

Kitsap County Emergency Medical Services (EMS) Opioid Overdose Quarterly Surveillance Report

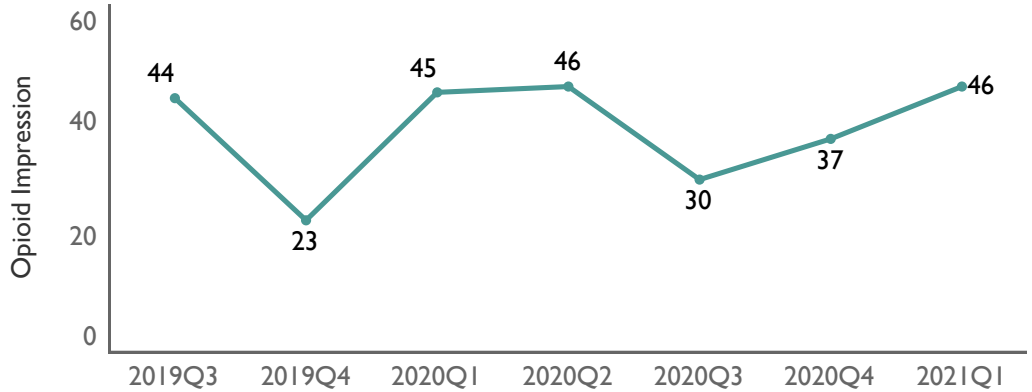

Source: County Emergency Medical Services (EMS) Opioid Monthly Surveillance Report. Washington State Department of Health.

Key Limitations

"Improved Naloxone Response" and "Opioid Impression" contain common responses and should not be added together to obtain a total count. "Possible Overdose" reflects the unduplicated combination of these fields.

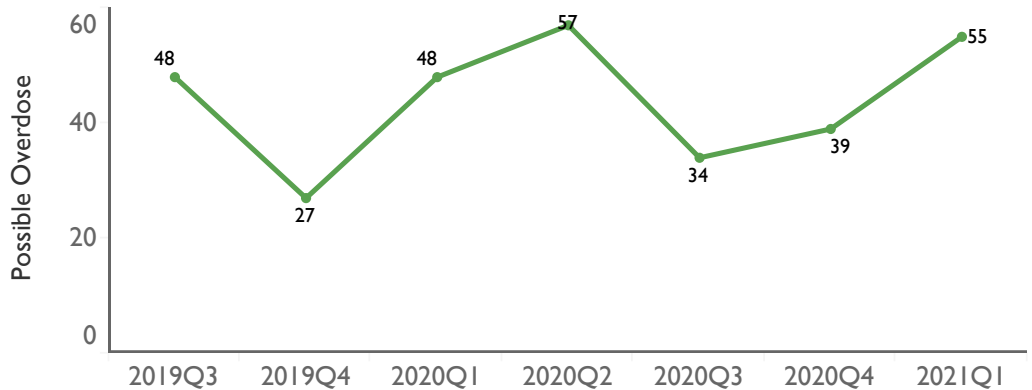

Seven out of eight Emergency Medical Services in Kitsap County report into WEMIS, with 81-100% of total EMS Responses Reported. This is estimated from the WA DOH Integrated Licensing and Regulatory System (ILRS).

Opioid Impression: Opioid was indicated by the EMS provider using any of the following ICD10 codes for the primary impression, secondary impression or cause of injury: F11, T40.0-T40.4 & T40.6

Possible Overdose: Either improved naloxone response or opioid impression present in a single patient record.

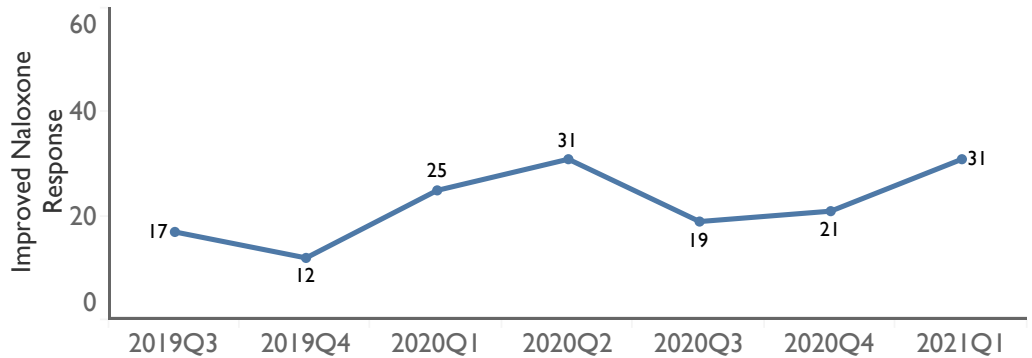

Data indicates a **15% increase** in possible overdoses when comparing Q1 2021 to Q1 2020.

Improved Naloxone Response

Response: Naloxone administered to patient and resulted in an improved patient response

Data indicated A **24% increase** in the number of improved Naloxone responses when comparing Q1 2021 to Q1 2020.

This report was produced by Kitsap Public Health District, Epidemiology and Assessment, released 4/15/2021. Information is subject to change as a result of updated or additional records being added to the reporting system.
