, we do not gather in large groups, we do not attend large gatherings. We care about the health and well being of our community. I am personally unvaccinated for health reasons. I am unable to get vaccinated and if you mandate the vaccine my family will literally have to flee our beautiful home state. It is not proven that the vaccine prevents you from spreading COVID within the community. Mandatory vaccinations will just create an even larger nurse shortage which will devastatingly affect our community who needs care. My husband does heating and air conditioning. Imagine in the middle of winter when your furnace goes out and there is no one there to fix it due to a shortage of HVAC technicians; which there already is in this county. PLEASE consider the fact that all lives matter and if you mandate the vaccine you will affect families who are unable to get the vaccine and need to feed their children and pay their mortgage. I do not wish to move out of Washington State but if you continue with these mandates we sadly will be forced to leave. Thank you so much for your time.

Sincerely a concerned mother and citizen.  
Angela

To Whom it May Concern:

I truly cannot believe that I am having to take time from my day to write an email to address these issues. Makes me sick to think this is what the world has come to.

It is not the issue of whether or not a person has the vaccine. This should be of NO CONCERN to anyone, but the person who is making the decision. My body my choice right? I do not know from one person to the next person what their story is and why they have chosen to do what they have regarding their health and well being. As we have lived thus far we have been able to make choices regarding our own body, our life and personal interests. Our basic human rights. And now, somehow, this is being pushed (very firmly) to the side and we are in situations in which we are being forced to "comply." And for what reason? The answer to that is very simple---CONTROL. As a small business owner I have not and will not ever ask someone about their personal choices when they choose to step foot into our business. This is not my place. What they choose to do has nothing to do with me and how I can and will run my business. And furthermore how I will serve them while they are here. This is putting people such as myself in a situation which is NOT my place nor is it ok. To confirm the vaccine status of another human is truly obscene. This is not my business note th business of any business owner. Equal treatment---right? Or is this where we are going?

It makes me truly sad to think this is where we have come to. That local governments are even thinking that this is right and that it is our place. Simply put we are going to dark places by thinking this is our right---to force people to comply and to further check these people---slowly we are stepping back to the tactics done in Germany. And if you do not see this you are looking the other direction because this could be no more in our face.

"Government is not the solution to our problem. Government is the problem."

- Ronald Reagan

This is a plea for civility and compassion for the people in our community.

If you are vaccinated you should be confident in your decision knowing that you are protected by the shot. If you have had Covid you should be confident in knowing that your body now has natural immunities that will protect you from getting Covid again.

Shaming the unvaccinated or telling them they are responsible for people dying of Covid is absurd.

Let us treat each other with civility.

Viruses will always be with us and no one escapes death. Let us live our lives to the fullest by loving one another, encouraging one another and respecting one another's private medical decisions.

It is time for all the mandates to end. We are in an endemic now and I believe the majority of Americans are responsible enough to continue all the things such as hand washing, staying home when sick, etc. that we have been doing for the last two years.

Sincerely, Tim and Anna Nanfito

Kitsap County Commissioners and Mayors,

This notice below is being sent out and I wish to put in my input. Out of the five scenarios, I would go for Number 1. The other four are infringing on personal rights. This vaccine has been proven to not work. I know as many people who have had these shots and got COVID as those who didn't take these shots and got COVID. These shots give you a 97% chance of survival to a 98.5% chance without the shots. So taking these shots lowers your chance of survival. None of these shots have been passed by the FDA except for EMERGENCY USE ONLY! The shots have been found to have many health issues that are detrimental to a person's long term health.

The tests have been shown to be inconsistent in the results, saying someone has COVID when they didn't and visa versa. Suddenly there are no deaths from flu or pneumonia, everything is under COVID. people who have underlining issues ( asthma, COPD, lung cancer, just to name a few) that could take their lives are now all put under COVID.

The latest findings is if you have had the shots, within 5 months your "immunity is down 40% compared to those who have natural immunity with only a reduction of 5%.

Forcing a mandate is against our rights. Even when the polo vaccine came out, it was not forced but encouraged and this was after 10 years of EMERGENCY USE ONLY.

PLEASE reconsider your recommendations. This mandate would make it so people like me who have adverse reactions to these shots (sick for 3 weeks AFTER a pneumonia shot) can not go to a restaurant, shop for food or clothing and/or have a life. All decisions should be between the person and their health provider.

Thank you for taking the time to read my objections.

Respectfully,

Sally Gill  
1719 Winfield Ave.  
Bremerton, WA 98310

Sent from my Sprint Samsung GalaxyPUBLIC SERVICE ANNOUNCEMENT:

IMPORTANT IF YOU LIVE IN KITSAP COUNTY. MAJOR DECISIONS BEING DISCUSSED AND MADE FOR YOU BY THE KITSAP COUNTY HEALTH BOARD, THIS TUESDAY SEP. 28 11:00am-Noon

Just to inform our community, our county health board will have a special meeting, to discuss the following recommended action (copied from the attached memo)

“While the Health District recognizes that vaccination requirements are a complex and controversial topic to some, we hope to receive direction from the Health Board on how you would like to proceed with respect to the following, or

other, options:

1. Take no action and allow the current situation to play out.
2. Make a formal Health Board recommendation/resolution for all local governmental agencies to require vaccination for their employees.
3. Make a formal Health Board recommendation/resolution for all private businesses to require vaccination for their employees and/or require proof of vaccination for entry into indoor public places.
4. Issue a formal Health Board / Health Officer order under the authority of RCW 70.05 to require employee vaccinations at governmental agencies.
5. Issue a formal Health Board / Health Officer order under RCW 70.05 to require all business open to the public, or indoor venues open to the public, to require proof of vaccination for entry.”

No public comment will be taken but the you can send your questions and comments in before hand.

If you are a business owner or work for a business or are a concerned citizen, it is important to contact the city mayors and county commissioners, as well as, send comment in for the meeting. I am including the emails for the board and the Kitsap County Health Director in this post, as well as, the link to the last meeting where the Board discusses this topic and how to proceed.

These are the people who will be making the decision on how they feel this should proceed. It's up to us, the people, to let them know how we stand. These meetings are usually in the middle of the day and most of us hardly know what is happening because we are going about life. We need to be involved and let our elected leaders and the members of this board know we are here, that we are listening and that our voices need to be heard too. Get involved because this involves every single one of us!

There is plenty in the memo discussing the burden on the health care system, but not much on the burden this will cause to small business and normal people. We all understand this is a hot topic when it comes to health care but when is enough enough? The normal person needs to speak up and tell them their stories and how mandates and restrictions have effected them. If you have something to say, say it, it matters!

Please take in advisement the following recommendation:

Without a doubt, COVID presents a health concern in Kitsap County. However, how we respond is another matter with a wide-range of possibilities.

I RECOMMEND the following:

1. "Make a RECOMMENDATION" for local government AGENCIES for EMPLOYEES"; this is within the jurisdiction and responsibility of the Board.

I believe all other actions present either a lack of responsibility (#1) or over-stepping (#3, #4, #5).

Thank you for your consideration.

Larry Davis  
Port Orchard, Kitsap County

#1: Let's be real, this will NEVER be the option taken. The Board will not take this stand no matter what.

#3-#5: All three place the Board in a position requiring citizens to follow mandates which are NOT agreed upon by the community; this is over-stepping at this time.

**Subject:** Please take a contrary view to the popular "beliefs" of what this virus is!

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

As you can see Kitsap County had no pandemic. All of this is from your statistics. I wish you would quite with the x in 100,000 it make our situation look worse.

And again the positive test are trending down.

Could anyone of you tell my why the unvaccinated are wearing masks? Either the vaccine works or it doesn't

I would like to see the details on these deaths, since the demographics have not changed in 19 months and are virtually all older folks with underlying health conditions. Let's take a look. From 9-16-21 to 9-22-21 there were an additional 16 deaths for a total of 172.

Only one death was added for those under 50 for the last two weeks.

It was hardly a bunch of anti-vaxxers! But you wonder about the 60+. We don't know if they were vaccinated or not! If not, why not?

50-59 Added 4 death  
60-69 Added 3 death  
70-79 Added 4 deaths  
80-89 Added 5 deaths

### Kitsap County Virus Statistics

An estimated 57,000 people have had the virus in KC and are now immune in 19 months!

This is in a population of 276,000

This is hardly the virus of death! Why in the world are they forcing vaccines on us!

100% of those ages 0-19 survive	0 Deaths
100% of those ages 20-29 survive	0 Deaths
99.996% of those ages 30-39 survive	2 Deaths
99.992% of those ages 40-49 survive	5 Deaths
99.974% of those ages 50-59 survive	18 Deaths
99.952% of those ages 60-69 survive	32 Deaths
99.935% of those ages 70-79 survive	41 Deaths
99.879% of those ages 80+ survive	74 Deaths

A couple of days at home with some chicken soup and you are back to work or school with no danger to others. What a fraud! Wake up everyone.

---

I think or know I had COVID-19, and I had symptoms  
You can be around others after:

10 days since symptoms first appeared and  
24 hours with no fever without the use of fever-reducing medications and  
Other symptoms of COVID-19 are improving\*
