

Kitsap Respiratory Illness Report

Week 4 (1/22/2023 - 1/28/2023)

Summary: Local influenza activity is currently **low**, with 2 positive influenza tests in the past week (1,671 cumulative (20.6% of total tested) since 10/2/2022). RSV activity is currently **elevated**, with 5 positive RSV tests in the past week (476 since the start of the season). In the past week 0.7% of emergency department (ED) visits were related to influenza-like illness (ILI). In the 2022-2023 flu season, there have been 6 influenza-related deaths and 5 outbreaks in long-term care facilities.

NOTE: Weeks 40 and 41 of the 2022-23 flu season are suppressed for two of the figures due to a temporary disruption in data reporting.
