1. Take no action and allow current situation to play out.

People who want to be vaccinated have already done so. People who choose to not be vaccinated should be able to make that choice for themselves.

I've had CoVid and recovered on my own.

Sincerely,

Poulsbo Resident
Sarah Wright

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Greetings.

As a registered voter of Kitsap County and citizen of the United States of America, I state that I am vehemently opposed to a vaccination mandate to be implemented or imposed by the Kitsap County Health Department upon any business or any other establishment. The right to a person's body belongs to them, not to their government, and government policy should reflect this.

Sincerely,

M. Q. Davis

Subject: In regards to the 9/28/21 meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good afternoon. I appreciate your willingness to read through my email and to hear the voices of your community. This is a beautiful area that we have grown to love over the years. We were stationed here in 2011-2013. One of my four children was born at the Bremerton Naval Hospital. We moved back because we valued the community and the job opportunities. We have lived here again since purchasing our home in 2018. When we bought our home, we saw this county as our forever home. Now, I have no problem looking for housing in other states along with many of my friends and associates.

We want to ensure that the freedoms of our friends, family, and our children are not infringed upon. We are a veteran military family that has served our local community, nation, and other countries. Freedom is not a joke to us.

I have my own opinion about the COVID-19 shot, as do you. Which is how it should be. An opinion should not ever dictate how an entire community is ran. Whether I get the shot or not is NO ONES business. Whether the individual sitting at a table on a date with their spouse has had their shot is NOT my business. I would NEVER ask someone their TB status, HIV status, or HSV status...all of which are also contagious. Respecting people and their medical choices are imperative. I would never ask you if you had a vasectomy or had all your Hep B shots. Why? It is rude, invasive, and none of my business. The ONLY time that would even come close to being appropriate is if I was your health care provider or if you were joining the military, signing your life away in service for your country.

Please, we want to continue to support our community. We shop local, we have friends that are business owners that will have to shut their doors if things go as they seem to be planned. With the state and federal mandates, we are already looking at massive economic upheaval. These ideas that will be discussed will have just as much, if not more, of a negative impact on our local community. Our local community is where we find our place of refuge from the stress of the world.

Our COVID cases are dropping it seems which is a good thing. Why they are dropping is all debatable which is not my intent. But rather to show that despite our kids in school, people going back to work, we are doing better as a community. Please do not vote to enforce the vaccine passport to get into public spaces. Too many in our community would suffer. Simple things as running into Walgreens to grab baby Tylenol at 9:00pm when a baby is fighting a fever. Or the parent who ran out of diapers and needs to run into the store quick. Or the 16 year old who has a heart condition and is not recommended to get the vaccine but needs to do the weekly grocery shopping for his family.

Scenario after scenario could be ran out in such fashion.....all of which are reality for many people in our community.

I am asking you to consider the freedoms of the people in your community. Your neighbors. The elderly. The homeless. Your church members. Your golf club members. Your waitress. The bus boy. The lady on the treadmill next to you. The teenagers. Please consider their needs, wants, desires, beliefs, and freedoms.

Respectfully,

Melissa Kugler, MSW, LSWAA

Subject: Vaccine Passport

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Kitsap Board of Health,

Thank you for your concern regarding Kitsap County residents. I appreciate the work you do! However, I take issue with regards to the proposed vaccine passport for Kitsap County. Not only is this unconstitutional, it will also have a devastating effect on residents & small businesses. With Pierce County still open, we will do all our shopping there as opposed to Kitsap County. Many others in Kitsap county may not have this ability to obtain what they need in an adjacent open county.

Anyone who wants to be vaccinated has had ample opportunity to do so and the rest have personal reasons for not taking the vaccine. Thank you for your recommendations as experts, but please allow the citizens of Kitsap County to make the best decision for themselves without unconstitutional government overreach.

Sincerely,
Brad Lamkin

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner —

For legal, economic and moral reasons, please help stop any potential plan of our Kitsap Health or other local authorities to require any kind of vaccine (including Covid) for entry into businesses in Kitsap County, where I live.

Please take a stand against this attack on individual freedom which also would deal a crushing financial blow to our local economy as employees and customers alike will work, shop, eat and perhaps even move elsewhere.

Thank you for serving our county.

Subject: Health Board Proposal Considerations

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To Keith Grellner,

I respectfully request that you advise the health board not to enact Covid vaccine mandates at this time for the following reasons:

- 1) The vaccine does not prevent individuals from spreading Covid, so it is discriminatory to deny access to public places those who cannot or choose not to receive a vaccine at this time.
- 2) Forcing compliance will destroy any trust your fellow Kitsap residents have left in your leadership. Convincing people should be a matter of education, let the data speak for itself.
- 3) Kitsap Covid cases are beginning to drop so recommending stricter mandates now appears to be little more than a power-flex.
- 4) The vaccine is not without risk. Serious side effects may be rare, but they do exist and many people are suffering long-term consequences from them. Still-births, Guillian-Barre syndrome, and heart failure are just a few of the potential consequences causing some individuals' hesitation. Especially because of these known risks, people (who know their own bodies far better than you do) should be able to decide for themselves what they are willing to risk, without governmental coercion. You take the liability on yourself when you force or pressure a person to take a risk they do not want.
- 5) Thousands of Kitsap County residents have natural immunity from successful battles with Covid. Current studies show natural immunity is at least as effective as the current vaccines available, and is a variable that should not be ignored any longer. Much more research needs to take place before pressuring recovered into vaccinating.

Thank you for your consideration.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good afternoon,

First I would like to thank you for your service to the state of Washington and to Kitsap County specifically. One can not imagine how difficult your job has been these last eighteen or so months. I believe you have worked diligently with the health and safety of the citizens of Kitsap county at the forefront of your mind.

That being said, I would like to express my concerns regarding the upcoming special meeting to address the impacts of the Covid-19 pandemic on our local community. I request that all parties present and involved in the decision making process, think long and hard before implementing any measures that would require residents to present proof of vaccination before entering establishments. Section 1 of the fourteenth amendment to the constitution very clearly states "all persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws." It is my belief that any such implementation of vaccine proof could potentially violate our constitutionally protected rights.

I am a long time resident of this county and love it dearly. I'm sure you all feel the same, which is why you serve. While public health and safety is important, protecting the rights of the citizens should always be a priority. Requiring proof of vaccine or the request of any other health information is discriminatory in nature and only serves to further divide in a time where unity is much needed.

In closing, thank you for your time, as a resident of Kitsap county I eagerly await the outcome of your meeting.

Sincerely,
Brittny Juntunen

Good afternoon,

I am writing to voice my concern and opposition to the county commissioners recommended action of imposing a vaccine mandate.

This is not about the debate of COVID.

This is about what are constitutional rights.

This country stands on precipice. For over two hundred years this country stood for freedom. Allowing it's citizens to decide how they would manage their money, family, work, religion, and health as they deemed fit. At this time we have government that is overreaching it's governing authority that is giving and authorized by the people it governs.

I vaccine mandate that also requires papers to prove a citizens validity is a Marxist rule and authority and has no place in a country who's declaration of independence stated that the citizens are endowed "with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness"

It also states that "That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government."

We the people are not ruled by the government but the government is ruled by the people.

Please remember that before you decide to force this mandate that violates the peoples "unalienable Rights."

Thank you,

A local citizen

Subject: Covid-19 Response

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good afternoon,

I am writing in regards to the meeting taking place tomorrow regarding Kitsap County's next steps of action regarding the impact the Covid-19 pandemic is having within our community.

I can understand that there are many concerns with the growing numbers of Covid cases within the county. We as a community are facing unprecedented times like never before and I'm thankful that you and the rest of the Kitsap Public Health officials are taking the time to come together to discuss a plan of action on how to best reduce the number of cases.

I would like to express my concern on enforcing mandatory vaccinations of any kind to any individual. I would say at this point, many people that have not received the vaccine are hesitant for many reasons. It's a new technology being used (mRNA) with no long-term studies completed yet on it's efficacy and adverse reactions on individuals. If there is concern on hospitals and medical facilities being short staffed, wouldn't enforcing vaccination cause an even larger deficit in staffing? Scientifically speaking, once someone has had an illness, their body produces natural immunities to it that help protect against the virus in the future. That being said, while we may see a surplus in hospitalizations now, it will not be long term. Once patients recover, herd immunity helps to reduce the invasiveness of that virus within communities. Hospitals are used to surges. Pre-pandemic, it was Influenza A and B. We don't really hear of those often anymore, but upon speaking with several healthcare professionals, it's normal to see an increase in the number of hospitalizations this time of the year.

Making a rash decision without allowing community input in the meeting is highly alarming. We should all come together as a community to discuss different options and move forward together. I realize there is a lot of division in our nation regarding the pandemic, but I believe Kitsap County is full of amazing individuals who just want to be heard (on all sides). Forcing someone to do something is not the right answer. I encourage you to put yourself in someone else's shoes to glean some insight on how your decision can impact the people of our community. Instead of choosing what's best for our community without our input, I would ask that you consider asking for input from the community in a constructive way. You as our leaders set the example and tone for the community. Let us hear your concerns, but please also listen to ours. I believe that in doing this, Kitsap County could become one that sets a new standard for other counties in our state and be an encouragement to the people of Washington state.

Thank you for taking the time to read this.

Respectfully,

Aaron Greco

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Keith Grellner,

I recently found out about Kitsap County Health Department meeting scheduled for tomorrow a.m. regarding proof of vaccination requirements for access to Kitsap County businesses.

I firmly oppose this kind of action, as I believe it clearly goes against our protected rights as Americans. This would be a huge step toward creating a two-tiered society, leading to segregation and discrimination. Mandates recently imposed have only primed the pump for such segregation. I am asking that you utilize whatever power you have to join me in the fight to preserve the equality and freedom that our great country stands for.

We are and will continue to pray for you and those making critical decisions for us, our children and our children's children.

Thank you for your time.

Subject: Oppose segregation - Please

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To all,

My family and I live and operate small businesses in Poulsbo. I and many others find the concept of mandating healthcare procedures from the political level disturbing and un-American.

Segregating society to create a class of people based on vaccines or (supposed) health status should be a red flag to everyone.

In democratic Israel, where the Green Pass has been adopted, we see how quickly personal liberties have been removed and intrusive personal tracking laws instituted under the guise of public health.

This is not too far removed from what we see in communist countries, like China, where social credit scores are aggressively used and enforced.

For now, these health passports may be focusing on COVID-19, but once they become widespread, surely additional vaccines and testing for other diseases will be required as well.

While we would not even think about bringing back racially segregated dining sections, vaccinated-only sections are being openly discussed.

If we are tracked and required to carry this type of documentation to exercise our legal rights and freedoms, do we truly live in a free society?

What downward spiral are we going to unleash as we allow such restrictions to be enforced?

I urge you and your peers to make your own personal choices for your family, but please don't use your political office to force medical mandates on our community. Oppose segregation.

Kind regards,

Daniel Wakefield

Subject: Email in Support of Medical Freedom

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To Those Deciding the Fate of Others,

I'm writing to you to ask you to oppose medical segregation in our community. It is a human right to be able to decide one's own medical care. No person's job or ability to provide for their family should be threatened because they want to decide what is injected into their body. The last time people were forced to undertake unwanted medical procedures, the Nuremberg Code was created to protect future generations. I fear that history is repeating.

The Nuremberg Code states "The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

When you threaten people jobs and their ability to access basic services, you are placing them under duress and coercing them into medical decisions. These vaccinations have only been studied for 6 months time. There is no long term safety data. More and more side effects, including blood clots, strokes, myocarditis and death are being attributed to these products. These vaccinations are not without risk and should not be forced on any person. It is a basic human right to control one's own body autonomy and to make one's own medical decisions!

There are no studies showing that medical segregation improves health outcomes. In fact, similar measures are contributing to an epidemic of suicide, abuse and mental health challenges in our communities.

Vaccinated people are just as likely to be infected with and transmit Covid as unvaccinated people. This is the CDC study to prove it. Please read the CDC study of Barnstable Massachusetts, July 2021 linked below.

<https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm>

- In this study of an outbreak of 469 people, 74% of the positive cases were fully vaccinated.
- Five people were hospitalized for Covid, four of them were fully vaccinated!
- Vaccinated and unvaccinated people were found to have similar viral loads in their nose and throat, meaning that they are equally likely to transmit the virus to others.

This study shows that vaccinated people are just as likely to carry the virus into a business or workplace. How can you justify excluding unvaccinated people from the workplace or from accessing basic services via businesses? The negative impacts of segregating the community far outweighs any proposed benefit. Please consider the negative impacts of medical segregation and discrimination as you make these decisions.

The decisions you make in the next few days, will be your legacy! Do you want to be responsible for a new era of medical apartheid? Do you want to be the cause of segregation and discrimination in our community? Are you willing to answer for these choices in the afterlife?

Sincerely,

John M. Cameron

To Whom It May Concern: (Kitsap Public Health)
To: Keith Grellner

I'm writing to you today to voice my opposition to any implementation of a vaccine passport in Kitsap County. This move will kill productivity - businesses and people will suffer as a result. More than that, it hits at the very core of what it means to be an American citizen. The implementation of a Covid-19 vaccine passport for domestic purposes would in practice represent a Checkpoint Permit. This type of document is associated with authoritarian regimes and with war and conflict. It is outrageous that 'Nazi' style check points could be implemented in the "Land of the Free and the Home of the Brave".

In addition, it is my right as a United States Citizen and as a free person, I have medical sovereignty over what I put into my body. There is a massive amount of clear evidence that reactions to this drug are widespread and are NOT being reported accurately by the mainstream media and governmental bodies. In fact, there is a lot of evidence from hundreds of doctors worldwide that this experimental mRNA drug is NOT SAFE AT ALL. These 'vaccines' do not immunize (which is the whole point of a vaccine), the definitions have been changed. What is the point of a jab that still allows you to contract and pass the virus? I liked the good ole days when I got my MMR vaccine and now I never have to worry about getting measles mumps or rubella. It is reasonable to be suspicious over an injection that is not living up to how it was sold to the public. This also does not take into account people who have already had the virus and their T-Cell immunity is better than any vaccine. Why do they still need to get a shot? Punishing those who think for themselves is anti-American at its core. Vaccine passports are illegal, tyrannical and immoral.

In Kitsap County only 172 people have died from Covid in the last 18 plus months, with 115 of those being 70 years old or older! It is a PROVEN FACT, that 98.9% of all Americans could get Covid-19 and pull through just fine.

We all know that for the majority of the population this virus is not deadly. It is being propped up as a boogeyman in order to control the masses through fear. Freedom is being stripped away from us every day under the guise of safety. Our safety is our own personal responsibility. There will always be sickness and death. You can not escape it. Shame on you if you punish those who choose to not cower in the face of a disease that has a pretty much guaranteed survival rate. Death is not the end, you should be thinking about what comes after that, rather than worrying about how to control people.

Please do everything in your power to STOP this before it starts. The people who wanted or intended to take this vaccine have already done so.

Please DO NOT allow your Health Department to cripple the economy and the working class of Kitsap County by trying to force it on everyone else.

Please DO NOT IMPLEMENT or vote in any way for an internal passport system (Vaccine Passport). It is a severe blow to all that America stands for.

Ellie Sullivan
Kitsap Resident

Dear Keith,

I beg you to NOT promote and pass the mandate and take away my human right to say "No" to the COVID vaccine! My body cannot take this! I have already had COVID and with some symptoms, staying isolated for 14 days, I am completely healed! The vaccine IS NOT THE ONLY REMEDY. I beg you to decline for the Kitsap Board of Health to pass the vaccine Mandate.

I am for the vaccine BUT NOT THE MANDATE!!!! This starts a very fascist and controlled path in our County, State, Country and Government!

Those who are at high risk will make their own choice have gotten it! Please do not use your position to take away my God-given and Constitutional rights!

Thank you!!

Subject: Covid-19 Vaccination Requirements

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good afternoon,

I am writing in regards to the meeting taking place tomorrow regarding Kitsap County's next steps of action regarding the impact the Covid-19 pandemic is having within our community.

I can understand that there are many concerns with the growing numbers of Covid cases within the county. We as a community are facing unprecedented times like never before and I'm thankful that you and the rest of the Kitsap Public Health officials are taking the time to come together to discuss a plan of action on how to best reduce the number of cases.

I would like to express my concern on enforcing mandatory vaccinations of any kind to any individual. I would say at this point, many people that have not received the vaccine are hesitant for many reasons. It's a new technology being used (mRNA) with no long-term studies completed yet on it's efficacy and adverse reactions on individuals. If there is concern on hospitals and medical facilities being short staffed, wouldn't enforcing vaccination cause an even larger deficit in staffing? Scientifically speaking, once someone has had an illness, their body produces natural immunities to it that help protect against the virus in the future. That being said, while we may see a surplus in hospitalizations now, it will not be long term. Once patients recover, herd immunity helps to reduce the invasiveness of that virus within communities. Hospitals are used to surges. Pre-pandemic, it was Influenza A and B. We don't really hear of those often anymore, but upon speaking with several healthcare professionals, it's normal to see an increase in the number of hospitalizations this time of the year.

Making a rash decision without allowing community input in the meeting is highly alarming. We should all come together as a community to discuss different options and move forward together. I realize there is a lot of division in our nation regarding the pandemic, but I believe Kitsap County is full of amazing individuals who just want to be heard (on all sides). Forcing someone to do something is not the right answer. I encourage you to put yourself in someone else's shoes to glean some insight on how your decision can impact the people of our community. Instead of choosing what's best for our community without our input, I would ask that you consider asking for input from the community in a constructive way. You as our leaders set the example and tone for the community. Let us hear your concerns, but please also listen to ours. I believe that in doing this, Kitsap County could become one that sets a new standard for other counties in our state and be an encouragement to the people of Washington state.

Thank you for taking the time to read this.

Respectfully,

Lindsey Greco

Subject: Proposed Mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

It is with great concern that I am writing to you today!

It is my understanding that the Kitsap County Health Department is proposing to unconstitutionally impose a vaccine mandate on businesses in Kitsap County. This is unacceptable as a clear and undeniable violation of human rights!

As a voter of Washington State and a CITIZEN OF THE UNITED STATES OF AMERICA, I am adamantly against vaccine mandates of any kind!

This is not an issue of being for vaccinations or against vaccinations. This is about our God given and Constitutional rights as free and sovereign citizens. It is about forcing people through intimidation, threats and coercion to take an action in order to have access to what they are inherently entitled to. It is about forcing business owners who have been made pawns for the government to do dirty work in order to keep their doors open. This proposed mandate is a violation of human rights!

I urge you to read the U.S. Constitution, the Bill of Rights and the Declaration of Independence and then search deep within your soul before you decide to support this mandate. I would also encourage you to remind yourself of the Nuremberg Code.

There is no just reason to support this proposed mandate if you believe in human rights.

Your support of this proposed mandate will make your belief clear to all of us.

Respectfully,

Dr. Monica Q. Mora

Subject: Options for vaccine and business

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To Whom It Concerns

I would like to voice my option for my choice for vaccines and public business to be added to tomorrow's meeting.

I vote choice 1. Leave things as they are and let them work out. Some people have legitimate health reasons for not being vaccinated. To limit them from work and providing provision is not justice for them. Doctors knowing patients have these restrictions are still not giving waivers although know their patients have these issues so getting a medical waiver is not an option.

Thank you.

Dear Keith Grellner,

I oppose any imposed "vaccine" mandates on any business in Kitsap County.
The increasing number of breakthrough cases is a clear indication the "vaccine" is NOT A REAL VACCINE, and is NOT STOPPING the spread of covid. It is experimental and as such has no right to be forced on the citizens of Kitsap County.
Sincerely,
Barbara L Davis

Subject: Tomorrow's Kitsap health district meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To whom it may concern,

It has come to my attention, and to the attention of countless other Kitsap families like mine, that a health district meeting will be held tomorrow. We realize that in such a time as we are in, health measures and decisions must often be made for the good and safety of the public at large. What is most concerning to me is that the public, the residents of this county, are quite literally being cut out from voicing our concerns over what those measure should be and to what extent is acceptable. Reading through the meeting's itinerary, it is the matter of the discriminatory policies that the health district is trying to implement, that trouble me most. Vaccine "passports" or proof of vaccinations to enter local businesses is abhorrent.

Where there is risk, there must be choice, and that choice is not up to our elected and non elected officials. For some it is merely a personal decision. For others, there is a moral obligation, or health issue that is deterrence enough to not get the vaccine. Many of us who have made the educated and informed decision to decline to COVID vaccine are, in fact, taking many great measures to remain healthy and keep those around us healthy.

Imagine how thousands of families across this region will have their lives uprooted, hardships added to already burdened lives if these policies are actually implemented. Imagine the business that will be lost, when local business owners are coerced to comply. Please understand and believe me when I say, there will be a local economic impact. After more than a year of small businesses hardly able to stay afloat, this, quite literally, may be the final blow.

This act of coercion towards those of us who have good and valid reason to decline this vaccine, will not sway our decisions. We are resolute in our households, and we will not be bullied by those who should have ALL of our best interests at heart. I implore you to please listen to the voices of all of the families rebuking these measures. It is not what's best for those of us just trying to live and provide for our families. We are all doing the best we can in these difficult times, please stop to consider what vaccine "passports" would do to thousands of families and businesses. It's the morally wrong answer for Kitsap county.

Thank you for your time,
Kristen Brady

Subject: Meeting 9/28/2021

To All Meeting Attendees And All Whom This May Concern-Good day. I am writing in earnest with the fervent hope and prayer that this nightmare we've all been enduring not be further exacerbated. The sole legal option (listed as #1 on your meeting agenda) is to leave the residents of Kitsap County, Washington to our own good common sense and allow everything to reach a conclusion, organically, as it will. There is no acceptable alternative. Any alternate choice would be a patent violation of the Rule of Law, The Constitution of The United States and The Nuremberg Code. The remainder of listed "options" are nothing short of draconian, tyrannical, sadistic and inhumane. We are Citizens of The United States of America. We have a God-given right to our freedom and it is legally secured in our Constitution. Along with multitudes of concerned Kitsap County residents, I/we implore you to consider the only one option which is lawful and right under the United States Constitution and to respect each and every one of us and the freedoms we all share. Thank you for your time and thoughtful consideration. Sincerely and Respectfully, Deborah Smith Resident of Kitsap County, Washington Sent from my iPhone

Subject: Input re Vaccination Status for 9/28 Mtg

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner:

It has come to my attention that the Kitsap County Health Board will soon be voting on vaccination proof requirements for Kitsap Country public and private businesses. As a small business owner in Port Orchard, I have customers from all over the county visit my office each week. I request the Board take no action and let the current situation continue, allowing individual business owners to determine what works best for their location and clientele. Instituting vaccination requirements would create undue hardship for me and those who work in my building. We currently require people to wear masks, regardless of vaccination status. Please table this proposal. Any mandate requiring proof of vaccination, thereby requiring vaccination, would be punitive and discriminatory toward those who cannot get vaccinated or those who choose not to be, including those who require reasonable medical exemptions and religious accommodations; additionally, it is an extreme and authoritarian step to take, one which precludes me from operating my business as I see fit, the way that is best for me and my clients. I appreciate your acknowledgment of the impact your decision will have, as well as your consideration of my position and my business. Thank you.

Sincerely,

Scott Kalkwarf

Subject: Covid shot mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Sent from [Mail](#) for Windows

Dear Kitsap Public Health,

My name is Jill Granquist and I was born and raised in Port Orchard. I am so disturbed about this so called vaccine and highly against it being mandated. A vaccine prevents you from getting the disease you are vaccinated for and this does not do that. I am not comfortable receiving it do to toxic ingredients which I have investigated and the quick release time, it is definatly still experimental. We are so privledged to be born in a country that is FREE so we are allowed to make our own choices. I do have a autoimmune disease and because of it my immune system is higher then most. I am not anti vaccine but do not feel I am a candidate for this. If I do get Covid I am prepared to handle it in my own responsible way and with a recovery rate of 99.7 % or so I don't see the need of injecting myself with something I do not trust. Forcing people is unconstitutional and should not be decided by politicians but left to be a decision between a person and their doctor. Please if you have ears to hear and a compassionate heart please say no to the mandate and keep our freedoms alive.

Sincerely
Jill Granquist

Keith Grellner,

I am writing you today to request a **NO** decision when considering proof of vaccines as a condition to participate in commerce in Kitsap County. The foundation for this request is our constitution and current laws protecting the citizens of our state and country. For example:

Fourteenth Amendment of the US Constitution states:

“No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

Title II Civil Rights Acts of 1964:

SEC. 201. (a) All persons shall be entitled to the full and equal enjoyment of the goods, services, facilities, and privileges, advantages, and accommodations of any place of public accommodation, as defined in this section, without discrimination or segregation on the ground of race, color, religion, or national origin.

If a patron has a religious conviction to not be vaccinated and a ‘proof of vaccination’ requirement is placed on a business, you would be forcing the business to violate Title II of the Civil Rights Act making them vulnerable to legal action against them.

Laws guaranteeing informed consent to experimental medications:

While the U.S. Food and Drug Administration has granted full approval for Pfizer's Covid vaccination named "Comirnaty," that product is not yet available. The only Pfizer shot currently available, called BNT162b2, remains under emergency use authorization, and the two differ widely in their legal liabilities.

The FDA did indeed give full approval to Comirnaty, but that product is not predicted to be available for over a year. The only Pfizer shot currently available, called BNT162b2, remains under EUA. We have the FDA to thank for this unusual and befuddling situation, but the key take-home is that while approval has been granted to Comirnaty, that product is not obtainable.

The FDA wants BNT162b2 to be viewed as interchangeable with Comirnaty, but from a legal standpoint they clearly are not identical.

The bottom line is this: mandating products authorized for Emergency Use Authorization status (EUA) violates federal law as detailed in the following legal notifications.

All COVID vaccines, COVID PCR and antigen tests, and masks are merely EUA-authorized, not approved, or licensed, by the federal government. Long-term safety and efficacy have not been proven.

EUA products are by definition experimental, which requires people be given the right to refuse them. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. Consent of the individual is 'absolutely essential.'

Earlier this year, Mary Holland, Children's Health Defense president and general counsel, and attorney Greg Glaser stated that federal law prohibits employers from mandating EUA COVID vaccines (or EUA COVID-19 tests or masks). Holland and Glaser wrote:

'If a vaccine has been issued EUA by the FDA, it is not fully licensed and must be voluntary. A private party, such as an employer, school or hospital cannot circumvent the EUA law, which prohibits mandates. Indeed, the EUA law preventing mandates is so explicit that there is only one precedent case regarding an attempt to mandate an EUA vaccine.'"

Thank you for your time and I trust you will uphold your commitment to honor the governing authority of our land – the Constitution and Laws.

To Whom it May Concern,

I am writing as a concerned citizen regarding the possibility of a Covid19 vaccine mandate in Kitsap County.

If mandated for restaurants and entertainment facilities, this is only going to be another major blow to these already struggling small businesses that are the heart of our county. People who have chosen not to get the vaccine by now have very strong convictions about it and this will not change their mind. It will, however, cause less people to frequent these businesses that have already endured so much potentially creating the final blow requiring them to shut their doors forever.

Requiring private businesses to mandate it for their employees will contribute to the shortage of workers we are already seeing in so many parts of the country. Additionally, it will take the rights away of business owners to make personal decisions on what is best for their business.

Finally, please look to your common sense when considering the reason for mandating the vaccine. Given the facts -or science and data if you will, whether or not one has the vaccine, does not make your neighbor, co-worker, patient, etc. safe or unsafe. The virus is spread freely between the vaccinated and unvaccinated. In fact, filling a space with vaccinated individuals could potentially spread the virus more as they may not know they are sick and spreading it.

Perhaps Kitsap County could be the first in the state to take the bold step and look into alternative treatments for Covid19. Yes- I'm talking about the ones no one is allowed to mention or they will be cancelled. If our officials truly have their citizens best interest at heart, they will diligently look into ALL options -even the unpopular ones.

Please read the article below. I believe it is the health officials job and responsibility to look into all studies and articles presented to them. This one might just surprise you.

Perhaps we can put Kitsap on the map for doing the right thing.

Subject: KPHD Virtual Meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Keith,

It has come to my attention that a special meeting is being held tomorrow, September 28, 2021 to consider vaccine mandates (passports) for Kitsap County restaurants, bars and other public venues. I am writing at this time to express my deepest concerns regarding this meeting and the decisions that may come from that meeting. I am 100% against any such mandats due to the exclusion of so much of our community.

Exclusions include:

- 1) Medically fragile individuals who have been advised against the vaccine by medical professionals are being excluded from involvement in the community, participation in events at public venues and basic entertainment at theaters, restaurants, gyms and bars. Many will be unable to continue memberships at much needed gyms and physical therapy locations outside of medical offices. Please consider those less fortunate than yourselves, those unable to receive the vaccine through no fault of their own.
- 2) Children who's parents are not allowing the vaccine to be given to their minor are also severely impacted by this decision. No longer will they be able to attend community events with friends, family or groups and activities they belong to. Your decision tomorrow could greatly impact hundreds of our young community in a very negative way.
- 3) Those with the natural immunity given to them through the virus itself. Those natural immunities are more important in staving off the virus and it's symptoms than the current vaccines offered. Many medical professionals are advising against the vaccine if you have already contracted and tested positive for the virus. Your decision could negatively impact the thousands of Kitsap County residents who are opting for natural immunity after suffering the symptoms of Covid.
- 4) Religious members of our community that have taken a vow with their religious convictions to not inject man made chemicals, fetal materials or other foreign substances into their bodies will be excluded from their community events. businesses and entertainment locations. Putting such a limitation on such a large sector of our community will definitely impact both those excluded as well as our local businesses.

Your decision tomorrow will negatively affect nearly every business in our community and most community member owned businesses will not survive. Those companies with corporate offices and locations outside Washington state may receive financial support from the corporate offices but unfortunately all of our local businesses do not have that luxury. Our local businesses have suffered enough, limiting the customer base to only 55% of the population is cruel.

I ask you kindly to take these impacts into consideration when making the decision tomorrow.

Respectfully,

Cynthia Pealstrom
Seabeck, WA

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

I am asking that the Kitsap County Health Board **DOES NOT** mandate the COVID-19 vaccine for entry to the places we all frequent in our every day lives. It will only add to the difficulty & confusion this Chinese virus is already causing.

SO IF THIS IS WHAT WAS SAID, WHY ARE THINGS DIFERENT NOW?

NANCY PELOSI: (4/29/2021) We cannot require someone to be vaccinated. That's just not what we can do.

ANTHONY FAUCI: (8/19/2020) We don't want to mandate and try and force anyone to take a vaccine.

We've never done that!

KAMALA HARRIS: (9/10/2021) The right of women to make decisions about their own bodies is not negotiable.

JEN PSAKI: (4/6/2021) Americans' privacy and rights should be protected.

NANCY PELOSI: (4/29/2021) It is a matter of privacy to know who is or who isn't.

ANTHONY FAUCI: (8/19/2020) We don't want to be mandating from the federal government to the general population. It would be unenforceable and not appropriate.

ROCHELLE WALENSKY: (5/16/2021) We're not counting on vaccine mandates at all. That is going to be locally driven and not federally driven.

KAMALA HARRIS: (9/10/2021) When people are able to make choices without government interference for themselves in terms of their well-being, we are a stronger society.

ANTHONY FAUCI: (7/7/2020) I don't see it on a national level merely because of all the situations you have upon — approaching upon persons' freedom to make their own choice of their own health.

JOE BIDEN: (12/4/2020) No! I don't think it should be mandatory. I wouldn't demand it be mandatory.

Thank you for making the right decision to **NOT ENFORCE A COVID-19 VACCINE MANDATE FOR ENTRY TO OUR CHURCHES, STORES, ETC.** in Kitsap County, Washington.

Commissioners Gelder, Garrido, and Wolfe,

As a vaccinated community member I do not live in any fear of my fellow Kitsap residents (vaccinated or not). I encourage everyone to evaluate their own risks and make their own health decisions. Let's not burden business owners with additional requirements to get involved in their employee's health decisions or those of their patrons. Coercing additional vaccinations will ultimately erode public trust and cause more harm than good ([vaccination rates for other childhood diseases are dropping already](#)). Let's err on the side of individual liberty and restore faith in our institutions.

Thank you,

To Whom It May Concern,

Please vote NO for proof-of-vaccine requirements to access businesses in Kitsap County. This measure is unconstitutional, completely tyrannical and will only serve to further divide our beautiful state's residents, turning the vaccinated against the unvaccinated, and vice-versa. Instead, please vote for personal choice and bodily autonomy. No person should ever have to decide between an unproven, ineffective, and potentially harmful vaccine, and the ability to live as a free citizen. This is not what Washington stands for, and not what the citizens of Washington State want for their future, or for the future generations of Washington State.

Sincerely,

Sonya Peterson

Dear Mr. Grellner

I oppose the Kitsap County Health Department imposing vaccine mandates on any business in Kitsap County.

Absolutely not! I don't know who you think you people are, but this is unacceptable and will not be tolerated by the people!

You are not elected by the people. You are a group of unelected bureaucrats acting as an official in government. We the people say "NO"! We will not tolerate this overreach!

Stop this ridiculous idea. Stop trying to frighten people. Stop trying to ruin businesses. Stop this idea of imposing a "proof-of-vaccine" requirement to access businesses. This is demonic! We the people are wearying of this!

JUST STOP!

Regards,
Theresa Frances

As a resident of Kitsap County, I strongly oppose allowing the Kitsap County Health Department to impose vaccine mandates on any business in Kitsap County. Showing a negative PCR test within 72 hours every time I patronize a business is unpractical. That will also unnecessarily increase the burden on test centers and labs.

Subject: Public Health Board Meeting - let's protect our neighbors

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

Thank you for the opportunity to comment on these upcoming discussions on requiring proof of vaccination regarding employment or admission to businesses and public places.

As the group discusses, please keep in mind a few important items:

1. The framers of the WA State Constitution gave us a wonderful gift: protection of individual rights. They ensured with the wording that not only could government bodies not impair individual rights but they worked to ensure that individual rights were protected from business and all other entities as well. There is no authority to legislate impairment on individual liberties such as peacefully going about one's day, engaged in activities such as purchasing food for one's family.
2. The continued singular focus on COVID has harmed too many neighbors already with little to show for it. The CDC 2020 vital statistics confirm large increases in deaths such as heart disease and personal injury (many of which are undiagnosed suicides) brought on by unneeded fear and healthcare interruptions. We should not be careless with more lives and livelihoods as there are real, unintended costs to these actions.
3. Kitsap County does not need a reputation as an unscientific community. It's clear from countless studies across the globe and here at home including Fred Hutchinson Cancer Research Center ([https://www.cell.com/cell-reports-medicine/fulltext/S2666-3791\(21\)00203-2#%20](https://www.cell.com/cell-reports-medicine/fulltext/S2666-3791(21)00203-2#%20)) that immune responses of the recovered provide the best protection. Others have conditions that would put them at risk for taking the COVID vaccines. This poses a large increase of adverse event with benefits to these individuals (some of which are our most vulnerable and defenseless). Any coercion that puts these people at risk is unscientific and inhuman.
4. Point 3 then demonstrates at least tens of thousands of recovered residents put at greater risk in order to (hopefully) curb the 33 hospitalizations that occur in our county per month for COVID (DOH site). Public actions should provide the most good for ALL residents. Though individual stories can be heartbreaking, public policy has to focus on more global measures for the good of everyone across all factors including other diseases, unintended health consequences for overall health, economic livelihoods, joy of living, ability to be free to work and care for one's family, etc.
5. These costs continue to be too great and disproportionate to what we are trying to accomplish. There is no perfect vacuum and we cannot implement this to target a problem and not have many more problems as a result. We can learn from those that tried this already and learned valuable lessons before abandoning programs like this such as Denmark, Moscow and England.

Thank you for your time.

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Sir,

I understand tomorrow morning there will be a meeting to discuss Kitsap County's vaccine protocols. Please know that I do not support you, or any other member of this council, implementing any new mandates or incentives. We already have plenty of education surrounding the safety and efficacy of the vaccines, at this point anyone who chooses to leave themselves at risk of contracting COVID is free to make that choice. Any further mandates, laws, requirements, etc is governmental overreach and is not acceptable. Part of living in a free society is allowing people to make bad choices if they so please. Thank you for hearing from those who voted you into office to represent them.

To Kitsap Public Health board contact - Keith Grellner, RS

I'm writing to you today to voice my opposition to any implementation of a vaccine passport and mandating Covid 19 vaccines in Kitsap County. This move will kill productivity - businesses and people will suffer as a result. More than that, it hits at the very core of what it means to be an American citizen. It is outrageous this could be implemented in our own county.

As you know, in Kitsap County only 172 people have died from Covid in the last 18 plus months, with 115 of those being 70 years old or older! It is a PROVEN FACT, that 98.9% of all Americans could get Covid-19 and pull through just fine.

Please do everything in your power to stop this before it starts. The people who wanted or intended to take this vaccine have already done so. Please do not allow your Health Department to cripple the economy and the working class of Kitsap County by trying to force it on everyone else.

I ask you, DO NOT IMPLEMENT or vote in any way for an internal passport system (Vaccine Passport). It is a severe blow for which all that America stands - freedom, justice and equality for all!. America is still the land of the free and the home of the brave.

Sincerely,

Amy Sullivan
Kitsap Resident.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

My husband has expressed our perspectives accurately.
Please don't impose more restrictions on the good people of Kitsap.
Please vote no on Vax Passports.
Liberty is the need of the hour to reduce community fear and frustration.

Thank you!
-Beth Knudsen

Thank you for your attention to this situation.

My family and I have owned property in Port Orchard for many years and support many Kitsap businesses through our patronage. I have worked in the healthcare sector for the majority of that duration. We DO NOT support the limiting of commerce in Kitsap county (or beyond) thru vaccination passports. We DO NOT believe that this type of restriction to citizens or visitors is appropriate or allowable under our state or national inalienable constitutional liberties.

Why?

1. Studying Israel's experience with high vaccination rates indicates that the well-intentioned vaccines are not truly effective to prevent catching or spreading the virus.
2. Side effects of these vaccinations are much higher than any other on record. The risks do not exceed the benefit for over 90% of our population.
3. The survivability percentage does not allow this situation to merit overreach of governmental control that our governor has been pushing.
4. Universally administering these specific gene therapy/vaccinations without long term studies performed only weakens our immune systems from their effective natural immunity.
5. Residents who have already survived the Covid illness should absolutely not take this vaccination according to seasoned virologists. Any decisions must provide the necessary exceptions for this population as well as medical and religious exemptions. Any discrimination to any of these individuals would absolutely violate our existing laws.
6. Attached is a copy of a lawsuit that has been made by a large group of doctors who after careful study fully question the efficacy of this type of treatment. (Pages 1-10 and Page 41 are especially pertinent)
7. Our county should not be in any way complicit in any mandatory activity that involves legal retribution for patients from adverse effects.
8. Forced vaccinations are not allowable under international Nuremburg agreement established after WWII.
9. Again... Limiting Commerce further will devastate our counties and state far more than a highly survivable virus.
10. The fear promoted by poor handling of this situation so far nationally and state has caused tremendous educational harm to our kids, spiked depression rates, and gravely polarized our communities and eroding trust in inconsistent governmental guidance which does not bode well for the livelihood of any elected official.

Instead - take action here:

1. There are immune system boosting treatments available that should be prescribed by all physicians, especially vulnerable populations.
2. Prophylactic outpatient treatment of patients will expedite recovery, shorten stays, and relieve pressure on the healthcare system.
3. DO NOT copy the mistakes of Israel's vaccination program.

4. India has had an enormous turnaround of their Delta surge by using this approach using proven medications.
5. Educate people to stay home when not feeling well instead of trusting a mask to protect others from their illness.
6. Support/subsidize trustworthy screening at business entrances instead of requiring passports.
7. Given the intentional origins of this virus we need to quickly restore our country to strength and normalcy. Passports won't do that, only reinforce division and inequitable treatment of citizens.
8. There are 2 phases to this illness which makes it harder to treat (inflammatory and respiratory). Properly sequencing treatment, focusing especially on the 8th day phase change will boost success of critical patients with comorbid conditions.

If something is truly good, it does not have to be forced upon respectable citizens. Please DO NOT require VAX Passports.

Thank you for your service - we're praying for your success in making wise decisions.

Please let me know if I can answer any questions or help clarify my statements in any way.

Most Respectfully,

- Brian Knudsen and Beth Knudsen

Subject: Health Department Meeting on Tuesday

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Elected officials:

I am writing to you deeply disturbed upon hearing that there is a special board convening to discuss various options of enacting a vaccine passport/mandate for Kitsap County. I am a mother of two who has taught my children about the important role government has in the life of its constituents. I have ensured their education also presented the side being active with government decisions being made on your behalf. As government officials are our REPRESENTATIVES, elected to serve us, I believe it prudent to become active in this civic duty. Today, that action is in the form of a letter/email as this meeting was CLOSED to the public and public representation is not allowed.

While I most certainly agree that COVID is real and needs to be taken seriously, I do not believe the proposed actions will aid in bringing this community back together or even in keeping the community safe from this virus. The following options being considered are a **gross overreach** and misuse of power:

Option #2 Make a formal Health Board recommendation/resolution for all local governmental agencies to require vaccination for their employees

Option #3 Make a formal Health Board recommendation/resolution for all private businesses to requiring vaccination for their employees and/or proof of vaccination for entry into indoor spaces

Option #4 Issue a formal Health Board/Health Officer order under the authority of RCW 70.05 to require employee vaccinations at governmental agencies

Option #5 Issue a formal Health Board/Health Officer order under RCW 70.05 to require all businesses open to the public, or indoor venues open to the public, to require proof of vaccination for entry

What these options will most certainly do is further divide and place an undue hardship on small businesses that have already taken a severe blow from the emergency powers still in effect in the governor's hands (Options #2 and #3). Mandating vaccines for employees,

the general public, etc is overreaching into the lives of the citizens of Kitsap County. Speaking on Options #4 and #5 directly, based on published numbers, Kitsap County was never in a pandemic state so why are we looking to do this NOW? The number of COVID cases in Kitsap County does not support this drastic action being proposed. Threatening this action over your constituents is frankly unconscionable. Accepting them means accepting the false idea that government owns your life, body, and freedom.

Another point is on the vaccine itself. This vaccine was greenlighted on an emergency basis by the FDA and did not go through the regular protocols on safety and efficacy. As we can see by the elected officials, boosters are now being discussed because the vaccines are not as effective as they believed. So why are we pushing this on constituents who have differing opinions and perhaps situations that warrant them NOT taking the vaccine? Additionally, as these vaccines were created with the use of aborted fetal cells in some aspect of their formation makes this a deeply personal decision to be made by the individual. All of this is an infringement on our personal rights.

More personally and most distressing, taking this vaccine presents a high risk to the health of one within my family. We are being presented the option of taking the vaccine and quite possibly exacerbate currently stable medical issues to potentially lose a spouse OR take the vaccine so you can buy food for your family. What a choice.

I implore you to represent my stance of vehemently opposing the allowance of Kitsap County Health Department in imposing vaccine mandates. Take NO action and let the current situation play out.

Thank you for your time and service.

Amber Binsfield

Subject: Please pick option 1: "Take NO ACTION and allow the current situation to play out."

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To Whom it May Concern,

Since public input is not allowed at your meeting it is important you hear what the people want.
PLEASE pick option 1. TAKE NO ACTION AND ALLOW THE CURRENT SITUATION TO PLAY OUT.

I have to believe you hold your current position because you care about this county and it's people. If that is true it is important to KNOW what the PEOPLE want.

While I would like to submit lengthy comments I want to respect your time and keep them as short as possible.

I work with young moms. I can tell you their anxiety is extremely high about this shot. They hear stories via social media connections of nursing moms who took the jab and then their baby died, or, even more frequently, the heartbreak of miscarriage. Do you have any idea how many women are now suffering with horrible and unpredictable menstrual cycles since taking the jab? Do you know how many have lost VERY WANTED babies? There is so much suffering this shot has already caused, why on earth would you push it on people after all we know it is doing to destroy lives?

This is a virus that has not been isolated. It has an extremely high recovery rate. There is absolutely NO SENSE in the insanity of forcing this medical tyranny on people.

The shot creates serious health issues and sometimes death. At the same time it does NOT protect you from getting the virus. Current studies are showing that vaccinated people are showing much higher loads on their system than unvaccinated people. Meaning the vaccinated are SICKER than the unvaccinated. Does that not tell you something? In the rush to get a vaccine out, it simply did not have the years of research it needed to make sure it was safe and effective. To say that it is safe and effective is an absolute lie and willful denial of the facts.

And what about those of us with health issues that make it dangerous for us to take the shot? You want to limit the lives of upstanding, tax paying, community involved citizens because they won't take a shot that would most assuredly exacerbate their medical conditions and potentially cost them their LIFE?

The practical side of things is that any change to the current rules would only FURTHER INJURE local businesses. If people have to show proof of vaccination before going out to dinner, they will simply not go out to dinner. This will further damage our local economy and tax base. After the last year and a half, many are hanging on by a thread as it is.

Given there is vast amounts of warnings, studies, anecdotal evidence etc. from experts around the world that this so called "vaccine" (which is NOT a vaccine in reality) is NOT SAFE, how can a reasonable person with a conscience force another human being to inject this into their body forever altering their DNA? It is UNCONSCIONABLE. It violates the

Nuremberg Code. Have you not been hearing the stories of professional athletes having to retire post having the shot? People dying? Excruciating pain and neurological disorders occurring?

How can you even THINK of forcing this on your fellow Kitsap residents?
Is it to gain access to funds based on compliance?

There is NO good reason to change anything. Please pick option 1.

This is America. We the people are free to decide what goes in our bodies.
I strongly implore you to NOT join the overreach that is going on in other areas.

If you won't make a decision that is in the best interest of the people, then at least consider making a decision that will protect **YOU** legally for the future.
At some point there will likely be Nuremberg trials. Now is the time for you to decide if you want to be caught in that net or not.

Any decision to limit citizen's freedoms based on vaccination status is short sighted, ill fated, and unnecessary.
PLEASE put the **people** before whatever entities, and temptations for funds, that are pressing in on you.
You are there to serve the people. Please serve with integrity and intelligence considering ALL the facts, not only the narrative driven manipulated "data" fed to the masses by the media complex.

People are fed up.
People are tired.
People are starting to fray.
People are not going to take any more government overreach.

Kitsap county is a well armed area. It is unwise to push them any further.
I am not a gun owner, but given what is going on I wish I were.

This is too much and has got to stop.

I truly hope you will LISTEN to the people.
There is no need to change the current regulations.
It's bad enough as it is, please don't make it any worse by making a fear based, ill fated decision.

Hoping you have a conscience,

Karen Foster

Subject: Please don't take our rights away! My body my choice! Don't violate my HIPPA rights!

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I truly don't believe anyone of you will even read this or listen to me. But I have to say my peace since no one is allowed to speak at the meeting tomorrow. But my hopes are that you will read this and listen to me. I pray that God will guide you on this matter.

We the people of Kitsap County can choose to stand above the fear and worry of this plague that is gripping our world. The vaccine being forced upon people will never be the answer and will only draw a hard line and divide our community. According to the Kitsap Sun cases have dropped 24% in Kitsap county, so why would you want to force anything like this on our beautiful community? I have also heard that the WHO - World Health Organization has stated that it is not right to force this. It should be my choice and it is according to my HIPPA rights it is.

5 years ago my family chose to move to Kitsap County from King County to get away from the power controlling people that restrict business, schools, and community. We wanted a better life for our kids and we thought we had found it. This will cause us to look at moving and we wont be the only ones. This will mean the end of how this community works, lives, gather, and thrive.

When I go shopping people are wearing masks and using sanitizer. In general people are being respectful. I think its sad that with numbers coming down in our county close to 2 times more than the state that we have come to this.

Do you want to be part of destroying our local economy? Do you want to be part of locking down a community? Do you want to be part of taking away our rights that our founders fought so hard for? If these plans go ahead it will show you don't have the best interest of the people and will be signing the closure of what is left of our small business communities. When most people would rather buy from a local business supporting the local growth of community.

Is it really worth it? Covid is survivable at a higher rate than with the vaccine. I believe that forcing this onto people will make more people leave and will cost future generations so much more in the long run then people leaving, but will cost your respect, dignity, and honor. So many politian's today have no honor and don't really show they care about the constituents that got them in the seat that you currently sit in. Are you going to be one of these many politicians that care more about money then people?

I feel that the vaccine is not as good as they are making it out to be. because it is a new type of vaccine not just a new medicine. We all know that just because it is FDA approved does not mean that it works. There are too many questions like what are the long term side effects of the vaccine: 2 year, 5, year, or 20 year. We also don't know enough about anti-bodies and how effective they are or are not. Other states use anti-body treatments and have a fast and effective success rate.

Subject: public comment

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

How would one ever believe that a vaccine passport is okay? How is it okay to take away constitutional rights from Americans? To tell them they have to be injected by a certain date to obtain their job or have access to a grocery store to feed their families?

The Nuremberg code includes:

Principles of informed consent and absence of coercion. The VOLUNTARY consent of the human is absolutely essential. (Regardless of what any president is demanding)

Experiment should be so designed and based on results of ANIMAL EXPERIMENTATION and knowledge of natural history of the disease to see if studies will give justification to performance of experiment.

No experiment should be conducted where there is reason to believe that DEATH or PERMANENT DISABILITY will occur. (See VAERS Reports)

Experiment should only be conducted by scientifically qualified persons. (Not the president, not the governor)

Human subject should be able to bring experiment to an end.

During the experiment, the scientist in charge must be prepared to terminate, in exercise of good faith, that continuation of experiment is likely to result in INJURY, DISABILITY, or DEATH to the experimental subject.

These 6 statements bring to my attention that what the president, and governor are doing is completely unconstitutional and violates my rights as an American and the Nuremberg code. There for anyone who enforces what the president and governor are doing, is violating my constitutional rights as an American.

This feels like the Nazis in Germany. I thought living in the United States of America, the land of the free, would NEVER even attempt to demand this from its people. Medical care and choices have always been an option, a right to each individual to make their own decisions.

This is America. Please stop trying to scare your people, your citizens, into getting the experimental covid-19 vaccine. It has not been tested on animals, it has too many adverse reactions that have been reported, yet hidden.... We see the wrong in this, we see the damage it brings. We demand to keep our freedoms, FREE.

This is the United States of America, where the gay can be loud and proud, black lives matter, and anyone can say they are a male AND female, so please, let those simply say NO THANKS, I'LL PASS, for this experimental covid-19 vaccine. We all should be allowed to work at the same place or shop in the same store. Otherwise, it is discrimination, isn't it?

Thank you for your time,
Christina Thacker

Subject: NO Proof of Vaccination

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,

I am opposed to requiring proof of vaccination for patrons of businesses in Kitsap County. My children have already missed out on opportunities because they are not eligible for vaccination. Most recently, they were not able to attend a play at the Port Orchard theater. This was a disappointment as we were looking forward to getting out and doing something fun and "normal." Please consider the mental and social well-being of our children who have already been isolated.

Additionally, requiring proof of vaccination would put undo stress on both businesses and families alike. If proof of vaccination is a widespread requirement throughout the county, people will not be spending their time nor money locally. If a family must get their children tested before going out to dinner, they will likely decide to stay home, I know I would.

Finally, those who are unable or unwilling to get vaccinated will not change their position because businesses require it. Instead they will buy things online and vacation in locations where proof is not required. Requiring proof of vaccination will stymie our local economic recovery and growth.

Say "NO" to requiring proof of vaccination in Kitsap County.

Sincerely,

Annette Clement
Port Orchard

Subject: RE proposed vaccine passports

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To Whom it may Concern,

As a resident of Kitsap county I am asking you to listen to your constituents and do not take action and allow the current situation to play itself out. Please do not enforce vaccine passports for the county! Not only would these vaccine passports be a direct violation of our rights to medical privacy, it is also forcing segregation within the community. This is government overreach and is not in our community's best interest. If you enact vaccine passports the economy will suffer, the divide between the vaccinated and non vaccinated will increase and you will be directly removing our rights for medical freedom. Please vote no for vaccine passports. Thank you for your time and consideration.

Sincerely a Concerned Citizen,

Jamie Keil

Dear Mr. Morrow:

I am writing as a concerned citizen of Kitsap County and will be speaking the truth in love. I urge you and all of the members of the Kitsap Public Health Org. to think and consider very carefully the damaging results and ramifications of a broad spectrum Vaccination Mandate of our County. So many people have already had the Covid 19 virus and have developed very good immunity against the virus. There is no need for the vaccine to be forced. Herd immunity, as it always does, has been kicking in. You know this to be true.

This mandate is not only illegal, but also immoral, discriminatory, and will force undo hardship on our whole county. This you know to be true.

The Nuremberg Code also forbids these actions, both internationally and nationally. You know this to be true.

I could go on and on about how terribly wrong and cruel this whole Vaccination Card mandate would effect our citizens....on every level, but I think by now you know what the right thing is to do. I ask you please to make the correct decision to vote NO on this mandate.

Thank you for your consideration.

Sincerely,

Lisa Hanson

To Whom it may concern,

I own and operate a small business here in Kitsap County and I DO NOT approve of the decision making it mandatory to show proof of vaccination to enter any establishment.

I have served the public for the 13 years and this could put me out of business. I truly believe it is up to each individual whether or not they get vaccinated and denying services to those who don't creates segregation.

Please consider not approving this ridiculous idea.

Respectfully,

Kacy Noel

Pretty bad when one has to block others from businesses unfairly. Perhaps you can understand how bad this may be for those immune by already contracting COVID and having immunity, the human way.

Subject: Vaccine proof to enter public places

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello Keith,

I am a deeply concerned citizen of Kitsap. I heard that elected and appointed public officials are meeting tomorrow afternoon to consider requiring people to have proof of a vaccine to enter stores or other public places.

This would discriminate against Conscientious objector's, Religious, and those who can not receive the vaccine do to medical reasons. Not to mention it would be Coercion to the general public, which is Illegal. I know some who didn't want to be vaccinated, but did because of the fear of loosing their job ,this is wrong! So now people could possibly be pressured to be vaccinated just so they could go grocery shopping, or go to there child's game?

I personally know three people who have been injured by the vaccine, one is dead. Hence the reason people don't want the vaccine is legitimate, especially if they have already had COVID.

More than that we are seeing first hand the State and Federal Constitution being violated here over a virus that still has a 99.6 percent recovery rate. When we look at the total death toll of 2020 it's virtually no different from the past 3 years. RCW's do not over ride our constitutional laws which are not hard to understand.

Finally if passed many will shop and dine out of county. Other nearby counties have voted against it. More businesses will suffer and or shut down, and tax revenue will be lost. Please understand, there will also be many lawsuits. There are better ways forward, than taking away freedom of choice through coercion.

Thank for your careful attention!

Jason

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello Mr. Keith Grellner,

I hear that Kitsap County is considering a vaccine passport to enter businesses. I am respectfully asking you to do no such thing.

It would be like a cop who uses unwarranted force while performing his job, to get his way. How does that work out in society? Who does he think he is, that cop? It is unjust.

I own a home in Kitsap County; I object to passports restricting freedoms within our county, state, and nation, of any kind whatsoever. They are not warranted by the circumstances. It is like amputating the entire arm when only the hand is infected.

Such “passports” are unprecedented in our country. But, not in other countries in history we both could name. Do you want to be like them? Do you want to open the door to “show me your papers!”

I object to the coercion of trying to hurt and shame a set of people with whom one disagrees. The entire body politic would be sickened by passports in order to enter businesses. Don’t let it happen on your watch.

Sincerely,
Deirdre Forman

September 26, 2021

To Those Deciding the Fate of Others:

This includes all of Kitsap County Health Department workers, Health Officers, Kitsap Board Admins., Commissioners, and all Kitsap Mayors and anyone else who is making these decisions,

I'm writing to you about your private meeting you are holding on Tuesday, September 27, 2021, and am asking you to oppose medical segregation in our community. We are mostly made up of grass roots businesses in the Kitsap community supporting each other, and adding division will create segregation and hostility. It is every human's right to be able to decide one's own medical care. No person's job or ability to provide for their family should be threatened because they want to decide what is injected into their body. When we look at history and when people were forced to undertake unwanted medical procedures it was devastating, and the **Nuremberg Code** which was created to protect future generations was set in place.

The Nuremberg Code states "The voluntary consent of the human subject is essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

Threatening people's jobs and their livelihoods as well as their ability to access basic services, you are placing them under duress and coercing them into medical decisions. These vaccinations have only been studied for a short duration of time, there is no long-term safety data. More and more side effects, including blood clots, strokes, myocarditis, and death are being attributed to these products. These experimental gene therapy vaccinations are not without risk and should not be forced on any individual. It is a basic human right to control one's own body autonomy and to make one's own medical decisions! I know people that have

gotten very sick and debilitated; blot clots and heart attacks, as well as pregnant women losing their unborn baby, and even those that have died, all after getting an mRNA injection that is being pushed.

Forced measures will contribute to an epidemic of suicide, abuse, and mental health challenges in our communities.

Vaccinated people are just as likely to be infected with and transmit Covid as unvaccinated people. Please read the CDC study of Barnstable Massachusetts, July 2021 linked below.

<https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm>

This study shows that vaccinated people are just as likely to carry the virus into a business or workplace. How can you justify excluding unvaccinated people from the workplace or from accessing basic services via businesses? The negative impacts of segregating the community far outweighs any proposed benefit. **Please consider the negative impacts of medical segregation and discrimination as you make these decisions.**

When we look at those becoming infected and possibly dying many have comorbidities, obesity, heart disease, diabetes etc. Why is the focus not on educating people to be healthy? **With a 99% recovery rate from covid**, the interventions and treatments that work as prevention and treatment during infection and therapeutics to boost the immune system are all being suppressed. There is no mindset in promoting health and wellness but instead a tactic that is creating fear in our communities. Our business sees numerous clients in person on a daily basis, some have had covid, many have not. We have not experienced getting covid ourselves but have been exposed numerous times, we have seen firsthand how people have been recovering with many therapeutic treatments and this information is being censored. With proper health, nutrition, exercise and proper cleaning and sanitation in the workplace, there is no need to be living in fear and we can keep ourselves and our community healthy.

The United States Constitution was created to protect Americans and going against the constitution is a lawless act. Taking into account the many statutes put into place to protect U.S Citizens, the following examples are from the Department of Justice:

Violent Interference with Federally Protected Rights, 18 U.S.C. § 245

This statute makes it a crime to use, or threaten to use force to willfully interfere with any person because of race, color, religion, or national origin and because the person is participating in a federally protected activity, such as public education, employment, jury service, travel, or the enjoyment of public accommodations, or helping another person to do so.

Conspiracy Against Rights, 18 U.S.C. § 241

This statute makes it unlawful for two or more persons to conspire to injure, threaten, or intimidate a person in any state, territory, or district in the free exercise or enjoyment of any right or privilege secured to him or her by the Constitution or the laws of the U.S.

Consider the decisions you make in the next day...do you want to be responsible for a new era of medical apartheid? Do you want to be the cause of segregation and discrimination in our community? Are you willing to answer for your choices and decisions in a court of law?

And I wonder if anyone will actually read this letter.

Sincerely,
K. Detwiler
Small business owner
Poulsbo, WA

Subject: Kitsap Public Health Board Meeting - 28 Sep 21

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Kitsap Public Health Board,

September 27, 2021

As a concerned Kitsap resident, property owner and taxpayer, I am writing to address your recommended actions to the COVID-19 state of affairs.

First, any recommendations under consideration must fall within the constitutional rights of its citizens. I noted recommendations within the discussion that suggest limiting a citizen's right to work (livelihood), engage in business for necessities such as food, clothing, shelter, etc., and possibly limiting free travel based on taking a COVID vaccine. This constitutional over-reach disregards the health of the citizen and assumes the COVID vaccine will solve the problems while not considering alternative treatments or mitigating circumstances.

Second, the COVID vaccines have not been proven to stop COVID-19 transmission as documented in numerous world-wide accounts of thousands of "breakthrough" cases of the vaccinated (US and Israel). Not only have the vaccines not proven to stop transmission and protect the recipient, but vaccinated people are able to transmit the disease. It is extremely disheartening to recommend imposing constitutional infringements based on a vaccine that does not provide protection.

Third, the COVID vaccines have documented evidence in the CDC VAERS system of thousands of deaths and tens of thousands of serious injuries (15,386 deaths, 99,410 serious injuries between Dec 14, 2020 and September 17, 2021). It is unconscionable to mandate a treatment that is unproven to stop transmission (breakthrough cases) and has a track-record of thousands of serious life-threatening injuries & death.

Fourth, if as you suggest, the health care system is being over-taxed with patient needs, we must take every opportunity to "keep" qualified workers and not mandate novel treatments that may push workers out of their profession. These "professionals" are well aware of the risks and benefits (working in the trenches) and are able to make the best medical choice for their situation. Mandates will only drive more workers out of the labor pool.

And, one size does not fit all; some have had COVID and have developed superior immunity while others have a robust immune system and may rely on preventative treatments.

Fifth, the Kitsap Health Board should take a proactive early outpatient treatment approach which has been documented throughout the country and world to have tremendous success in preventing and treating the disease.

Sixth, COVID-19 mRNA vaccines put our youngest population (12-17 years-old) at risk from severe adverse reactions, such as myocarditis, pericarditis, cancer, blood clotting, etc. Statistically, their natural immunity and recovery rate put them at an extremely low risk from COVID-19 without any mandated intervention.

In closing, COVID-19 policy should not supersede constitutional rights of citizens, or define who is entitled to life, liberty and the pursuit of happiness based on a medical treatment (COVID vaccines). Daily, the news puts out information from vaccine manufacturers that the current vaccines are ineffective and boosters will be needed, perhaps for the rest of one's life to provide any form of protection. Health care choices should be left to the patient and their doctor under the tenets of freedom, dignity and medical privacy.

I've been serving to protect our country and citizens from the most formidable foreign threats and weapons for almost three decades, across the country and world, to preserve our constitutional freedoms. I hope you will take my concerns seriously during your discussions.

Thank you,

Michael Palmer
Bremerton, WA

Subject: Kitsap County Health Board Meeting, September 28th

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I am writing in regards to the upcoming Health Board Meeting regarding action regarding vaccine mandates. As a resident of Port Orchard, I am appalled at the eagerness to take away the citizen's rights and freedoms simply over fear. I am 68 years old and have lived through many years where just the flu virus killed many thousands and many suffered illness. Never did we decide to mask up (which is very harmful and proven not effective) or force mandate everyone in society. Forcing employees and citizens to receive a vaccine that cannot be reversed if an adverse response is affected and which we have no long-term data on because it has only been in use for a few months is contrary to accepted and common sense strategies for the treatment of viruses that we have always followed in the past.

So in closing, I want to state that I am totally against any vaccine policy that mandates the Covid vaccine in any form for employees of government agencies, private business or the general public.

Respectfully,
Nancy Perry

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Good morning,

I am writing in regards to the closed comment meeting taking place tomorrow about Kitsap County's next steps regarding the pandemic/mandates/passports.

Myself and most community members I speak with are AGAINST any type of vaccine passports being required by our businesses.

If you look at the Kitsap County vaccine by demographics report that was released in January 2021 you will find that people of color are by far the smallest demographic of people receiving the vaccine.

Not only are the passports unconstitutional but they would be once again segregating people of color from entering businesses if they choose not to vaccinate. Is this the direction we really want our "inclusive" community to be heading?

We are adults that are capable of thinking critically and making safe decisions for ourselves. Passports are only going to continue to cripple small businesses and restaurants while padding the pockets of the corporate/big box stores like Walmart and Amazon.

I appreciate you taking the time to read this and take this perspective into consideration when making your decision.

The majority of your community does not want these mandates or passports. You were elected to represent the PEOPLE of this community not the wants of the federal government.

Thank you for your time,
A South Kitsap resident

As a 50 plus year resident of this county and one who pays the of taxpayer dollars, we are seriously considering relocating if a vaccine mandate is passed. I personally have many friends and family who regret getting the vaccine due to adverse reactions. Its pretty clear these are not being reported as the hospital gets alot of money, you know exactly what I'm saying. Whose going to take responsibility if I have adverse reactions? You? No you won't! A vaccine is a choice. Not allowing one in stores is DISCRIMINATION. I'll wear a mask as long as I have to. Hard working people, people who have worked through this entire pandemic thus far are loosing their jobs! This is not okay ! NO TO A VACCINE MANDATE...even Congress and their staff are exempt, ask yourself why that is. I personally know staff at St. Michael's in silverdale, many vaccinated pregnant women are having miscarriages due to blodclots in the umbilical cords. Maybe you should look into that! We whom are against or not comfortable or afraid to be vaccinated are many. I hope you actually listen and compromise with the large group that you disagree with and not just do what YOU personally want. Thankyou for reading, if you actually read or care.

Mr. Keith Grellner,

It has been brought to my attention the Kitsap County Health Department will consider whether to impose a proof-of-vaccine requirement in order to access businesses. I unequivocally oppose mandatory vaccinations and I strongly urge Kitsap County officials to quash the proof-of-vaccine nonsense. Mandates and papers are utterly tyrannical, completely out of line with the American founding and our constitutional rights. COVID19 has devolved into a campaign of terror for the sole purpose of power and control.

The disturbing fallacy of the COVID terror campaign asserts that if everyone is vaccinated, we can beat the pandemic. This is bullshit! Unvaccinated people pose no danger to people who have been vaccinated. The idiotic cry that the unvaccinated are prolonging the pandemic is ignorance fueled by fear.

People need to live their lives to the fullest without the shackles of misguided bureaucracies. For people who want the vaccine, let them get the vaccine and those who don't urgently wish to return to normalcy. Natural antibodies are far superior to vaccine antibodies and facilitate the most expedient path to fight a pandemic with greater results.

Subject: Vaccine Passports - OPPOSED

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Vaccine passports to enter public businesses is a recent unprecedented step in our Country and one of dubious Constitutionality. Despite Kitsap Public Health weekly reports that claim “Washington State recently passed some important vaccination mandates”, the truth is no mandates have been passed by the Washington State legislature—the law making body in the state. Referenced historical cases universally were based on legislative action, not decrees by governors and health officials. And those earlier cases all revolved around diseases that had mortality rates significantly higher than COVID, which has been trending toward flu levels.

Laws for vaccines have always recognized the need for medical and religious exemptions. These exemptions were manageable as laws primarily affected schools, which were frequently the outbreak source. How will exemptions be managed when every business is effected? Every person? And how will the county insure equitable treatment will be maintained when these actions are taken. There are deep seated cultural, religious and racial biases against vaccines that simply can't be ignored. Individual medical and religious concerns are real! But it seems like public health have become the doctors that are too aloof to listen to the actual patient. Several minority groups are deeply opposed to forced medical procedures as they bring back cultural memories of Tuskegee, Haiti and other medical experiments run amuck.

A recent Medium post concerning other diseases and the vaccines rattled off a list of diseases that are significant problems for Covid patients and concluded that the positives outweighed negatives for anyone with pre-existing conditions — left out was neurological, autoimmune, environmental exposure immune syndromes, and a host of other rare diseases that are vaccine safety concerns. Concerns that are only evident after lengthy disease specific vaccine trials. I have had transverse myelitis and Gulf War Syndrome, and have spent ten years seeking expert medical advise on every vaccine I receive. And while I obtained COVID vaccines I did so with trepidation as not a single doctor could offer medical evidence specific to my morbidities.

Misses the mark. One would expect if the government is going to so restrict our freedom to shop, eat, buy basic goods and services that there would be a

preponderance of evidence showing such need. Yet when we review where COVID outbreaks are occurring it is in healthcare, long term care facilities, jails and schools. Most retailers and private businesses have been operating successfully for months without wide scale outbreaks. These businesses will now be burdened with having hired vaccine gatekeepers? And I will have to reveal medical information to a minimum wage worker with zero privacy training?

Vaccine “papers” policy ignores valid science regarding natural immunity. Though it may not be the advised course of immunity, the fact remains 14,000+ residents have tested positive. Breakthrough cases amongst natural immunity are extremely rare, though we’ve seen vaccine breakthrough cases are quite common. Large clinical studies out of Cleveland and Israel have shown natural immunity is viable, even if not advisable.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner,

It has come to my attention that the Kitsap County Health Department is considering whether to impose a "proof of vaccine" requirements (i.e mandate) to access businesses within the county at their meeting tomorrow

I am emailing to implore you to not allow such a mandate to be initiated within this county that I live.

It is unconstitutional for you to place such a requirement on any American citizen

An individual's health and the choices regarding ones health is at the discretion of that individual. This vaccine may protect a certain portion of the population from the severity of the COVID-19 virus (i.e. the elderly and those with cold morbidity health problems), however studies have shown that it does not stop those vaccinated from transmitting the virus to others. Therefore, it is not a logical argument for one to make that the entire population should be vaccinated against this virus and that one should have to show proof of such a vaccination in order to utilize local businesses. This would be a gross violation of ones constitutionally protect rights and cause further strain the local economy that is trying to bounce back from the economic oppression from the previous year.

Thank you for your time and attention to this matter,
Bobett Davis

Subject: Vaccine Passport Vote 9/28/21

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hi,

I strongly oppose any vaccine passports for Kitsap county and request the board vote no on any vaccine passport proposal for Kitsap County.

I am not opposed to vaccines and believe residents of Kitsap should make the medical decision best for them but also believe that passports serve no real health purpose other than to intimidate, isolate, divide and bully. They create an undue burden on small local businesses to enforce when they are already struggling. It is not the government's job to keep me safe. It is the governments job to protect my rights as a citizen.

Even the Israeli Health Minister agrees according to recorded comments he made when he thought his mic was turned off. Israeli Health minister Nitzan Horowitz admitted, "there is no medical or epidemiological justification for the Covid passport, it is only intended to pressure the unvaccinated to vaccinate."

Thank you,

Beth Grams

A quick note to inform you that I do not agree with the concepts of vaccine passports. The idea is not only illogical, but extremely divisive in an already difficult time.

I've worked with At Risk Youth and Families for the past 25 years in Kitsap County. I have raised my children and sadly, buried one in this County my family has called home for over 100 years.

I have continued to ensure the safety and well-being of the foster children on my case load during this pandemic and will continue to do so as long as our Governor allows.

Results show that the safety measures we have been implementing for the last 20 months have been working and can continue to work. We also know that even with the vaccine, you can contract and pass on the virus. These type of mandates will not ensure the safety and well being of our neighbors, but it will hurt businesses and will definitely continue to drive a wedge in our community, when what we really need is more healing.

Please consider this letter when weighing your decisions and also know that this letter speaks for my immediate and extended family as well.

Thank you,
Jeff King

As a concerned citizen and business owner in Kitsap County, I am asking you to please VOTE AGAINST implementing a proof-of-vaccine 'passport' requirement to access restaurants and businesses.

The science is showing a dramatic downward trend in positive Covid cases in Kitsap County, and I fear that imposing such a mandate would do even more harm to the already struggling businesses in our county.

Thank you!

Mr. Grellner,

I would like to submit my opinion regarding the upcoming vote of vaccine passports for Kitsap county.

While this pandemic has been a tragedy for our community and the world, I do not believe vaccine passports are the way to go.

Putting additional stress on our small businesses will be detrimental to their success and future growth.

Please vote no for vaccine passports in Kitsap county.

Thank you,

Mr. Grellner,

I am writing to ask you to oppose allowing the Kitsap County Health department to impose vaccine mandates any business in Kitsap county.

This will not help to keep our county safe, but instead it will cause hardship for businesses and individuals.

There have been no longitudinal studies to prove the safety and effectiveness of these emergency experimental vaccines.

It is essential that experimental vaccines not be forced upon a person, but they need to be a matter of free choice.

Sincerely,

Diane Nelson

To whom it may concern:

It is my understanding that vaccine "passports" are being discussed at this public health commissioner meeting for Kitsap County. As a resident of Kitsap county who happens to be a "vaccinated" ED RN and the son of an immigrant to the US, I OBJECT to any vaccine passport regulations in Kitsap County. The following are my reasons:

First, while hospital volumes are high, the number of cases that I have witnessed have decreased versus the past month or so. The hospital volumes are going down along with COVID admissions and while I do not have official numbers, anecdotally, I know we are in a different place than we were 3 weeks or 6 weeks ago.

Second, numbers that have not been quantified in this pandemic are the chronically ill who get admitted to hospitals. They are filling up the hospitals with admissions and ED waiting rooms. Unfortunately, due to the focus on the treatment of COVID, these are chronically ill (people with a history of diabetes, heart failure, sepsis, UTIs, the mental health patients and the chronically non-ambulatory to name a few high risk conditions) have been more isolated and anxious to receive regular treatment. I believe that enforcing vaccine mandates will not encourage them to go to their regular doctor's appointments or take care of themselves on a daily basis but will in fact, keep them more isolated due to anxiety of getting COVID and as a result, fill up our hospital ED waiting rooms.

Furthermore, I know many of the "unvaccinated" individuals and enforcing such a mandate of vaccine passports will not increase the chances they get the COVID vaccine. Instead, it will destroy businesses with unnecessary regulation and decrease their customers. The local or state governments could not supply all businesses with necessary resources and monetary funds to keep their businesses from sinking. Businesses and individuals are already leaving the state and this will increase those numbers.

Finally, as a son of an immigrant, I feel this will only sow inequity and increase distrust of government authority. Since African Americans and Hispanics have some of the highest unvaccinated numbers in the country, I believe coercing them to receive the vaccine will not encourage them to get a vaccine that they already do not trust. As a result, they will feel left out of businesses and will not be able shop for their basic needs increasing inequity in our community.

I object to all types of vaccine passports in Kitsap County and encourage the commissioners to "take no action and allow the current situation to play out."

Sincerely,

Matthew Pesely

Dear Elected Officials,

Recommending or requiring a vax passport is discriminatory to people with disabilities who have a right to public accommodations and is in violation of Constitutional rights & the Nuremberg Code. It's an affront to the privileged and confidential doctor patient relationship. Your legal liability is about to go through the roof. A vaccine passport would be an undue burden on small business and doesn't benefit public health or our community.

It's not ok to prohibit public comment. You work for the tax payers of kitsap county.

My family has lived in Bremerton since 1981 to present day.

How dare you consider separating families and dividing communities over this issue. It's not too late to make the right choice. This is your jurisdiction. Tell the WA State DOH to stay out of our business.

Thank you.

Too many back and forth requirements not resulting in any answer. Please let the people decide what's best for themselves.

Do you get to make suggestions and listen to all involved? Probably yes. When you have enforced requirements how does that make you feel? Or do you enjoy your freedom of choice?

We all want this to go away, but we all know the vaccines have not stopped this. Prevention is better dealt with up front by informing not enforcing.

How do you feel when some forces you to do something you don't agree with. You can do it but it won't necessarily resolve anything.

Let's be we the people and allow our constitution to allow us to be free as people.

I'm not against the vaccine, I'm against forcing it on others and closing down businesses over something that may or may not work.

Thanks for your time.

Subject: I oppose allowing the Kitsap County Health Department to impose vaccine mandates on any business in Kitsap County.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Keith Grellner,

There is no reason to separate or segregate unvaccinated people, especially when we are all still forced to wear masks. I am vaccinated, and I am not worried about an unvaccinated person giving me Covid. The vaccine will keep me out of the hospital, and that is the reason I got it.

My husband, two daughters ages 22 and 21, and I have all been vaccinated for Covid, two by force and two by choice. I stand by anyone, however, who does not feel comfortable getting a vaccine. I have read stories and seen video testimonies of hundreds of people who have had serious adverse effects from the vaccine, such as constant loud ringing in the ears (tinnitus), paralysis, death, heart problems, Guillain-Barre syndrome, blood clots, menstrual changes, intense headaches that do not go away, intense pain throughout the body that does not go away, visual problems, vertigo, and more. This is not misinformation. This is happening to thousands and thousands of people. In fact, one of my daughters had a horrific and painful reaction the night after she got the J&J vaccine, something she never wants to go through again.

The federal, state, and employer mandates to get a vaccine that has risks such as those listed above and that does not even stop the spread of the virus (see Cornell University, 95% vaccination rate, below) has already been an unethical overreach of power. To force people to choose between losing their jobs/schooling or taking a new vaccine that has not had long term safety testing done and that lists serious risks on its information sheet is wrong. It is also wrong that anyone who suffers a vaccine injury receives no help or compensation, and often when they speak out, they are silenced.

Now, a third booster has been approved for certain groups, and I am very concerned it will eventually be forced on my family. With every shot, comes more risk, and we still don't have any long-term safety data.

I know this is a confusing time. but the governments in this country, and in this case Kitsap County, need to stand for freedom. With masks and social distancing and the current case numbers in this county starting to decline, please do not force or allow businesses to refuse service to people who are not vaccinated for Covid. Please. Please help keep this a free country.

Thank you for your time.

Sincerely,
Michelle Peretti

Statement of Informed Consent and Medical Sovereignty

September 27, 2021

To: Gib Morrow Health Officer, Kirsten Hytopoulos Deputy Mayor At Large Bainbridge Island, Becky Erickson Mayor of Poulsbo, Charlotte Garrido Kitsap County Commissioner District 2, Robert Gelder Kitsap County Commissioner District 1, Greg Wheeler Mayor of Bremerton, Rob Putaansuu Mayor of Port Orchard, Ed Wolfe Kitsap County Commissioner District 3, Keith Grellner RS Administrator

From: David & Melinda Manning

Re: Statement Regarding Informed Consent and Medical Sovereignty

1. David and Melinda Manning are against medical experimentation without verifiable and full informed consent on all potential side effects of said treatment with an unconditional free will choice to refuse the medical experiment on untested or unsafe medical interventions, such as a faulty use of a PCR test or government illegal mandates regarding the COVID-19 experimental vaccine.
2. We assert that no government individual, agency or other corporate representatives have been granted authority over the "PEOPLE'S" private health decisions and we maintain our sovereign control over our bodies in unconditional terms, regardless of a so called "State of Emergency".
3. We assert it is against State, Federal and International Laws that exist regardless of a declared State of Emergency (particularly, unlawfully prolonged ones), to mandate the FDA's (Food and Drug Administration) EUA (Emergency Use Authorization) for COVID-19 "vaccines" or any product or procedures, whether EUA or not, without full informed consent of all ingredients and potential side effects; and to institute illegal mandates such as vaccine passports for access to schools, workplaces, restaurants, etc., is completely unconstitutional and scientifically unsound.
4. We assert that to allow and worse, to facilitate the coercing, shaming, bribing or otherwise forcing citizens into being a test subject in any experiment without full informed consent in order to keep their employment, attend schools, or participate within their communities, is to participate in crimes against humanity.
5. We assert that until such time as the United States of America and its Constitution and the Bill of Rights are dissolved, all citizens as "We the People," citizens, are protected by that Constitution and Bill of Rights along with the Federal and State Health statutes that are codified in the Nuremberg Code. Violations of the Nuremberg code and Bill of Rights is against all the "We the People's" inherent and Constitutional Rights.

6. We assert that none of the 10 codes of Medical Ethics in the Nuremberg document are being honored in these experimental COVID-19 vaccines...None. And without full disclosure as to the ingredients of these gene therapies (i.e., mRNA vaccines), and due to secret proprietary ingredients maintained by the pharmaceutical corporations in question, the basic requirement of informed consent is not possible. See the following link:

<https://nam11.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.cirp.org%2Flibrary%2Fethics%2Fnuremberg&data=04%7C01%7Ckeith.grellner%40kitsappublichealth.org%7C4d16c0756c884c98f73b08d981ee66f4%7C63ea23e1c6c043fe8754515c89aa179a%7C1%7C1%7C637683683208980995%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6Iik1haWwiLCJXVCi6Mn0%3D%7C3000&sdata=ZSBA6wWWL7cMIglUSJGXhQFAybIjTmsayeXpie1QnPY%3D&reserved=0>

7. We assert that “We the People” have the right by law to refuse any products including all EUA drugs technologies, vaccines, EUA tests, masks or medical procedures, EUA investigational products, population genomics programs, EUA healthcare data tracking and surveillance platforms. A lawful application of the terms of a lawful Emergency Use Authorization includes the right to informed consent and the option to refuse. The FDA can only issue an EUA if there are no other cures, treatments or prophylactics available. The FDA has therefore breached this regulation, when it issued the EUA, as they were informed prior to that issuance of alternative and successful treatments such as Ivermectin, Hydroxychloroquine, Zinc, vitamins B, D and C. So, for the FDA to continue asserting that “COVID vaccines” are the only way to “get back to normal” is entirely fraudulent!

8. We assert if any individual representing any business/corporation that chooses to enforce any illegal mandates such as a medical procedure (the PCR test) or medical therapy (the COVID-19 vaccine) on healthy employees, vendors, or sales representatives by strongly suggesting these tests and treatments are necessary, should be offered on an absolutely voluntary basis without any recriminations whatsoever. Otherwise, these corporate individuals may be held liable for any damages, injuries or loss of employment due to refusing the illegal mandates. For employers to threaten employees, vendors or sales representatives to adhere to unlawful dictates is to participate directly in harm being carried out on employees, vendors and sales representatives, and as such these employers may be liable for damages of said harm.

9. We assert that the First Amendment to the United States Constitution prevents the government from making laws which regulate or abridge the freedom religion, the freedom of speech, the freedom of the press, the freedom of assembly, or the right to petition the government for redress of grievances. Since our “We the People” freedoms have obviously been profoundly and unlawfully eroded during this alleged “pandemic” because of unjustified and disastrous lockdown mandates. “We the People”, having all political power, never granted authority to any one, whether a lawmaker, government official, law enforcement official, employer, doctor or nurse to force any medical intervention upon us through their opinions, policies, programs or mandates being falsely presented as law. On the contrary, “We the People,” maintain adherence to the laws that were in place before this virus or any of its variants emerged.

10. We recognize other foreign and domestic agendas at play that are repugnant to the Constitution and Statues designed to protect us and so we firmly denounce them and their influence on our Representatives. We demand an immediate investigation into the fraudulent nature of this, “pandemic” and the unsustainable claim of a “State of Emergency.”

11. We affirm that “We the People” are not feeling protected, but suffocated by arbitrary restrictions based on inaccurate data and unsubstantiated fears. This coupled with unprecedented levels of censorship and fake news based on misleading and ever-changing data, reveals a “public servants” lack of comprehension and memory regarding the oaths “public servants” took to uphold the Constitution of the United States of America. Due to this breach of duty to protect our First Amendment Rights and Trust, the Affiants demand that each of you rectify this breach immediately, regardless of any State of Emergency, whether or not such a state, in fact exists.

12. We demand that you prove that there is in fact, justification for a State of Emergency based on an actually isolated virus called Sars Cov2 or any variant thereof. Claiming justification for the “Emergency Powers and EUA,” that are based

on the rising "Case Numbers" from the Drosten's PCR test, a version of Nobel Prize laureate Dr. Kary Mullis' invention of the PCR test, it will not hold up in court, legally or medically, having been proven to be inaccurate and fraudulent in citing rising case numbers. The Affiants also demand that you provide full disclosure of new laws (not mandates) that grant you authority to exercise this force against your constituents, as no laws exist at this time.

13. We demand you respond to we the people and hear our demands. If you fail to respond to us, within the week, you will have acknowledged trespassing against the Constitutional and God-given Rights of the People that you have sworn to protect as well as participating in the crimes mentioned herein. You further agree, that if you do not respond showing Constitutional Provisions authorizing the before mentioned breaches within seven business days, you will have agreed to the facts herein, that no court shall re-examine this matter as you will have thereby agreed to accept the above-mentioned terms of truth and law. This letter authored by two Citizens of the United States of America and residents in Washington State, in Kitsap County, stands as a Notice of Liability and will be used as evidence of wrongdoing, if needed. In the meantime, the Citizens also demand that you cease and desist coercing the "We the People" into surrendering their right to opt out of PCR testing and dangerous mRNA experiments, gene therapies, vaccines or any medical mandates whatsoever.

The Citizens present this statement, on 27th day of September in the year of our Lord Two Thousand Twenty-one by
(Name)

David & Melinda Manning

Dear Elected Officials;

I am a 40 year resident of Kitsap County and Bremerton. I have enjoyed living here most of my life. I have felt that in many cases the elected officials have put the best interests of the people as a priority in their decisions.

As a concerned citizen and a Covid-19 survivor I encourage you all not to place any mandates in order. These mandates will not serve the best interests of the people of this county. It will hurt the businesses and the people of the county.

My survivorship was not based on anything the medical profession of this county did. When I visited the E.R., their response was there is nothing we can do for you. I had just returned from a Health and Freedom conference where several Doctors spoke of treating patients early on with great success and no deaths. This "pandemic" is only exacerbated by failure to institute early treatment as prescribed by those Doctors having success. The mortality rate in this county has not grown since the beginning of this virus. While one death is to many most have included comorbidity.

Instituting mandates will only exacerbate economic problems for this county's business owners.

The reason for hospital occupancy problems are two fold, one failure to institute early treatment, and the laying off of workers, (nurses, Drs, staff, etc).

There have been some 7000 plus cases in Kitsap County, that means there are some 7000 plus naturally immune people and probably more due to unreported cases. These people, spouse and self included DO NOT need to contaminate our bodies with something that is causing severe side effects, including death.

In closing, I strongly urge you to vote against any mandates. Let this virus take it's course.. I would like K.C. to continue to stand for Kitsap County, instead of Kitsap Communism.

Sincerely Jessica Harty

Subject: PLEASE Oppose Medical Segregation (30 Facts You Should Know)

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

You probably got a BUNCH of these same letters. No need to read it again.
BUT if you're concerned, this is what you should look at:

[30 facts you NEED to know about Covid](#)

I am a resident of Poulsbo. I love this town and I love our community and want to see it thrive, as I am sure you do as well. I'm writing to you to ask you to oppose medical segregation in our community. It is a human right to be able to decide one's own medical care. No person's job or ability to provide for their family should be threatened because they want to decide what is injected into their body. The last time people were forced to undertake unwanted medical procedures, the Nuremberg Code was created to protect future generations. I fear that history is repeating. We trust that our leaders will hear us, and will not rely on unproven data, coercion, peer pressure and politics for the welfare of our community.

The Nuremberg Code states "The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

When you threaten people jobs and their ability to access basic services, you are placing them under duress and coercing them into medical decisions. These vaccinations have only been studied for 6 months time. There is no long term safety data. More and more side effects, including blood clots, strokes, myocarditis and death are being attributed to these products. These vaccinations are not without risk and should not be forced on any person. It is a basic human right to control one's own body autonomy and to make one's own medical decisions! I personally have had family members die from reactions to vaccines. This narrative does not make front page news, but it is heartbreaking to the ones who are suffering through this, and then are now being told to inject the same chemical into our own bodies without due process or understanding of long term health effects. No official guidance on exemptions, whether it be medical or religious, has been administered to the public, and our community of concerned citizens are making frantic decisions. These closed door meetings are causing alarm, and for good reason. Please do not rush health orders and mandates when there are too many questions that remain unanswered.

There are no studies showing that medical segregation improves health outcomes. In fact, similar measures are contributing to an epidemic of suicide, abuse and mental health challenges in our communities. Vaccinated people are just as likely to be infected with and transmit Covid as unvaccinated people. This is the CDC study to prove it. Please read the CDC study of Barnstable Massachusetts, July 2021 linked below.

It has come to my attention, there is a special meeting being conveniently held at 1100 on Tuesday without allowing public to attend or comment.

Therefore, I have provided my input below.

I encourage you to choose option "1" to take no action and allow the current situation to play out.

I DO NOT support any vaccine mandates or requirements for anyone including government employees.

I DO NOT support a requirement for providing proof of a vaccine or negative test to enter any business or indoor venue.

Thank you for your attention to this very important matter

Jack Cahoon

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Keith,

I live right on the boarder of Kitsap County but I spend a lot of time in Kitsap County visiting family and shopping. Thank you for serving on the Health Board.

Please **reject** Proof-of Vaccine Requirement to access business tomorrow. This will hurt business, divide our community that is already divided.

Thank you again.

Best Regards,

Mark Roddy

To board elected officials/public servants;

I'm writing to you to ask you to oppose medical segregation in our community via requirements to show proof of vaccination status. It is a basic human right to be able to decide one's own medical care. No person's job or ability to provide for their family should be threatened because they want to decide what medical procedures happen to their body. The last time people were forced to undertake unwanted medical procedures, the Nuremberg Code was created to protect future generations. History is repeating itself.

The Nuremberg Code states "The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

Where there is risk there must be choice. Especially when it comes to medical procedures.

When you threaten people's jobs and their ability to access basic services, you are placing them under duress and coercing them into medical decisions. I know a few single mamas who have had to choose providing for their family by taking the vaccine. They felt forced and coerced to take the vaccine that they knew had many risks. Because they simply wanted to provide basic needs for their children. They worry about the long term effects from their forced decision to take the vaccine. They worry about their children's futures. If they die or have complications from the vaccine, who will take care of their babies? Who will take care of them? Will you each personally do it? Obviously the makers of the vaccines are all fully immune from liability. All of these single mamas were already infected with and survived covid.

What about natural immunity?

As studies from Israel's highly vaccinated population shows, there is no better protection than natural immunity. What about those that are naturally immune already?

https://www.timesofisrael.com/study-covid-recovery-gave-israelis-longer-lasting-delta-defense-than-vaccines/?fbclid=IwAR07pOUbaa_02d9eD7XceUQtPoNyIpgF-1hbl8fJ1MiR41AOWCApu09aYVQ

These vaccinations are too new to be deemed truly safe. I am all for vaccines. There is no long term safety data on this one though. This is why I believe it cannot be mandated. There have been more and more side effects reported, including blood clots, strokes, myocarditis and death are being attributed to these products. Just recently Dr. Jessica

Rose testified to the FDA that this vaccine should not be recommended for boosters nor given to children. The risks outweigh the benefits to humans. You can watch the entire 8 hour advisory virtual meeting for the FDA here:

<https://youtu.be/WFph7-6t34M>

These vaccinations are not without risk and should not be forced on any person. It is a basic human right to control one's own body autonomy and to make one's own medical decisions! Especially when it involves providing for their families!

Vaccinated people are just as likely to be infected with and transmit Covid as unvaccinated people. This is the CDC study to prove it. Please read the CDC study of Barnstable Massachusetts, July 2021 linked below.

<https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm>

-In this study of an outbreak of 469 people, 74% of the positive cases were fully vaccinated.

-Five people were hospitalized for Covid, four of them were fully vaccinated!

-Vaccinated and unvaccinated people were found to have similar viral loads in their nose and throat, meaning that they are equally likely to transmit the virus to others.

This study shows that vaccinated people are just as likely to carry the virus into a business or workplace. How can you justify excluding unvaccinated people from the workplace or from accessing basic services via businesses? The negative impacts of segregating the community far outweighs any proposed benefit. Please consider the negative impacts of your decisions. Businesses should not be given this burden to police. This is not their responsibility to enforce. They are already suffering enough. So many businesses - the backbone of our country - have had to shut down because they could no longer bear the burden. Let's not add this to our businesses list of burdens to bear.

I believe that if you do make the decision to segregate people based on their medical choices, you will only have further fueled the hesitation to vaccinate. I truly don't believe it will make anything better for anyone. And it will continue to breed mistrust of our local county, city, state, and national leaders and government. Since it does seem that you are not willing to hear the voices of all your constituents. Especially by holding a behind-closed-doors, no public comment meeting. Which makes me ask a question. Is this really about health? Or this really about the federal funding our county may lose by not placing a mandate? Does the city of Bremerton, Poulsbo, or Port Orchard or does Kitsap county receive state or federal funds based on vaccination rates? Our state has one of the highest vaccination rates in the country. When the vaccine came out the goal was 70% vaccinated, I believe? We have met that goal and that does not include the folks who acquired natural immunity. What about those statistics? I would love to see what data you have that makes you feel justified in your decision.

Please don't make a decision that will further divide and segregate our county. Let's find a better solution. Let's treat the sick with available treatment options instead of sending them home with nothing until they can't breathe. Treatment is possible. And it doesn't have to be through the hospital or through vaccine mandates in the form of vaccine passports.

Sincerely,

Yolanda Abastilla

Concerned mother and long-term resident of Kitsap County

Mr. Grellner, There are PRE-HOSPITALIZATION solutions without FORCING people to take an * EXPERIMENTAL vaccine. Refer to action in FLORIDA.

*THE FDA DID NOT REMOVE THE MNRA vaccines from EXPERIMENTAL status. Public news sources were in error.

As a former small business owner for 20 years, I IMPLORE you and the board to consider and investigate EARLY TREATMENT OPTIONS currently used such as Mono Chronal antibodies, available at St. Anthony's, Ivermectin available by prescription and used in and studied in other countries and hydroxychloroquine*

*Dr. Zelenko provides excellent information, Dr. Ryan Cole. All science and data backed.

Again Please consider and information, if not now when?

Diane and Tim

Dear Public Servant,

1. **Can you please direct me to the Washington State Constitution Article that gives you the authority/right to discriminate against another man or woman** (covid shot injected or not, HIV positive or not, gay or not, herpes or not, democrat or not), and **their right to "Life, Liberty and the pursuit of Happiness?"**
2. Can you point me to a contract that each resident of Kitsap County has signed, giving you the right to administrate a vaccine product in their private property (their body) or deny their freedom, movement, access to private businesses, and public facilities owned and financed by "all residents?" If you don't have each individual mans and woman's contractual consent, you would be **trespassing** their God given rights and body.
3. What liability would **you** and your peers accept if any man or woman is harmed by this proposed unconstitutional action? **Unlike federal and state officials, you have no personal liability protection as a representative; you are personally liable for violating the U.S. Constitution, State of Washington Constitution, State Statutes, Local Codes and Federal Criminal Statutes.**

I am making legal notice to you, verifiable to 3rd parties via FOIA requests, so you cannot claim ignorance that any vaccine product verification mandate would likely personally subject you to 42 U.S. Code 1983 liability claims. Also, if you and another vote to mandate a vaccine product or use the color of the law to intimidate/coerce/violate your residents' rights, you will be in violation of 18 U.S. Code 241 and 242 subject to imprisonment. Lastly, you and your peers may be personally liable and tried in an international court for "Violations of Nuremburg Code."

Any vaccine product that you require to be in their body to have access businesses and public spaces, how will you remove it from their body when they leave said areas? **If you can't remove it, what compensation will you provide each man and woman for the taking of their private property (their body) as required by the U.S constitution 5th amendment? Will you personally and Kitsap County put up a \$500 million bond for damages, injuries and punitive damages that will ensure in due time?**

I require you as my representative to deny a vaccine product mandate to have access to private businesses and public spaces within Kitsap County.

42 U.S. Code 1983 Civil action for deprivation of rights
18 U.S. Code § 241. Conspiracy against rights
18 U.S. Code § 242. Deprivation of rights under color of law
18 U.S. Code § 514. Fictitious obligations
18 U.S. Code § 876. Mailing threatening communications
18 U.S. Code § 1001. Statements or Entries Generally

1341 – Fraud and swindles to coerce residents into taking an experimental product that is also an interstate commerce product thus subjecting yourselves and Kistap County to Federal Criminal Statutes

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello,

I am a concerned citizen in Kitsap County and I vote for recommended action number 1. Take no action and allow the current situation to play out.

Though it is **none of your business**, I will share with you that **I am vaccinated** to make a point. It is **scary** that I even need to say that at the start of my statement, because that information is for my healthcare provider and me to be aware about.

This is America, the land of the **FREE**, and people **DO NOT** need the government involved in their healthcare choices. We the people, can make our own decisions that we believe are the right decisions for us personally, which will differ from individual to individual. No one person on this earth is made the same.

Grocery stores and public places **DO NOT** need to know anyone's vaccination status, as that is a **HUGE** invasion of privacy and goes against equal rights and is 100% discrimination. I never in my lifetime thought we would be ever facing these issues, we're supposed to be The United States of America. There is no good that will come out of that path, only allowing people to control us more and more... I imagine a class action lawsuit would be fitting if it is decided that people will be discriminated against for public access.

If people are scared or high risk and they know they should take extra precautions, they can choose to. If there are people who are not scared and not at high risk, they have the right to make what choices align with their comfort level too. If people would rather stay home, they can. If people want to go on and live life, they should be able too. No one should be denied basic public access to live life. I am appalled that this is even a topic for discussion.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello,

This is in regards to a vote that may happen about requiring any vaccines. I am a voter, a mother, a worker, and a Human Being. I have a medical reason why I can't get the vaccine but that shouldn't matter. It should be my choice, there shouldn't be a person telling me what goes into my body. I have a daughter who can't get vaccines normally, this is a family condition. We aren't sick in the sense that getting Covid would kill us, we aren't immunocompromised. Yes we "could" get sick but so can people who do get vaccinated. We are healthy and would live but now have to live in fear of our government. My family has had Covid last year, and we survived. Now having a natural immunity, which it just as good as the one from the vaccine. Please would you take that into consideration with this vote.

Please let my doctor and I decided what I do with my health.

Like all medical decisions, there is no one size fits all answer. And my body is my choice, or so I've been told.

Thank you for your understanding and care

Mrs. Gift

Subject: Vaccine passports

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr Grellner,

I am a health care worker who was vaccinated against Covid-19 early this year. As a healthcare worker, I felt it was my duty to protect myself and my patients even though I was completely unsure of the safety of this MRNA vaccine. My employer recently reopened its vaccine clinics in an attempt to get more of our county vaccinated. I see very few people coming through to take it vantage of this. I believe most people that wanted the vaccine have already received it.

I am against any forced vaccination requirements to the general public or employees by our federal, state, and local governments. Many people have already had it and recovered from the COVID-19 virus and have better immunity than a vaccine can ever provide. I have not heard of any of these new rules making exceptions for those people.

I am against the use of a "Proof of Vaccine Passport" and I refuse to show my vaccine card to any business. I will not dine or attend events where this is a requirement. I feel bad for the businesses that will be hurt in my community if our county makes this a rule. I have already chosen to not dine in or attend events in Seattle or the other counties where this has become a mandate.

I don't feel that it is the role of our government to make such mandates.

Regards,
Jeannine L DeVine
Seabeck, WA

Subject: In Regards to Voting on Vaccine Passports for Kitsap...

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

My fellow Kitsap citizens,

I am writing this email to you because you have a voice. You have a voice that I do not currently have. You are on a committee that will be discussing whether or not vaccine passports should be used in Kitsap County. I am writing to tell you to vote a resounding NO on this idea. Here are the reasons, in no particular order, as all are equally important for consideration:

(1) In local government, you represent all of us. This includes people who are unvaccinated. The people not getting vaccinated are not "anti-vaxers", and not all of us are Republicans. We are doctors, veterinarians, psychologists, teachers, moms, dads, government workers, state workers, business owners... We come from every walk of life, every political stance, and every race and gender. As tax payers, as voters, as human beings, we deserve to be heard with open ears and open hearts.

(2) Some of the people not getting vaccinated choose not to do so because, along with their doctors, they know their medical history and are concerned about blood clots if they get the vaccines. There is no guarantee if you get blood clots or not, and there is no recourse for those who become disabled or die from the vaccine or their family members. To some, medically speaking, the vaccines are more harmful than COVID is. I know this first hand. Even though these cases are rare, they DO happen. My aunt is one of those people who became vaccine-harmed after her first dose, because she has an MTHFR gene variant that causes her to be susceptible to blood clots in general. When she got her first shot, she was hospitalized for 3 days and her doctor told her not to get the second vaccine because she would die. If her county in Arizona decided to mandate vaccination passports, she would be ***isolated*** from going to restaurants, coffee shops and businesses. She would be **segregated** from the community, through no fault of her own. This goes for cancer patients, people who cannot take it for religious reasons. This violates their right to choose what goes into their bodies. If this really is about altruism, than these people also need to be considered for their health and wellbeing. They will be publicly ostracized right alongside our family and neighbors who are also unvaccinated.

(3) Some of us didn't get the vaccine because we've already had COVID, (there are a few I know who've even had it more than once, very mildly), and they are already protected from the virus with natural immunity. Those of us who've had COVID now have the same protections as the vaccinated, -- the science says we are actually more protected -- yet we are not being considered for inclusion in the vaccine passports... You must ask yourselves WHY? Something doesn't add up. Is this really about health, or is this about power? And if it's about altruism as most claim it to be, than why are the medically exempt being segregated from their community? What happens when people won't be allowed in grocery stores to buy food without a vaccine passport? This is the slippery slope you're playing on when you're discussing vaccine mandates.

(4) Some don't want the vaccine because it's unnecessary risk to their health if they happen to have a reaction. They'd rather get COVID than take the chance of getting the possible side-effects of the vaccine. When people are *forced*, this takes away the **law** of informed consent. It breaks constitutional rights - rights you were hired to protect at all costs.

(5) Vaccine passports are another way that Kitsap's economy will be negatively affected, and there is no reason to do this type of harm to small businesses, nor is it a noble thing to put that burden on a business to enforce such mandates -- unless you are willing to hire bouncers for every single small business to do so. I guarantee you that there will be sit-ins, and protests, and business owners who will not pay the fines that would go along with not upholding a vaccine passport mandate. ***Nowhere*** have restaurants been shown to increase likelihood of getting COVID, and the same goes for gyms and other public places that follow the mask guidelines. This fact alone should guide your logic on whether or not to vote "no" on a vaccination passport idea.

I am **not** an anti-vaxer. I am not even a Republican! I **am**, however, very concerned about where this country, and now, my own Kitsap County is headed. Please. Don't support segregation. Vote NO on the very idea of vaccine passports in Kitsap. People's livelihoods, people's ability to feed their families, and possibly their very lives depend on your vote. Please do the right thing. Vote NO on vaccine passports.

Hello,
I hope this email finds you well.

Like so many others, I OPPOSE vaccine passports for Kitsap County.

Any attempt to impose vaccine passports is a gross overreach of government authority and any/all consideration must be STOPPED immediately.

We the people ARE the government and I respectfully remind you and other elected officials that your role, above all else, is to ensure our freedoms are upheld.

Clearly there are many potential negative outcomes to vaccine passports and you must immediately take into consideration the horrible impact to our economy through the continued stress and hardship on local businesses, and the unethical and unconstitutional segregation and discrimination of those with medical and religious exemptions.

I respectfully demand that any/all proposals or attempts to impose vaccine passports be STOPPED immediately!

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

To whom it may concern:

We would like to go on the record that we are vehemently opposed to segregation of people based purely on vaccination status. This is unscientific, violates medical ethics, and the discriminatory fallout of it is immoral. It is also highly political and therefore even the appearance of discrimination should be rejected until such a time as there is solid epidemiological evidence to prove otherwise. Based on currently available data, sufficient evidence to make such a decision will be at least several years from now. There is no validity to false claims that such a decision must be made now.

Sincerely,
Philip J. Davenport

Subject: Whether to Require Vaccination

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Keith,

I have enjoyed living in Kitsap Co for 40+ years and this is the first time I've ever written to Kitsap leaders.

Regarding whether to require vaccination to go about our daily living, PLEASE: Protect our God-given right to choose what we feel is best for our bodies. Please: take no action and allow the current situation to play out. And don't hurt businesses.

We've already seen that many people are contracting Covid in spite of being vaccinated. There are many options for folks who do not want to be exposed to Covid. They can order groceries and pretty much everything else under the sun with home delivery.

We've already seen that many people are having severe reactions to Covid vaccinations even including death. Do not take our rights away to choose for ourselves.

Finally: if you must choose to limit our freedoms PLEASE make provision for those who already have immunity! Many in our community have already had Covid and it can be proven by antibody testing. Don't force folks who are already immune with natural immunity to take the vaccine which has no medium or long-term safety proven and DUBIOUS short term safety! A study in Israel of 700,000 people show there is a much, much higher likelihood of someone vaccinated to contract a breakthrough Covid infection than someone who has already had it.

If you feel there must be a "vaccine passport", it should rather be an "IMMUNITY PASSPORT" to include both those vaccinated and those who've already had Covid.

Sincerely,
Rebecca L. Hageman, RN

Hello again Mr. Grellner,

A couple of last points lest you think that I don't understand the gravity of the situation. My husband's cancer surgery had to be rescheduled last year due to Covid and the shutting down of the Silverdale surgery center, my husband and I both had Covid in March of 21 and recovered. My husband was severely burned in a car fire in July and due to the shut down of Harrison in Bremerton we ended up spending an entire evening at the ER in Gig Harbor.

I do understand the gravity of the situation, however, government control cancelling the freedoms guaranteed by our Constitution is the worst thing that could happen for Americans now and future generations.

On Sun, Sep 26, 2021 at 3:52 PM Kelly Donalson <adgappraisalservice@gmail.com> wrote:

Hello Mr. Grellner,

Yesterday I had breakfast with a group of friends and, while talking about vaccines and proposed mandates, it came to my attention that the Kitsap Public Health Board would be having this "speical" meeting on September 28. Now, I know that is not how the word "special" is spelled but that's how it reads on the kitsappublichealth.org website. Hmmm...

I have some questions and comments about this meeting:

1. Why was this meeting not made common knowledge to the citizens of Kitsap County? Even on the home page of the website it is not mentioned, only the meeting on October 5 is. I had to search hard to find the link to this meeting and I believe you have left most Kitsap County residents uninformed in regard to who is making decisions about our health care choices and the choices we make over our own bodies.
2. The public is not being made aware of the fact that there are EUA fact sheets from the manufacturers of these vaccines that contain numerous warnings, again, we must search for the information. In a time where even an aspirin commercial contains warnings, the tv ads for the Covid vaccine show nothing but a little box checked "safe". These vaccines are not safe for all, there have been a wide variety of adverse reactions to them. And, they all say not to use the vaccine if you have known allergies but how does a person know if they have allergies if they've never before been exposed to the ingredient or substance they are allergic to? I am allergic to codeine but didn't know it until I was given codeine after a surgery years ago. Finding out that I was allergic to it was not a pleasant experience.
3. No one knows what the long-term effects of the vaccine are as they have not been out long enough to have any long-term information. Johnson's Baby Powder, which was a staple in households as far back as I can remember, is now proven to cause cancer.
4. The public is not being made aware that none of the available vaccines for Covid have been tested with any other vaccines (as stated on the EUA fact sheets). This is the time of year for flu and pneumonia vaccines, and I heard a Bartel's commercial today encouraging people to come get all of their vaccines for the season there. How much time is necessary between the Covid vaccine and other vaccines? If they haven't been tested, how do we know? The CDC is stating that the Covid vaccine can be given in the same visit as other vaccines

based on experience with OTHER vaccines, not based on experience with the Covid vaccine which is not like OTHER vaccines. Scary. Maybe I'll forgo my flu vaccine this year.

5. What about people who have had Covid? They aren't eligible for the vaccine for 90 days if they have been treated with monoclonal antibodies or convalescent plasma.
6. Why is no one talking about natural immunity? If God sees fit to let someone recover from Covid (which is what happens in the vast majority of cases) He has granted them natural immunity. Why does this seem to mean nothing to the health care world?
7. Why aren't preventative measures (diet, exercise, vitamin D, sunshine) being encouraged? It is a disservice to the community to not encourage the measures which deter the virus.
8. Kitsap county is populated by a very large group of military personnel, both active and retired, who have given of themselves to protect the freedoms granted by the Constitution. Mandates violate those freedoms but the health care industry, and the Governor, don't seem to care.
9. If a woman has the right to decide what to do with her own body, that decision doesn't just apply to her uterus. Or does it?
10. People are flooding our borders without even being tested, let alone forced to have a vaccine. What makes anyone think it's okay to force American citizens into a vaccine while illegal immigrants can flood our country with the virus?
11. The mandates in place already have caused depression and suicide. That's a fact. They've also caused obesity in much of our population, our children especially. It's a known fact that obese people are more at risk for Covid. What's the next mandate, overweight people have to weigh in every week and be tested to see if they ate anything fattening?
12. Maybe if the emergency room at Harrison in Bremerton hadn't been closed there wouldn't be "intermittent bottlenecks" at the other ERs in the area.

At the breakfast I mentioned at the beginning of this email, 50% of our group had been vaccinated but 100% of the group agreed that mandates are not only not the way to get people on board, but they also put business owners in charge of doing something they are not qualified to do. In addition, they put employees at risk of having to defend themselves from irate customers who feel their right to medical privacy is being invaded, which it is.

I am not anti-vaccine. As a mother, I've made sure that my daughter was vaccinated properly and on time. I am, however, anti-privacy invasion, anti-mandate and anti-public disinformation or withholding of information to the public. My medical records are my business, I can't find anywhere in the HIPPA rules that says a restaurant owner can have access to my medical records.

I hope you will take these comments into consideration and decide to take no action that disregards Kitsap County residents' freedom, which is protected under the Constitution and a vital part of what makes America "special".

Thank you,
Kelly Donalson

Subject: September 28, 2021 Special Meeting Comments Concerning Covid Mandates/Recommendations

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To: All Connected with the Kitsap Public Health District Meeting Concerning Covid-Related Mandates or Requirements (Discriminatory Measures)

I would ask on behalf of all Kitsap County residents that you not impose any restrictive mandates, requirements, or recommendations on us. They will result in gross discrimination. We are all being affected in negative ways by covid, and government interference will make it worse. Often, the consequences aren't seen until after the damage is done.

Our medical care has never been one size fits all. It's not a sound approach to medicine. We need to recognize individual differences and situations. There are those who have natural immunity after having had covid, and others with medical conditions that make it unsafe for them to get the shot. In my son's case, he's had medical issues over the years that put him at risk from the shot. He, like other unvaccinated, takes all necessary precautions with masks and social distancing, and has stayed healthy throughout the pandemic. But, if required to get the shot to keep the job, he will walk, and have no income. This is a form of coercion, NOT choice.

ABC's Facebook Page recently asked for input about family or friends who died from covid while unvaccinated. Instead, they received over 39,000 comments from people directly impacted by having severe side effects, even deaths, from the shot itself. These deaths or debilitating results should matter too, and they are a valid concern. Get the shot even if it kills you is not a persuasive argument.

No one should be treated as a second-class citizen nor should we have a two-tier society built around the vaxxed and unvaxxed. It's wrong. It shouldn't be acceptable in our society to disregard one group in favor of another. We should never think it's okay to prevent one group from buying food and other necessities in person, or going to other public places like movies or gyms. Give people credit for the ability to take precautions and be safe and keep others safe through their own good common sense.

We should NOT recommend that government or private businesses' employees be required to receive the shot. There is already a shortage of workers and a portion of this is due to the state's mandate to be vaccinated. An already stretched thin line of medical and other first responders has been stretched further because some are walking away from their careers. Again, getting the shot to keep your job is coercion, not choice. And, you can't just produce thousands of skilled employees to take the place of the ones you've pushed out.

Another facet to consider is the discrimination this will impose on our community. It is a fact that people of color; African Americans, and Latinos, have the highest unvaccinated rate across the board. It isn't because of lack of access. It's because of lack of trust in our government and concern for their health, and side effects from the vaccine. So, you're now going to prevent them from meeting in public places, or keeping their hard-earned jobs and ability to provide for themselves?

In light of all these issues, I highly recommend that you don't impose any requirements or recommendations. It is a discriminatory act toward people of color, those with disabilities, those with medical conditions, and those who want the freedom to make their own decisions.

Thankyou for your consideration.

Sincerely,

Jeri Stockdale

Kitsap Health Board Members

I write to you to express my grave concern and provide an exhortation to not implement vaccine mandates throughout our community. I am a pastor in our community and have been a resident of Bremerton all of my life. The measures you are considering in regards to vaccination for employees and entry upon businesses are unjust and will bring greater havoc and chaos in our community. There is more towards the overall health of an individual than their physical health. The ability for one to work, provide for their family, and freely conduct business in our community drastically impacts one's mental, emotional, and spiritual health. Implementing vaccine mandates and requirements for business is unjust and will bring about a far worse situation in our community than we find today.

As a Christian, I believe that Jesus is the Creator, Sustainer, and Ruler of the world. When He died and rose to secure the forgiveness of sins and salvation of all who might believe, the Bible describes Him as being appointed to the right hand of God and given all authority over creation. The Bible teaches God rules and is authoritative over all, yet has put leaders in place "For there is no authority except from God, and those that exist have been instituted by God." (Romans 13:1) This means that God was pleased to appoint leaders, yet it is a delegated authority from God. The scope by which government is established by God is to punish what is evil and reward what is good. Government is established by God as a way to maintain civility and peace amongst humanity. Vaccine mandates for employment and conducting business opposes civility and peace amongst humanity.

The pursuit to require employees to be vaccinated and businesses to check vaccination status is wrong and unjust. It is unjust as it is outside of the scope of delegated authority that God has permitted governing authorities have. Your language that the government ought to lead the way in vaccination mandates is built on a lie. You have not only bought into this lie but are looking to implement and provide administration forcing this lie upon citizens. The lie is that this is within your jurisdiction to dictate health decisions for employers and citizens.

I believe that the authority God has delegated in this world regarding medicine is a household matter. Decisions are made with the wisdom of doctors/medicine, but it is unjust for a family doctor to force medication, vaccinations or other practices on households. Rather, households permit the authority of a doctor into their life as wise counsel but it's a household decision.

I charge you as a pastor and minister of the Lord Jesus Christ to reverently consider the God of the universe, your leadership and your decision making. You will have to give an account for your life and also for your leadership and decisions with the role God has appointed you to. If this is truly unjust as I declare to you it is, your implementation of these requirements is not simply an unjust decision, but you would be bringing upon injustice to the citizens and employees by which you represent and impact.

The unjust decisions for vaccine mandates have already had negative consequences within our community. Multiple members in our church have already been told they will be fired because they refuse to be vaccinated, due to a conscience that does not permit it. As a Christian, whatever we do we ought to do by faith, whether that is to be vaccinated or not vaccinated. The Bible warns a Christian to go against their conscience and that if we do, it is sin. As a result of these coercive vaccine mandates like the ones you are considering, multiple families will be unemployed in our church. It is our duty and joy to come around these families to care for them and provide for them, but what happened to them is unjust and wrong.

If any of board members profess to be a Christian, you also need to consider the ramifications before Jesus for your decisions. If you wrongly support the implementation of such measures that are unjust, it is fitting and proper for Christians in our community to appeal to their pastors and church to bring you up on charges of church discipline and have those presented to your pastor and church. This is fitting and proper because what you would be doing is wrong and unjust, therefore sinful against your brothers and sisters in Christ.

Please know that I am praying for you. I desire for you to do what is right and lead our community with courage, wisdom, and respect. I desire for you and our community to flourish. I believe the decision to mandate vaccinations for employees and doing business is unjust and threatens the flourishing of our community. Out of this concern for you and our community, I offer my prayers and this letter. May God be gracious to you and pour out His wisdom upon you to make just decisions.

Sincerely,

Pastor Brandon Johnston

Subject: Against Vaccine Mandates, a plea to look into the REAL Science.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To whom it may concern,

I've heard from multiple sources that a vaccine mandate may be coming to Kitsap, or that this meeting may be deciding whether or not to do that.

Do not enact vaccine mandates.

The restaurant industry and small business industry in Kitsap can not take another hit. A vaccine mandate will kill even more local businesses, and put even more residents out of work.

Vaccine mandates do not work. If someone does not wish to take an experimental drug they should not have to. Mandates imply that our administration does not respect the bodily autonomy of this community. The community that has been working and functioning without the vaccine for over a year already.

If health and safety options have not been worked out for a population that has some vaccinated some not, this is a failure of the administration and the producers of the drug. People who have taken it seem to feel entitled to others taking it to increase the effectiveness of the drug. It is a slap in the face to every worker who went to their job and kept our community functioning without vaccines and without full information on the new virus spreading around the country.

We all went to work. We all took risks. And one by one community by community we are being told our choices no longer matter. We are only allowed to risk ourselves for convenience.

We now have a lot more information than we did last year. Let's please be real here, looking at the data-- this mandate will not help the COVID situation. It is here. Virologists all over the world say it is going nowhere. It will continue to mutate. We will continue to need more vaccines, more boosters, more restrictions unless we address this problem at its source. Healthy eating, healthy behavior and natural immunity are the most useful tools we have. Support individual health. Educate people on how to boost their body's immunity. Early COVID care options in hospitals need to be expanded. People need resources and information to care for low severity COVID cases at home. We need to staff up our hospitals that are struggling.

Last year I watched everyone I know either lose their jobs or go broke without work. I watched as studies came out that said the food industry is not where the spread is coming from. Yet those studies continue to be ignored and the industry continues to be a target, which is so unfortunate because people in this industry do not have a lot of savings, health insurance or any financial protection. We have used up our unemployment and any extra money for the lock downs... At this point I have to question how the lock downs actually helped us? The problem is still here, according to the media its somehow worse now? Apparently we are right where we started... But now everyone is burnt out and our

resources drained. Is it possible these mandates will end up being on that same level? I know I'm not the only Kitsap resident who can't afford for us to go through that again.

And on the subject of spread, there is no evidence vaccines reduce spread. They only reduce symptoms for the individual. And since asymptomatic COVID has been the number one concern this entire time, a vaccine makes no difference. The information is out there. Seeing mandate after mandate makes me think this isn't a matter of looking into the studies and science of the issue, but following other politicians and constituents. There is probably a lot of pressure or fall in line.

There are also a large number of side effects for the vaccine that are being ignored. When they say no side effects found in vaccine trials what they mean is the trials intention was not to find side effects, but to test vaccine effectiveness (reports are now coming out that Pfizer exaggerated effectiveness in their trials). It is outrageous that this is being forced without long term studies.

The companies producing these vaccines have a terrible track record, Pfizer having to pay out one of the biggest criminal fines in history for misrepresenting and over prescribing their drugs. Johnson & Johnson knowingly gave women of color ovarian and cervical cancer advertising the use of baby powder in their underwear every day. This method does nothing for intimate health. They literally sold a needless use for their product and then continued to do so knowing women would be injured.

I would take all of this into account. I would hope my letter gets read or at least considered during the meeting to decide.

Decide on our community, and our ability to continue to be safe and healthy. Address those that have issues, help our vulnerable population. But do not force a healthy population to risk their health, ignore their beliefs and lose their choice, all for a brand new medicine with no real evidence of true effectiveness to "end COVID", something we know will never happen.

We need to switch gears. We need to revisit how we are handling this.

I'll leave you with one example of mandates and how they are about the effect the entire economy of our community. The shipyard is already dealing with the mandate from the President. Half of their employees do not want to take the vaccine. The shipyard is probably our largest employer. If they go through with what they're being forced to do, there will be huge impacts to the community.

Please do not force us into destitution. Make smart decisions for our community. Thank you for your time and for reading my letter.

In regard to the vaccine for Covid 19, I am writing to ask that you honor our God given right to decide what does and does not enter our bodies. Please vote to take no action.

I currently suffer from idiopathic tracheal stenosis, which is the narrowing of the trachea. Doctors do not know what caused this. I have to have surgeries regularly and steroid injections to keep my airway open. I also have allergies caused by an auto-immune disorder. Again, the cause is unknown.

I have done my own research and sought out my own doctors to get me the treatment I know I need.

I have also done my own research into the Covid vaccines and other vaccines. I choose to not get the flu vaccine because in the past I have experienced worse illnesses as a result of the vaccine. I trust my immune system to protect me from the flu. I eat a healthy diet and take supplements as needed. I don't want to put anything else in my body without it having a proven track record. The Covid vaccines are too new and cannot be trusted.

The hospitals are experiencing staffing shortages because of the vaccine mandate. These are the same frontline workers we praised a year ago as they fought to keep people well. We shouldn't require them to take a vaccine that cannot be trusted. They deserve the freedom to choose what they put in their bodies.

Please be mindful as you make decisions that will impact our county.

Statement of Informed Consent and Medical Sovereignty

September 27, 2021

To: Gib Morrow Health Officer, Kirsten Hytopoulos Deputy Mayor At Large Bainbridge Island, Becky Erickson Mayor of Poulsbo, Charlotte Garrido Kitsap County Commissioner District 2, Robert Gelder Kitsap County Commissioner District 1, Greg Wheeler Mayor of Bremerton, Rob Putaansuu Mayor of Port Orchard, Ed Wolfe Kitsap County Commissioner District 3, Keith Grellner RS Administrator

From: Justin and Camille Wood

Re: Statement Regarding Informed Consent and Medical Sovereignty

1. Justin and Camille Wood are against medical experimentation without verifiable and full informed consent on all potential side effects of said treatment with an unconditional free will choice to refuse the medical experiment on untested or unsafe medical interventions, such as a faulty use of a PCR test or government illegal mandates regarding the COVID-19 experimental vaccine.

2. We assert that no government individual, agency or other corporate representatives have been granted authority over the “PEOPLE’S” private health decisions and we maintain our sovereign control over our bodies in unconditional terms, regardless of a so called “State of Emergency”.
3. We assert it is against State, Federal and International Laws that exist regardless of a declared State of Emergency (particularly, unlawfully prolonged ones), to mandate the FDA’s (Food and Drug Administration) EUA (Emergency Use Authorization) for COVID-19 “vaccines” or any product or procedures, whether EUA or not, without full informed consent of all ingredients and potential side effects; and to institute illegal mandates such as vaccine passports for access to schools, workplaces, restaurants, etc., is completely unconstitutional and scientifically unsound.
4. We assert that to allow and worse, to facilitate the coercing, shaming, bribing or otherwise forcing citizens into being a test subject in any experiment without full informed consent in order to keep their employment, attend schools, or participate within their communities, is to participate in crimes against humanity.
5. We assert that until such time as the United States of America and its Constitution and the Bill of Rights are dissolved, all citizens as “We the People,” citizens, are protected by that Constitution and Bill of Rights along with the Federal and State Health statutes that are codified in the Nuremberg Code. Violations of the Nuremberg code and Bill of Rights is against all the “We the People’s” inherent and Constitutional Rights.
6. We assert that none of the 10 codes of Medical Ethics in the Nuremberg document are being honored in these experimental COVID-19 vaccines...None. And without full disclosure as to the ingredients of these gene therapies (i.e., mRNA vaccines), and due to secret proprietary ingredients maintained by the pharmaceutical corporations in question, the basic requirement of informed consent is not possible. See the following link: <http://www.cirp.org/library/ethics/nuremberg>
7. We assert that “We the People” have the right by law to refuse any products including all EUA drugs technologies, vaccines, EUA tests, masks or medical procedures, EUA investigational products, population genomics programs, EUA healthcare data tracking and surveillance platforms. A lawful application of the terms of a lawful Emergency Use Authorization includes the right to informed consent and the option to refuse. The FDA can only issue an EUA if there are no other cures, treatments or prophylactics available. The FDA has therefore breached this regulation, when it issued the EUA, as they were informed prior to that issuance of alternative and successful treatments such as Ivermectin, Hydroxychloroquine, Zinc, vitamins B, D and C. So, for the FDA to continue asserting that “COVID vaccines” are the only way to “get back to normal” is entirely fraudulent!

8. We assert if any individual representing any business/corporation that chooses to enforce any illegal mandates such as a medical procedure (the PCR test) or medical therapy (the COVID-19 vaccine) on healthy employees, vendors, or sales representatives by strongly suggesting these tests and treatments are necessary, should be offered on an absolutely voluntary basis without any recriminations whatsoever. Otherwise, these corporate individuals may be held liable for any damages, injuries or loss of employment due to refusing the illegal mandates. For employers to threaten employees, vendors or sales representatives to adhere to unlawful dictates is to participate directly in harm being carried out on employees, vendors and sales representatives, and as such these employers may be liable for damages of said harm.

9. We assert that the First Amendment to the United States Constitution prevents the government from making laws which regulate or abridge the freedom religion, the freedom of speech, the freedom of the press, the freedom of assembly, or the right to petition the government for redress of grievances. Since our “We the People” freedoms have obviously been profoundly and unlawfully eroded during this alleged “pandemic” because of unjustified and disastrous lockdown mandates. “We the People”, having all political power, never granted authority to any one, whether a lawmaker, government official, law enforcement official, employer, doctor or nurse to force any medical intervention upon us through their opinions, policies, programs or mandates being falsely presented as law. On the contrary, “We the People,” maintain adherence to the laws that were in place before this virus or any of its variants emerged.

10. We recognize other foreign and domestic agendas at play that are repugnant to the Constitution and Statues designed to protect us and so we firmly denounce them and their influence on our Representatives. We demand an immediate investigation into the fraudulent nature of this, “pandemic” and the unsustainable claim of a “State of Emergency.”

11. We affirm that “We the People” are not feeling protected, but suffocated by arbitrary restrictions based on inaccurate data and unsubstantiated fears. This coupled with unprecedented levels of censorship and fake news based on misleading and ever-changing data, reveals a “public servants” lack of comprehension and memory regarding the oaths “public servants” took to uphold the Constitution of the United States of America. Due to this breach of duty to protect our First Amendment Rights and Trust, the Citizens demand that each of you rectify this breach immediately, regardless of any State of Emergency, whether or not such a state, in fact exists.

12. We demand that you prove that there is in fact, justification for a State of Emergency based on an actually isolated virus called Sars Cov2 or any variant thereof. Claiming justification for the “Emergency

Powers and EUA,” that are based on the rising “Case Numbers” from the Drosten’s PCR test, a version of Nobel Prize laureate Dr. Kary Mullis’ invention of the PCR test, it will not hold up in court, legally or medically, having been proven to be inaccurate and fraudulent in citing rising case numbers. The Affiants also demand that you provide full disclosure of new laws (not mandates) that grant you authority to exercise this force against your constituents, as no laws exist at this time.

13. We demand you respond to we the people and hear our demands. If you fail to respond to us, within the week, you will have acknowledged trespassing against the Constitutional and God-given Rights of the People that you have sworn to protect as well as participating in the crimes mentioned herein. You further agree, that if you do not respond showing Constitutional Provisions authorizing the before mentioned breaches within seven business days, you will have agreed to the facts herein, that no court shall re-examine this matter as you will have thereby agreed to accept the above-mentioned terms of truth and law. This letter authored by two Citizens of the United States of America and residents in Washington State, in Kitsap County, stands as a Notice of Liability and will be used as evidence of wrongdoing, if needed. In the meantime, the Citizens also demand that you cease and desist moving further under RCW 70.05, coercing the “We the People” into surrendering their right to opt out of masking, PCR testing and dangerous mRNA experiments, gene therapies, vaccines or any medical mandates whatsoever.

The Citizens present this statement, on 27th day of September in the year of our Lord Two Thousand Twenty-one by Justin and Camille Wood.

Dear Mr. Grellner,

I am writing, as a consumer, to state my opposition to the vaccine mandate proposed in Kitsap county to require people to have a vaccine card to patronize businesses. Not only is this detrimental to the businesses, many of them small and already hit hard by the pandemic, it violates the freedom of choice to spend our money where we wish.

Please vote down this ridiculous and unfair mandate.

Thank you,

Pam Honegger

What sort of input are local businesses and officials submitting to Kitsap Public Health? Here are my thoughts, let's stand up for the little guy...it's been hard enough to keep open as it is!

Here is the Kitsap Public Health Board Special Meeting Agenda for 9/28, Recommended Actions on Pages 5 & 6:

https://kitsappublichealth.org/about/files/agendas/2021/0928_BOH_Agenda.pdf

Hi Keith-

It's my hope that the Kitsap Public Health Board will follow the science and decide that requiring additional vaccine requirements in Kitsap County is unnecessary.

The top employers in the area already require vaccines

- Department of Defense
- All Contractors who work at/for department of defense
- Olympic College (staff and students)
- Hospitals
- School Districts
- All other state and federal agencies
- All businesses that employ 100+ employees

What percentage of Kitsap County needs to get vaccinated for it to be enough?

Small businesses will be impacted by this the most. Especially restaurants. I don't know if you've tried to eat out lately, but I eat out at local restaurants at least 3 times a week, and I can tell you that restaurants are already struggling to hire enough staff. Adding additional requirements for employment and then requiring those establishments to have to hire more people to track the vaccination status of their employees and patrons is excessive.

We can assume that if the majority of employers already require vaccinations, then the majority of people who are patronizing local businesses are vaccinated.

I think that the Health Board should wait until the State and Federal mandates are in effect and see if further measures are needed.

From what I read, there doesn't seem to be any clear benchmarks locally or nationally regarding vaccines. I hope that our county will decide that additional mandates, additional stress on business owners, additional red tape, etc is superfluous.

The CDC is very clear that vaccinated individuals can still spread and contract COVID. Does requiring vaccines to enter businesses REALLY make people safer? or does it just make them FEEL safer? or is it about MAKING people do something they don't want to do (get vaccinated)?

What is the Health Board's objective? Safety? Feelings? Control?

I urge you to let the mandates/requirements that are already in place to be sufficient. Assume that the federal government chose to make their requirements for businesses over 100+ employees for a reason and don't make more restrictive recommendations.

Thank you,
Beth Michaelson

Subject: Vaccine Mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Keith Grellner,

My family and I live and work in Kitsap County. We oppose the Kitsap Health Department imposing the vaccine passport/mandate. There are so many small businesses that have closed or are still struggling that to further limit the number of customers would crush them not only financially but personally, mentally and spiritually.

I am not opposed to someone else wanting to get the vaccine for their own reasons; that is THEIR choice. I am not opposed to it for myself in the future. But for now, my family and many others do their part in not spreading the virus. When my son and I both tested positive we quarantined ourselves; took extra vitamins and stayed hydrated. No one else in our household (8 people) tested positive or had any symptoms. We are very thankful to have had only mild symptoms but now are bodies are equipped with the antibodies to fight the virus. I feel the bigger push should be for better health and better treatments.

Fear, Stress, and Anxiety weaken the immune system and that is what all of the passports and mandates are doing to our communities.

Thank you for your time,

Jill Hannem

“Fear of man will prove to be a snare, but whoever trusts in the Lord is kept safe.”

Committee Members,

I'm the Proud owner of SageMicroSpas here in Poulsbo. I opened my business in what I thought was the end of this nightmare in September 2020. I've loved working and serving the Poulsbo and greater Kitsap community. I have a successful and growing practice and it continues to grow to this day.

On a personal note, It took me decades to know what I really wanted to do with my life and through injury and experience it led me to massage therapy. I have several spinal and knee injuries from my military service. Providing wellness to others as well as being in that community has and does improve my ability to function too.

I provide a valued service that promotes wellness and in fact in the last year, I've had ZERO Covid transmissions in my clinic. I've worked on vaccinated, unvaccinated people alike. I personally have not been sick since Dec 2019. Unlike other practitioners I physically touch people in my work not consult in a treatment room through masks... so please let that sink in when thinking about ZERO transmissions.

In my humble opinion having been a first responder for 20 years and now a practitioner in the state of WA, it would be illegal, discriminatory and flat out wrong for me or anyone else In our community, state or country to ask for anyone's vaccine status coming in for treatment or being able to conduct any business in the public sector. That is between people and their doctor.

We already prescreen for sickness, Covid screen, sterilize and sanitize equipment, touch points and use clean linens.

We've asked quite a bit from the public already, this is a step too far!

Facts:

People who have chosen to get this experimental shot(s) are not safer than those who have natural immunity, antibodies from previous infection or otherwise good health. People who choose to contract and beat a virus (since it's inescapable) that by the "CDC" numbers still has a survival rate of greater than 99% in our most vulnerable population. Have you or the board you will be sitting on tomorrow read the study that came out of Israel two weeks ago? Plenty of information out there that taking these shots do not do anything to stop spread and nobody should be forced to put anything in their body, period. Forcing people to do so is flat out Medical Tyranny. It's not who we are as a people, not what we should be promoting.

Furthermore, even the masks that we are being told to wear are NOT doing a thing to protect people. In fact, rebreathing your own expelled air creates many other health concerns.

I have been forced for the past year to wear a suffocating mask while working on people. You ever workout in a mask? Run with a mask? That's what we do in massage, move work and use our muscles. I have had headaches non stop post work days since this began.

During the bird flu outbreaks I tested the N95 masks from 3m Corp right here in the Puget Sound, while in the Coast Guard. We wore a variety of masks to see if they were effective for preventing contraction while working on aquatic structures loaded with migratory bird droppings. I know quite a bit about masks, effective use etc. best science is your own... you smell fried chicken when you walk into Safeway with your mask on? Do you know in comparison the size of a flavonoid droplet compared to a microscopic virus? There's no avoiding it, n95 if fitted properly do make a great seal, but you might want to see the manufactures limitations for use and protection... and very few are wearing n95s m, most have cloth or flimsy medical masks that don't seal.

Our economy is struggling, things are going to get worse and now you sit about to decide on whether we move forward with logic, and science or you vote to further ruin what's left of our great nation and community by further dividing and destroying the small business community.

I encourage you as a citizen of a free people to stand up for freedom, stand up for what is right just and vote to protect individual freedoms and liberties afforded by the constitution of the United States us.

I know you have the courage and strength to do what's right. May God Bless you as you navigate this moment in time.

Chris Sage,
Owner-SageMicroSpas

As you get ready to discuss the fate of Kitsap county, please remember to listen to the voices of the people you are supposed to represent.

Covid is not going away. Shutting down the county, telling people to vaxx up, masking, won't change that fact. Like the annual flu, I am not saying covid is the flu, there are seasonal variances and the pharmaceutical company can only make a guess at the strain for the season.

Like the common cold, it (covid) will continue to mutata and spread

But you all know this.

You also know that vaxxed people are still getting sick, and still passing on covid.

The purpose of a vaccine is to protect the person who got it. To lessen their symptoms. Not get a vaxx to protect those around them.

Do not dismiss natural immunity!

To dismiss natural immunity is to deny science.

A vaccine passport is not what Kitsap county needs.

Doing such as this hurt businesses in Callalam and Jefferson counties and will hurt businesses in Kitsap.

People need to be responsible for their own health decisions. Not ostracized from society because their views differ from yours.

The people of Kitsap county have been responsible.

Do not punish the local businesses that are struggling to maintain employees by telling them their employees need to be vaxxed. By making it so that anyone entering a local business must show documentation that they have received the stamp of approval to be allowed in society.

Please, not here.

~Penny L.

Dear Sir:

I am not an anti-vaxer, but I do believe in upholding the Constitution and by not allowing full public access to businesses, our County Government will be treading all over it. People who have the vaccine also are spreaders and can become ill, it has happened recently three times in my immediate family (one in Kitsap County and two in Georgia). This is how the Holocaust began (I do have an M.A. in History so I do know what I am speaking of).

Hi Keith,

Please strongly resist any vaccine mandates being considered for Kitsap County.

I firmly believe any mandates are government overreach and would be harmful to local businesses and the long-term mental and emotional health of the Bainbridge Island community, especially children.

People and local businesses need the freedom to make their own decisions regarding their personal health, medical safety, and freedoms.

Thanks for listening,

Stephanie

Keith -

I'm a local to Kitsap and a business owner here in Poulsbo. We have respected and have followed all steps to help re-open our county + keep our family and others safe as we can.

What we don't agree with is a Vaccine "proof" to enter businesses or public and state facilities. This email is to notify you before your meeting tomorrow morning that we HIGHLY DISCOURAGE this action in Kitsap.

We believe people have the right to choose what is best for their family and that no government (local or state) has the right to FORCE (by mandate, which is not above Federal Law) anyone to have to make this decision.

By forcing business to essentially force citizens to "Show their papers" for basic essentials such as shopping, groceries, eating with family at local thriving restaurants, you lose the respect and trust of YOUR community. What voice do we have if we cannot be heard?

We ask kindly to NOT IMPLEMENT a "proof-of-vaccine" in Kitsap County. This is overstepping of our rights and we do not come into agreement with it.

Thanks

Jefte

Dear Sir,

As a Kitsap County resident, I respectfully voice my opposition to vaccine mandates and vaccine passports of any kind. Please convey my opposition to the board.

Not only are the aforementioned ethically wrong, but they are unconstitutional and will inevitably incur expensive legal challenge.

I urge you and every board member to read the following technical document. Everyone is busy and has limited time for such reading, but matters such as these rise to the level of importance to understand all of the research available...even if it runs counter to our biases.

Subject: Kitsap Public Health Special Meeting

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

I am writing to provide comment on the proposals laid out in the Special Meeting Agenda.

I was born and raised in Kitsap County and currently live here with my wife and 3 sons. The proposal of creating a Health Board/Health Officer order to require vaccinations per the Special Meeting Agenda is a coercive and overreaching move by the government, which will ultimately lead to the creation of 2 separate social classes:

- 1) Those who received vaccinations either of their own free will or under threat by the government.
- 2) Those who decided for themselves to not receive the vaccine.

By following through with the furthest extent of the options laid out in the agenda, this order could effectively bar 34.5% of the Kitsap population (per the current numbers provided by the county) from "normal" societal interactions.

Due to an under-lying health condition, I decided to receive a COVID vaccine. I did this to lessen my symptoms should I contract COVID and to add a layer of protection for my parents and grandparents who I frequently visit (though now it has been shown that vaccinated persons can transmit COVID). This was not done because the government said that I needed to do this in order to work a job to provide income for my family or to enter public spaces (such as grocery stores) to provide sustainment for my family. I do not disagree that the vaccine can help with lessening the effect of COVID, but it is not the government's place to issue these mandates.

The fact that this meeting is taking place in a virtual environment further shows that the Board does not fully trust the vaccine to protect them (assuming that all board members are vaccinated and the fact that vaccinated persons can transmit COVID if infected).

I am therefore asking the Kitsap Public Health Board to not enact any vaccine mandates.

Thank you for your time,
Andrew Doornink

Mr. Grellner -

My name is Nichole Hurley and I live on Raft Island in Gig Harbor. I was raised in Port Orchard and have friends and family that still reside within Kitsap County and are business owners. I am a stay-at-home mom - Gonzaga Law educated attorney.

I strongly oppose allowing the Kitsap County Health Department to impose a vaccine mandate on businesses, restaurants/bars, gym facilities and the like. This is a slippery slope of which the door should not be opened. The harm that will come to businesses both financially and from disgruntled citizens will be devastating to these establishments.

I am pro-choice with respect to the vaccine. My husband is a first responder and is vaccinated. Please do not work toward dividing Kitsap County into the have and have-nots. Forced compliance will rip these communities apart. Please work toward unity not division.

Respectfully -

Nichole Hurley

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

I am writing in opposition to any further restrictions or limitations being placed on government or private workers in Kitsap County. These restrictions are placed without regard to their unintended consequences and without real analysis of their need or effectiveness.

Unintended consequences include disruptions of goods and services, including medial services, educational services, transporting of goods, and provision of first responder services as many individuals in these fields are refusing to get the vaccine. In communities around the nation where these restrictions are being implemented there is no evidence that they are having any positive effect.

If there was a true analysis of their need or effectiveness we would be able to see evidence that you have looked at studies done elsewhere that show, for example, that a person that has contracted COVID 19 and survived it are up to 27 times more resistant to getting the virus again than those that have received the vaccine. Also, going the vaccine route is showing that to be protected from the variant strains of COVID requires a vaccine booster shot whereas those with natural immunity appear to have a greater natural resistance to the variants.

I see the proposed board actions as nothing more than a "me too" action trying to catch up with what is happening in surrounding communities. I believe your actions would do more for the public health and welfare if you would focus on early treatment of the virus with products such as Vitamin D+, Zinc, Hydroxychloroquine, and Monoclonal Antibodies which assist the body's immune system in combating the virus while strengthening it to resist future virus variants. As it is, if a person goes to the ER with COVID 19 symptoms, they are told to go home and come back in two weeks when they will either be near death or their own immune system will have started overcoming the virus. This makes no sense when early intervention has shown to be very effective.

Restrictions don't work. Please do not go along with the "group think" and do something positive that will actually help our community.

Respectfully,

Bruce Van Woudenberg

As a life long resident of Kitsap County I am greatly disturbed by the vaccine passport mandates being discussed! I urge you to take no further action and allow the current situation to play out! These mandates are illegal and against our State and Federal constitutions. I have been a teacher for 35 years and have been forced to retire Because of restrictions and mandates! There has been no consideration for people who have had Covid and have Recovered. Studies have shown the natural immunity is far greater than the vaccine! This tells me that this is nothing more than a political control issue! Stop this madness now!

Sincerely,
Rosemary Marsh

This is not an FDA approved VAX. It has not been through full trials. You don't know what in it and they won't tell you.

Please listen to the inventor of mRNA, Dr. Robert Malone at Epoch TV <https://ept.ms/EscapeMutants5>

The shot should be voluntary for those who want to choose it, but should not be mandated for those of us who don't want it.

There are treatments that work and will reduce hospital stays. They are not talked about because it is not acceptable politically to speak of these things. The health care industry has been taken over by politics. Medical decisions should be between a doctor and patient. This is not the case in today's world because doctors are not getting information that they should have to fully be informed and to properly advise patients. They are threatened with possible repercussions and revoking of license to practice medicine.

Additionally, there are several groups that don't need a shot. People who have already had COVID-19 and have natural antibodies, or got the monoclonal antibodies. I'm sure there are others that experts can identify.

I fall in to both categories listed above. I will not be taking the shot under any situation regardless of any mandate.

I could go on and on about this subject with hours and hours of links to real experts with years of experience but you won't watch them or listen to them, it would be politically incorrect for you to do so.

Thank You

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I understand that you are considering what action to take regarding the covid situation.

I highly recommend that you "Take no action and allow the current situation to play out". It's only by government intervention that we are in this situation right now. It's the politicians and bureaucrats that have hugely overreacted to the covid threat in the first place and now you want to continue with this stupidity. To consider recommending or mandating vaccines and implementing vaccine passports is just going to further the disaster that you have already brought upon us.

What happened to the individual's right to choose? It's pretty important when you want to kill the unborn, but looks like it's not even a consideration when it comes to you deciding if everyone should be coerced into vaccinations.

Have you considered that the constitution and bill of rights are for all the people of this land, as a defense against tyrannical government actions? More medical tyranny is what you are considering! You don't have any authority higher than the constitution, that same constitution gives everyone living here the inalienable right to "Life, Liberty and the pursuit of happiness". You don't have the authority to take that away from people by threatening people with job loss if they don't get vaccinated or threatening that people can't go into businesses unless they prove they are vaccinated.

You are creating a horrible situation to have to live and work in. The politicians have created so much suffering because of this needless overreaction.

If your main source of news is mainstream media outlets you are living in a narrow tunnel of information. Also, If you don't understand the level of censorship going on right now in this so called information age and you only rely on mainstream news you can't possibly have a full understanding of what is going on. If that is the case the first thing you need to know is there is **not** a consensus when it comes to covid science or vaccines. That being the case, please don't try to force people into vaccines when vaccines may not be the panacea you think it is.

Regards,

Mark McColgan

To Whom it may Concern,

I hope you will receive this email with an open mind and not be quick to write off my concerns about mandating vaccines in our county. When I found out about this upcoming meeting I was very concerned with the topics and the ideas that you will be discussing. I know that as a health board you want to do your best to protect the citizens of this county from illness, but I do not believe that you can do that by mandating vaccines for government workers, in public places, or in grocery stores, or restaurants. This vaccine is still very much in the experimental phase and even though it is approved by the FDA there is no long-term (as in more than 5 years) studies on this vaccine. Therefore there is risk in taking the vaccine and there is obviously risk in getting COVID. People need to have the right to make their own medical choices for themselves and their families and decide which risk they are willing to take. Mandating vaccines takes away our right and freedom to make decisions for ourselves. I do feel that the vaccine is a good choice for some and educating about the benefits of the vaccine and the benefits of building your immune system and being a healthy person is also important. But people need to be allowed to make their own decisions about their health and make the best decisions for themselves!!!

The continued overreach I am seeing by the government to control and coerce people is NOT ok. Our freedoms are slipping away and it leaves me very concerned for the direction our country is headed and what kind of world my children and grandchildren will live in. The mandating of this vaccine is discriminatory and unconstitutional in my opinion. I ask that you will not mandate any more vaccines for our community! I am praying for your meeting and praying that you will have wisdom and discernment when discussing these matters!! Please listen to the people of this community!

Thank you for your time and open-minded consideration!

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Greetings,

I am writing to you today to express my opposition to allowing the Kitsap County Public Health Department to impose vaccine mandates and/or vaccine passports on any business in Kitsap County. This will greatly affect and limit the businesses and places of interest of those 12 and under, as well as unvaccinated residents. This will greatly dampen the community unity and will prevent thousands of unvaccinated people from meeting the needs of their families. The shipyard, the largest employer in Kitsap County, has a large number of unvaccinated employees (nearly half) that will not be able to spend their hard-earned money in businesses around Kitsap County. These kinds of restrictions will take away the rights of many individuals and cause a great divide among the community of any county in which it is implemented.

Sincerely,

Brian Day, concerned resident of Kitsap County

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner

I am opposed to the implementation of “proof-of-vaccine” anywhere at any time.

I am opposed to the Kitsap County Health Department requiring “proof-of-vaccine” or mandating vaccination prior to being able to conduct business.

Thank you

Tim

Subject: KPH agenda 9/28/2021

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Per the Kitsap Public Health Board Special Meeting Agenda for 9/28, Recommended Actions on Pages 5 & 6:

https://kitsappublichealth.org/about/files/agendas/2021/0928_BOH_Agenda.pdf

I strongly oppose all Recommendations but #1.

Please give our County residents the freedom of choice regarding obtaining a COVID vaccine in order to participate in and contribute to the economy of Kitsap County.

The vaccinated are protected from those who are not. The unvaccinated can choose to expose themselves to situations where other unvaccinated citizens gather and should not be banned (which in a sense is what the result will be) from participating in commerce just because they have chosen not to be vaccinated. Americans should continue to have freedom of choice in such matters.

I oppose Recommendations #2-5. Please count my voice as one of many Kitsap County residents who oppose such mandates.

Thank you for your consideration.

I don't see credit for post Covid with proof of antibodies, which are being shown as 27 times less Covid contagious than those with the shot.

Webster defines "vaccine" as providing immunity, yet CDC tells us "vaccinated" individuals can still contract Covid and spread the disease.

Therefore, the safest people to admit to public venues are post Covid with antibodies.

Good morning to all, sending a kind reminder..

Do not think of making any unlawful or unconstitutional actions.

That will be grounds for immediate removal from your seat.

We The People are watching all of our employees-elected or installed.

Good evening,

I am writing you to remind you that We The People DO NOT CONSENT TO THIS TYRANNY!
This is out of line with The Founding Documents.
It is unconstitutional and a Nuremberg Code violation.
You are all on notice.

Vote no, or promptly resign.
This is good vs evil. There is no middle ground.

You work for We The People, you do not have any right regarding our God given rights, you do not have any legal standing for this unconstitutional, violation of civil rights, violation of the Nuremberg Code.

ENOUGH OF THE LIES.

Sincerely,
Reverend M

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

To All Meeting Attendees And All Whom This May Concern-

Good day. I am writing in earnest with the fervent hope and prayer that this nightmare we've all been enduring not be further exacerbated.

The sole legal option (listed as #1 on your meeting agenda) is to leave the residents of Kitsap County, Washington to our own good common sense and allow everything to reach a conclusion, organically, as it will. There is no acceptable alternative.

Any alternate choice would be a patent violation of the Rule of Law, The Constitution of The United States and The Nuremberg Code. The remainder of listed "options" are nothing short of draconian, tyrannical, sadistic and inhumane.

We are Citizens of The United States of America. We have a God-given right to our freedom and it is legally secured in our Constitution.

Along with multitudes of concerned Kitsap County residents, I/we implore you to consider the only one option which is lawful and right under the United States Constitution and to respect each and every one of us and the freedoms we all share.

Thank you for your time and thoughtful consideration.

Sincerely and Respectfully,

Beth Hill
Lifelong Resident of Kitsap County, Washington

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I urge you to not push a vaccine mandate through in order to visit public spaces in kitsap county. There are many reasons why people may not be vaccinated and this is discrimination. This is wrong! Segregating people has been done throughout history. History is to be learned from in hopes it is not repeated. This is so reminiscent of the holocaust and how people had to show their papers. The CDC has admitted tests cannot distinguish between COVID and the flu. This virus has a very high survival rate! If hospital space is so low per population in this area, that should have been looked at long ago.

Thank you,

Subject: **AGAINST** Proof of Vaccination to enter public places

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Gentlemen, I understand that tomorrow's health district meeting will not except public comments nor public engagement.

I also understand that one of the items on the agenda is mandating that vaccination status be provided to local establishments, "public" establishments which in my mind includes grocery stores and shopping venues.

I hope you are giving serious thought to what this will do to local businesses. I am fully vaccinated I will not under any circumstances show my "papers" to anyone other than my healthcare professionals. For the county to mandate that I share my personal medical information with anyone is unconscionable.

If this is passed, I will no longer frequent local grocery stores, I will find locations where I can buy my groceries without entering a "public" location or purchase what I need online. I will no longer frequent restaurants that require me to provide proof of vaccination.

These sort of heavy handed mandates are getting out of hand. They have to stop. This latest vaccine mandate has pushed at least three people that I know from contemplating getting the vaccine and getting quite close to I will not get the vaccine under any circumstances. It's not working.

Are you really willing to hurt the businesses of Kitsap county by passing a mandatory proof of vaccination in public areas?

Again, even the concept is unconscionable and should be struck down without further conversation, and again even the public is not being allowed to provide any input which is no longer part of the civil discourse but more of a dictate.

Subject: Good Morning!

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Greg Wheeler,

I want to start off by thanking you for the vital role you play in our community and understand that you are trying to do what is best for Kitsap County and its residents. However, the draconian measure of the vaccine mandate is unconstitutional and this current Kitsap Public Health Board meeting is considering additional discriminatory actions to enforce an unconstitutional mandate and I am writing as a concerned citizen out of a desire to remain in this community.

From the item "Kitsap Public Health Board Special Meeting Agenda" dated 28 Sept., 2021, there is no statement that our health care facilities are overwhelmed, just a casual statement and comparison to highly populated and polluted areas, and, in fact, not one of the areas listed are in Washington State. It is stated that there are delays in discharge of patients into health care facilities where the employee's at these facilities are unvaccinated. My questions are:

1. If the employees at the nursing home facilities are unvaccinated, how will this coercive action result in more employees at these facilities being vaccinated? What data do you have that shows they will stay in a job that is forcing a vaccine with unknown side effects (which has been the result all over the United States)? If this mandate does result in less health care staff overall (which is the indication given several health care workers within Kitsap have quit due to vaccine mandates), what is your mitigation strategy if this does not result in the desired outcome?

2. Given that there are demonstrations all over the world against providing proof of vaccination, what evidence do you have that the majority of Kitsap residents aren't opposed to these mandates thus resulting in local unrest?

3. Our own CDC has stated that vaccinated people are just as likely to be infected with and transmit Covid as unvaccinated people (link: <https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm>) and states "Real-time reverse transcription–polymerase chain reaction (RT-PCR) cycle threshold (Ct) values in specimens from 127 vaccinated persons with breakthrough cases were similar to those from 84 persons who were unvaccinated . . .," Given this data, how is this mandate going to improve the lives of the residents of Kitsap County?

There are many things to be concerned about. The entries into the VAERS database over the last 20 years for all vaccines combined has more than doubled for the COVID vaccines alone, the NIH is currently studying the effects of the vaccine on ovulation (link: <https://www.nichd.nih.gov/newsroom/news/083021-COVID-19-vaccination-menstruation>), and there is a current study stating that the AstraZeneca and the Johnson & Johnson are associated with blood clots (link: <https://covid19-sciencetable.ca/sciencebrief/vaccine-induced-immune-thrombotic-thrombocytopenia-vitt-following-adenovirus-vector-covid-19-vaccination/>). This combined with the doctrine of the Nuremberg Code, which states that we as free citizens " . . . have the right to exercise free power of choice, without the intervention of any element of force . . .," and this current mandate is a method of force.

What side of history do you want to be on? You have the chance to stand up and do the right thing. I implore you to think about the long-term impacts of taking away a citizen's right to bodily autonomy.

Thank you for your time,

Jessica Hancock

Subject: Kitsap Public Health Board Meeting 9/28

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

I am responding to the special meeting being held on 9/28/21 by the Kitsap Public Health Board.

I strongly urge that NO ACTION is taken.

The Federal Government has done enough with the mandates to address the concerns this group is wanting to address even further. The shortage of medical staff is a result of one of these mandates which is the key issue behind the staff shortage problem. Any additional mandates that are put in place by KPHB will only destroy businesses and lives even more.

Those who have compromised health have had and still have plenty of opportunity to take care of themselves to prevent getting the virus. Additionally, everybody needs to be respectful of individual religious beliefs.

There is too much at stake with too many repercussions as we have all seen and experienced by adding more mandates.

If you decide to take action, more people will die from other things such as suicide as there is already so much control over people's livelihood and businesses cannot take it anymore. I have already lost a brother-in-law to suicide because of these mandates.

It also needs to relay to the public the risks of the shots as there are more people dying from the negative reactions to the vaccines. I know of more people having a negative reaction where 2 have died, 2 have almost died, and 2 are not doing well and will probably pass away soon. However, I know many people who have had the virus and recovered without any issues and do not know of anybody who has passed away from the virus. I am not saying people have not, I personally have not experienced it.

Thank you

Dear Greg Wheeler,

I was disheartened to hear that a meeting is planned to discuss options concerning requiring vaccinations to enter a public building. While the concern for covid is real, there are many measures already in place. Especially as we do not know the full efficacy of the vaccines in transmission (look at Israel for data - covid is still being transmitted from the vaccinated), this would be an infringement on personal choice.

There are numerous supreme court precedents on not forcing medical procedures. To cut off a portion of the population from entering a grocery store, a church, a home improvement store - due to a status is just as heinous as separating someone due to race or sexual preference.

In the 1930s, under Hitler, Germany took many steps to eventually strip Jews and homosexuals of their rights. Businesses were shut down, personal belongings were confiscated, and the right to travel freely was taken away. We have gone from two weeks to flatten the curve, to masking up everywhere, to now- your job is threatened if you don't

get vaccinated, along with your ability to enjoy getting groceries to feed your family. Where is this going to stop? How has our society become so filled with fear that we are willing to segregate and shun an entire portion of the population? How do we not see this as coercion?

The people will not stand for it. This is a sure-fire way to create a parallel economy. Instead of getting everyone vaccinated, your economy is going to tank. Businesses will suffer, along with your tax revenue.

But if you continue with the status quo? I can assure you that the economy will continue to grow. People will be free to buy and sell, to enjoy a cup of coffee, to make improvements on their homes. And the county will reap the benefits.

It is foolish to think that more restrictions upon your own citizens will result in anything positive.

I voted for you in the primaries, thinking that you had done a decent job so far. But this would change a lot of people's minds on the upcoming election. We are a government for the people, by the people.

Subject: Tomorrow's meeting where you'll decide the financial & medical fate of Kitsap county & it's voters.

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

To Those Deciding the Fate of Others,

I'm writing to you to ask you to oppose medical segregation in our community. It is a human right to be able to decide one's own medical care. No person's job or ability to provide for their family should be threatened because they want to decide what is injected into their body. The last time people were forced to undertake unwanted medical procedures, the Nuremberg Code was created to protect future generations. I fear that history is repeating itself.

The Nuremberg Code states "The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

When you threaten people jobs and their ability to access basic services, you are placing them under duress and coercing them into medical decisions. These vaccinations have only been studied for 6 months time. There is no long term safety data. More and more side effects, including blood clots, strokes, myocarditis and death are being attributed to these products. These vaccinations are not without risk and should not be forced on any person. It is a basic human right to control one's own body autonomy and to make one's own medical decisions!

There are no studies showing that medical segregation improves health outcomes. In fact, similar measures are contributing to an epidemic of suicide, abuse and mental health challenges in our communities.

Vaccinated people are just as likely to be infected with and transmit Covid as unvaccinated people. This is the CDC study to prove it. Please read the CDC study of Barnstable Massachusetts, July 2021 linked below.

<https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm>

- In this study of an outbreak of 469 people, 74% of the positive cases were fully vaccinated.
- Five people were hospitalized for Covid, four of them were fully vaccinated!
- Vaccinated and unvaccinated people were found to have similar viral loads in their nose and throat, meaning that they are equally likely to transmit the virus to others.

This study shows that vaccinated people are just as likely to carry the virus into a business or workplace. How can you justify excluding unvaccinated people from the workplace or from accessing basic services via businesses? The negative

impacts of segregating the community far outweighs any proposed benefit. Please consider the negative impacts of medical segregation and discrimination as you make these decisions.

The decisions you make in the next few days, will be your legacy! Do you want to be responsible for a new era of medical apartheid? Do you want to be the cause of segregation and discrimination in our community? Are you willing to answer for these choices in the afterlife?

Sincerely,

Donna Cressman

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Members of the Executive Leadership Team and Public Health Board:

I am a long time resident of Port Orchard. I URGE you to vote against any type of vaccine passport process for the residents of Kitsap County. No one should be required to disclose personal, PRIVATE medical information in order to enter a business! It's unconstitutional and you all know that (if you don't, I urge you to read the U.S. Constitution). This is something the voters of your county do NOT want. Voters are paying attention.

Vaccine passports will only hurt local businesses more; as if they haven't suffered enough through COVID already. This is absolutely UNACCEPTABLE and illegal. Lawsuits will result if this becomes a reality.

Thank you,
Spring Tart

Greg Wheeler

As a retired RN, I am deeply concerned about the way this "vaccine" is being pushed/forced on us. The covid 19 virus has a 99.7% recovery rate. Our immune systems are our biggest & best defense against this & any other virus. This "vaccine" has not gone through the 4-6yrs of rigorous testing & research that all other drugs & vaccines go through to prove they are safe. The "vaccine" is an Mrna drug with a spike protein that is harmful. There are 7,000+ doctors & scientists who have spoken out against the use of this "vaccine". The countries that have the most vaccinated people are the ones with the most covid cases!! The VAERS data from the CDC show the incredible numbers of adverse affects as well as the huge number of deaths from this "vaccine"! If that isn't enough to know this "vaccine" should not be forced on anyone, just think of the large number of businesses that are going to be destroyed! Haven't we ALL suffered enough without doing more harm to individuals as well as businesses by having to show proof that we've been vaccinated before we can enter an establishment?! This is really outrageous & something I would expect in a Communist country!!

Very Sincerely,
Peggy Reyman

[Mayors of Kitsap County,](#)

I am a resident of Kitsap County. I love this area

and I love our community and want to see it thrive, as I am sure you do as well. I'm writing to you to ask you to oppose medical segregation in our community. It is a human right to be able to decide one's own medical care. No person's job or ability to provide for their family should be threatened because they want to decide what is injected into their body. The last time people were forced to undertake unwanted medical procedures, the Nuremberg Code was created to protect future generations. I fear that history is repeating. We trust that our leaders will hear us, and will not rely on unproven data, coercion, peer pressure and politics for the welfare of our community.

The Nuremberg Code states "The voluntary consent of the human subject is absolutely essential. This means

that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

When you threaten people jobs and their ability to access basic services, you are placing them under duress and coercing them into medical decisions. These vaccinations have only been studied for 6 months time. There is no long term safety data. More and more side effects, including blood clots, strokes, myocarditis and death are being attributed to these products. These vaccinations are not without risk and should not be forced on any person. It is a basic human right to control one's own body autonomy and to make one's own medical decisions! I personally have had family members die from reactions to vaccines. This narrative does not make front page news, but it is heartbreaking to the ones who are suffering through this, and then are now being told to inject the same chemical into our own bodies without due process or understanding of long term health effects. No official guidance on exemptions, whether it be medical or religious, has been administered to the public, and our community of concerned citizens are making frantic decisions. These closed door meetings are causing alarm, and for good reason. Please do not rush health orders and mandates when there are too many questions that remain unanswered.

There are no studies showing that medical segregation improves health outcomes. In fact, similar measures are contributing to an epidemic of suicide, abuse and mental health challenges in our communities. Vaccinated people are just as likely to be infected with and transmit Covid as unvaccinated people. This is the CDC study to prove it. Please read the CDC study of Barnstable Massachusetts, July 2021 linked below.

<<https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm>>

- In this study of an outbreak of 469 people, 74% of the positive cases were fully vaccinated.
- Five people were hospitalized for Covid, four of them were fully vaccinated!
- Vaccinated and unvaccinated people were found to have similar viral loads in their nose and throat, meaning that they are equally likely to transmit the virus to others.

This study shows that vaccinated people are just as likely to carry the virus into a business or workplace. How can you justify excluding unvaccinated people from the workplace or from accessing basic services via businesses? The negative impacts of segregating the community far outweighs any proposed benefit. Please consider the negative impacts of medical segregation and discrimination as you make these decisions.

The decisions you make in the next few days, will be your legacy! Do you want to be responsible for a new era of medical apartheid? Do you want to be the cause of segregation and discrimination in our community? I know your job is a difficult one with the passion about this topic... but please think of the business owners and concerned citizens that feel unheard and are barely surviving as is after the past year and a half of low/ no business, supply chain shortages, staffing problems, etc. These orders and mandates, whether lawful or not, are going to kill our small businesses, our economy and our morale. Please consider this; this decision you will be a part of has the ability to do much harm to our community. I love our community, as I am sure you do as well. Please do the right thing.

Sincerely,

Joel Atteberry

Business owner, Veteran, and Supporter of our Community.

Are you freaking nuts? Why would you do this. I just have come off of having Covid-19 and have the antibodies in my blood which is much better for me than any shot. Why should I have to show a passport? Not only that, any medical information is privileged between me and my DR and NOT any business who have no right, along with you, to have access to my medical information. Do not take away my privacy rights from me. You will be overstepping my Amendment Rights. Not only that, I see it also as a racist issue, vaccinated versus unvaccinated. Is that like the unvaccinated go to the back of the bus? It sure is what it feels like. Do you want to see a lot more small businesses go out of business? Perfect way to do it. My husband and I have some disposable income of which we choose to use on family owned businesses and NOT franchised places. If you make mandatory passports a mandate, then I will gladly cook at home as I love to cook. Not only that, I will shop Amazon.

Sincerely,
Kathy Kiehn

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Please do not impose vaccine mandates. I am an employer in the construction industry in Poulsbo with 26 employees. We can't get enough employees to do the work that needs to be done as it is & if a mandate were imposed many of my current employees would quit.

Cases, hospitalizations, & deaths are trending down, according to the state health department website. A mandate would economically devastate Kitsap county, & according to what the health department is reporting, provide no appreciable improvement in public health.

Even if there were some small marginal improvements in public health by imposing a mandate, this just seems heavy-handed & overreaching. Especially with the tone of the meeting stating that no public comment would be taken. A group of un-elected individuals potentially imposing severe restrictions on the freedom of movement, ability to earn a living, & general civil rights just doesn't sit well with me, nor would it with most of the public.

Hi Mr Wheeler. We met at my former residence at 123 s. Hartford Ave. During your campaign. I stood up on my deck above the road as we spoke. I respected and found your take on things very mutual. It was interesting since I'm not Democrat. The reason for my email is I was just made aware of the health dept. Planned meeting today about covid-19 possible vaccination requirements for businesses regarding employee's and customers. I'm appalled and gravely concerned that this is even under consideration. I hope and believe that your character will allow your voice to be heard and protest any such ideas. There is a reason for suppression of therapeutics that have been shown to work and any mention of them by big tech. I know you realize this. Please do your best and use your heart. I'd like to speak with you. My # is 360-551-3235 thank you Dana Cline.

Dear Mayor Wheeler,

I would like to express my opinions on the following issues that will be voted upon September 28, 2020 Please VOTE NO to vaccine mandates for small businesses & entry to indoor public places. I am a concerned citizen with several friends who own small businesses in Kitsap county and due to the vaccination rate of our county being below 50% I fear that this imposition if mandated would cause a grave affect upon our economy. Please keep our businesses open and allow them to serve customers regardless of vaccination status. If they want to check temperatures at the door and require masks mandates I'm fine with that, but preventing someone who to enter a business simply based on vaccination status is not only unconstitutional but is it extremely unfair to the business owner who would benefit from the revenue received from said customer.

Thank you for taking my concerns into consideration as you vote on this very sensitive issue. How you vote could have grave consequences for the small businesses in our county.

Ver Sincerely,
Andria Laws

Hi Keith,

I've lived in Kitsap county for about 7 years now, and am concerned about your sudden concern regarding my health and my livelihood. I'm not getting the vaccine because I suffer from migraines and have read a numerous amount of reports stating that migraines have either worsened or become part of a person's health when they weren't before.

What I'm understanding is, if I don't get the shot, I can't shop. If I do get the shot and suffer from more migraines, I can't shop because I'll be too ill/debilitated to do so...

Please help this make sense to me. I wash my hands. I wear a mask. I don't cough/sneeze/lick people in my day-to-day. Why are you and the board making life more difficult for those of us who are doing EVERYTHING else you ask of us?

Blessings!

Subject: Good Morning!

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Keith Grellner,

I want to start off by thanking you for the vital role you play in our community and understand that you are trying to do what is best for Kitsap County and its residents. However, the draconian measure of the vaccine mandate is unconstitutional and this current Kitsap Public Health Board meeting is considering additional discriminatory actions to enforce an unconstitutional mandate and I am writing as a concerned citizen out of a desire to remain in this community.

From the item "Kitsap Public Health Board Special Meeting Agenda" dated 28 Sept., 2021, there is no statement that our health care facilities are overwhelmed, just a casual statement and comparison to highly populated and polluted areas, and, in fact, not one of the areas listed are in Washington State. It is stated that there are delays in discharge of patients into health care facilities where the employees at these facilities are unvaccinated. My questions are:

1. If the employees at the nursing home facilities are unvaccinated, how will this coercive action result in more employees at these facilities being vaccinated? What data do you have that shows they will stay in a job that is forcing a vaccine with unknown side effects (which has been the result all over the United States)? If this mandate does result in less health care staff overall (which is the indication given several health care workers within Kitsap have resigned due to vaccine mandates), what is your mitigation strategy if this does not result in the desired outcome?

2. Given that there are demonstrations all over the world against providing proof of vaccination, what evidence do you have that the majority of Kitsap residents aren't opposed to these mandates thus resulting in local unrest?

3. Our own CDC has stated that vaccinated people are just as likely to be infected with and transmit Covid as unvaccinated people (link: <https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm>) and states "Real-time reverse transcription-polymerase chain reaction (RT-PCR) cycle threshold (Ct) values in specimens from 127 vaccinated persons with breakthrough cases were similar to those from 84 persons who were unvaccinated . . .," Given this data, how is this mandate going to improve the lives of the residents of Kitsap County?

There are many things to be concerned about. The entries into the VAERS database over the last 20 years for all vaccines combined has more than doubled for the COVID vaccines alone, the NIH is currently studying the effects of the vaccine on ovulation (link: <https://www.nichd.nih.gov/newsroom/news/083021-COVID-19-vaccination-menstruation>), and there is a current study stating that the AstraZeneca and the Johnson & Johnson are associated with blood clots (link: <https://covid19-sciencetable.ca/sciencebrief/vaccine-induced-immune-thrombotic-thrombocytopenia-vitt-following-adenovirus-vector-covid-19-vaccination/>). This combined with the doctrine of the Nuremberg Code, which states that we as free citizens " . . . have the right to exercise free power of choice, without the intervention of any element of force . . .," and this current mandate is a method of force. What side of history do you want to be on? You have the chance to stand up and do the right thing. I implore you to think about the long-term impacts of taking away a citizen's right to bodily autonomy.

Thank you for your time,

Jessica Hancock

I can't help but draw the comparison: certain citizens of Germany were told by other certain citizens of Germany to just board the trains. It is for their own good.

You may think this is a stretch but, with the actions you are proposing, you are repeating history.

Herd immunity was reached a while ago.

Everything you are proposing is about elected officials-not the public.

Follow the true science.

You are on a slippery slope.

Subject: Meeting Tuesday regarding shut downs

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Here it is:

Good morning,

I am a vaccinated employee in the Central Kitsap School District. I am highly aware of the important role you play in our community and thank-you for your service to our community. My purpose in writing to you is to highly encourage you to take no action regarding limitations where vaccinated and unvaccinated people may go. My reasons for this are as follows:

1. The history of the Delta variant is that after two months it starts to subside. That appears to be what is happening in our county now. The Covid cases are going down. Therefore, allowing the current situation to play out would be best for our community. It does not make logical sense to put unnecessary restrictions on our community at this time.
2. My second reason has to do with the mental health of Kitsap County. If you choose to do anything other than “take no action” you will be furthering the “Covid segregation” that is occurring in our community. This segregation is causing deep rifts that need to heal, not be further exacerbated by unnecessary limits on people’s personal freedoms.
3. Many unvaccinated people in the community have already had Covid-19. None of the options being considered takes these people into consideration. Data from multiple studies has shown that these people have just as high of immunity as those people that have been vaccinated. Granted, many of the studies say that if the infected person does get vaccinated their immunity would be higher. However, many of the people with immunity don’t desire to get vaccinated. Their high “natural” immunity is at least equal to those with a vaccination.
4. The government should not be in the position of limiting people’s basic personal freedoms-taking away the ability to shop for groceries or go to food banks.

Thank-you for taking the time to read my concerns.

Regards,

Wendy Merley
6796 Laurelhurst Dr NW

Subject: "vaccine"

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Keith Grellner,

As a retired RN, I am deeply concerned about the way this "vaccine" is being pushed/forced on us. The covid 19 virus has a 99.7% recovery rate. Our immune systems are our biggest & best defense against this & any other virus. This "vaccine" has not gone through the 4-6yrs of rigorous testing & research that all other drugs & vaccines go through to prove they are safe. The "vaccine" is an Mrna drug with a spike protein that is harmful. There are 7,000+ doctors & scientists who have spoken out against the use of this "vaccine". The Salk institute has documented the spike protein attacks our vascular system. The countries that have the most vaccinated people are the ones with the most covid cases!! The VAERS data from the CDC show the incredible numbers of adverse affects as well as the huge number of deaths from this "vaccine"! If that isn't enough to know this "vaccine" should not be forced on anyone, just think of the large number of businesses that are going to be destroyed! Haven't we ALL suffered enough without doing more harm to individuals as well as businesses by having to show proof that we've been vaccinated before we can enter an establishment?! This is really outrageous & something I would expect in a Communist country!!

Very Sincerely,
Peggy Reyman

Thank you for taking the time to hear the voice of those in our community.

My family and I moved to Port Orchard from Southern California in 2010 and never looked back. We absolutely love our county and our community.

I'm writing to voice that many of us in Kitsap County request that you do not bring on vaccination passports and stricter requirements.

I am pro-vaccine but this particular vaccine I would just like more time to decide. I want to see long term affects. Also, there are many "whistleblowers" bringing to light that MANY adverse reactions are not being reported across the country. These reactions may be rare but they weigh on my decision. That coupled with the uncertainty of what may happen in years to come make me so thankful to live in a country and a county where we have the right to choose what we put into our bodies. We truly just don't have all the answers yet.

We do our part by supporting our community. We shop local, we donate and volunteer, we wash our hand often, we are mindful, we keep our distance from others in stores and when we are sick we stay home! In the last two weeks cases here in Kitsap and across Washington are going down.

Please reconsider this decision so that my family can remain active members of this community.

Thank You,
Denyal Stewart

Dear Mr. Grellner,

I was disheartened to hear that a meeting is planned to discuss options concerning requiring vaccinations to enter a public building. While the concern for covid is real, there are many measures already in place. Especially as we do not know the full efficacy of the vaccines in transmission (look at Israel for data - covid is still being transmitted from the vaccinated), this would be an infringement on personal choice.

There are numerous supreme court precedents on not forcing medical procedures. To cut off a portion of the population from entering a grocery store, a church, a home improvement store - due to a status is just as heinous as separating someone due to race or sexual preference.

In the 1930s, under Hitler, Germany took many steps to eventually strip Jews and homosexuals of their rights. Businesses were shut down, personal belongings were confiscated, and the right to travel freely was taken away. We have gone from two weeks to flatten the curve, to masking up everywhere, to now- your job is threatened if you don't get vaccinated, along with your ability to enjoy getting groceries to feed your family. Where is this going to stop? How has our society become so filled with fear that we are willing to segregate and shun an entire portion of the population? How do we not see this as coercion?

The people will not stand for it. This is a sure-fire way to create a parallel economy. Instead of getting everyone vaccinated, your economy is going to tank. Businesses will suffer, along with your tax revenue.

But if you continue with the status quo? I can assure you that the economy will continue to grow. People will be free to buy and sell, to enjoy a cup of coffee, to make improvements on their homes. And the county will reap the benefits.

It is foolish to think that more restrictions upon your own citizens will result in anything positive.

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

I am totally against vaccine cards, getting vaccinated should be a choice not a requirement for our daily life. I know personally of vaccinated people that have tested positive for covid with no symptoms which i know from doctors this also counts as a positive for tracking purposes (so the count all across the state are inaccurate). our small businesses have been hurt and some closed for good. businesses should not be the checkpoint for individual rights in this country.

Subject: Special Meeting 28 September

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Public Officials,

I am writing you as a member of your public, urging you to take no action regarding the meeting you are holding tomorrow morning (the one that is closed to public comment). Please oppose medical segregation in our community. It is a human right to be able to decide one's own medical care. No person's job or ability to provide for their family should be threatened because they want to make their own choice about what is injected into them.

It is always a dark time in history when the government decides to forcefully perform medical procedures on its people. Similar events happened prior to World War II in Germany, and still happen today in China with forced organ harvesting. Do you want to be held in the same regards as those historical (and current) tyrants? I request that you choose carefully.

The Nuremberg Code states that the 'voluntary consent of the human is absolutely essential. This means that the person involved should have the legal capacity to give consent; should be so situated as to be able to exercise free power of choice without the intervention of any element of force, fraud, deceit, duress, overreaching or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision.

When you threaten people's jobs and their ability to access basic needs and services, you are placing them under undue duress and coercing them into medical decisions. These vaccinations are experimental, as Comernaty is not available to US Citizens. There is no long term safety data. Life altering side effects that have been observed include blood clots, strokes, myocarditis and DEATH. These vaccinations are not without risk, and should not be forced on any non willing person. It is a basic human right to control one's own bodily autonomy, and to make one's own medical decisions.

There are no studies showing that medical segregation improves health outcomes. In fact, similar measures are contributing to an epidemic of suicides, abuse and mental health challenges in our community. **I have a friend who's 10 year old came to her and said that he wanted to commit suicide because of the lock downs and the hopelessness he felt.**

The following options are DRACONIAN solutions:

2. Make a formal Health Board recommendation/resolution for all local governmental agencies to require vaccination for their employees.
3. Make a formal Health Board recommendation/resolution for all private businesses to require vaccination for their employees and/or require proof of vaccination for entry into indoor public places.
4. Issue a formal Health Board / Health Officer order under the authority of RCW 70.05 to require employee vaccinations at governmental agencies.

5. Issue a formal Health Board / Health Officer order under RCW 70.05 to require all business open to the public, or indoor venues open to the public, to require proof of vaccination for entry.”

Please note that the COVID-19 vaccine DOES NOT PREVENT TRANSMISSION OF THE VIRUS (I read the recap of the 7 September Health Board Meeting, please stop spreading misinformation). Thus all the aforementioned protocols (2-5) are superfluous, as they are based on the assumption that vaccinated people do not contract or spread Covid.

Please see the following study where vaccinated people are just as likely to be infected with and transmit Covid as unvaccinated people. This is a CDC study of Barnstable, MA from July of this year.

<https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm>

The study indicates that vaccinated people are just as likely to carry the virus into a business or workplace. Your plan to exclude unvaccinated people from the work place or from accessing basic needs and services is unjustifiable. Please consider the negative impacts of medical segregation and discrimination as you make these decisions.

The decisions you make in the next few days will be your legacy. Are you willing to be responsible for a new era of medical apartheid? Are you willing to be the cause of segregation and discrimination in our community? Are you willing to answer for your choices to the public?

Respectfully,
Lara Steinhebel

Comments: I understand you are considering individuals will have to possess a vaccine card to enter any business that is open to the public. This is outrageous considering this is supposed to be a "voluntary" vaccine. I had Covid 19 in June and recovered. What considerations do you have for those of us that have already had the disease and survived? This is an infringement of my rights and you will be blocking me from basic needs like food and clothing. I will not "go online" to acquire the things need to survive. I hope common sense will prevail and you will not enact such a restrictive order.

Good morning,

I am writing in regards to the closed comment meeting taking place tomorrow about Kitsap County's next steps regarding the pandemic/mandates/passports.

Myself and most community members I speak with are AGAINST any type of vaccine passports being required by our businesses.

If you look at the Kitsap County vaccine by demographics report that was released in January 2021 you will find that people of color are by far the smallest demographic of people receiving the vaccine.

Not only are the passports unconstitutional but they would be once again segregating people of color from entering businesses if they choose not to vaccinate. Is this the direction we really want our "inclusive" community to be heading?

We are adults that are capable of thinking critically and making safe decisions for ourselves. Passports are only going to continue to cripple small businesses and restaurants while padding the pockets of the corporate/big box stores like Walmart and Amazon.

I appreciate you taking the time to read this and take this perspective into consideration when making your decision.

The majority of your community does not want these mandates or passports. You were elected to represent the PEOPLE of this community not the wants of the federal government.

Respectfully,
Charles and Stephanie Murphy

Subject: The end of my business?

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Keith,

This is not an email where I shout and say obnoxious things to you.

I hope this email finds you well.

It has been brought to my attention that the county will soon vote on vaccine passports. This is extremely alarming to me.

I realize you are likely getting emails daily from people who are complaining, name calling, and saying completely baseless things.

I realize you also are acting and trying to do the best you can to make the best choices for the county.

Those things I respect and understand.

If vaccine passports go through it will be the end of many small businesses.

My gym Virtuous Fitness has been a member of this county for 7 years. We have hundreds of life changing success stories and have always aimed to serve people the best.

If a passport rule is implemented this will be the death of my business. Businesses thrive and survive off of new people coming in the door and our people staying (repeat buyers) for long periods of time. This is our life blood.

A passport will basically stop this in its tracks. No longer will people come in because many of my members are young healthy and unvaccinated due to their personal choice.

I can overnight lose all my clients and not receive new ones.

My business would close in a matter of weeks.

This is thousands of dollars of tax revenue per month gone. On top of that my three young sons will no longer have a father who can put food on the table to them.

The past years were hard enough on my business and this would for sure be the death of it.

Outside of my business, if this were allowed to take place where would the rules end? This would set a precedent that anything goes. Never in history once power is taken by government has any been relinquished.

I have my vaccine. So does my wife. We are not anti vaccine. We think they are great. But I can tell you if we had not got them before these mandates we would for sure resist just due to the odd behavior displayed by many in local and federal government. Before mandates began to be put out I had many friends and colleagues go get their vaccine. They felt it was the right thing to do. Now, I've heard of none just because all trust has been dropped.

I'm begging and pleading as a tax payer and local leader to consider another route other than a forced vaccine passport in our county.

Please step up and say no.

Please lead.

Allow people to make the decision on their own.

I'm not ready to lose my livelihood and career over this.

Cody Smith

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Kitsap Public Health Department,

I am a resident of Poulsbo. I love this town and I love our community and want to see it thrive, as I am sure you do as well. I'm writing to you to ask you to oppose medical segregation in our community. It is a human right to be able to decide one's own medical care. No person's job or ability to provide for their family should be threatened because they want to decide what is injected into their body. The last time people were forced to undertake unwanted medical procedures, the Nuremberg Code was created to protect future generations. I fear that history is repeating. We trust that our leaders will hear us, and will not rely on unproven data, coercion, peer pressure and politics for the welfare of our community.

The Nuremberg Code states "The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

When you threaten people jobs and their ability to access basic services, you are placing them under duress and coercing them into medical decisions. These vaccinations have only been studied for 6 months time. There is no long term safety data. More and more side effects, including blood clots, strokes, myocarditis and death are being attributed to these products. These vaccinations are not without risk and should not be forced on any person. It is a basic human right to control one's own body autonomy and to make one's own medical decisions! I personally have had family members die from reactions to vaccines. This narrative does not make front page news, but it is heartbreaking to the ones who are suffering through this, and then are now being told to inject the same chemical into our own bodies without due process or understanding of long term health effects. No official guidance on exemptions, whether it be medical or religious, has been administered to the public, and our community of concerned citizens are making frantic decisions. These closed door meetings are causing alarm, and for good reason. Please do not rush health orders and mandates when there are too many questions that remain unanswered.

There are no studies showing that medical segregation improves health outcomes. In fact, similar measures are contributing to an epidemic of suicide, abuse and mental health challenges in our communities. Vaccinated people are just as likely to be infected with and transmit Covid as unvaccinated people. This is the CDC study to prove it. Please read the CDC study of Barnstable Massachusetts, July 2021 linked below.

<<https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm>>

- In this study of an outbreak of 469 people, 74% of the positive cases were fully vaccinated.
- Five people were hospitalized for Covid, four of them were fully vaccinated!

-Vaccinated and unvaccinated people were found to have similar viral loads in their nose and throat, meaning that they are equally likely to transmit the virus to others.

This study shows that vaccinated people are just as likely to carry the virus into a business or workplace. How can you justify excluding unvaccinated people from the workplace or from accessing basic services via businesses? The negative impacts of segregating the community far outweighs any proposed benefit. Please consider the negative impacts of medical segregation and discrimination as you make these decisions.

The decisions you make in the next few days, will be your legacy! Do you want to be responsible for a new era of medical apartheid? Do you want to be the cause of segregation and discrimination in our community? I know your job is a difficult one with the passion about this topic... but please think of the business owners and concerned citizens that feel unheard and are barely surviving as is after the past year and a half of low/ no business, supply chain shortages, staffing problems, etc. These orders and mandates, whether lawful or not, are going to kill our small businesses, our economy and our morale. Please consider this; this decision you will be a part of has the ability to do much harm to our community. I love our community, as I am sure you do as well. Please do the right thing.

Sincerely,

Joel Atteberry

Business owner, Veteran, and Supporter of our Community.

Subject: Kitsap Vaccination

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Hello,

Please take no action on vaccination and allow the current situation to play out. Do not force people to get vaccinated in order to keep living their lives. If vaccines are in any way mandated in Kitsap County, even though I am vaccinated, I will no longer continue shopping, dining, or conducting any business here.

Sincerely,
Spencer Thomas
Kitsap Resident, Homeowner, Small Business Owner

“Of all tyrannies, a tyranny sincerely exercised for the good of its victims may be the most oppressive. It would be better to live under robber barons than under omnipotent moral busybodies. The robber baron's cruelty may sometimes sleep, his cupidity may at some point be satiated; but those who torment us for our own good will torment us without end for they do so with the approval of their own conscience. They may be more likely to go to Heaven yet at the same time likelier to make a Hell of earth. This very kindness stings with intolerable insult. To be "cured" against one's will and cured of states which we may not regard as disease is to be put on a level of those who have not yet reached the age of reason or those who never will; to be classed with infants, imbeciles, and domestic animals.”

-CS Lewis

Subject: Fw: Board Meeting September 28, 2021 regarding COVID mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

There should be no vaccine passports. Fully vaccinated people can still get the virus and pass it on. Even if you only allow vaccinated people into public places, they can still have the virus and pass it on, especially since some of them may be asymptomatic and not even know they have the virus. The unvaccinated have been unfairly blamed for this outbreak, when the vaccinated were unknowingly passing it around as well.

Natural immunity after having had COVID is never considered. Even if you have natural immunity and get one shot (which has been recommended), you still would not be considered fully vaccinated without two shots, which makes no sense. **Proof of antibodies after having had COVID should be an alternative to any vaccine passport.**

Vaccines should not be mandated. An injection is an invasive medical procedure. Why is it OK to say "My Body My Choice" for abortions so that women aren't forced to have a baby if they don't want to, but being forced to get an injection is OK? Loss of your job is a threat. The mandates do not really allow a choice, even if you have a valid religious or medical exemption, because if your employer cannot "accommodate" you in the workplace, you still lose your job. So basically you are saying if you don't get this vaccine, we don't care if you lose your job or business, become homeless, starve to death, or even die.

While severe adverse reactions may not affect the majority of people getting vaccines, how would you feel if it was you, your child, spouse or parent had a seizure, blood clots, Myocarditis, Bell's Palsy, Guillain-Barre syndrome? These concerns are real. For these people there was no benefit in getting the vaccines.

RE: Kitsap Public Health Board Special Meeting 9/28/2021 Comments and Concerns for Consideration

To ALL voting members and those participating in discussion:

We are writing this today for your review and serious consideration. You were elected to represent all residents of Kitsap County and to make policy decisions on our behalf. These decisions must be within the boundaries and authority of the State Constitution, state law, and the United States Constitution. Decisions should not be made that are outside of those boundaries, are discriminatory, and violate an individuals right to be employed or make conscious medical decisions about their own body and medical care. Nor should an individuals religious convictions be violated.

We wish to record our opposition to coercive vaccine mandates and to vaccine passports. We offer for your consideration the following reasons so well written by Douglas Bryce Farrow, Professor of Theology and Ethics, School of Religious Studies, McGill University.

:

1. “The mandates are incoherent. Either the “vaccines” (which are more accurately described as experimental gene therapy treatments) protect or they do not protect those who have received them. If they do protect, there is nothing to fear but fear itself, which the government has a duty to resist rather than promote. If they don’t protect, they ought not to be forced on others.
2. Such mandates are contrary to science, as to sound reasoning. It has become evident recently that the vaccinated, too, are prone not only to contract the Delta variant but to spread it. There is increasing evidence, as predicted by eminent scientists, that mass vaccination of people who do not need protection is driving variant production and dangerous antibody dependent enhancement (ADE). Moreover, many have already been exposed to SARS-CoV-2 and have robust natural immunity. It is particularly dangerous for them, as for the young, to take these injections.
3. Coercive mandates represent a violation of individual autonomy. Vaccination decisions, as some courts have recently reaffirmed, are personal medical decisions that cannot appropriately be determined by anyone other than a patient and his or her own doctor; nor can information about those decisions, except in extreme cases, be demanded by third parties.
4. These mandates serve to reinforce the vaccine passport system or to achieve its goals by other means. But vaccine passports violate the principles of liberty, equality, and fraternity. They severely erode natural and constitutional rights while accomplishing nothing that protects the citizenry, for people without passports are often immune and people with passports are often not immune. This suggests to any thinking person that such instruments are political not medical in nature; in short, that they are instruments of power not of faithful service to the public.

5. It is deeply unethical to ask people—especially young people who, absent serious co-morbidities, are not at risk from the virus but are at risk from experimental measures—to submit to those measures because older people, in a position of power over them, are fearful. Inasmuch as this fear is stoked by those plainly in a conflict-of-interest position, who stand to gain financially and politically from the imposition of vaccines or vaccine passports, it is doubly unethical.
6. People who are pressured or coerced into vaccination and who suffer vaccine injury—deaths and serious injuries are being reported in significant numbers in many jurisdictions—will be in a position to take legal action against those who did the coercing or who suppressed knowledge of these injuries. Others who are disadvantaged by non-compliance may also be in a position to take legal action. (I encourage you to read the Statement of Non-Compliance produced by Professor Forte, with which I concur.) Likewise those for whom nothing has been done to provide the option of a vaccine that is ethically produced and genuinely safe.
7. Coercive mandates, in the case of experimental treatments, violate the Nuremberg Code, which ought to be held sacrosanct among both the vaccinated and the unvaccinated. They do so by abandoning the principle of informed consent with which it begins. Indeed, it can be argued cogently (though I cannot conduct that argument here) that each of the code’s ten points has been violated, or on the present trajectory will be violated. FDA approval of the Pfizer product notwithstanding, these gene therapies remain by definition experimental. Their short-term performance is disconcerting and their long-term effects are unknown. What is already clear enough is that, unlike traditional vaccines, they produce dangerous, even fatal, clotting effects; require frequent boosters; disrupt the natural immune system; and, through global rather than targeted use, contribute to the emergence of breakthrough variants. The public has not been properly informed of these features. Rather, it has been encouraged, quite irrationally, to scapegoat the unvaccinated. Even such consent as it has afforded, then, does not meet Nuremberg standards. Moreover, the consent of one adult does not suffice in lieu of another’s; nor, in such circumstances, can the consent of many override the dissent of one.

Emerging evidence about the behavior of the virus and of the vaccines, and about the behavior of those suppressing safer and more viable treatments for their own gain, makes the position of officials who enforce mandates and passports extremely tenuous. History will judge harshly all who undertake to act contrary to reason and in violation of basic moral principles, as will God and nature itself.

I remind you of this government document containing the ten points of the aforementioned code, for the sake of those unfamiliar with the duties it prescribes. I observe that able clinicians working on COVID-related public health problems have supplied good medical reasons (here are ten) why we ought to steer clear of coercive mandates and instead re-examine the peculiar premises on which recent public policy has been based. Sadly, such voices are being censored, but many other capable doctors and scientists are of the same mind. As the Harvard epidemiologist Martin Kulldorff remarked in a recent interview: “To me, as a public health scientist, it is stunning that we suddenly threw out [the sound] principles we have used for decades to deal with public health issues.” To sound principles we must return immediately. May we count on you to help set things right? Refusing to endorse coercive mandates and abandoning vaccine passports would be a good start. In the other direction lies grave peril, both for the people and for those who govern them.”

We implore you to NOT enforce vaccine mandates or vaccine passports as at the very least they are unconstitutional, unethical, immoral, and discriminatory. Medical decisions of any kind should be between an individual, their God, their family, and their medical provider. Are you willing to personally take responsibility for any adverse effects of the vaccine short term or long term? If you aren’t you should not be mandating them! Are you positive it is “safe”? Have you been listening to what is happening in other countries with vaccine injuries and the spread among the vaccinated? Have you asked yourself why are therapeutic treatments being used affectively in other countries and other states, and not in ours, but we are the ones in crisis? Have we tried everything we can before threatening peoples lively hoods and violating their rights to make medical decisions for themselves? Why have we not set up temporary hospitals like we did in the beginning that were not utilized? What are we going to do when we potentially lose 30% of our medical staff due to firings for not being vaccinated? Have you spoke to those who will be negatively impacted by these mandates? Have you listened to their reasons? Have you listened to others, other than politicians and those who have much to gain from these mandates? If you cannot say you have done everything you can before considering vaccine mandates and passports... I would say you have not done your job as an elected official. Please do not take the easy way out... please do the hard work of protecting our rights. That is why you were elected. This is not black and white, there are many opinions, there are many experts who disagree, there are many variables, the “science” seems to be ever changing, none of this should be mandated to any individual, entity, group...etc.

We also would like to request that no action be taken until public comment is taken in an open public meeting.

Sincerely,

Curt and Heather Fredrickson

Subject: What percentage of Kitsap County needs to get vaccinated for it to be enough?

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

It's my hope that the Kitsap Public Health Board will follow the science and decide that requiring additional vaccine requirements in Kitsap County is unnecessary.

The top employers in the area already require vaccines

- Department of Defense
- All Contractors who work at/for department of defense
- Olympic College (staff and students)
- Hospitals
- School Districts
- All other state and federal agencies
- All businesses that employ 100+ employees

What percentage of Kitsap County needs to get vaccinated for it to be enough?

Small businesses will be impacted by this the most. Especially restaurants. I don't know if you've tried to eat out lately, but I eat out at local restaurants at least 3 times a week, and I can tell you that restaurants are already struggling to hire enough staff. Adding additional requirements for employment and then requiring those establishments to have to hire more people to track the vaccination status of their employees and patrons is excessive.

We can assume that if the majority of employers already require vaccinations, then the majority of people who are patronizing local businesses are vaccinated.

I think that the Health Board should wait until the State and Federal mandates are in effect and see if further measures are needed.

From what I read, there doesn't seem to be any clear benchmarks locally or nationally regarding vaccines. I hope that our county will decide that additional mandates, additional stress on business owners, additional red tape, etc is superfluous.

The CDC is very clear that vaccinated individuals can still spread and contract COVID. Does requiring vaccines to enter businesses REALLY make people safer? or does it just make them FEEL safer? or is it about MAKING people do something they don't want to do (get vaccinated)?

What is the Health Board's objective? Safety? Feelings? Control?

I urge you to let the mandates requirements that are already in place to be sufficient. Assume that the federal government chose to make their requirements for businesses over 100+ employees for a reason and don't make more restrictive recommendations.

Thank you,
Beth Michaelson

Good morning Keith,

We understand there is a health board meeting this Tuesday to discuss ongoing Covid measures.

I implore you to resist the push for implementing draconian measures such as vaccine passports and other mandates that restrict personal choice and damage our local businesses.

Look at other states in our great country that have chosen different paths with great success, without destroying livelihoods.

The right thing is to continue to support a free country under the US constitution, support all health care providers equally and to continue to explore all options for treatment.

I appreciate your time to read this email and look forward to Kitsap County Health Department making strong choices for all people.

Thank you

Mr. Grellner

As a Kitsap resident, I do not want any additional mandates or proof of vaccination to enter a business. Our small businesses especially have suffered enough.

I ask that you not support proof of vaccination.

Thank you,
Nancy Ourada

Please do not impose vaccine mandates. I am an employer in the construction industry in Poulsbo with 26 employees. We can't get enough employees to do the work that needs to be done as it is & if a mandate were imposed many of my current employees would quit.

Cases, hospitalizations, & deaths are trending down, according to the state health department website. A mandate would economically devastate Kitsap county, & according to what the health department is reporting, provide no appreciable improvement in public health.

Even if there were some small marginal improvements in public health by imposing a mandate, this just seems heavy-handed & overreaching. Especially with the tone of the meeting stating that no public comment would be taken. A group of un-elected individuals potentially imposing severe restrictions on the freedom of movement, ability to earn a living, & general civil rights just doesn't sit well with me, nor would it with most of the public.

Comments: Good Monday Morning! This is in regards to the closed meeting tomorrow concerning the "Vaccine Passport" As a person working in the food service industry I would like to inform you we are tired! Adding another "stipulation" for us to check a Vaccine Passport is preposterous and adding to the extra work we already do to prevent the spread. Might I add, NOT going to be very effective.. While doing this short staffed on a daily basis! NO TO "Vaccine Passport" Please!

Subject: Vaccine Mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Kitsap County Public Health,

I am writing this email to respectfully voice my opposition to the possibility of mandating the vaccine for business owners in Kitsap County

I'm an ordinary Dad in Kitsap Country. I'm well-connected in my neighborhood, and I'm asking business owners in my life to tell me what the impact of this policy would be in their lives. I'm a voluntary recipient of the Pfizer vaccine and strongly opposed to vaccine mandates.

I have split my response into:
Principles why a mandate like this is terrible
Practical reasons why a mandate like this is terrible.

Principles why a mandate like this is terrible.

#1. It begins to establish a precedent of America becoming a "biomedical security state" where medicine is not an instrument of healing and health, but an instrument of state power and social control. The logic of a mild policy like a vaccine mandate is the exact same logic that could be used to justify a more extreme policy like the "social credit system" being implemented in China.

#2. Covid-19 is tempting lots of politicians, institutions, and government organizations to overreach their lawful boundaries. Kitsap County Public Health is in danger of overreaching its proper boundaries with a policy like this.

#3. It double penalizes some citizens in Kitsap County for trying to follow their consciences. One of my friends ran a business for many years, slowed down his business to take a job with Washington State, resigned his job because he couldn't in good conscience comply with the vaccine mandate, and is now back to running his business. If you mandate the vaccine for businesses, you are double penalizing my friend, and are going to leave him no choice but to move out of state to conduct business somewhere else, or force him to violate his conscience to get the vaccine to continue earning a living. I'm sure my friend is not the only person in this type of situation, and there are many people in Kitsap County in this situation.

#4. There are lots of intelligent, competent business owners in Kitsap County who don't want to receive the vaccine for religious reasons, personal philosophical reasons, or medical reasons. The attitude behind a policy like this is people are stupid and not qualified to make intelligent decisions based on their unique circumstances, and the state has to make it for them.

#5. The long-term risks of the vaccine are currently unknown. As a voluntary recipient of the vaccine, I feel safe taking the vaccine, but a lot of people don't. Forcing people to take on these risks as a pre-requisite to doing business in Kitsap County is terrible. Imagine if 20 years from now, we discovered that the vaccine is strongly correlated to infertility or a mental illness. Future generations would judge organizations requiring the vaccine as having made foolish, rash decisions out of fear and a desire to control people.

#6. Just because something is a good idea does not mean it should be required. Obesity and heart disease are significant causes of death in American society. I don't see Kitsap County Public health outlawing soda vending machines, sugary snacks, etc. There is so much fear, energy, and concern connected to Covid-19, Americans are not weighing risks fairly and intelligently.

#7. Abortion-on-demand-for-convenience is a great evil going on in Washington State. If Kitsap County Public Health is about promoting and nurturing health in Kitsap County, what are you doing about the health of unborn babies in Kitsap County? I think it's terrible inequity and injustice that Kitsap County is not a safe place for unborn babies, but we're going to go poke business owners and their employees with needles to make the world a safer place.

Practical reasons why a mandate like this is terrible.

#1. Business owners in Kitsap County and Washington are becoming increasingly weary of poor government laws and policies. If you implement a policy like this, a lot of business owners will take their business to another state or country. I don't what this translates to in revenue lost for the state, but it could be a lot.

#2. The cost and practical implementation of a policy like this would be ridiculous. Are you going to hire someone whose full-time job is to drive around Kitsap County and harass business owners about their compliance with a policy they hate?

#3. Trust between Americans and our institutions is at all-time or near-all-time low in history. A terrible policy like this will further damage trust between Americans and our institutions. You can Google "Pew Research Poll Americans Trust Institutions" and see some good studies.

I strongly and respectfully implore you not to implement a vaccine mandate, but to encourage and incentivize people freely and voluntarily receiving the vaccine and respect people who have religious, personal conviction, or medical reasons for not taking the vaccine.

I am always available for coffee or to email if there are opportunities or need to discuss further.

Sincerely,
John Wise

Comments: It has come down to whether the US, or even our county should institute the passport. Having friends and family on both sides of the issue, I have listened to both sides, and all are passionate about their decision. It is no longer about whether the job or the disease is worse. Minds are now made up - and people have done their research. We are past the point of reasoning to sway others, using force would open the floodgates of backlash in many forms, mandates aren't doing the trick, pulling at heart strings only works until you pull up research, cutting off employment and even relationships still isn't convincing people, and frankly, is there anyone left who actually can say they trust their government or media? How long will fear work? After awhile, it is no longer a threat. Add in the flood of immigrants who aren't being screened, etc, and honestly, people have a right to protest that the rules don't apply across the board. If the pressure is taken off whether to get shot or lose jobs, did it ever occur that maybe people would comply because they felt it is their choice? As families are divided on this issue they will more likely choose to gather as a family, in wherever that can be accomplished. They will eat out in establishments that allow their mix, or gather outdoors, where it is open to all - what's the point if only part of the family can go? Besides, it's cheaper to eat at home. Many products and items can be ordered online - gardens can be planted, and how many people now have backyard chickens? No, now it boils down to economy. We saw how many businesses went under when this whole thing began. Think about the continued impact if passports are required to enter businesses. Add that into requiring the shot to work? People are already choosing to lose their jobs over being forced to take something against their will. There will be many many more homeless - particularly in the cities. Where will they go when they no longer are employed, and can't find basic food and housing? Crime will rise even more, as you've already seen, and don't get me started on the reduction of our police force - those who are left are hamstrung for what they can and cannot enforce. So, while you may retain your home, job, and freedoms - you will be surrounded by others who do not have that. Put a face to these people - these are your friends, family and neighbors, for God's sake. These are not impacting "those people", who ever they are. This will impact YOU in ways not even foreseen. I implore you to appeal to our lawmakers, health departments, representatives - stop the mandates. Let the businesses decide their preference, and their fate. If they choose masks and proof, then let them screen their customers. It has always been their prerogative to say "No shirt - no service". So, here we are.

Subject: Vote against mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Dear Mr. Grellner and board members,

I am writing to you today to ask that you vote against any mandates in Kitsap County. I think it's imperative that our citizens remain free to make medical decisions for themselves and their families. Kitsap is very diverse in a lot of ways and medical freedom of choice is another form of diversity that I feel we should respect and honor.

I have members of my family on both sides of the mandate argument. I have many members of my family who have had Covid and recovered at home, even elderly members with underlying health conditions who were told by the media that they would for sure die but didn't. I have family members who lived with symptomatic, positive Covid relatives and never got sick with Covid. I do not think there is a one-size-fits-all approach to this and taking away the personal medical decision making from healthy people is not the answer. We are all masking and distancing and being responsible for ourselves. Those who want to be vaccinated have been and those who don't have exercised their right not to. That should tell you where everyone lies on this issue. You are not God and in my humble opinion, should not be making life and death health decisions for anyone, especially since none of you on that board are willing to take personal responsibility for anyone that suffers vaccine injuries or death because of your mandate.

Mandates will only further harm our workforce, economy and businesses in Kitsap County at a time when it's hard to find good workers. Our public services are already suffering and having a hard time keeping up with their regular workload. There is also so much other unrest going on with state and federal mandates. I do not feel that our Kitsap County families and businesses can take any more right now.

On a personal level, I am a sexual assault victim who has spent years trying to recover from physical violations that I did not consent to. The thought of mandates makes me anxious, sad, scared, claustrophobic and quite frankly, angry. The thought that you would be in favor of forcing something on another human being and into their body against their will is sickening and disheartening to me. You have no right to impose that type of psychological and physical trauma on another human being.

In closing, please decline all mandates on vaccines and vaccine passports in Kitsap County.

Sincerely,

Heidi Pape

Dear Elected officials,

I am a 45 year old resident of Kitsap County and Port Orchard and have lived here most of my years since I graduated high school.

I am very concerned about what is happening here. No American citizen should be forced, harassed, or bullied to take ANY medical procedure they do not want to.

This is the facts and it lines up with our constitutional rights...PERIOD.

I am a Christian woman who believes that every life that the good Lord creates is made for a purpose and should not be murdered for ANY reason. All of these vaccines have cells that are grown from aborted baby cells. I do not care how you try and explain that its not they are in the vaccinations...

Corn is grown from a corn stalk...these human cells are grown from an aborted baby. On top of that I am a healthy woman (not perfect) but healthy and see no reason to get this vaccine. We quit getting the flu vaccination years ago because every time we would take it we would get extremely sick by that same evening. So no thank you. The Lord gave me an immune system and I want to rely on that even if I were to get sick and die I want the freedom to make that choice for myself.

I know that you all have a difficult job, but I am asking you to please take into consideration peoples rights and what the freedom of living in this county means.

Thank you so very much for your time.

I am writing to you today to stand up for our community and do the right thing tomorrow. I am asking that you VOTE NO against ILLEGAL vaccine mandates that will cause detrimental and catastrophic impact on our community. Don't follow the lies. If the "vaccine" was so "lifesaving" then why are we still wearing masks. Why is COVID still around? How is this going to change things? The "shot" has caused this virus to mutate and it is the vaccinated that are causing this virus to continue. It's never going to stop until we let herd immunity run it's course. This is nothing short of MEDICAL APARTHEID!! STOP IT NOW!!

I am writing in opposition to the vaccine passports being enacted in Kitsap County.

This is very discouraging, being that this is NOT based on any science. It is a fact that we have more cases now than this time last year (9/13/20=139, 9/13/21=3527) and we supposedly have almost 70% vaccinated. It's obvious the vaccine is not working the way we were told it was going to, and therefore will not make any difference if you require shots to go into stores.

You're only hurting the business owners, and they've taken a big enough hit from your shut down last year!

I am very disappointed to see so many city and state officials follow this political agenda and blatantly disregard any common sense. You aren't stupid, are you? How are you able to make these decisions with a clear conscience?

A year ago people that predicted vaccine passports were called conspiracy theorists, now it's happening in our own town. I implore you to vote AGAINST vaccine passports in Kitsap County, allow your people to make decisions for themselves, and stop trying to control us with baseless mandates.

Good Evening Eric,

I wanted to write to you tonight and encourage you to be brave and strong with your position on the Kitsap Public Health Board, and to not go along with the plan to order local businesses to require proof of vaccinations for entry. I want you to consider that a lot of people do not want the shot for various religious and medical reasons. Why do they have to be treated like second-class citizens?

I also wanted to remind you that 50% + of the employees at PSNS are unvaccinated. People who do not want to get the shot for one reason or another. There are people willing to walk away from their jobs at PSNS because of their convictions. I personally know of two people who just submitted their resignations. I myself will be forced into an early retirement, because I will not take a shot that the Holy Ghost has prompted me not to take. Even if some or all who cannot just walk away from their great job, and they end up having to get a shot, they are doing it coercively and under extreme pressure. They aren't going to support a County mandate requiring vaccines. Our small businesses need "everyone's" support. Please don't alienate their potential customers. You're only hurting our local businesses!!!

Please, please, if you haven't already done so, please do your own research concerning the shots. Look to the research coming out of Israel, where they have one of the highest vaccination rates. Both vaccinated and unvaccinated can catch and pass the virus on to others. So why is it ok to treat the unvaccinated as if they are the cause of the problem? Please vote no to requiring businesses to check for proof of vaccination. Keep our County strong, by not limiting our local businesses. Respect the rights of "all" to make choices about their health.

Instead of alienating residents, please work to let our doctors treat covid patients early with medications they are using all across the world. Early treatment is the key to keeping people out of the hospitals, and to a speedier recovery.

Thank you for listening,
Linda Popp

Subject: Comments about the vaccine mandate

[CAUTION]: This email originated from outside Kitsap Public Health District. **Do not click links or open attachments** unless you are expecting this email. If you are unsure please contact IT.

Mr. Grellner,

I read the agenda for the upcoming meeting and am writing to submit commentary. I live in Kitsap County and am a taxpayer, a mother, and a concerned citizen. Within my circle of friends and acquaintances, we've agreed that these mandates are overreaching and they haven't answered fundamental questions that many who have not taken the vaccine have. We have often been brushed aside and spoken to and about that we don't care about the other people, people that have been vaccinated or those who are vulnerable for a vaccine that cannot guarantee if you are safe from getting this disease or spreading the disease, and that is simply not true. We have questions that you are not answering, is there is no presentation on the pros and cons of mandating vaccination for small business owners and the community at large (not even public health pros and cons)? The purpose of the meeting is to ask the Health Board to give a recommendation on whether to mandate vaccination. That doesn't make sense to me when you've clearly stated that you're for the mandate. It seems to have already been decided- as stated in the agenda- that vaccination is the "only" way to have businesses and schools stay open and then further decided that after designated individuals present on the crisis of the healthcare system, the Health Board should give a recommendation on whether to recommended mandatory vaccinations or do something else. If the board is open to input and other more open-ended considerations to advance public health, I and many of my counterparts have some questions: 1) Are there things that St. Michaels can do to run a safer, more efficient hospital for its employees and patients outside of the vaccine issue? I know doctors and nurses who work there and other health care facilities, both vaccinated and unvaccinated, and I think the answer to that question is yes. If the problems at St. Michaels are a stated reason for mandating vaccination, their management and administrative decisions should become an ongoing open, transparent discussion and part of the public debate on public health. 2) What is the cost and burden on businesses to mandate vaccination? Will boosters be mandated? How will this be policed? What are your plans to address those that do not comply? Will religious and medical exemptions be allowed and whether yes or no, will businesses be opened up to possible liability in administering a vaccine mandate? 3) Is there a public health benefit in having more widely available antibody testing? If a person has antibodies from having had Covid, what is the increased protection for that person (and for the public from that person) in receiving the vaccine? 4) Are there any legitimate concerns that individuals have in getting the vaccine and/or having it mandated vs optional? If so, what are they and how should that be weighed? 5) What are the potential costs to the public of mandatory vaccination? Will people still refuse and avoid necessary services? For instance, DV victims or people that need other legal services? I suppose some may say- well, it's their choice, it doesn't matter. But that would be an emotional response, not one in the interest of public health. These are only a few of our concerns, we have many more questions that are still not being answered and we would like some answers before you make any decisions on what you "make" someone do with their own body.

I appreciate your time in looking these concerns over,
Damaris Tate

Good morning Tasha,

Thank you for taking the time to email me your input regarding vaccinations. I appreciate it very much and consider all feedback carefully as part of the decision making process as a member of the Kitsap Public Health District Board of Directors. I am also including Navy and Bremerton Police Department leadership in my reply for their information regarding the other issues you are reporting. Thank you again for reaching out to me with your thoughts and concerns. Take care and I hope you have a great week.

Sincerely,

Greg Wheeler

Hi,

My name is Tasha Ohnemus. I am a ten year internet trafficking survivor of Mason county now residing in Kitsap, and I did not come to play.

Now, at the beginning of all of this, I was actually concerned. I emailed you out of concern for the drive in reopening too soon.

And then I saw the inconsistencies. I was told my sister in laws boss was the first case for our county. He admitted it. He is military, so I was convinced y'all kept it quiet for opsec purposes. Except you allowed his family to not quarantine. You allowed them to travel our entire state. You allowed his wife to continue to work as a pharmacist on Bainbridge Island. I on the other hand, called your health department to complain. I called the pharmacy and asked wtf is going on. This county did nothing to stop the spread. At all. Our own hospital could not detect where the spread was coming from and I have that in a screenshot from Scott Peckenpough, ER doctor.

And now, knowing what we all do, that the vaxxed can spread it just as easily as the unvaxxed (not to mention the bombshells from Project Veritas, who is also investigating Central Kitsap school district 😊) you are still going to go forward segregating your community, and destroying what's left of small businesses, with the vax passports? Did you already sell out to the eastside?

You allowed this bs narrative to ignore the town trafficking survivor who threw her first rally only to be completely ignored by our local paper and then berated for being a conspiracy theorist..bravo!

Did I mention my name was also KatieWaitie from TNABOARD? That I was an escort to Microsoft in Bellevue? To the ceos and the tech world there? Did I mention when I was sold online prior as a child, it was on a live web camera with other pedos in our state?

Look, I know exactly what is going on here. What do they have on you? Why can't you help your community? Why didn't Rick Allen Jones have to register as a sex offender? The last one is rhetorical, because we both know the answer. I'm just curious where your darkness lies and if you will find the light to be a decent person to lead our community. Clock is ticking. And please don't respond with some generic email. We've all seen the crap response you've sent all weekend long. 😊

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

To Whom it May Concern: Keith Grellner, RS Administrator

I am very adamant that “no action” should be taken with regard to vaccines for employees of private and/or state/federal agencies with employees. I am also very much against “proof of vaccination” in order to enter a private business or state/federal agency. Those who have had the COVID 19 already have immunity that has been proven to be as effective as a vaccinated individual. The medical choice to be vaccinated should be left up to each individual and their health care professional. The government has no right to interfere as this vaccine is still considered experimental and as such there is no written informed consent provided to those individuals. These experimental vaccines are by definition a violation of (1) the 1947 Nuremberg Code, (2) The International Covenant on Civil and Political Rights (ICCPR Treaty, and (3) The American Medical Association (AMA) Code of Ethics.

To restrict private businesses from serving the public which may hamper their ability to stay in business, provide income for their employees and support the economy would be a travesty. It goes against our nation’s founding principles to not allow them to engage in business with whomever THEY choose to serve and not be hindered by more government regulations.

Respectfully,
René Jordan

Subject: Mandates

[CAUTION]: This email originated from outside Kitsap Public Health District. Do not click links or open attachments unless you are expecting this email. If you are unsure please contact IT.

Hello Mr. Grellner,

I will keep this short as I know you will be getting lots of letters. It has been brought to my attention that Kitsap county will be discussing vaccine mandates tomorrow.

Please consider that there are special cases out there. My husband was recently let go of his job because of this vaccine. He already had COVID and has proved with his blood work that he has natural antibodies. He has a family history of heart disease and together with his physician came to the conclusion that to get the vaccine would be more risk than benefit for him at this time. But because heart disease is not on the approved list for exemptions he was not granted a medical exemption. Please consider natural immunity in your discussion tomorrow. The point, as I understand it, of a vaccine is to develop those very same immunities that people who have already had the disease naturally have. However a mandate to get the vaccine would force people who have already lived through COVID to then take on more risk to themselves of possible side effects. My husband has already lost his job, please don't make it near impossible to find another one. A one size fits all solution simply will not work.

Thank you,
Angela
