

February 1, 2019

Dear Families:

Kitsap Public Health District is aware that there are upcoming athletic events scheduled in Clark County and that some Kitsap County school teams may be attending.

The Health District has the following recommendations:

- Vaccination is the best protection against measles. The measles vaccine (MMR) is safe and effective. Vaccinated individuals have immunity against measles.
- Individuals who are not vaccinated, are partially vaccinated, or have questions about their immunity should contact their healthcare provider to discuss travel to Clark County.
- For more information about what is going on in Clark County, including measles exposure sites, visit: <https://www.clark.wa.gov/public-health/measles-investigation>

For more measles information, please visit our website at www.kitsappublichealth.org.

Sincerely,

Susan Turner MD, MPH, MS | Health Officer
